List of Contributors, vii

History of the British Ecological Society, xi

Preface, xiii

Part 1: Populations

- 1 Plants stand still, but their genes don't: non-trivial consequences of the obvious, 3
J. Silvertown
- 2 Causes and effects of small-scale spatial structure in plant populations, 21
R. Law, D. W. Purves, D. J. Murrell and U. Dieckmann
- 3 Inferences about spatial processes in plant populations from the analysis of molecular markers, 45
R. A. Ennos
- 4 Mating systems and population genetic structure in the light of coalescent theory, 73
D. Charlesworth and J. R. Pannell
- 5 Spatially explicit studies on the ecology and genetics of population margins, 97
J. Antonovics, T. J. Newman and B. J. Best
- 6 The scale of local adaptation in forest plants, 117
G. Bell, M. J. Lechowicz and M. Waterway

Part 2: Metapopulations

- 7 Spatially realistic models of metapopulation dynamics and their implications for ecological, genetic and evolutionary processes, 139
I. Hanski
- 8 Landscape fragmentation and the viability of plant populations, 157
O. Eriksson and J. Ehrlén
- 9 The interaction of genetic and demographic processes in plant metapopulations: A case study of *Silene alba*, 177
D. E. McCauley, C. M. Richards, S. N. Emery, R. A. Smith and J. W. McGlothlin

CONTENTS

- 10 *The demography and genetics of host–pathogen interactions*, 197
J. J. Burdon and P. H. Thrall
- 11 *Spatial dynamics of cytoplasmic male sterility*, 219
S. A. Frank and C. M. Barr
- 12 *The evolution of seed heteromorphism in a metapopulation: interactions between dispersal and dormancy*, 245
I. Olivieri

Part 3: Geography

- 13 *Inferring glacial refugia and historical migrations with molecular phylogenies*, 271
G. M. Hewitt and K. M. Ibrahim
- 14 *From spatial patterns of genetic diversity to postglacial migration processes in forest trees*, 295
R. J. Petit, R. Bialozyt, S. Brewer, R. Cheddadi and B. Comps
- 15 *Comparative phylogeography of northwestern North America: A synthesis*, 319
S. J. Brunnsfeld, J. Sullivan, D. E. Soltis and P. S. Soltis
- 16 *A geographical context for the evolution of plant reproductive systems*, 341
S. C. H. Barrett, M. E. Dorken and A. L. Case
- 17 *Adaptation at the edge of a species' range*, 365
N. H. Barton
- 18 *The unified neutral theory of biodiversity and biogeography: a synopsis of the theory and some challenges ahead*, 393
S. P. Hubbell

Index, 413
