

# WCDMA FOR UMTS

Radio Access For Third Generation  
Mobile Communications

Revised Edition

**REVISED  
AND  
UPDATED**  
Spring 2001

Edited by Harri Holma  
and Antti Toskala

# Contents

<b>Preface</b>	<b>xiii</b>
<b>Acknowledgements</b>	<b>xv</b>
<b>Abbreviations</b>	<b>xvii</b>
<b>1 Introduction</b>	<b>1</b>
<i>Harri Holma, Antti Toskala and Ukko Lappalainen</i>	
1.1 WCDMA in Third Generation Systems	1
1.2 Air Interfaces and Spectrum Allocations for Third Generation Systems	2
1.3 Schedule for Third Generation Systems	4
1.4 Differences between WCDMA and Second Generation Air Interfaces	5
1.5 Core Networks	7
References	8
<b>2 UMTS Services and Applications</b>	<b>9</b>
<i>Jouni Salonen and Antti Toskala</i>	
2.1 Introduction	9
2.2 UMTS Bearer Service	10
2.3 UMTS QoS Classes	11
2.3.1 <i>Conversational Class</i>	12
2.3.2 <i>Streaming Class</i>	18
2.3.3 <i>Interactive Class</i>	20
2.3.4 <i>Background Class</i>	21
2.4 Service Capabilities with Different Terminal Classes	22
2.5 Concluding Remarks	23
References	23

<b>3 Introduction to WCDMA</b>	<b>25</b>
<i>Peter Muszynski and Harri Holma</i>	
3.1 Introduction	25
3.2 Summary of Main Parameters in WCDMA	25
3.3 Spreading and Despreading	27
3.4 Multipath Radio Channels and Rake Reception	30
3.5 Power Control	33
3.6 Softer and Soft Handovers	36
References	38

<b>4 Background and Standardisation of WCDMA</b>	<b>39</b>
--	-----------

<i>Antti Toskala</i>	
4.1 Introduction	39
4.2 Background in Europe	39
4.2.1 Wideband CDMA	40
4.2.2 Wideband TDMA	41
4.2.3 Wideband TDMA/CDMA	41
4.2.4 OFDMA	42
4.2.5 ODMA	42
4.2.6 ETSI Selection	42
4.3 Background in Japan	43
4.4 Background in Korea	44
4.5 Background in the United States	44
4.5.1 W-CDMA N/A	44
4.5.2 UWC-136	44
4.5.3 cdma2000	45
4.5.4 TR46.1	45
4.5.5 WP-CDMA	45
4.6 Creation of 3GPP	45
4.7 Creation of 3GPP2	47
4.8 Harmonisation Phase	47
4.9 IMT2000 Process in ITU	47
4.10 Beyond 3GPP Release-99	48
References	50

<b>5 Radio Access Network Architecture</b>	<b>51</b>
--	-----------

<i>Fabio Longoni and Atte Lämsisalmi</i>	
5.1 System Architecture	51
5.2 UTRAN Architecture	54
5.2.1 The Radio Network Controller	55
5.2.2 The Node B (Base Station)	56

5.3	General Protocol Model for UTRAN Terrestrial Interfaces	56
5.3.1	<i>General</i>	56
5.3.2	<i>Horizontal Layers</i>	56
5.3.3	<i>Vertical Planes</i>	56
5.4	Iu, the UTRAN–CN Interface	58
5.4.1	<i>Protocol Structure for Iu CS</i>	58
5.4.2	<i>Protocol Structure for Iu PS</i>	59
5.4.3	<i>RANAP Protocol</i>	60
5.4.4	<i>Iu User Plane Protocol</i>	62
5.5	UTRAN Internal Interfaces	62
5.5.1	<i>RNC–RNC Interface (Iur Interface) and the RNSAP Signalling</i>	62
5.5.2	<i>RNC–Node B Interface and the NBAP Signalling</i>	65
	References	67

## **6 Physical Layer** **69**

*Antti Toskala*

6.1	Introduction	69
6.2	Transport Channels and their Mapping to the Physical Channels	70
6.2.1	<i>Dedicated Transport Channel</i>	71
6.2.2	<i>Common Transport Channels</i>	71
6.2.3	<i>Mapping of Transport Channels onto the Physical Channels</i>	73
6.2.4	<i>Frame Structure of Transport Channels</i>	74
6.3	Spreading and Modulation	74
6.3.1	<i>Scrambling</i>	74
6.3.2	<i>Channelisation Codes</i>	75
6.3.3	<i>Uplink Spreading and Modulation</i>	75
6.3.4	<i>Downlink Spreading and Modulation</i>	80
6.3.5	<i>Transmitter Characteristics</i>	83
6.4	User Data Transmission	84
6.4.1	<i>Uplink Dedicated Channel</i>	84
6.4.2	<i>Uplink Multiplexing</i>	86
6.4.3	<i>User Data Transmission with the Random Access Channel</i>	89
6.4.4	<i>Uplink Common Packet Channel</i>	89
6.4.5	<i>Downlink Dedicated Channel</i>	90
6.4.6	<i>Downlink Multiplexing</i>	92
6.4.7	<i>Downlink Shared Channel</i>	93
6.4.8	<i>Forward Access Channel for User Data Transmission</i>	95
6.4.9	<i>Channel Coding for User Data</i>	95
6.4.10	<i>Coding for TFCI information</i>	97
6.5	Signalling	97
6.5.1	<i>Common Pilot Channel (CPICH)</i>	97
6.5.2	<i>Synchronisation Channel (SCH)</i>	98
6.5.3	<i>Primary Common Control Physical Channel (Primary CCPCH)</i>	98
6.5.4	<i>Secondary Common Control Physical Channel (Secondary CCPCH)</i>	99

6.5.5	<i>Random Access Channel (RACH) for Signalling Transmission</i>	100
6.5.6	<i>Acquisition Indicator Channel (AICH)</i>	101
6.5.7	<i>Paging Indicator Channel (PICH)</i>	101
6.5.8	<i>Physical Channels for CPCH Access Procedure</i>	102
6.6	<b>Physical Layer Procedures</b>	103
6.6.1	<i>Fast Closed Loop Power Control Procedure</i>	103
6.6.2	<i>Open Loop Power Control</i>	103
6.6.3	<i>Paging Procedure</i>	104
6.6.4	<i>RACH Procedure</i>	105
6.6.5	<i>CPCH Operation</i>	106
6.6.6	<i>Cell Search Procedure</i>	106
6.6.7	<i>Transmit Diversity Procedure</i>	108
6.6.8	<i>Handover Measurements Procedure</i>	108
6.6.9	<i>Compressed Mode Measurement Procedure</i>	110
6.6.10	<i>Other Measurements</i>	112
6.6.11	<i>Operation with Adaptive Antennas</i>	113
6.7	<b>Terminal radio access capabilities</b>	113
	<b>References</b>	116

## **7 Radio Interface Protocols** **117**

*Jukka Vialén*

7.1	<b>Introduction</b>	117
7.2	<b>Protocol Architecture</b>	117
7.3	<b>The Medium Access Control Protocol</b>	119
7.3.1	<i>MAC Layer Architecture</i>	119
7.3.2	<i>MAC Functions</i>	119
7.3.3	<i>Logical Channels</i>	121
7.3.4	<i>Mapping Between Logical Channels And Transport Channels</i>	121
7.3.5	<i>Example Data Flow Through The MAC Layer</i>	122
7.4	<b>The Radio Link Control Protocol</b>	123
7.4.1	<i>RLC Layer Architecture</i>	123
7.4.2	<i>RLC Functions</i>	125
7.4.3	<i>Example Data Flow Through The RLC Layer</i>	126
7.5	<b>The Packet Data Convergence Protocol</b>	127
7.5.1	<i>PDCP Layer Architecture</i>	128
7.5.2	<i>PDCP Functions</i>	128
7.6	<b>The Broadcast/Multicast Control Protocol</b>	129
7.6.1	<i>BMC Layer Architecture</i>	129
7.6.2	<i>BMC Functions</i>	129
7.7	<b>The Radio Resource Control Protocol</b>	130
7.7.1	<i>RRC Layer Logical Architecture</i>	130
7.7.2	<i>RRC Service States</i>	131
7.7.3	<i>RRC Functions And Signalling Procedures</i>	133
	<b>References</b>	147

*Harri Holma, Zhi-Chun Honkasalo, Seppo Hämäläinen, Jaana Laiho, Kari Sipilä and Achim Wacker*

8.1	Introduction	149
8.2	Dimensioning	149
8.2.1	<i>Radio Link Budgets and Coverage Efficiency</i>	150
8.2.2	<i>Load Factors and Spectral Efficiency</i>	154
8.2.3	<i>Example Load Factor Calculation</i>	159
8.2.4	<i>Capacity Upgrade Paths</i>	162
8.2.5	<i>Capacity per km<sup>2</sup></i>	163
8.2.6	<i>Soft Capacity</i>	165
8.3	Capacity and Coverage Planning	167
8.3.1	<i>Iterative Capacity and Coverage Prediction</i>	167
8.3.2	<i>Planning Tool</i>	168
8.3.3	<i>Case Study</i>	170
8.3.4	<i>Network Optimisation</i>	174
8.4	GSM Co-planning	175
8.5	Multi-operator Interference	176
8.5.1	<i>Introduction</i>	176
8.5.2	<i>Worst-Case Uplink Calculations</i>	177
8.5.3	<i>Downlink Blocking</i>	178
8.5.4	<i>Uplink Simulations</i>	179
8.5.5	<i>Simulation Results</i>	180
8.5.6	<i>Network Planning with Adjacent Channel Interference</i>	181
References		182

**9 Radio Resource Management****183**

*Janne Laakso, Harri Holma and Oscar Salonaho*

9.1	Interference-Based Radio Resource Management	183
9.2	Power Control	184
9.2.1	<i>Fast Power Control</i>	184
9.2.2	<i>Outer Loop Power Control</i>	191
9.3	Handovers	197
9.3.1	<i>Intra-frequency Handovers</i>	197
9.3.2	<i>Inter-system Handovers Between WCDMA and GSM</i>	204
9.3.3	<i>Inter-frequency Handovers within WCDMA</i>	206
9.3.4	<i>Summary of Handovers</i>	206
9.4	Measurement of Air Interface Load	207
9.4.1	<i>Uplink Load</i>	207
9.4.1	<i>Downlink Load</i>	210
9.5	Admission Control	211
9.5.1	<i>Admission Control Principle</i>	211
9.5.2	<i>Wideband Power-Based Admission Control Strategy</i>	211
9.5.3	<i>Throughput-Based Admission Control Strategy</i>	213

9.6	Load Control (Congestion Control)	213
	References	214

## 10 Packet Access 217

*Mika Raitola and Harri Holma*

10.1	Packet Data Traffic	217
10.2	Overview of WCDMA Packet Access	218
10.3	Transport Channels for Packet Data	219
	10.3.1 Common Channels	219
	10.3.2 Dedicated Channels	220
	10.3.3 Shared Channels	220
	10.3.4 Common Packet Channel	220
	10.3.5 Selection of Channel Type	221
10.4	Example Packet Scheduling Algorithms	221
	10.4.1 Introduction	221
	10.4.2 Time Division Scheduling	222
	10.4.3 Code Division Scheduling	223
	10.4.4 Transmission Power-Based Scheduling	224
10.5	Interaction between Packet Scheduler and Other RRM Algorithms	225
	10.5.1 Packet Scheduler and Handover Control	225
	10.5.2 Packet Scheduler and Load Control (Congestion Control)	225
	10.5.3 Packet Scheduler and Admission Control	225
10.6	Packet Data Performance	226
	10.6.1 Link-Level Performance	226
	10.6.2 System-Level Performance	228
	References	236

## 11 Physical Layer Performance 237

*Harri Holma, Markku Juntti and Juha Ylitalo*

11.1	Introduction	237
11.2	Coverage	237
	11.2.1 Uplink Coverage	238
	11.2.2 Random Access Channel Coverage	247
	11.2.3 Downlink Coverage	248
	11.2.4 Coverage Improvements	249
11.3	Capacity	250
	11.3.1 Downlink Orthogonal Codes	250
	11.3.2 Downlink Transmit Diversity	255
	11.3.3 Capacity Improvements	257
11.4	High Bit Rates	258
	11.4.1 Inter-path Interference	259
	11.4.2 Multipath Diversity Gain	261
	11.4.3 Feasibility of High Bit Rates	262

11.5	Performance Enhancements	263
11.5.1	<i>Antenna Solutions</i>	264
11.5.2	<i>Multi-user Detection</i>	268
	References	272

## **12 UTRA TDD Mode** **277**

*Otto Lehtinen, Antti Toskala, Harri Holma and Heli Väätäjä*

12.1	Introduction	277
12.1.1	<i>Time Division Duplex (TDD)</i>	277
12.2	UTRA TDD Physical Layer	279
12.2.1	<i>Transport and Physical Channels</i>	279
12.2.2	<i>Modulation and Spreading</i>	280
12.2.3	<i>Physical Channel Structures, Slot and Frame Format</i>	281
12.2.4	<i>UTRA TDD Physical Layer Procedures</i>	285
12.3	UTRA TDD Interference Evaluation	289
12.3.1	<i>TDD–TDD Interference</i>	290
12.3.2	<i>TDD and FDD Co-existence</i>	291
12.3.3	<i>Unlicensed TDD Operation</i>	294
12.3.4	<i>Conclusions on UTRA TDD Interference</i>	294
12.4	Concluding Remarks on UTRA TDD	294
	References	295

## **13 Multi-Carrier CDMA in IMT-2000** **297**

*Antti Toskala*

13.1	Introduction	297
13.2	Logical Channels	298
13.2.1	<i>Physical Channels</i>	299
13.3	Multi-Carrier Mode Spreading and Modulation	299
13.3.1	<i>Uplink Spreading and Modulation</i>	299
13.3.2	<i>Downlink Spreading and Modulation</i>	300
13.4	User Data Transmission	301
13.4.1	<i>Uplink Data Transmission</i>	301
13.4.2	<i>Downlink Data Transmission</i>	303
13.4.3	<i>Channel Coding for User Data</i>	304
13.5	Signalling	304
13.5.1	<i>Pilot Channel</i>	304
13.5.2	<i>Synch Channel</i>	305
13.5.3	<i>Broadcast Channel</i>	305
13.5.4	<i>Quick Paging Channel</i>	305
13.5.5	<i>Common Power Control Channel</i>	305
13.5.6	<i>Common and Dedicated Control Channels</i>	305
13.5.7	<i>Random Access Channel (RACH) for Signalling Transmission</i>	306

<b>13.6</b>	<b>Physical Layer Procedures</b>	<b>306</b>
<b>13.6.1</b>	<i>Power Control Procedure</i>	<b>306</b>
<b>13.6.2</b>	<i>Cell Search Procedure</i>	<b>306</b>
<b>13.6.3</b>	<i>Random Access Procedure</i>	<b>307</b>
<b>13.6.4</b>	<i>Handover Measurements Procedure</i>	<b>308</b>
<b>References</b>		<b>308</b>
<b>Index</b>		<b>309</b>
