

ASTRONOMY

JOURNEY TO THE COSMIC FRONTIER

JOHN D. FIX

THIRD EDITION

Contents

Foreword, xv
Preface, xvii
Guided Tour, xxii

Part 1 The Journey Begins

chapter 1

Journey's Start, 3

Evening, 4
The Moving Sky, 4
The Terrestrial Coordinate System, 5
The Celestial Sphere, 7
Angles, 8
The Horizon System, 9
2 A.M., 11

chapter 2

Patterns in the Sky, 17

The Daily Motion of the Sky, 18
The Apparent Motion of the Sun, 21
 The Seasons, 23
 Time, 26
The Phases of the Moon, 28
The Motion of the Moon, 30
The Motions of the Planets, 31

chapter 3

Ancient Astronomy, 37

Mesopotamian Astronomy, 38
Egyptian Astronomy, 40
Early Greek Astronomy, 40
 The Astronomers of Miletus, 40
 Pythagoras and His Students, 42
 Eudoxus, 42
 Aristotle, 43

Later Greek Astronomy, 45

Aristarchus, 45
Eratosthenes, 48
Hipparchus, 49
Ptolemy, 50

Chinese and Mesoamerican Astronomy, 52

Chinese Astronomy, 52
Mesoamerican Astronomy, 53

chapter 4

Renaissance Astronomy, 57

Astronomy After Ptolemy, 58
 Islamic Astronomy, 58
The Rebirth of Astronomy in Europe, 58
Copernicus, 60
 The Heliocentric Model, 61
Tycho Brahe—The Great Observer, 65
Kepler and Planetary Orbits, 68
 Kepler's First Law, 68
 Kepler's Second Law, 68
 Kepler's Third Law, 70
Galileo and the Telescope, 70
 The Observations, 71
 The *Dialogue*, 71

chapter 5

Gravity and Motion, 79

Force and Motion Before Newton, 80
 Galileo's Experiments, 80
 Descartes and Inertial Motion, 80
Planetary Motion Before Newton, 82
 Kepler's Explanation, 82
 Robert Hooke, 82
Isaac Newton, 83
 The Laws of Motion, 83
 Gravity, 85
 Newton's Analysis, 86

- The Apple and the Moon, 87
- The Law of Gravitation, 87
- Elliptical Orbits, 88
- Force at a Distance, 91
- Orbital Energy and Speed, 91
- Orbital Speed, 91
- Escape Velocity, 92
- The Four Kinds of Trajectories, 93
- Tides, 93
 - Differences in Gravity, 94
 - Solid Earth Tides, 95
 - Ocean Tides, 95

chapter 6

Light and Telescopes, 101

- Waves, 102
- Electromagnetic Waves, 102
 - The Spectrum, 103
 - The Doppler Effect, 104
 - Photons, 105
- Reflection and Refraction, 107
 - Reflection, 107
 - Refraction, 108
 - Dispersion, 108
- Optical Telescopes, 109
 - Refractors, 109
 - Reflectors, 110
 - Forming an Image, 111
 - Detectors, 112
 - Notable Optical Telescopes, 115
- Optical Observatories, 117
 - Modern Observatories, 119
- Space Observatories, 120
 - Optical Observations, 121
 - Infrared and Ultraviolet Observations, 121
 - X-Ray and Gamma-Ray Observations, 122
- Radio Telescopes, 123
 - Radio Interferometry, 123

Part 2 Journey Through the Solar System

chapter 7

Overview of the Solar System, 131

- Solar System Inventory, 132
 - The Abundance of the Elements, 132
- Gases, 133
 - Atoms in Motion, 133
 - Density and Pressure, 135
- Radiation and Matter, 137
 - Blackbody Radiation, 137
 - Thermal Equilibrium, 140
 - Temperatures in the Solar System, 140
- Nuclear Reactions and Radioactivity, 142
 - Nuclei and Nuclear Particles, 142

- Nuclear Reactions, 142
- Radioactivity, 144
- Internal Heat in Planets, 145
 - Radioactive Heating, 145
 - Accretional Heating, 145
 - Flow of Heat, 146
- Planetology, 147

chapter 8

The Earth, 153

- Rotation and Revolution, 154
 - Aberration, 154
 - The Foucault Pendulum, 155
 - "Centrifugal Force," 155
 - Coriolis Effect, 156
- Surface, 157
 - The Age of the Earth and Its Rocks, 158
 - Minerals and Rocks, 159
 - Oceans and Continents, 160

Interior, 160

- Probing the Interior, 160
- Internal Structure, 163
- Plate Tectonics, 164
- Atmosphere, 168
 - Composition, 168
 - Thermal Structure, 168
 - Human Changes, 170
- Magnetosphere, 171
 - Van Allen Belts, 172
 - Structure of Magnetosphere, 172
- Evolution of the Earth, 173
 - Development of the Core, 173
 - Oceans, 174
 - Atmosphere, 174

chapter 9

The Moon, 181

- Revolution and Rotation, 182
 - The Month, 182
 - Synchronous Rotation, 182
 - The Orbit and Size of the Moon, 183
- Eclipses, 184
 - Eclipses as Omens, 186

Eclipses and Shadows, 186

Predicting Eclipses, 189

Tides, 191

Tides and the Earth's Rotation, 191

Tides and the Moon's Orbit, 192

The Moon's Surface, 193

Observations from the Earth, 193

Exploration of the Moon, 193

Lunar Craters, 194

Volcanic Features, 196

Lunar Samples, 196

Chemical Composition, 196

Ages of Lunar Samples, 197

Ages and Cratering, 197

The Moon's Atmosphere, 198

Density, 198

Gain and Loss of Gases, 199

The Moon's Interior, 199

Mass, 199

The Density of the Moon, 199

Lunar Seismology and Internal Structure, 200

The Origin of the Moon, 200

Fission, Accretion, Capture, 200

The Giant Impact Theory, 201

The *Viking* and *Pathfinder* Landers, 248

The *Viking* Landers, 248

Pathfinder, 249

The Atmosphere of Mars, 251

The Interior and Evolution of Mars, 254

Water on Mars, 256

Life on Mars, 258

The Evolution of the Terrestrial Planets, 259

chapter 12

Jupiter and Saturn, 265

Jupiter and Saturn, 267

Basic Properties, 267

Atmospheres, 270

Interiors, 277

The Internal Energy of Jupiter and Saturn, 278

Magnetospheres, 279

Rings, 279

chapter 13

The Outer Planets, 291

Discoveries, 292

Uranus, 292

Neptune, 292

Pluto, 293

Uranus and Neptune, 294

Basic Properties, 294

Atmospheres, 295

Internal Structure, 297

Magnetic Fields and Magnetospheres, 299

Rings, 300

Pluto, 304

Basic Properties, 304

Charon, 305

Surface and Atmosphere, 306

The History of Pluto, 306

The View from Pluto, 307

Planet X, 308

Searches, 308

Gravitational Detection, 308

chapter 14

Satellites, 313

Kinds of Satellites, 314

chapter 10

Mercury and Venus, 207

Mercury, 208

Mercury's Orbit, 208

Surface, 210

Mercury's Interior, 213

Venus, 215

Rotation and Revolution, 216

Venus's Hostile Atmosphere, 216

Surface, 219

Interior, 226

Evolution of Venus, 226

chapter 11

Mars, 233

The Exploration of Mars, 235

The Surface of Mars, 236

The Polar Regions, 246

- Regular Satellites, 314
- Collision Fragments, 314
- Captured Asteroids, 314
- Other Satellites, 314
- General Properties of Satellites, 314
 - Density and Composition, 314
 - Internal Activity, 315
- The Satellites of Mars, 316
- The Galilean Satellites, 318
 - Io, 319
 - Europa, 321
 - Ganymede, 323
 - Callisto, 324
- The Icy Moons of Saturn, 325
 - Rhea and Mimas, 326
 - Dione and Tethys, 327
 - Iapetus, 328
 - Enceladus, 328
- Titan, 329
 - Origin of Titan's Atmosphere, 329
 - Atmospheric Structure, 330
 - At the Surface of Titan, 330
- Satellites of Uranus, 331
 - Oberon, Titania, Umbriel, and Ariel, 331
 - Miranda, 332
- Satellites of Neptune, 334
 - Triton, 334

chapter 15

Solar System Debris, 341

- Meteors, 342
 - The Meteor Phenomenon, 342
 - Sizes of Meteoroids, 343
 - Meteor Showers, 343
 - Micrometeorites, 344
- Meteorites, 345
 - How Often Do They Fall?, 346
 - Kinds of Meteorites, 346
 - Ages of Meteorites, 348
 - Parent Bodies of Meteorites, 348
- Asteroids, 349
 - Discovery of Asteroids, 349
 - Orbits of Asteroids, 350
 - Classes of Asteroids, 353
 - Asteroids and Meteorites, 354

- Comets, 354
 - Anatomy of a Comet, 355
 - Comet Orbits, 357
 - What Happens to Comets?, 360
 - Where Did Comets Form?, 362
 - Collisions with Earth, 363
 - How Often Do Collisions Occur?, 363
 - Record of Impacts, 363
 - Consequences of the Impact, 363
 - Has This Ever Happened?, 364

Part 3 Journey to the Stars

chapter 16

Basic Properties of Stars, 371

- Star Names, 372
- The Distances of Stars, 372
 - Pretelescopic Estimates, 372
 - Later Estimates, 372
 - Parallax, 372
- The Motions of the Stars, 374
 - Proper Motions, 374
 - The Motion of the Sun, 374
- The Brightnesses of Stars, 375
 - Stellar Magnitudes, 375
 - Absolute Magnitude, 377
 - Luminosity Functions, 378
- Stellar Spectra, 378
 - Atoms and Spectral Lines, 379
 - Spectral Classification, 382
 - The Role of Temperature, 382
 - Luminosity Class, 384
 - Chemical Abundances, 384
 - The Doppler Effect and Stellar Spectra, 385
- H-R Diagrams, 386
- Stellar Masses, 388
 - Masses of Binary Stars, 388
 - The Range of Stellar Masses, 388
 - The Mass-Luminosity Relation, 389

chapter 17

The Sun, 395

- The Internal Structure of the Sun, 396
- The Sun's Energy, 397
 - Some Wrong Answers, 397
 - Nuclear Reactions, 397
 - Flow of Energy to the Surface, 399
- The Outer Layers of the Sun, 402
 - The Photosphere, 403
 - The Chromosphere, 408
 - The Corona, 409
 - The Solar Wind, 412

- The Sunspot Cycle, 414
 - A Model of the Sunspot Cycle, 415
- Solar Mysteries, 417

chapter 18

The Formation of Stars and Planets, 421

- Some Important Clues, 422
 - Clues from Stars, 422
 - Clues from the Solar System, 422
- Star Formation, 422
 - Giant Molecular Clouds, 422
 - Cores and Star Formation, 423
- Protostars, 425
 - The Evolution of a Protostar, 425
 - Rotation and Disks, 426
- Young Stars, 427
 - H-R Diagrams for Young Stars, 427
 - Winds and Disks, 428
- Planetary Systems, 431
 - The Solar Nebula, 431

chapter 19

The Evolution of Stars, 439

- Why Do Stars Evolve?, 440
 - Energy Generation, 440
 - Opacity, 442
 - Equation of State, 442

- The Vogt-Russell Theorem, 443
- Models of Stars, 443
- Evolutionary Tracks and Star Clusters, 443
 - Changing Appearance in the H-R Diagram, 444
 - H-R Diagrams of Star Clusters, 444
- Main Sequence Stars, 446
 - The Variety of Main Sequence Stars, 446
 - Main Sequence Lifetime, 448
 - Evolution on the Main Sequence, 449
- After the Main Sequence, 450
 - Red Giant Stars, 451
 - Core Helium Burning, 452
 - The Asymptotic Giant Branch, 455
 - Very Massive Stars, 458
 - The Formation of Heavy Elements in Stars, 459

chapter 20

White Dwarfs, Neutron Stars, and Black Holes, 465

- White Dwarf Stars, 466
 - White Dwarfs and Electron Degeneracy, 466
 - Evolution of White Dwarf Stars, 467
 - What Is the Origin of White Dwarf Stars?, 468
- Neutron Stars, 469
 - Supernovae, 469
 - Supernova Remnants, 473
 - Properties of Neutron Stars, 474
 - Pulsars, 476
- Black Holes, 479
 - Spacetime, 479
 - The Formation of a Black Hole, 483
 - Detecting Black Holes, 485

chapter 21

Binary Star Systems, 491

- The Kinds of Binary Stars, 492
 - Detecting Binary Stars, 492
 - Multiple Star Systems, 497
- The Formation of Binary Systems, 498
 - Wide Binaries, 498
 - Close Binaries, 498

- Evolution of Close Binaries, 499
 - Evidence for Interaction: The Algol Paradox, 499
 - Equipotentials, 499
- Binaries with Compact Objects, 506
 - Accretion Disks, 507
 - Binaries with White Dwarfs, 507
 - Binaries with Neutron Stars or Black Holes, 509

Part 4 Journey to the Cosmic Frontier

chapter 22

The Milky Way, 517

- Interstellar Matter, 519
 - Interstellar Gas, 519
 - Interstellar Dust, 522
- The Shape and Size of the Galaxy, 528
 - Star Counting, 528
 - The Modern View of the Galaxy, 529
- The Rotation of the Milky Way, 532
 - The Orbit of the Sun, 532
 - The Rotation Curve of the Galaxy, 532
- The Spiral Structure of the Galaxy, 535
 - Observations of Spiral Structure, 535
 - Why Is There Spiral Structure?, 536
- The Center of the Galaxy, 539
 - Crowded Stars, 540
- The History of the Galaxy, 541
 - Stellar Populations, 541
 - Galactic Evolution, 542

chapter 23

Galaxies, 549

- The Discovery of Galaxies, 550
 - Island Universes, 550
 - Hubble Proves Nebulae Are Galaxies, 551
- The Kinds of Galaxies, 552
 - Elliptical Galaxies, 552
 - Spiral Galaxies, 553

- Irregular Galaxies, 555
 - Why Are There Different Kinds of Galaxies?, 556
- The Rotation of Galaxies, 559
- The Cosmic Distance Scale, 561
 - Primary Distance Indicators, 561
 - Secondary Distance Indicators, 562
 - Tertiary Distance Indicators, 562
- Hubble's Law, 563

chapter 24

Quasars and Other Active Galaxies, 569

- Quasars, 571
 - The Meaning of Quasar Redshifts, 571
 - Properties of Quasars, 572
- The Active Galaxy Zoo, 576
 - Seyfert Galaxies, 577
 - Radio Galaxies, 578
 - Blazars, 580
 - IRAS Galaxies, 581
- Massive Black Holes and Active Galaxies, 582
 - Massive Black Holes, 582
 - Accretion Disks, 583
 - The Host Galaxy, 586
- Evolution of Quasars, 587
 - Evidence for Evolution, 587
 - Where Are the Dead Quasars?, 590
- Quasars as Probes of the Universe, 590
 - Absorption Lines, 590
 - Gravitational Lenses, 591
- Gamma Ray Bursts, 592

chapter 25

Galaxy Clusters and the Structure of the Universe, 597

- Clusters of Galaxies, 598
 - Classifying Clusters, 598
 - Galaxies in Clusters, 604
 - Other Matter in Clusters, 607
- Superclusters and Voids, 609
 - The Local Supercluster, 609
 - Other Superclusters, 609
 - Voids, 609
 - Why Are There Voids and Sheets?, 611
 - The Great Attractor, 611

Cosmology, 615

- Hubble's Law Revisited, 616
 - The Expansion Age of the Universe, 616
- Cosmological Models, 617
 - Curvature of Space, 617
 - Testing Curvature, 620
 - Three-Dimensional Universes, 621
 - Distant Supernovae, 624
- The Big Bang, 625
 - When Did the Big Bang Occur?, 626
 - What Happened?, 626
 - The Cosmic Background Radiation, 630
- Inflation, 632
 - Problems with the Standard Big Bang, 632
 - How Inflation Solves the Problems, 633
 - Why Inflation?, 634
- The Fate of the Universe, 635
 - The Choices, 635
 - Contraction and Beyond, 635
 - Continued Expansion, 636

Part 5 The Journey in Search of Life**Life in the Universe, 641**

- Life, 642
 - What Is Life?, 642
 - Life on Earth, 642
 - Other Possibilities, 642
- The Origin and Evolution of Life on Earth, 643
- Life Elsewhere in the Solar System, 644
- Life in Other Planetary Systems, 645
 - Finding Other Planetary Systems, 645
 - Habitable Planets, 649
 - Intelligent Life, 650
- Interstellar Communication, 651
 - Travel, 651
 - Radio Communication, 652

Appendixes, A-1

- 1 Mathematical and Physical Constants, A-1
- 2 Astronomical Constants, A-1
- 3 Conversion Factors, A-1
- 4 Periodic Table of the Elements A-2
- 5 Orbital Properties of the Planets, A-3
- 6 Physical Properties of the Planets, A-3
- 7 Properties of the Satellites of the Planets, A-3
- 8 Orbital Properties of Selected Asteroids, A-7
- 9 Orbital Properties of Selected Comets, A-7
- 10 Properties of Selected Meteor Showers, A-8
- 11 The Constellations, A-8
- 12 Stars Nearer Than Four Parsecs, A-10
- 13 The Brightest Stars, A-11
- 14 Known and Suspected Members of the Local Group of Galaxies, A-12
- 15 The Brightest Galaxies Beyond the Local Group, A-13
- 16 Properties of Selected Clusters of Galaxies, A-13
- 17 Logarithmic Graphs, A-14
- 18 Answers to Odd-Numbered Questions, A-15

Glossary, G-1**References, R-1****Credits, C-1****Index, I-1**
