

Hydropower in the New Millennium

EDITED BY

B. HONNINGSVÅG

G.H. MIDTTØMME

K. REPP

K. VASKINN

T. WESTEREN

Table of contents

Preface	IX
Organization	XI
Acknowledgements	XIII
<i>New Trends in the Development of Hydropower Projects</i>	
BOOT experiment in Nepal: Recent practices <i>R.C. Arya</i>	3
Technical, economic and environmental feasibilities of Nemunas hydro energy utilization <i>J. Burneikis, D. Streimikiene & P. Punys</i>	11
Development of B.O.O. hydroelectric project in China <i>P. Dong, Z. Yuchang, P. Hong & L. Guanghua</i>	19
Economic risk - and sensitivity analyses for hydro-power projects <i>T. Gjermundsen & L. Jenssen</i>	23
New trends in the development of hydro power projects in India <i>D. Khera & M. Singh</i>	29
New trends in the development of hydropower projects: Experiences of a utility in a transitioning economy <i>J.R. Shrestha</i>	37
<i>Recent Trends in Operation of Hydropower Plants</i>	
Real-time inflow forecasting for Gilgel-Gibe reservoir, Ethiopia <i>G.G. Amenu & Å. Killingveit</i>	43
Unit commitment in hydro power operation scheduling <i>M. Belsnes, O.B. Fosso, J. Røystrand, T. Gjengedal & E. Valhovd</i>	49
Assessment of secondary energy in hydroelectric systems <i>M.A. Cicogna & S. Soares</i>	55
Benefits of power exchange between hydropower and thermal power systems <i>P.B. Eriksen</i>	61
Optimal control of adjustable speed hydro machines <i>T. Gjengedal</i>	67
Kulekhani reservoir: our operational experience <i>R.P. Hada</i>	75

Scenario techniques for long-term hydrothermal scheduling <i>L. Martinez & S. Soares</i>	85
Southern Africa power electricity trade development <i>M. Marumo</i>	93
Integrated tool for maintenance and refurbishment planning of hydropower plants <i>B. Mo, E. Solvang, J. Heggset, D.E. Nordgård & A. Haugstad</i>	105
Economic risk assessment for hydro plants using computer software <i>M. Morgenroth, F. Welt & H.W. de Meel</i>	113
Study of transient two-phase flow of the turbine start of the Coo-2 hydroelectric storage power station <i>M.A. Motte & A.G.H. Lejeune</i>	123
Reversible pump turbine plant for increased grid utilisation <i>T.K. Nielsen & P.O. Haugom</i>	131
Extension of price forecasts for hydropower scheduling and risk management tools <i>I. Schjølberg & B. Mo</i>	139
Experience from peaking operation of a high head hydropower plant in Tanzania <i>O. Skuncke, O.A. Røvang & D. Mhaiki</i>	145
River basin management in India vis-à-vis perspective HE development <i>R.N. Srivastava, D.V. Khera & M. Singh</i>	153
Water resources management in a cascade of hydropower plants <i>S. Theobald, A. Celan & F. Nestmann</i>	161
<i>Hydropower as Environment Sustainable Generation</i>	
Project construction and environmental impact assessment approach <i>B. Beraković, Z. Pletikapić, Z. Mahmutović & B. Karleuša</i>	173
Hydropower and environment; an experience from the Khimti I hydropower project, Nepal <i>M.B. Bishwakarma</i>	181
A decision support system for hydropower peaking operation <i>P. Borsányi, Á. Killingveit & K.T. Alfreðsen</i>	191
The Norwegian R&D programme for environmental flows <i>J.E. Brittain & J.H. L'Abée-Lund</i>	197
Short-term regulations in reservoirs - biological impacts and mitigation measures <i>E. Brodtkorb</i>	201
Hydropower development and environmental requirements in Lithuania <i>J. Burneikis, P. Punys & G. Zibiene</i>	207
Cameron Highlands hydroelectric scheme: Landuse change - Impact and issues <i>F. Choy & F.B. Hamzah</i>	215
Upgradation of small hydro power plant at Maniyar, India <i>D. Das, R.M. Nair, A. Sivakumar & N. Sharma</i>	223
Mitigation measures for environmental protection - sediments and fisheries in relation to the Kjøsnæs fjorden Hydropower Project, Norway <i>S.E. Haarklau & E.T. Pettersen</i>	231
Influence of streamflow variability on the design of small hydropower plants <i>Z. Hailu & H.-B. Horlacher</i>	241
Ecological impacts of hydro peaking in rivers <i>A. Harby, K.T. Alfreðsen, H.P. Fjeldstad, J.H. Halleraker, J.V. Arnekleiv, P. Borsányi, L.E.W. Flodmark, S. Saltveit, S.W. Johansen, T. Vehanen, A. Huusko, K.C. Clarke & D.A. Scruton</i>	249

Impact of climatic change on hydropower investment <i>G.P.Harrison & H.W.Whittington</i>	257
Hydropower in a wider energy and greenhouse gas perspective <i>P.Ø.Herpaasen, G.Dyrllie, A.Ruud & E.Torblaa</i>	263
Electrification of rural areas in Eastern Himalayas through water wheels <i>D.Kedia & A.Kedia</i>	271
Environmental aspects of power generation - thermal v/s hydropower plants <i>P.Krishnamachar, R.Shrivastava & M.Chauhan</i>	277
Hydrological computations for hydropower projects in changing environment <i>H.V.Lobanova</i>	281
A contribution to ecological-economical aspects of hydro power plants <i>H.-B.Matthias, E.Doujak & P.Angerer</i>	289
A micro-hydro pilot plant for mechanical pumping <i>R. Pallabazzer & A. Sebbit</i>	297
SHP promotion by tradeable certificates - will it work or not? <i>B.Pelikan</i>	305
Water and environmental conflicts in the Pangani River Basin, Tanzania Hydropower or irrigation? <i>P.C. Røhr, Å.Killingtveit, G.M. Nderingo & P.E. Kigadye</i>	309
Increasing energy output from existing hydro power system in Tasmania <i>G. Stojmirovic & J. Sheedy</i>	317
National Hydropower Plan (NHP) study in Vietnam <i>V.D. Thin, E. Skofteland & G. Lifwenborg</i>	323
Rehabilitation and improvement of the Tûneis hydroelectric undertaking. Hydroelectric and environmental issues <i>J. Vazques, L. Gusmão & D. Estrela</i>	333
<i>Development of Hydropower Technology and Design</i>	
Sedimentation in the Koka Reservoir, Ethiopia <i>M. Abebe H.</i>	345
New aspects of research on the prediction of cavitation <i>T. Baur & J. Köngeter</i>	351
Numerical modelling of the intake parts of small hydropower plants <i>A. Drab, J. Jandora, J. Riha & O. Neumayer</i>	361
Foundation work at the Penstock Finchaa Power Plant - Ethiopia <i>K. Dønåsen</i>	371
Strain gauge measurements of friction on radial dam gate bearings <i>H. Føsker, H. Bjørndal, T. Ellefsrød & K. Knutsen</i>	375
Design of unlined headrace tunnel with 846 m head at Lower Kihansi, Tanzania. Filling experience. <i>A. Halvorsen & J.A. Roti</i>	381
Implementation of SAP R/3 maintenance management system for Lesotho Highlands Water Project (LHWP) <i>F. Hoohlo</i>	391
The Groner-membrane: a hydraulic superconductor for rough tunnels? <i>T. Jacobsen & L. Jenssen</i>	401

New technologies for dredging of contaminated reservoir sediments <i>T. Jacobsen</i>	405
Small lower head hydropower plant design - Batou hydropower plant <i>W. Junhong</i>	411
Silica use in RCC dams - considerable cost savings and improvement of quality? <i>Ø. Lilleland</i>	417
Some problems arised with respect to foundation difficulties of an earth dam in Trinidad <i>R. Maysingh, R. Budhiraja, C. Stere & A. Popovici</i>	425
Limit condition of distance of force center and rotation center for self-excited vibration of radial gate <i>K. Ogihara, H. Emori & Y. Ueda</i>	431
3D CFD modelling of water flow in the sand trap of Khimti Hydropower Plant, Nepal <i>N.R.B. Olsen & P.R. Aryal</i>	437
For all future hydro power plants located underground the new highvoltage generator Powerformer™ is expected to be the most supreme alternative <i>S. Palmer</i>	445
Revival & updating of Chamera Power Station <i>Y. Prasad & S.K.Dodeja</i>	453
Head loss of inclined fish screen at turbine intake <i>C. Reuter, K. Rettemeier & J. Königeter</i>	465
Poles with pins - an innovative element of a hydro-generator <i>H. Schneider & A. Fuerst</i>	471
Theoretical and practical aspects of the design of desander outlet structures <i>J. Schramm, C. Schweim, J. Königeter & C. Jokiel</i>	475
Hydropower potential and underground construction risks in Nepal Himalayan region <i>G.L. Shrestha</i>	485
Geographical information system of hydropower installations <i>T.E. Skaugen</i>	495
Powerformer™: Insulation co-ordination and its impact on plant design <i>E.G. Sørensen</i>	499
Modified design of the power intake at the 660 MW Deriner Dam Project <i>E. Tanrıverdi, M. Balissat & J.L. Boillat</i>	509
More power from the Mississippi River: upgrading the Ford Hydroelectric Station <i>G.M. Waldow, B. Bystrom & J.H. Rohlf</i>	517
Stochastic boundary element computation of the reliability of gravity dam <i>M. Zhang & Q. Wu</i>	527
The repairing technique for the slab of stilling pool of Ankang hydropower station <i>S. Zhiheng & Zhanglei</i>	531
Authors index	535
