<b>Preface</b>	<b>vii</b>
<b>1 Fundamental Issues in Transportation Systems</b>	<b>1</b>
1.1 Principal Characteristics of Intelligent Transportation Systems . . . . .	2
1.2 Scientific Validation of ITS Designs through Modeling and Simulation . . . . .	7
<b>2 DARYN: A Distributed Decision-Making Algorithm for Railway Networks</b>	<b>9</b>
2.1 Introduction . . . . .	9
2.2 The DARYN Approach . . . . .	12
2.2.1 Algorithm . . . . .	12
2.2.2 Proof of Freedom from Deadlock . . . . .	15
2.2.3 Modeling DARYN on a Loosely-Coupled Parallel Processor . . . . .	16
2.3 Implementation of DARYN on ARMSTRONG . . . . .	19
2.4 Performance of DARYN . . . . .	24
2.4.1 Limitations of DARYN . . . . .	29
<b>3 RYNSORD: A Novel, Decentralized Algorithm for Railway Networks with Soft Reservation</b>	<b>33</b>
3.1 Introduction . . . . .	33
3.2 The RYNSORD Approach . . . . .	34
3.3 Modeling RYNSORD on an Accurate, Realistic, Parallel Processing Testbed . . . . .	41
3.4 Implementation Issues . . . . .	49
3.5 Simulation Data and Performance Analysis . . . . .	51
<b>4 DICAF: A Distributed, Scalable Architecture for IVHS</b>	<b>67</b>
4.1 Introduction . . . . .	67
4.2 DICAF: A Novel, Distributed and Scalable Approach to IVHS . . . . .	74
4.3 Modeling DICAF on an Accurate, Realistic, Parallel Processing Testbed . . . . .	81
4.4 Implementation and Debugging Issues . . . . .	87
4.5 Simulation Results and Performance Analysis of DICAF . . . . .	88

<b>5 Stability of RYNSORD Under Perturbations</b>	<b>111</b>
5.1 Introduction . . . . .	111
5.2 Formal Definition of Stability of RYNSORD . . . . .	114
5.3 Modeling RYNSORD for Stability Analysis . . . . .	116
5.3.1 Implementation Issues . . . . .	117
5.4 Stability Analysis of RYNSORD . . . . .	117
5.4.1 Error Criteria for Stability Analysis . . . . .	117
5.4.2 Steady-State Analysis . . . . .	119
5.4.3 Perturbations to the Input Rate and Stability Analysis . . . .	120
5.4.4 Perturbations to System Characteristics and Stability Analysis	122
5.4.4.1 Perturbations to Inter-station and Train-to-station Communications . . . . .	124
5.4.4.2 Perturbations Relative to the Track Segments . . .	131
<b>6 Modeling and Simulation Techniques for ITS Designs</b>	<b>135</b>
6.1 Introduction . . . . .	135
6.2 Virtual and Physical Process Migration Strategies for ITS Designs .	136
6.2.1 Virtual Process Migration Strategy . . . . .	137
6.2.2 Physical Process Migration Strategy . . . . .	139
6.3 Software Techniques Underlying the Process Migration Strategies .	140
6.3.1 Software Techniques Underlying VPM . . . . .	141
6.3.2 Software Techniques Underlying PPM . . . . .	145
6.4 Implementation Issues . . . . .	148
6.5 Simulation Results and Performance Analysis . . . . .	149
<b>7 Future Issues in Intelligent Transportation Systems</b>	<b>157</b>
<b>8 Description of the RYNSORD Simulator on CD-ROM and Scope of Experiments</b>	<b>159</b>
8.1 Installation . . . . .	159
8.2 Overview . . . . .	160
8.3 Getting Ready to Run . . . . .	161
8.3.1 network.out . . . . .	161
8.3.2 Helper Scripts . . . . .	162
8.3.3 Input Generation . . . . .	162
8.3.4 Output Files . . . . .	163
8.3.5 Troubleshooting . . . . .	164
8.3.5.1 How you know it is working . . . . .	164
8.3.5.2 Problems . . . . .	164
8.3.6 Track and Communication Failures . . . . .	164
8.4 Conclusions . . . . .	165
<b>Bibliography</b>	<b>167</b>
<b>Index</b>	<b>175</b>
