

The background of the cover is a dark, textured blue. A large, faint circular shape, possibly a lens or a bowl, is visible. Inside this circle, there is a smaller, lighter blue area where a hand is holding a small, rectangular object, possibly a piece of paper or a small container. The overall composition is abstract and artistic.

WATER-SOLUBLE POLYMER APPLICATIONS IN FOODS

A. NUSSINOVITCH

<i>Preface</i>	viii
<i>Acknowledgements</i>	xi
<i>About the Author</i>	xii
1 Hydrocolloid Adhesives	1
1.1 Introduction	1
1.2 Mechanical testing of adhesive joints	1
1.3 Hydrocolloids as adhesive materials in foods	4
1.4 Multi-layered gels and texturized fruits	10
1.5 Other uses and future prospects	25
1.6 References	26
2 Hydrocolloid Coatings	29
2.1 Introduction	29
2.2 Edible packaging materials – a general approach	30
2.3 Uses of hydrocolloids for coating	30
2.4 Special biopolymer-based coatings	40
2.5 Special uses and aspects of hydrocolloid films	47
2.6 Film-application techniques	52
2.7 Physical methods and relevant parameters before, during and after coating application	53
2.8 Plasticizers	59
2.9 Drying of films	59
2.10 Gloss properties of hydrocolloid films	60
2.11 References	60
3 Dry Macro- and Liquid-Core Hydrocolloid Capsules	70
3.1 Introduction	70
3.2 Soft gelatin capsules	70
3.3 Liquid-core capsules	71
3.4 Liquid-core hydrocolloid oil capsules	74

3.5	Biotechnological applications of liquid-core capsules	76
3.6	Special food applications	76
3.7	Dry hydrocolloid capsules	78
3.8	References	80
4	Multi-Layered Hydrocolloid Products	82
4.1	Introduction	82
4.2	Deformability modulus and compressive deformabilities of multi-layered gels and texturized fruits	82
4.3	Other multi-layered edible hydrocolloid products	85
4.4	Layered cellular solids	86
4.5	Biotechnological uses of multi-layered gels	88
4.6	Techniques to evaluate properties of multi-layered products	89
4.7	References	90
5	Hydrocolloids in Flavor Encapsulation	93
5.1	Introduction	93
5.2	Spray-drying for flavor encapsulation	93
5.3	Extrusion processes for flavor encapsulation	94
5.4	Film performance in flavor encapsulation	95
5.5	Materials for flavor encapsulation	96
5.6	Flavor oxidation, retention and shelf-life	99
5.7	Controlled release of active ingredients	101
5.8	Food applications	101
5.9	Interactions between volatile compounds and hydrocolloids	108
5.10	Micro-capsule micro-structure	108
5.11	References	109
6	Immobilization for Food and Biotechnological Purposes	114
6.1	Definition, aims and features of immobilized preparations	114
6.2	Immobilization media and techniques	115
6.3	Mechanical properties of immobilization matrices	122
6.4	Mixed systems for immobilization	125
6.5	Food and biotechnological uses of immobilization	126
6.6	Factors related to bead manufacturing	141
6.7	Bead size, sphericity and pore-size measurements of hydrocolloid beads	142
6.8	References	143
7	Texturization of Vegetative Materials	152
7.1	Introduction	152
7.2	Agar and alginate-based texturized fruits	152

7.3	Dependence of composite fruit products on pulp properties	154
7.4	Combined effect of fruit pulp, sugar and gum on texturized fruit products	156
7.5	Alginate texturization of highly acidic fruit pulps and juices	158
7.6	Succulent, hydrocolloid-based, texturized fruit products	159
7.7	Multi-layered texturized fruits	163
7.8	Texturized products for process evaluation	164
7.9	Special products related to texturization of vegetative materials	165
7.10	Texturized vegetative products based on carrageenan, starch, CMC and konjak mannan	165
7.11	Unique uses of texturization	166
7.12	References	169
8	Hydrocolloid Cellular Solids	172
8.1	Introduction	172
8.2	General applications of cellular solids	172
8.3	Structure of cellular solids	173
8.4	Edible cellular solids	173
8.5	Compression of cellular solids	174
8.6	Models for describing stress-strain behavior	175
8.7	Elastic properties of edible cellular materials	177
8.8	Layered sponges and compressibility of spongy particulates	178
8.9	Brittle foams	178
8.10	Hydrocolloid cellular sponges	179
8.11	References	192
9	Hydrocolloids in the Production of Special Textures	196
9.1	Introduction	196
9.2	Fabricated foods	196
9.3	Japanese desserts and molded products	198
9.4	Use of hydrocolloids in spray-dried products	199
9.5	Frozen products	200
9.6	Stabilization and stable foams	202
9.7	Candies	203
9.8	Fluid and emulsion gels	204
9.9	References	205
	<i>Abbreviations</i>	207
	<i>Index</i>	209
