MANAGING SERVICE LEVEL QUALITY

ACROSS WIRELESS AND FIXED NETWORKS

Peter Massam

Contents

Preface	ix
List of Figures	xi
List of Test Figures	xiii
List of Tables	xv
Acknowledgments	xvii
Introduction	xix
1 Managing Service Level Quality in Fixed Networks	1
1.1 Relevance	1
1.2 Scope	1
1.3 Summary	2
2 History	3
2.1 Summary	3
2.2 Traditional Network Management	4
2.2.1 <i>OSI Functional Areas</i>	4
2.2.2 <i>Network Management Features Deemed Most Important (1992)</i>	4
2.2.3 <i>Network Management Features Deemed Most Important (2000)</i>	5
2.2.4 <i>Automated Tools Requirement</i>	6
2.3 Simple Network Management Protocol (SNMP)	7
2.3.1 <i>SNMP Origins</i>	7
2.3.2 <i>SNMP (Renamed SNMP v1)</i>	8
2.3.3 <i>SNMP Version 2 (SNMP v2c)</i>	9
2.3.4 <i>SNMP Version 3 (SNMPv3)</i>	11
2.4 Management Information Base (MIB-I, MIB-II and extensions)	13
2.4.1 <i>Client Applications – A Definition</i>	14
2.4.2 <i>SMI Directory Tree</i>	14
2.4.3 <i>MIB-II Groups</i>	15
2.4.4 <i>Application Identification</i>	16
2.5 RMON and RMON2	17
2.5.1 <i>RMON2 MIB Location</i>	17
2.5.2 <i>RMON2 MIB Groups</i>	18
2.5.3 <i>RMON2 MIB Capabilities</i>	18
2.5.4 <i>RMON2 Limitations</i>	18

2.6	Common Management Information Services (CMIS)	19
2.6.1	<i>Summary</i>	19
2.6.2	<i>Attempts to Combine CMIP and SNMP</i>	19
2.6.3	<i>OSI Management Model Overview</i>	19
2.6.4	<i>Considerations and Concerns</i>	21
2.6.5	<i>CMIS Capabilities</i>	21
3	Current Standards	23
3.1	Systems Management System (SMS)	23
3.2	Applications Response Measurement	24
3.2.1	<i>Objections to ARM</i>	24
3.3	Common Information Model (CIM)	25
3.3.1	<i>The CIM Model</i>	25
3.3.2	<i>CIM Specification</i>	25
3.3.3	<i>CIM Schema</i>	25
3.3.4	<i>CIM Capabilities in the Future</i>	26
3.3.5	<i>CIM Capabilities Today</i>	26
3.4	The SLA Factor	27
3.4.1	<i>SLA Factors Deemed Most Important (2000)</i>	27
4	Latest Developments	29
4.1	Application Instrumentation	29
4.2	Network Probes (or X-ray Tools)	29
4.2.1	<i>Capabilities</i>	30
4.2.2	<i>Limitations and Constraints</i>	30
4.2.3	<i>Summary</i>	31
4.3	Active Monitoring (or Capture and Playback)	31
4.3.1	<i>Differences between Active and Passive Monitoring</i>	31
4.3.2	<i>Simple Network Access Methods</i>	31
4.3.3	<i>Strengths of Capture and Playback</i>	31
4.3.4	<i>Active Considerations</i>	33
4.4	Passive Monitoring (or Client Capture)	33
4.4.1	<i>Strengths of Client Capture</i>	33
4.4.2	<i>Passive Considerations</i>	33
4.5	The NIMI Project	34
4.5.1	<i>NIMI Project Overview</i>	34
4.5.2	<i>NIMI Architecture</i>	34
4.5.3	<i>Lessons Learnt from NIMI</i>	35
5	A Model Agent	37
5.1	Agent Architecture	37
5.1.1	<i>What is an Agent?</i>	37
5.1.2	<i>Endpoint and Server Functions</i>	38
5.2	TCP Flows	39
5.3	Summary	40
6	An Integration Model	41
6.1	Why Integrate?	41
6.2	Application-level Traps	41
6.2.1	<i>Application Thresholds</i>	42
6.3	Root Cause Analysis – An Example	43
6.3.1	<i>Case Study</i>	43

6.4	Bi-directional Interaction	43
6.4.1	<i>Transactional Breakdown</i>	45
6.4.2	<i>Challenges and Possible Solutions</i>	45
7	Application Performance in a Nutshell	47
7.1	Synopsis of Mechanisms	47
7.2	Summary	48
8	Service Level Quality across Fixed and Wireless Networks	49
8.1	Relevance	49
8.2	Scope	49
8.3	Summary	50
9	Wireless Architectures	51
9.1	Summary	51
9.2	GSM (or 2G) Networks	52
9.2.1	<i>GSM Architecture</i>	52
9.2.2	<i>The Radio Link Function</i>	54
9.2.3	<i>The Network Function</i>	59
9.2.4	<i>Integrated Voice and Data Services</i>	61
9.3	GPRS (or 2.5G) Networks	62
9.3.1	<i>GPRS Architecture</i>	62
9.3.2	<i>GPRS Lower Layer Protocols</i>	64
9.3.3	<i>Call Setup</i>	67
9.3.4	<i>The Air Interface</i>	68
9.3.5	<i>Coding Schemes</i>	72
9.3.6	<i>Multislot Capability</i>	73
9.3.7	<i>QoS Profiles</i>	73
9.4	UMTS (or 3G) Networks	78
9.4.1	<i>UMTS (or 3G) Architecture</i>	78
9.4.2	<i>QoS Service Architecture</i>	79
9.5	Implications of a 3GPP Mandated Standard	82
10	Moving to Wireless	83
10.1	QoS Roots	84
10.2	Router Scheduling and Queuing	85
10.2.1	<i>FIFO Queuing</i>	86
10.2.2	<i>Priority Queuing</i>	86
10.2.3	<i>Class-based Queuing and Weighted Round-robin</i>	87
10.2.4	<i>Weighted Fair Queuing</i>	88
10.2.5	<i>Packet Discard</i>	88
10.3	TCP Operations	90
10.3.1	<i>TCP Modes</i>	91
10.3.2	<i>TCP Window Sizes</i>	91
10.3.3	<i>TCP and Interactive Traffic</i>	92
10.4	UDP Operations	92
10.5	RTP Operations	93
10.6	IPv6	95
10.7	QoS Approaches in Fixed Networks	96
10.7.1	<i>QoS Background</i>	97
10.7.2	<i>RSVP and IntServ</i>	97

10.8	DiffServ	100
10.8.1	<i>Traffic Classification and Conditioning</i>	101
10.8.2	<i>DiffServ Marking</i>	101
10.8.3	<i>Per Hop Behaviours</i>	102
10.9	MPLS	103
10.9.1	<i>Benefits</i>	104
10.9.2	<i>The Fit with IPv6</i>	105
10.9.3	<i>The Multi-Protocol Nature</i>	105
10.9.4	<i>MPLS Operations</i>	105
10.9.5	<i>Flexibility and Future Development</i>	106
10.10	Compression Standards for Multimedia Applications	107
10.10.1	<i>RTP Payload Types</i>	107
10.10.2	<i>Header Compression</i>	108
10.10.3	<i>Video Compression</i>	109
10.11	Summary	110
11	Wireless Performance	113
11.1	A GPRS Simulator	114
11.2	The 3G Demonstrator	114
11.3	The Test Laboratory	115
11.3.1	<i>Methodology and Test Lab Topology</i>	115
11.4	The Test Results	116
11.4.1	<i>Live Network Results</i>	116
11.4.2	<i>Laboratory Network Results</i>	117
12	Conclusions	129
12.1	Synopsis of Test Results	129
12.2	Summary	130
	References	133
	Appendix A	135
	Appendix B	137
	Appendix C	139
	Appendix D	141
	Appendix E	143
	Abbreviations	145
