

The Desk Encyclopedia of Microbiology

Edited by Moselio Schaechter

Contents

Contributors	x
Preface	xvii
General websites	xviii
1. Adhesion, Bacterial <i>Matthew A. Mulvey and Scott J. Hultgren</i>	1
2. Agrobacterium and plant cell transformation <i>Peter J. Christie</i>	10
3. Antibiotic resistance in bacteria <i>Julian Davies and Vera Webb</i>	25
4. Antifungal agents <i>Ana Espinel-Ingroff</i>	47
5. Antisense RNAs <i>Andrea Denise Branch</i>	68
6. Antiviral agents <i>Richard J. Whitley</i>	84
7. Archaea <i>Paul Blum and Vidula Dikshit</i>	108
8. Attenuation, Transcriptional <i>Charles Yanofsky</i>	117
9. <i>Bacillus subtilis</i> , Genetics <i>Kevin M. Devine</i>	126
10. Bacteriophages <i>Hans-Wolfgang Ackermann</i>	135
11. Biocides (Nonpublic health, Nonagricultural antimicrobials) <i>Mohammad Sondossi</i>	147
12. Biofilms and biofouling <i>Karen T. Elvers and Hilary M. Lappin-Scott</i>	161
13. Biological warfare <i>James A. Poupard and Linda A. Miller</i>	168
14. Bioluminescence, Microbial <i>J. Woodland Hastings</i>	180

15.	Bioreactors <i>Larry E. Erickson</i>	189
16.	Bioremediation <i>Joseph B. Hughes, C. Nelson Neale, and C. Herb Ward</i>	196
17.	Biosensors <i>Yoko Nomura and Isao Karube</i>	216
18.	Cell membrane: structure and function <i>Robert J. Kadner</i>	222
19.	Cell Walls, Bacterial <i>Joachim-Volker Höltje</i>	239
20.	Chemotaxis <i>Jeff Stock and Sandra Da Re</i>	251
21.	Chromosome, Bacterial <i>Karl Drlica and Arnold J. Bendich</i>	259
22.	Conjugation, Bacterial <i>Laura S. Frost</i>	271
23.	Crystalline bacterial cell surface layers (S layers) <i>Uwe B. Sleytr and Paul Messner</i>	286
24.	Culture collections and their databases <i>Mary K. B. Berlyn</i>	294
25.	Developmental processes in bacteria <i>Yves V. Brun</i>	314
26.	Diversity, Microbial <i>Charles R. Lovell</i>	326
27.	DNA repair <i>Lawrence Grossman</i>	340
28.	DNA replication <i>James A. Hejna and Robb E. Moses</i>	350
29.	DNA restriction and modification <i>Noreen E. Murray</i>	358
30.	DNA sequencing and genomics <i>Brian A. Dougherty</i>	371
31.	Ecology, Microbial <i>Michael J. Klug and David A. Odelson</i>	381
32.	Emerging infections <i>David L. Heymann</i>	387
33.	Energy transduction processes: from respiration to photosynthesis <i>Stuart J. Ferguson</i>	394
34.	Enteropathogenic bacteria <i>Farah K. Bahrani-Mougeot and Michael S. Sonnenberg</i>	403
35.	<i>Escherichia coli</i> and <i>Salmonella</i> , Genetics <i>K. Brooks Low</i>	415

36.	Exotoxins <i>Joseph T. Barbieri</i>	427
37.	Extremophiles <i>Ricardo Cavicchioli and Torsten Thomas</i>	436
38.	Fimbriae, Pili <i>Matthew A. Mulvey, Karen W. Dodson, Gabriel E. Soto, and Scott J. Hultgren</i>	454
39.	Flagella <i>Shin-Ichi Aizawa</i>	470
40.	Food-borne illnesses <i>David W. K. Acheson</i>	480
41.	Fungal infections, Cutaneous <i>Peter G. Sohnle and David K. Wagner</i>	499
42.	Fungal infections, Systemic <i>Arturo Casadevall</i>	507
43.	Gastrointestinal microbiology <i>T. G. Nagaraja</i>	514
44.	Genetically modified organisms: guidelines and regulations for research <i>Sue Tolin and Anne Vidaver</i>	526
45.	Genomes, Mapping of Bacterial <i>J. Guespin-Michel and F. Joset</i>	536
46.	Germ-free animal techniques <i>Bernard S. Wostmann</i>	547
47.	Gram-negative anaerobic pathogens <i>Arthur O. Tzianabos, Laurie E. Comstock, and Dennis L. Kasper</i>	554
48.	Gram-negative cocci, Pathogenic <i>Emil C. Gotschlich</i>	562
49.	Heat stress <i>Christophe Herman and Carol A. Gross</i>	574
50.	Horizontal transfer of genes between microorganisms <i>Jack A. Heinemann</i>	582
51.	Human immunodeficiency virus <i>Luc Montagnier</i>	591
52.	Identification of bacteria, Computerized <i>Trevor N. Bryant</i>	602
53.	Industrial fermentation processes <i>Thomas M. Anderson</i>	613
54.	Insect's symbiotic microorganisms <i>A. E. Douglas</i>	626
55.	Iron metabolism <i>Charles F. Earhart</i>	637
56.	Lipopolysaccharides <i>Chris Whitfield</i>	645

57.	Methanogenesis <i>Kevin R. Sowers</i>	659
58.	Methylotrophy <i>J. Colin Murrell and Ian R. McDonald</i>	680
59.	Nitrogen cycle <i>Roger Knowles</i>	690
60.	Nitrogen fixation <i>L. David Kuykendall, Fawzy M. Hashem, Robert B. Dadson, and Gerald H. Elkan</i>	702
61.	Nodule formation in legumes <i>Peter H. Graham</i>	715
62.	Nutrition of microorganisms <i>Thomas Egli</i>	725
63.	Oral microbiology <i>Ian R. Hamilton and George H. Bowden</i>	739
64.	Osmotic stress <i>Douglas H. Bartlett and Mary F. Roberts</i>	754
65.	Outer membrane, Gram-negative bacteria <i>Mary J. Osborn</i>	767
66.	Oxidative stress <i>Pablo J. Pomposiello and Bruce Demple</i>	775
67.	pH Stress <i>Joan L. Slonczewski</i>	781
68.	Plant pathogens <i>George N. Agrios</i>	789
69.	Plasmids, Bacterial <i>Christopher M. Thomas</i>	808
70.	Polymerase chain reaction (PCR) <i>Carol J. Palmer and Christine Paszko-Kolva</i>	824
71.	Prions <i>Christine Musahl and Adriano Aguzzi</i>	829
72.	Protein secretion <i>Donald B. Oliver and Jorge Galan</i>	842
73.	Quorum sensing in gram-negative bacteria <i>Clay Fuqua</i>	859
74.	Recombinant DNA, Basic procedures <i>Judith W. Zyskind</i>	870
75.	Sexually transmitted diseases <i>Jane A. Cecil and Thomas C. Quinn</i>	879
76.	Skin microbiology <i>Morton N. Swartz</i>	899
77.	Soil microbiology <i>Kate M. Scow</i>	914

78.	SOS response <i>Kevin W. Winterling</i>	927
79.	Space flight, effects on microorganisms <i>D. L. Pierson and S. K. Mishra</i>	934
80.	Sporulation <i>Patrick J. Piggot</i>	942
81.	Starvation, Bacterial <i>A. C. Matin</i>	951
82.	Strain improvement <i>Sarad Parekh</i>	960
83.	Sulfur cycle <i>Piet Lens, Marcus Vallero, and Look Hulshoff Pol</i>	974
84.	Transcriptional regulation in prokaryotes <i>Orna Amster-Choder</i>	984
85.	Transduction: host DNA transfer by bacteriophages <i>Millicent Masters</i>	1000
86.	Transformation, Genetic <i>Brian M. Wilkins and Peter A. Meacock</i>	1012
87.	Transposable elements <i>Peter M. Bennett</i>	1025
88.	Two-component systems <i>Alexander J. Ninfa and Mariette R. Atkinson</i>	1042
89.	Vaccines, Bacterial <i>Susan K. Hoiseth</i>	1053
90.	Vaccines, Viral <i>Ann M. Arvin</i>	1063
91.	Viruses <i>Sondra Schlesinger and Milton J. Schlesinger</i>	1071
92.	Viruses, Emerging <i>Stephen S. Morse</i>	1084
93.	Yeasts <i>Graeme M. Walker</i>	1102
	Index	1115
