

Refining Processes Handbook

Surinder Parkash

Contents

Preface xii

1	Refinery Distillation	1
	Process Variables	2
	Process Design of a Crude Distillation Tower	5
	Characterization of Unit Fractionation	11
	General Properties of Petroleum Fractions	14
	Atmospheric Distillation Unit	18
	Vacuum Distillation Unit	20
	Crude Desalting	22
2	Distillate Hydrotreating	29
	Naphtha Hydrodesulfurization Process	34
	Kerosene Hydrotreating	38
	Gas Oil Hydrodesulfurization	41
	Atmospheric Residuum Desulfurization	50
3	Hydrocracking Processes	62
	Hydrocracking Reactions	62
	Process Configuration	66
	Process Flow Scheme	69
	Operating Conditions	75
	Catalyst Sulfiding and Unit Startup	88
	Shutdown Procedure	90
	Catalyst Regeneration	92
	Mild Hydrocracking	95
	Residuum Hydrocracking	95
4	Gasoline Manufacturing Processes	109
	Catalytic Reforming	109
	Fluid Catalytic Cracking	114
	Alkylation	128
	Isomerization of C ₅ /C ₆ Normal Paraffins	136
	Methyl Tertiary Butyl Ether	143

5	Hydrogen Production and Recovery	153
	Natural Gas Desulfurization	153
	Steam Reforming	156
	Carbon Monoxide Conversion	157
	Carbon Dioxide Removal	158
	Methanation	162
	Pressure Swing Adsorption Route	162
	Partial Oxidation Process	164
	Hydrogen Recovery	170
6	Residuum Processing	176
	Delayed Coking	176
	Visbreaking	189
	Solvent Deasphalting	197
	Bitumen Blowing	203
7	Treating Processes	210
	General Principles	210
	FCCU Light Gasoline	211
	Jet Fuel (ATK) Sweetening	214
8	Sulfur Recovery and Pollution Control Processes	220
	Sulfur Recovery from Acid Gas	220
	Claus Tail Gas Treatment	223
	Flue Gas Desulfurization	228
	Amine Treatment	235
9	Refinery Water Systems	242
	Cooling Water System	242
	Sea Water Cooling System	243
	Cooling Towers	246
	Boiler Feedwater System	247
	Utility Water System	251
	Treatment of Oily Water	257
	Wet Slop Oil System	260
	Treatment of Sanitary Sewage	261
	Sour Water Treatment	261
10	Refinery Off-Site Facilities and Utility Systems	270
	Refinery Tankage	270
	Shipping Terminals and Sea Lines	272
	Refinery Tankage Estimation	273

Product Blending System	278
Refinery Flare System	286
Refinery Steam System	298
Refinery Fuel System	303
11 Product Blending	308
Gasoline Octane Blending	308
ASTM Distillation Blending	314
Viscosity Blending	326
Pour Point Blending	330
Flash Point Blending	331
Reid Vapor Pressure Blending for Gasolines and Naphthas	339
Aniline Point Blending	341
Crude Oil Assays	342
12 Refinery Stock Balancing	384
Data for Model Building	385
Calculation Procedure	386
Refinery Material Balance Spreadsheet Program	388
13 Refinery Linear Programming Modeling	415
Development of the Refinery LP Model	415
The Structure of a Refinery LP Model	417
Property Propagation to Other Tables	430
Blending Specifications	431
Stream Pooling (Recursion Process)	431
Distributive Recursion	436
Objective Function	439
Optimization Step	439
Solution Convergence	440
Interpreting the Solution	440
Report Writer Programs	443
Delta-Based Modeling	443
Atmospheric Crude Distillation and VDU Modeling	447
Single-Product LP Blender	471
14 Pricing Petroleum Products	476
Netback and Formula Pricing for Crude Oil	476
Pricing Petroleum Products and Intermediate Stocks	481
Assigned Crude Yields	488

15	Definitive Operating Plan.....	493
	DOPs in Joint-Ownership Refineries	498
	Fixed- and Balancing-Grade Products	505
	Product Equivalencies	510
	Product Equivalency Determination	514
	Crude Oil Equivalency	518
	Equivalency of Slop	519
16	Product Allocation.....	520
	Input Data	521
	Forecaster Changes	521
	Rules for Forecaster Changes	521
	Crude Oil Changes	534
	DOP "Loss" Adjustment	535
	Retrospective DOP	536
	Allocation of Balancing Grades	536
	Reverse Allocation	537
	Final Allocation	542
	Allocation LPs	545
	Process Unit Capacities	545
	Product Prices	548
	Summary of Primary Data Input for LPs	551
	Examination of LP Results	551
	Final Allocation Cycle	556
	Allocation Spreadsheet Program	561
	Product Allocation Problems	567
17	Available Tankage Capacity.....	620
	Estimation of Total Available Capacity	620
	Minimum and Maximum Inventory (LI and HI)	621
	Allocation of Tankage Capacity	622
	Ullage	633
	Ceding of Refinery Capacity	635
	Ceding of Tankage Capacity	635
18	Shipping Inventory Forecasts.....	638
	Weekly Production Estimates	638
	Refinery Estimate Schedule	639
	Procedure	640

Allocation of Deltas 641
Inventory and Ullage Forecasting System
(Joint Ownership Refineries) 646

19 Refinery Operating Cost681

Allocation of Operating Cost 682
System Costing Method 682
Theoretical Sales Realization Valuation Method 682
Cost Allocation for Actual Usage 684
Unused Capacity Charge 684

**Appendix Processing Agreement for Joint-Ownership
Refinery691**
