# analytical chemistry

*Séamus P. J. Higson*

# Contents

---

---

## **Part 1 The scope of analytical chemistry: ground rules and fundamental**

---

- |          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>The scope of Analytical chemistry and the nature of analytical measurements</b> | <b>3</b>  |
| <b>2</b> | <b>Analytical quality assurance and statistics</b>                                 | <b>13</b> |
- 

## **Part 2 Chemical analysis: key principles and processes**

---

- |          |  |            |
|----------|--|------------|
| <b>3</b> | <b>Standard wet chemical and reagent-based techniques</b>                                      | <b>51</b>  |
| <b>4</b> | <b>Analyses based on the determination of mass</b>   | <b>89</b>  |
| <b>5</b> | <b>An Introduction to the use of visible and ultraviolet light for analytical measurements</b> | <b>105</b> |
- 

## **Part 3 The key analytical techniques**

---

- |           |  |            |
|-----------|--|------------|
| <b>6</b>  | <b>Further applications of UV–visible absorption and fluorescence phenomena including X-ray fluorescence, Raman, Mössbauer, and photoelectron spectroscopic techniques</b> | <b>141</b> |
| <b>7</b>  | <b>Atomic spectroscopy in analytical chemistry</b>   | <b>167</b> |
| <b>8</b>  | <b>Separatory methods and chromatography</b>   | <b>195</b> |
| <b>9</b>  | <b>Mass spectrometry</b>   | <b>233</b> |
| <b>10</b> | <b>Electro-analytical techniques</b>   | <b>267</b> |
| <b>11</b> | <b>Nuclear magnetic resonance spectroscopy</b>   | <b>301</b> |
| <b>12</b> | <b>Infrared techniques</b>   | <b>317</b> |

---

**Part 4 Analytical chemistry in practice: contemporary analytical science**

---

13	Radiochemical analytical methods	341
14	Bio-analytical methods	353
15	Environmental analyses and assays	395
16	Critical choice of technique, good laboratory practice, and safety in the laboratory	411
	Index	417
