THIRD EDITION

## CONTAMINATION OF FOOD

ITS SIGNIFICANCE FOR FOOD QUALITY AND HUMAN HEALTH

**CONOR REILLY** 

## Contents

Preface to the third edition	xiii
Preface to the second edition	XV
Preface to the first edition	xvii
Part I: The Metals We Consume	1
1 Introduction	3
1.1 Ash	3
1.1.1 Ash and the early food analysts	3
1.1.2 A nineteenth-century view on food ash	4
1.1.3 Ash in the modern food laboratory	5
1.2 The metals in food	5
1.2.1 Chemical properties of the metals	7
1.2.2 Representative and transition metals	7
1.3 Distribution of the metals in the environment	8
1.3.1 Metals in human tissue	3 3 4 5 5 7 7 8 8 8
1.3.2 Metals in soil	8
1.3.2.1 Soil as a source of plant trace elements	8
1.3.2.2 Variations in the metal content of soils	8 9
1.3.2.3 Soil metal availability	9
1.3.2.4 Metal transport and location within the plant	10
1.3.2.5 Soil metal speciation	10
2 Metals in food	12
2.1 The metal components of food	12
2.2 Why are we interested in metals in food?	13
2.2.1 Functions of the trace elements	13
2.2.2 New trace elements	14
2.3 The toxic metals	15
2.4 Effects of metals on food quality	16
2.5 How much metal do we consume with our food?	16
2.5.1 Estimating metal intakes	17
2.5.1.1 Surveillance methods for assessing intake	18
2.5.1.2 Duplicate diet method for intake estimation	18
2.5.2 Comparison of methods of assessment of metal intakes	19
2.6. Assessing risks from metals in food	19
3 Metal analysis of food	23
3.1 The determination of metals in foods and beverages	23
3.1.1 The first step in analysis: obtaining a representative sample	23

3.1,2 Prevention of contamination	24
3.1.3 Drying of samples	24
3.1.4 Purity of chemical reagents and water	25
3.1.5 Glassware and other equipment	2.5
3.2 Preparation of samples for analysis: digestion of organic matter	25
3.2.1 Dry ashing	25
3.2.2 Wet digestion techniques	26
3.2.2.1 Nitric acid digestion	26
3.2.2.2 Nitric-sulphuric acids digestion	27
3.2.2.3 Use of perchloric acid	27
3.2.2.4 Hydrofluoric acid	27
3.2.3 Microwave digestion	27
3.3 End-determination methods for metal analysis	28
3.3.1 Atomic absorption spectrophotometry (AAS)	29
3.3.1.1 Background correction	29
3.3.1.2 Use of slurries and flow injection in AAS	29
3.3.1.3 Speeding up AAS	30
3.3.2 Spectrofluorimetry	30
3.3.3 Inductively coupled plasma spectrometry (ICP-S)	31
3.3.3.1 Inductively coupled plasma atomic emission spectrometry	
(ICP-AES)	31
3.3.3.2 Inductively coupled plasma mass spectrometry (ICP-MS)	31
3.3.4 Other analytical techniques for trace elements	32
3.4 Determination of elemental species	32
3.4.1 Methodology for the determination of metal species	33
3.4.1.1 Chemical methods of speciation	33
3.4.1.2 Hyphenated techniques for metal speciation	33
3.5 Analytical quality control	34
4. How motals gat into food	40
4 How metals get into food 4.1 Metals in the soil	40
4.1.1 Uptake of metals by plants	41
4.1.1.1 Accumulator plants	41
4.1.1.2 Geobotanical indicators	41
4.1.2 Effects of agricultural practices on soil metal content	42
4.1.2.1 Metals in agricultural fertilisers	42
4.1.2.2 Metals in sewage sludge	43
4.1.2.3 Metal uptake from agrochemicals	45
4.1.3 Industrial contamination as a source of metals in food	45
4.1.3.1 Metal contamination from mining operations	46
4.1.3.2 Metal contamination from metal industries	46
4.1.3.3 Emission of metals from coal	48
4.1.3.4 Problems of use of brownfield sites	48
4.1.4 Geophagia	49
4.2 Metal contamination of food during processing	49
4.2.1 Contamination of food from plant and equipment	50
4.2.2 Metal pick-up during canning	50
4.2.2.1 'Tin' cans	51
4.2.2.2 Aluminium containers	52
4.2.3 Contamination of food during catering operations	53
4.2.3.1 Metal cooking utensils	53
V	

	Contents	vii
4.2.3.2 Ceramic ware		55
4.2.3.3 Enamelled ware		56
4.2.3.4 Other domestic sources of metal contamination	n of food	56
4.3 Food fortification		57
4.3.1 Regulations and current practice regarding fortification	ation of foods	57
4.3.1.1 UK regulations		58
4.3.1.2 Australian and New Zealand regulations		58
4.3.2 Foods commonly fortified		59
4.3.2.1 RTE breakfast cereals		59
4.3.2.2 Functional foods		59
4.3.3 Natural fortification of foods with metals		60
5 Metals in food and the law		67
5.1 Why do we have food legislation?		67
5.1.1 International and national legislation		69
5.1.1.1 UK legislation on metals in food		69
5.1.1.2 US legislation on metals in food		71
5.1.1.3 Legislation in Australia and elsewhere in the E world	inglish-speaking	72
5.1.1.4 - International standardisation and harmonisation	on of food laws	74 74
5.1.1.5 European Community food regulations	on or root laws	75
5.2 Codes of practice		76
•		
Part II: The Individual Metals		<del>7</del> 9
6 The persistent contaminants: lead, mercury, cadmium		81
6.1 Lead		81
6.1.1 Chemical and physical properties of lead		82 82
6.1.2 Production and uses		84
6.1.3 Lead in the human body 6.1.4 Biological effects of lead		85
6.1.5 Lead in food and beverages		87
6.1.5.1 Lead in meat and offal		87
6.1.5.2 Lead in canned foods		87
6.1.5.3 Lead in wines		88
6.1.5.4 Lead in home-grown vegetables		88
6.1.5.5 Lead in water		89
6.1.6 Adventitious sources of dictary lead		89
6.1.6.1 Lead in alcoholic beverages		89
6.1.6.2 Lead in dietary supplements		90
6.1.6.3 Lead in plastic packing		90
6.1.7 Dietary intake of lead		91
6.1.7.1 Lead in children's diets		91
6.1.8 Analysis of foodstuffs for lead		93
6.2 Mercury		94
6.2.1 Chemical and physical properties of mercury		94
6.2.2 Environmental distribution of mercury		95
6.2.3 Production and uses of mercury		96
6.2.4 Biological effects of mercury		96
6.2.5 Mercury in food		97
6.2.6 Analysis of foodstuffs for mercury		99

6.3.1 Chemical and physical properties of cadmium 6.3.2 Production and uses of cadmium 6.3.3 Cadmium in food 6.3.4 Cadmium in water and other beverages 6.3.5 Dietary intake of cadmium 6.3.6 Uptake and accumulation of cadmium by the body 6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 11.7.1.3.1 Aluminium in food and beverages 11.7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 11.5.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in inserved tea 7.1.4.1 Dietary intake of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.1.7 Tin (Chemical and physical properties of tin 7.2.1 Chemical and physical properties of tin 7.2.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin 7.2.6 Analysis of foodstuffs for tin
6.3.2 Production and uses of cadmium 6.3.3 Cadmium in food 6.3.4 Cadmium in water and other beverages 6.3.5 Dietary intake of cadmium 6.3.6 Uptake and accumulation of cadmium by the body 6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in fresh foods 7.1.3.3 Aluminium in fresh foods 7.1.3.4 Aluminium in fresh foods 7.1.3.5 Aluminium in beverages 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 7.1.3.7 Aluminium in beverages 7.1.3.8 Aluminium in brewed tea 7.1.3.8 Aluminium in brewed tea 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.1.7.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
6.3.3 Cadmium in food 6.3.4 Cadmium in water and other beverages 102 6.3.5 Dietary intake of cadmium 6.3.6 Uptake and accumulation of cadmium by the body 104 6.3.7 Effects of cadmium on health 105 6.3.8 Analysis of foodstuffs for cadmium 106 7 The packaging metals: aluminium and tin 11.1 Chemical and physical properties of aluminium 11.1 Chemical and physical properties of aluminium 11.1 Production and uses 11.1 Aluminium in food and beverages 11.1 Aluminium in food and beverages 11.1 Aluminium in fresh foods 11.1 Aluminium in processed foods 11.1 Aluminium in processed foods 11.1 Aluminium in beverages 11.1 Aluminium in beverages 11.2 Aluminium in beverages 11.3 Aluminium in beverages 11.4 Aluminium in beverages 12.7 Aluminium in beverages 12.7 Aluminium in brewed tea 12.7 Aluminium in brewed tea 12.7 Aluminium in brewed tea 12.7 Aluminium in alcoholic beverages 12.7 Aluminium in processed foods 12.7 Aluminium in brewed tea 12.7 Aluminium in alcoholic beverages 12.7 Aluminium absorption 12.7 Aluminium aluminium absorption 12.7 Aluminium aluminium aluminium absorption 12.7 Aluminium aluminium aluminium absorption 12.7 Aluminium aluminium aluminium aluminium absorption 12.7 Aluminium alumi
6.3.4 Cadmium in water and other beverages 6.3.5 Dietary intake of cadmium 6.3.6 Uptake and accumulation of cadmium by the body 6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium 106 6.3.8 Analysis of foodstuffs for cadmium 107 7 The packaging metals: aluminium and tin 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 117 7.1.3.1 Aluminium in fresh foods 118 7.1.3.2 Aluminium in processed foods 119 7.1.3.3 Aluminium in beverages 110 7.1.3.4 Aluminium in beverages 111 7.1.3.5 Aluminium in domestic water 112 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 112 7.1.3.7 Aluminium in brewed tea 113 7.1.3.8 Aluminium in alcoholic beverages 114 7.1.4 Dietary intake of aluminium 115 7.1.4.1 High consumers of aluminium 117 7.1.5 Aluminium absorption 118 7.1.6 Analysis of foodstuffs for aluminium 119 7.1.7 Aluminium absorption 110 7.1.6 Analysis of foodstuffs for aluminium 110 7.1.7 Aluminium absorption 111 7.1.1 Chemical and physical properties of tin 112 7.1.2 Production and uses of tin 113 7.1.3 Tin in food and beverages 114 7.1.5 Aluminium absorption 115 7.1.6 Analysis of foodstuffs for aluminium 116 7.1.7 Chemical and physical properties of tin 117 7.1.1 Chemical and physical properties of tin 119 7.1.2 Production and uses of tin 119 7.2.3 Tin in food and beverages 119 7.2.4 Dietary intakes of tin 119 7.2.5 Absorption and metabolism of tin
6.3.5 Dietary intake of cadmium 6.3.6 Uptake and accumulation of cadmium by the body 6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium 106 6.3.8 Analysis of foodstuffs for cadmium 106 7 The packaging metals: aluminium and tin 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 115 7.1.2 Production and uses 116 7.1.3 Aluminium in food and beverages 117 7.1.3.1 Aluminium in fresh foods 117 7.1.3.2 Aluminium in processed foods 118 7.1.3.3 Aluminium in infant formulas 119 7.1.3.4 Aluminium in beverages 120 7.1.3.5 Aluminium in domestic water 121 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 121 7.1.3.8 Aluminium in brewed tea 121 7.1.3.9 Aluminium in alcoholic beverages 122 7.1.4 Dietary intake of aluminium 127 7.1.4.1 High consumers of aluminium 127 7.1.5.1 Metabolic consequences of high aluminium absorption 127 7.1.5 Aluminium absorption 127 7.1.5 Chemical and physical properties of tin 129 7.2.1 Chemical and physical properties of tin 120 7.2.2 Production and uses of tin 121 7.2.3 Tin in food and beverages 122 7.2.3.1 Organotin compounds in food 123 7.2.4 Dietary intakes of tin 125 7.2.5 Absorption and metabolism of tin
6.3.6 Uptake and accumulation of cadmium by the body 6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in food and beverages 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in processed foods 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in beverages 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
6.3.7 Effects of cadmium on health 6.3.8 Analysis of foodstuffs for cadmium  7 The packaging metals: aluminium and tin 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
6.3.8 Analysis of foodstuffs for cadmium  7 The packaging metals: aluminium and tin 7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 117 7.1.3.1 Aluminium in fresh foods 118 7.1.3.2 Aluminium in processed foods 118 7.1.3.3 Aluminium in infant formulas 119 7.1.3.4 Aluminium in beverages 120 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 121 7.1.3.8 Aluminium in brewed tea 122 7.1.3.8 Aluminium in alcoholic beverages 123 7.1.4 Dietary intake of aluminium 124 7.1.4.1 High consumers of aluminium 125 7.1.5 Aluminium absorption 126 7.1.5 Aluminium absorption 127 7.1.5 Aluminium absorption 128 7.2.1 Chemical and physical properties of tin 129 7.2.2 Production and uses of tin 120 7.2.3 Tin in food and beverages 121 7.2.3 Tin in food and beverages 122 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 125 7.2.5 Absorption and metabolism of tin
7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in processed foods 7.1.3.4 Aluminium in infant formulas 7.1.3.5 Aluminium in beverages 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1 Aluminium 7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in processed foods 7.1.3.4 Aluminium in infant formulas 7.1.3.5 Aluminium in beverages 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.1 Chemical and physical properties of aluminium 7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in böttled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5 Aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.2 Production and uses 7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in infant formulas 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5 Aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3 Aluminium in food and beverages 7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.1 Aluminium in fresh foods 7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bôttled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.2 Aluminium in processed foods 7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.3 Aluminium in infant formulas 7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.4 Aluminium in beverages 7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.5 Aluminium in domestic water 7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.6 Levels of aluminium in bottled waters and canned soft drinks 7.1.3.7 Aluminium in brewed tea 7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.3.8 Aluminium in alcoholic beverages 7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.4 Dietary intake of aluminium 7.1.4.1 High consumers of aluminium 7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.4.2 Adventitious contributions of aluminium to the diet 7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.5 Aluminium absorption 7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin
7.1.5.1 Metabolic consequences of high aluminium absorption 7.1.6 Analysis of foodstuffs for aluminium 7.2 Tin 7.2.1 Chemical and physical properties of tin 7.2.2 Production and uses of tin 7.2.3 Tin in food and beverages 7.2.3.1 Organotin compounds in food 7.2.4 Dietary intakes of tin 7.2.5 Absorption and metabolism of tin 126 127 128 129 129 120 120 120 120 120 120 120 120 120 120
