

APPLIED ANIMAL REPRODUCTION

SIXTH EDITION

H. Joe Bearden • John W. Fuquay • Scott T. Willard

Contents

Preface xv

Chapter 1 ***Introduction and Early History*** **1**

Suggested Reading 4

PART 1 **Anatomy, Function, and Regulation**

Chapter 2 ***The Female Reproductive System*** **7**

2-1 Ovaries 7

2-2 Oviducts 13

2-3 Uterus 13

2-4 Cervix 17

2-5 Vagina 19

2-6 Vulva 19

2-7 Support Structures, Nerves, and Blood Supply 19

Suggested Reading 21

Chapter 3 ***The Male Reproductive System*** **22**

3-1 Testes 22

3-2 Scrotum and Spermatic Cord 27

3-3 Epididymis 29

3-4 Vasa Deferentia and Urethra 31

3-5 Accessory Glands 31

3-6 Penis 33

3-7 Prepuce 33

Suggested Reading 35

Chapter 4 ***Neuroendocrine and Endocrine Regulators of Reproduction*** **36**

4-1 Primary Reproductive Hormones of the Pituitary Gland 38

4-2 Neuroendocrine Control of the Pituitary Gland 40

4-3 Hormones of the Gonads 44

- 4-4 Primary Reproductive Hormones of the Adrenal Cortex 48
- 4-5 Endocrine Function of the Uterine/Placental Unit 49
- 4-6 Reproductive Role of Prostaglandins 49
- 4-7 Hormone-like Factors and Other Hormonal Mediators 50
- 4-8 Regulation of Hormonal Receptor Sites 52
- 4-9 Intracellular Mechanisms of Hormone Actions 53
- 4-10 Methods of Hormone Detection and Measurement 55
- 4-11 Summary 57
- Suggested Reading 57

PART 2 Reproductive Processes

Chapter 5 The Estrous Cycle 61

- 5-1 Puberty 61
- 5-2 Periods of the Estrous Cycle 63
- 5-3 Hormonal Control of the Estrous Cycle 64
- 5-4 Follicular Dynamics 67
- 5-5 Seasonal Breeders 70
- Suggested Reading 73

Chapter 6 Spermatogenesis and Maturation of Spermatozoa 75

- 6-1 Puberty 75
- 6-2 The Process of Spermatogenesis 77
- 6-3 The Seminiferous Epithelial Cycle and Spermatogenic Wave 82
- 6-4 Capacitation of Spermatozoa and Acrosome Reaction 84
- Suggested Reading 86

Chapter 7 Mating Behavior 87

- 7-1 Regulation of Mating Behavior 87
- 7-2 Behavioral Characteristics of Estrus 90
- 7-3 Mating Behavior in Males 91
- Suggested Reading 95

Chapter 8 Ovogenesis and Fertilization 96

- 8-1 Ovogenesis 96
- 8-2 Ovulation 98
- 8-3 Gamete Transport 99
- 8-4 Fertilization 103
- 8-5 Polyspermy 105
- 8-6 Aging of Gametes 105
- Suggested Reading 107

Chapter 9 Gestation 109

- 9-1 Cleavage 110
- 9-2 Differentiation 112
- 9-3 Fetal Growth 119

- 9-4 Maintenance of Pregnancy 121
- 9-5 Twinning 124
- Suggested Reading 126

Chapter 10 ***Parturition and Postpartum Recovery*** **128**

- 10-1 Overview of the Parturition Process 128
- 10-2 Approaching Parturition 128
- 10-3 Parturition 131
- 10-4 Dystocia 135
- 10-5 Care of the Newborn 135
- 10-6 Retained Placentae 136
- 10-7 Postpartum Recovery 137
- Suggested Reading 140

Chapter 11 ***Lactation*** **142**

- 11-1 Structure of Mammary Glands 142
- 11-2 Hormonal Regulation of the Development and Function of the Mammary Gland 146
- 11-3 Composition of Milk 150
- Suggested Reading 152

PART 3 **Artificial Insemination**

Chapter 12 ***Introduction and History of Artificial Insemination*** **155**

- 12-1 Introduction 155
- 12-2 History 156
- 12-3 Advantages and Disadvantages 159
- Suggested Reading 159

Chapter 13 ***Semen Collection*** **160**

- 13-1 Facilities Needed for Semen Collection 160
- 13-2 Methods of Semen Collection 160
- Suggested Reading 172

Chapter 14 ***Semen and Its Components*** **173**

- 14-1 Spermatozoa 173
- 14-2 Seminal Plasma 177
- 14-3 Energy Metabolism by Spermatozoa 178
- 14-4 Factors Affecting Rate of Metabolism 179
- Suggested Reading 182

Chapter 15 ***Semen Evaluation*** **183**

- 15-1 Gross Examination 183
- 15-2 Progressive Motility 184
- 15-3 Concentration of Sperm Cells 186

- 15-4 Sperm Cell Morphology 190
- 15-5 Differential Staining of Live and Dead Sperm 192
- 15-6 Speed of Sperm 192
- 15-7 Evaluating Frozen Semen 193
- 15-8 Computer Automated Semen Analyzer 195
- 15-9 Other Tests 196
- Suggested Reading 197

Chapter 16 *Semen Processing, Storage, and Handling* 198

- 16-1 Importance and Properties of Semen Diluters 199
- 16-2 Buffer Solutions Used in Semen Diluters 200
- 16-3 Antimicrobial Agents for Semen Diluters 201
- 16-4 Effective Diluters for Bull Semen 202
- 16-5 Processing Bull Semen 204
- 16-6 Storage and Handling of Bull Semen 211
- 16-7 What Does the Future Hold for Liquid Bull Semen? 212
- 16-8 Processing Boar Semen 214
- 16-9 Processing Ram Semen 217
- 16-10 Processing Stallion Semen 218
- 16-11 Processing Buck Semen 221
- Suggested Reading 221

Chapter 17 *Insemination Techniques* 223

- 17-1 Insemination of the Cow 223
- 17-2 Insemination of the Ewe and Doe 230
- 17-3 Insemination of the Sow 231
- 17-4 Insemination of the Mare 233
- Suggested Reading 234

PART 4 **Management for Improved Reproduction**

Chapter 18 *Synchronization of Estrus and Superovulation with Embryo Transfer* 237

- 18-1 Synchronization of Estrus 237
- 18-2 Superovulation and Embryo Transfer 249
- Suggested Reading 259

Chapter 19 *Reproductive Biotechnology* 261

- 19-1 Assisted Reproductive Technologies 261
- 19-2 Sex Determination and Control 269
- 19-3 Cloning 276
- 19-4 Genetic Engineering (Transgenics) 278
- 19-5 Gene Discovery—Markers for Reproduction 282
- 19-6 Technologies for the Future—Definitions 286
- Suggested Reading 289

Chapter 20	<i>Reproductive Management</i>	291
20-1	Measurements of Reproductive Efficiency	291
20-2	Management Related to the Female	292
20-3	Management Related to the Male	309
20-4	Altering Male Reproduction	313
	Suggested Reading	317
Chapter 21	<i>Pregnancy Diagnosis</i>	318
21-1	Cow	318
21-2	Ewe and Doe	329
21-3	Mare	331
21-4	Sow	334
	Suggested Reading	337
Chapter 22	<i>Environmental Management</i>	338
22-1	Environmental Stressors	338
22-2	Physiological Relationship of Environmental Stress to Reproduction	341
22-3	Thermoregulation	343
22-4	Modification of Summer Environments to Reduce Stress	343
22-5	Other Management Considerations in Hot Environments	345
	Suggested Reading	346
Chapter 23	<i>Nutritional Management</i>	348
23-1	Nutritive Components	348
23-2	Growing Animals	354
23-3	Maintaining Reproductive Efficiency	355
	Suggested Reading	357
PART 5	Causes of Reproductive Failure	
Chapter 24	<i>Anatomical and Inherited Causes of Reproductive Failure</i>	361
24-1	Freemartin	361
24-2	Infantile Reproductive System	363
24-3	Incomplete Structures—Oviduct, Uterus, Cervix, or Vagina	363
24-4	Hermaphrodite	364
24-5	Cryptorchid	365
24-6	Injuries	366
24-7	Prolapse of Vagina and Uterus	368
24-8	Genetic Abnormalities	369
	Suggested Reading	369

- Chapter 25** ***Physiological, Toxicological, and Psychological Causes of Reproductive Failure*** **370**
- 25-1 Cystic Ovaries 370
 - 25-2 Retained Corpus Luteum 373
 - 25-3 Anestrus 374
 - 25-4 Irregular Estrous Cycles 375
 - 25-5 Quiet Ovulation 376
 - 25-6 Age 377
 - 25-7 Reproductive Toxicology 378
 - 25-8 Psychological Disturbances 385
 - Suggested Reading 387
- Chapter 26** ***Infectious Diseases That Cause Reproductive Failure*** **389**
- 26-1 Bacterial Diseases 389
 - 26-2 Protozoan Diseases 403
 - 26-3 Viral Diseases 406
 - Suggested Reading 411
