Preface xvii

Extensible Hypertext Markup Language I

Chapter Objectives I

- I.1 Semantic, Structure, and Style I
- I.2 XHTML Documents 2
- I.3 Creating an XHTML File 3
- I.4 XHTML Syntax Overview 4
 - I.4.1 The XML Declaration 5
 - I.4.2 The Document Type Declaration: XHTML 1.0 5
 - I.4.3 The Document Type Declaration:
XHTML 1.1 Modularization 6
 - I.4.4 The Document Type Declaration: XHTML Basic 1.0 6
 - I.4.5 The Root Element and Namespace 7
 - I.4.6 Well-Formed Documents 8
- I.5 Valid Documents 9
 - Exercise 9
- I.6 Additional Elements 10
 - I.6.1 Headers, Paragraphs, and Lists 11
- Exercises 11

1.7	XHTML Core Attributes	14
1.7.1	Universal/Core Attributes	14
1.7.2	Element Attributes	16
	Exercises	16
1.8	Adding Anchors and Images	18
1.8.1	<a>	18
1.8.2		19
1.8.3	<a> and 	20
	Exercises	20
1.9	A Few More Elements	21
1.9.1	 	21
1.9.2	<div>	21
1.9.3		22
	Exercises	22
1.9.4	Differences between XHTML 1.1/XHTML Basic 1.0 and HTML 4/XHTML 1.0	23
1.10	XHTML Tables	27
1.10.1	Table Cells	28
1.10.2	Table Cell Attributes	30
	Exercises	30
1.11	Forms	32
	Exercise	33
1.12	Form Controls	33
1.12.1	<fieldset>	36
1.12.2	<form>	36
1.12.3	<input>	37
1.12.4	<label>	38
	Exercises	39
	Chapter Summary	41
	Self-Assessment	43

2 Cascading Style Sheets 45

	Chapter Objectives	45
2.1	Style Separation	45
2.2	Linking CSS	48
2.3	CSS Syntax	48

2.4	Comments 49
2.5	Cascading and Levels of CSS 49
2.6	Values 51
2.7	CSS Rules 53
2.8	Font Properties 53
2.8.1	font-family 53
2.8.2	font-style 54
2.8.3	font-weight 54
2.8.4	font-size 55
2.8.5	font 55
2.9	Text Property 56
2.9.1	text-align 56
2.10	Color Properties 56
2.10.1	color 56
2.10.2	background-color 57
2.10.3	background-image 57
	Exercises 57
2.11	Class and ID Attributes 58
	Exercise 60
2.12	Display Properties 60
2.12.1	display 61
	Exercise 61
2.13	Additional Selector Syntax 61
2.13.1	Universal Selector 62
2.13.2	Descendant Selector 62
2.13.3	Child Selector 63
	Exercise 63
2.14	Pseudo-Elements and Pseudo-Classes 64
	Exercises 64
2.15	Attribute Selectors 65
2.15.1	Matching Attribute Selector 65
2.15.2	Matching Attribute Value Selector 65
2.15.3	Substring Matching Attribute Selectors 66
	Exercise 67
2.16	Space Properties 67
2.16.1	margin 68
	Exercise 69

- 2.16.2 padding 69
- 2.16.3 border 70
- 2.16.4 border-width 71
- 2.16.5 border-style 71
- 2.16.6 border-color 72
- 2.16.7 border 72

Exercise 72

- 2.16.8 cellspacing and cellpadding 73
- 2.16.9 XHTML Height and Width 74

Exercises 74

- 2.17 Positioning 76
 - 2.17.1 position 77
- 2.18 CSS and Parsing Errors 78

Exercises 78

Chapter Summary 81

Self-Assessment 83

3

Extensible Markup Language 85

Chapter Objectives 85

- 3.1 Planning, Developing, Presenting, and Manipulating Data 85
- 3.2 Creating an XML Document 87
 - 3.2.1 Case-Sensitive and the Use of "XML" 88
- 3.3 Attributes and Subelements 88
- 3.4 Comments 89
- 3.5 PCDATA and CDATA 90
- 3.6 Processing Instructions 92
- 3.7 Entities 93
- 3.8 Encoding 94
 - Exercises 95
- 3.9 Namespaces 97
 - Exercises 98
- 3.10 XML Hierarchical Structure 102
- 3.11 XML Parsers 106
- 3.12 Modeling 107
 - Exercises 109
 - Chapter Summary 113
 - Self-Assessment 114

Document Object Model 117

Chapter Objectives 117

- 4.1 Manipulating Data 117
- 4.2 DOM Level 1 119
- 4.3 DOM Nodes 119
 - Exercises 122
- 4.4 The DOM Tree 123
- 4.5 Building DOM 124
 - 4.5.1 Examples of DOM Nodes 125
- 4.6 DOM Node Properties and Methods 126
 - 4.6.1 The Node Object 126
 - 4.6.2 Node Types 127
 - Exercise 129
- 4.7 Getting Started 130
 - 4.7.1 DOM and JavaScript with Microsoft ActiveX 131
 - 4.7.2 Subset of DOM with Microsoft ActiveX 131
 - 4.7.3 DOM and JavaScript with XML Island 132
- 4.8 Parsing and Loading 132
 - 4.8.1 File Error(s) 133
 - 4.8.2 XML Errors 134
 - Exercises 135
- 4.9 Applying Node Properties and Methods 136
 - 4.9.1 Accessing the Document Tree 136
 - Exercises 139
 - 4.9.2 Modifying the Document Tree 140
 - 4.9.3 Manipulating and Replacing Nodes from Two Documents 144
- Chapter Summary 147
- Self-Assessment 148

DOM with Larger Documents 151

Chapter Objectives 151

- 5.1 Working with Larger Documents 151
 - 5.1.1 The nodeList Object 152
 - Exercises 154
- 5.2 The Document Object 156
 - Exercises 158

- 5.2.1 The Element Object 159
- Exercise 160
- 5.2.2 getAttribute Method 160
- Exercise 161
- 5.2.3 getAttributeNode Method Example 161
- 5.2.4 getElementsByTagName(tagName) Method Example 162
- Exercise 163
- 5.2.5 Searching for a Specified Tag Name 163
- 5.2.6 Scanning All Elements Using childNodes 164
- 5.2.7 Using the removeAttribute(attributeName) Method 165
- 5.2.8 Inserting a New Attribute 166
- 5.2.9 Creating or Modifying Attributes 167
- Exercises 169
- 5.3 Adding Style with CSS 184
- Chapter Summary 184
- Self-Assessment 185

6

Extensible Stylesheet Language: Transformation 187

Chapter Objectives 187

- 6.1 XML Structure Transformation 187
- 6.2 How XSLT Works 190
- 6.3 XPath 191
- Exercise 194
- 6.4 XSLT Transformation 194
- 6.5 XSLT Elements 199
 - 6.5.1 <xsl:output> 200
 - 6.5.2 <xsl:apply-templates> 201
 - 6.5.3 <xsl:value-of> 203
 - 6.5.4 <xsl:for-each> 203
 - Exercise 209
 - 6.5.5 <xsl:sort> 209
 - Exercises 213
 - Chapter Summary 216
 - Self-Assessment 218

XSLT—Toward More Complex Applications 219

Chapter Objectives 219

7.1 Additional Elements 219

7.1.1 <xsl:element> 219

7.1.2 <xsl:attribute> 221

7.1.3 <xsl:processing-instruction> 223

7.1.4 <xsl:text> 225

7.1.5 <xsl:variable> 226

7.1.6 <xsl:if> <xsl:choose> 229

Exercises 233

Chapter Summary 243

Self-Assessment 244

Simple API for XML 245

Chapter Objectives 245

8.1 Event-Based Search 245**8.2 The Structure of SAX 247****8.3 Find Content, Send to Output 252**

Exercises 256

Chapter Summary 261

Self-Assessment 261

Extensible Stylesheet Language 263

Chapter Objectives 263

9.1 Source Content Output 263**9.2 Formatting 265****9.3 XSL-FO 266**

9.3.1 Tree Example 268

9.4 Inline-Level Formatting Objects 271**9.5 XSL and PDF Output 273**

9.5.1 Adding XSLT 276

Exercises 277

Chapter Summary 283

Self-Assessment 284

10

Server Side XML 287

Chapter Objectives 287

- 10.1 Server Technologies 287
- 10.2 Active Server Page Files 290
- 10.3 More Complex ASP 294
- 10.4 Searching on the Server 298
 - Exercise 303
- 10.5 Sending Data to the User 303
- 10.6 ASP and XSLT 304
 - Exercises 306
- 10.7 ASP and Databases 309
 - Exercise 311
 - Chapter Summary 311
 - Self-Assessment 312

11

XML Schema and Document Type Definition 313

Chapter Objectives 313

- 11.1 Validating XML Documents 313
 - 11.1.1 Complex and Simple Data Types 314
 - Exercises 316
- 11.2 Declaring Elements 316
- 11.3 More on Types 318
- 11.4 Declaring Attributes 318
 - Exercise 320
- 11.5 Schema Syntax 321
 - Exercise 327
- 11.6 DTDs 328
- 11.7 Elements 334
 - Exercise 337
- 11.8 Cardinality Operators 338
 - 11.8.1 Examples 339
 - Exercises 341
- 11.9 Attributes 343
 - Exercises 345
 - 11.9.1 Attribute Matching Values 347
 - Exercise 347

- 11.10 Attributes and DTD Notes 348
- 11.11 Entities 348
 - Exercises 351
- 11.12 DTD Shortcomings 353
 - Exercises 354
 - Chapter Summary 355
 - Self-Assessment 357

12 Wireless Markup Language 359

Chapter Objectives 359

- 12.1 Designing for Wireless Devices 359
- 12.2 Wireless Markup Language 360
 - Exercise 362
- 12.3 WML Style 362
 - Exercises 363
- 12.4 Escape Characters 364
 - Exercise 364
- 12.5 Graphics 364
 - Exercises 365
- 12.6 WML Navigation 366
- 12.7 Optimization 367
- 12.8 Do Elements 368
- 12.9 User Input 369
 - Exercise 371
- 12.10 Navigation and History Tracking 371
- 12.11 Variables 372
- 12.12 Additional Input 373
 - Exercise 374
- 12.13 Timers 374
 - Exercise 375
- 12.14 WML Hybrid Technologies 375
- 12.15 Server-Side WML 377
 - Exercise 380
 - Chapter Summary 382
 - Self-Assessment 383

13

Commercial Projects 385

Chapter Objectives 385

13.1 Client-Based Projects 385

13.2 Project 1—Frequently Asked Questions 386

- 13.2.1 The Purpose of the Product 386
- 13.2.2 Client, Customer, and Other Stakeholders 387
- 13.2.3 Users of the Product 387
- 13.2.4 Requirements Constraints 387
- 13.2.5 Naming Conventions and Definitions 388
- 13.2.6 The Scope of the Product 388
- 13.2.7 Functional and Data Requirements 388
- 13.2.8 Look and Feel Requirements 388
- 13.2.9 Usability Requirements 388
- 13.2.10 Performance Requirements 388
- 13.2.11 Operational Requirements 389
- 13.2.12 Maintainability and Portability Requirements 389
- 13.2.13 Security Requirements 389

13.3 Project 2—Construction Schedule 389

- 13.3.1 The Purpose of the Product 389
- 13.3.2 Client, Customer, and Other Stakeholders 390
- 13.3.3 Requirements Constraints 390
- 13.3.4 Naming Conventions and Definitions 390
- 13.3.5 Relevant Facts 390
- 13.3.6 Assumptions 391
- 13.3.7 The Scope of the Product 391
- 13.3.8 Functional and Data Requirements 391
- 13.3.9 Look and Feel Requirements 393
- 13.3.10 Usability Requirements 393
- 13.3.11 Performance Requirements 393
- 13.3.12 Operational Requirements 393
- 13.3.13 Maintainability and Portability Requirements 394
- 13.3.14 Security Requirements 394
- 13.3.15 Cultural and Political Requirements 394

13.4 Project 3—DigitalNet 394

- 13.4.1 The Purpose of the Product 394
- 13.4.2 Client, Customer, and Other Stakeholders 394
- 13.4.3 Users of the Product 395
- 13.4.4 Requirements Constraints 395
- 13.4.5 Assumptions 395
- 13.4.6 The Scope of the Product 395
- 13.4.7 Functional and Data Requirements 395
- 13.4.8 Look and Feel Requirements 395

13.4.9	Usability Requirements 395
13.4.10	Performance Requirements 396
13.4.11	Maintainability and Portability Requirements 396
13.4.12	Security Requirements 396
13.4.13	Cultural and Political Requirements 396
13.4.14	Off-the-Shelf Solutions 396
13.5	Project 4—Household Manufacturer 396
13.5.1	The Purpose of the Product 396
13.5.2	Client, Customer, and Other Stakeholders 397
13.5.3	Users of the Product 397
13.5.4	Requirements Constraints 398
13.5.5	The Scope of the Product 399
13.5.6	Functional and Data Requirements 399
13.5.7	Look and Feel Requirements 399
13.5.8	Usability Requirements 399
13.5.9	Performance Requirements 399
13.5.10	Operational Requirements 400
13.5.11	Maintainability and Portability Requirements 400
13.5.12	Security Requirements 400
13.6	Project 5—SmartHome 400
13.6.1	SmartHome 400
13.7	Authors' Note 401
