The background of the cover is a complex, multi-colored molecular structure. It features a central blue and white grid-like lattice, possibly representing a protein or a crystalline structure. Various colored spheres (red, green, blue, purple) are scattered throughout, representing atoms or functional groups. The overall color palette is dominated by blues, greens, and purples, with a prominent orange-red rectangular area at the top containing the title.

# Molecular Nutrition

Edited by J Zempleni  
and H Daniel

The logo for CABI Publishing, featuring a stylized 'C' and 'I' inside a circle, surrounded by a cluster of colorful spheres.

<b>Contributors</b>	ix
<b>Preface</b>	xi
<b>PART 1: METHODS IN MOLECULAR NUTRITION RESEARCH</b>	
<b>1 Genomics and Beyond</b> <i>Ji Zhang</i>	1
<b>2 Perspectives in Post-genomic Nutrition Research</b> <i>Hannelore Daniel</i>	13
<b>PART 2: CELLULAR NUTRIENT HOMEOSTASIS, PROLIFERATION AND APOPTOSIS</b>	
<b>3 Molecular Physiology of Plasma Membrane Transporters for Organic Nutrients</b> <i>Hannelore Daniel</i>	21
<b>4 Intracellular Trafficking and Compartmentalization of Vitamins and Their Physiologically Active Forms</b> <i>Donald B. McCormick</i>	43
<b>5 Nutrient Homeostasis in Proliferating Cells</b> <i>Janos Zempleni</i>	61
<b>6 Nutrients and Apoptosis</b> <i>John C. Mathers</i>	73
<b>PART 3: ROLES FOR NUTRIENTS IN SIGNAL TRANSDUCTION, GENE EXPRESSION AND PROTEOLYSIS</b>	
<b>7 Glucose Regulation of Gene Expression in Mammals</b> <i>Fabienne Foufelle and Pascal Ferré</i>	91

<b>8</b>	<b>Amino Acid-dependent Control of Transcription in Mammalian Cells</b> <i>Michael S. Kılberg, Van Leung-Pineda and Chin Chen</i>	105
<b>9</b>	<b>Fatty Acids and Gene Expression</b> <i>Ulrike Beisiegel, Joerg Heeren and Frank Schnieders</i>	121
<b>10</b>	<b>Role of RARs and RXRs in Mediating the Molecular Mechanism of Action of Vitamin A</b> <i>Dianne R. Soprano and Kenneth J. Soprano</i>	135
<b>11</b>	<b>Regulation of Gene Expression by Biotin, Vitamin B<sub>6</sub> and Vitamin C</b> <i>Krishnamurti Dakshinamurti</i>	151
<b>12</b>	<b>Selenium and Vitamin E</b> <i>Alexandra Fischer, Josef Pallauf, Jonathan Majewicz, Anne Marie Minihane and Gerald Rimbach</i>	167
<b>13</b>	<b>Sphingolipids: a New Strategy for Cancer Treatment and Prevention</b> <i>Eva M. Schmelz</i>	187
<b>14</b>	<b>The Health Effects of Dietary Isoflavones</b> <i>Thomas M. Badger, Martin J.J. Ronis and Nianbai Fang</i>	201
<b>15</b>	<b>Mechanisms of Ubiquitination and Proteasome-dependent Proteolysis in Skeletal Muscle</b> <i>Didier Attaix, Lydie Combaret, Anthony J. Kee and Daniel Taillandier</i>	219
<b>PART 4: NUCLEIC ACIDS AND NUCLEIC ACID-BINDING COMPOUNDS</b>		
<b>16</b>	<b>Diet, DNA Methylation and Cancer</b> <i>Judith K. Christman</i>	237
<b>17</b>	<b>Biotinylation of Histones in Human Cells</b> <i>Janos Zempleni</i>	267
<b>18</b>	<b>Niacin Status, Poly(ADP-ribose) Metabolism and Genomic Instability</b> <i>Jennifer C. Spronck and James B. Kirkland</i>	277
<b>PART 5: MOLECULAR EVENTS AFFECT PHYSIOLOGY</b>		
<b>19</b>	<b>Assembly of Triglyceride-transporting Plasma Lipoproteins</b> <i>Joan A. Higgins</i>	293
<b>20</b>	<b>Regulation of Cellular Cholesterol</b> <i>Ji-Young Lee, Susan H. Mitmesser and Timothy P. Carr</i>	309
<b>21</b>	<b>2002 Assessment of Nutritional Influences on Risk for Cataract</b> <i>Allen Taylor and Mark Siegal</i>	321
<b>22</b>	<b>Nutrition and Immune Function</b> <i>Parveen Yaqoob and Philip C. Calder</i>	349

**PART 6: FOODS**

- 23 Molecular Mechanisms of Food Allergy** 369  
*J. Steven Stanley and Gary A. Bannon*
- 24 Safety Assessment of Genetically Modified Foods** 381  
*Steve L. Taylor*
- Index** 395
