

CASTI HANDBOOK of
Stainless
Steels &
Nickel
Alloys

Second Edition

Stephen Lamb
Technical Editor

TABLE OF CONTENTS

1.	Some Historical Notes	1
	Monel: Ni-Cu Alloy	2
	Ferritic (Fe-Cr) Stainless Steel	4
	Austenitic (Fe-Cr-Ni) Stainless Steel	5
	Hastelloys: Alloy B (Ni-Mo) and Alloy C (Ni-Cr-Mo)	7
	Alloy 20	12
	Alloy G	14
	Alloy 825	15
	AOD and New Refining Technology	15
	Duplex Stainless Steels	16
	6-Mo Alloys	20
	Ferritic (Fe-Cr-Mo) Stainless Steels	22
	The Future?	24
2.	Cast Corrosion and Heat Resistant Alloys	31
	Overview	31
	Chemical Compositions	33
	Description of Alloy Designation System (ACI)	39
	Metallurgy	41
	Alloy Types	53
	Ferritic Stainless Steels	53
	Martensitic Stainless Steels	55
	Austenitic Stainless Steels	57
	Duplex Stainless Steel	60
	Superaustenitic Stainless Steel	62
	Cast Heat Resistant Alloys for the Hydrocarbon Processing Industry	69
3.	Martensitic and Ferritic Stainless Steels	85
	Martensitic Stainless Steels	86
	Chemical Compositions	92
	Mechanical Properties	94
	Precipitation-Hardening Stainless Steels	106
	Chemical Compositions	108
	Fabrication	117
	Mechanical Properties	121

3. Martensitic and Ferritic Stainless Steels (Continued)	
Ferritic Stainless Steels	131
Chemical Compositions	133
Mechanical Properties	135
Applications	139
4. Austenitic Stainless Steels	159
Introduction	159
General Characteristics and Applications	160
Chemical Compositions	162
Mechanical and Physical Properties	165
ASTM Specifications	167
Cast Grades	171
Mechanical Properties	174
ASME Allowable Stresses	176
Corrosion Properties	180
Fabrication	196
Basis for Alloy Selection	200
Design and Application	203
5. Duplex Stainless Steels	209
Introduction	209
Chemical Compositions	212
History	214
Mechanical Properties	216
Metallurgy as it Relates to Fabrication	218
Intermetallic and Other Phases	219
Fabrication Characteristics	221
Applications	228
Corrosion Properties	233
Acids	233
Caustic Solutions	236
Localized Corrosion	237
6. Superaustenitic Stainless Steels	243
Introduction	243
Alloy Development	244
Super Austenitic Alloys	247
Chemical Compositions	248
Mechanical Properties	249
ASTM Specifications	250

6. Superaustenitic Stainless Steels (Continued)	
Corrosion Properties	257
Pitting and Crevice Corrosion	258
Stress Corrosion Cracking	260
Corrosion in Acids	261
Fabrication Characteristics	266
Applications	269
7. Nickel-Based Alloys	287
Chemical Compositions	291
American Standards - Cross References	294
Applications	297
Water, Seawater and Atmospheric	297
Chemical Process Industry	299
Pulp and Paper	302
Natural Gas Production	303
Petrochemical and Refinery Processing	312
Gas Turbines	314
Rockets, Missiles, and Spacecraft	318
Power	319
Electrical Resistance Alloys	321
Heating/Heat Treating Equipment	325
Automotive	332
Corrosion Properties in Aqueous and High Temperature Environments	334
8. Weld Fabrication of Nickel-Containing Materials	353
Welding Characteristics of Austenitic Stainless Steels and Nickel Alloys	354
Welding Martensitic Stainless Steels	359
Welding Ferritic Stainless Steels	361
Welding Austenitic Stainless Steels	363
Welding Duplex Stainless Steels	373
Welding Precipitation Hardenable Austenitic Stainless Steels	377
Welding Nickel Alloys	379
Welding Precipitation Hardenable Nickel Alloys	382
Specialized Welding Processes or Procedures	385
Welding of Castings	392
Maximizing Weld Corrosion Resistance Through Design	395

9. Corrosion Resistant Alloys for Downhole Production Tubing	399
Use of Corrosion Inhibitors	401
Use of Corrosion Resistant Alloys	402
Stainless Steels in Production Conditions	403
Appendix 1 Abbreviated Terms	411
Appendix 2 Trade Names	413
Appendix 3 Hardness Conversion Numbers	419
Appendix 4 Unit Conversions	429
Appendix 5 Pipe Dimensions	437
Appendix 6 Stainless Steel Welding Filler Metals	443
Appendix 7 Nickel & Nickel Alloy Welding Filler Metals	463
Subject Index	473
Alloy Index	
ASTM Standards	491
Nickel Alloys	495
Cast Stainless Steels	503
Wrought Stainless Steels	505
