Preface	xxi
Contributors	xxv

SECTION I ATMOSPHERIC CHEMISTRY

1 OVERVIEW: ATMOSPHERIC CHEMISTRY	3
<i>Jack Fishman</i>	
1 Stratospheric Chemistry: Understanding the Ozone Layer	4
2 Tropospheric Chemistry: A Complex Interaction of Biogeochemical Cycles	11
3 Global Carbon Cycle	12
4 Global Carbon Budget	15
5 Atmospheric Chemistry within Global Carbon Cycle	16
6 Carbon Monoxide, Nitrogen Oxides, and Oxidizing Capacity of Troposphere	18
7 Atmospheric Chemistry and Global Warming	21
8 Stratosphere–Troposphere Chemical and Climate Interaction	21
9 Stratosphere–Troposphere Exchange	24
References	28

2	OXIDIZING POWER OF ATMOSPHERE	29
	<i>Daniel J. Jacob</i>	
1	Introduction	29
2	Hydroxyl Radical OH	31
3	Other Atmospheric Oxidants	40
	References	43
3	TROPOSPHERIC OZONE	47
	<i>Jack Fishman</i>	
1	Introduction	47
2	Chemistry of Tropospheric Ozone Formation	48
3	Global Distribution of Tropospheric Ozone	50
4	Tropospheric Ozone Trends in Nonurban Troposphere	51
5	Global Tropospheric Ozone Budget	55
6	Current Understanding of Tropospheric Ozone Budget	57
	References	58
4	NITROGEN OXIDES AND OTHER REACTIVE NITROGEN SPECIES	61
	<i>J. H. Crawford, J. D. Bradshaw, D. D. Davis, and S. C. Liu</i>	
1	Introduction	61
2	Chemical Transformations and Speciation of Reactive Nitrogen	62
3	Sources of Reactive Nitrogen	66
4	Tropospheric Distribution of Reactive Nitrogen	71
	References	74
5	CARBON MONOXIDE IN THE ATMOSPHERE	79
	<i>Paul Novelli</i>	
1	Measurement Techniques	80
2	Global CO Distributions	81
3	Global CO Budget	83
4	Tropospheric Trends	84
	References	85
6	ATMOSPHERIC METHANE	89
	<i>M. A. K. Khalil and M. J. Shearer</i>	
1	Introduction	89
2	Atmospheric Observations	92

3	Mass Balance	94
4	Sources and Sinks	97
5	Past and Present Trends	100
6	Discussion and Commentary	102
	References	103
7	 BIOGENIC NONMETHANE HYDROCARBONS	107
	<i>Marcy E. Litvak</i>	
1	Introduction	107
2	Biogenic NMVOCs	109
3	Regional and Global Distribution of Biogenic NMVOC Emissions	116
4	Summary and Conclusions	117
	References	118
8	 ATMOSPHERIC SULFUR	125
	<i>D. D. Davis, G. Chen, and M. Chin</i>	
1	Introduction	125
2	Chemical Forms, Sources, and Concentration Levels	127
3	Transformations	131
4	Global Distributions of SO ₂ and Sulfate	144
5	Stratospheric Sulfur	150
	References	152
9	 CONVECTIVE TRANSPORT	157
	<i>Kenneth E. Pickering</i>	
1	Introduction	157
2	Observations	158
3	Modeling	164
4	Summary	173
	References	173
10	 BOUNDARY LAYER PROCESSES AND FLUX MEASUREMENTS	179
	<i>Donald H. Lenschow</i>	
1	Introduction	179
2	Boundary Layer Evolution	179
3	Structure of the Boundary Layer	181
4	Scales and Processes	183

5	Observational Techniques	186
	References	190
11	SOURCES AND COMPOSITION OF AEROSOL PARTICLES	193
	<i>Richard Arimoto</i>	
1	Introduction	193
2	Mechanically Generated Aerosols	194
3	Sources Producing Primary and Secondary Particles	199
4	Concluding Remarks	208
	References	209
12	AEROSOLS: FORMATION AND MICROPHYSICS IN THE TROPOSPHERE	215
	<i>John H. Seinfeld</i>	
1	Introduction	215
2	Particle Size Distribution	216
3	Residence Times of Particles in the Troposphere	216
4	Tropospheric Aerosols	218
5	Aerosol Microphysics	222
6	Conclusion	223
	References	223
13	PHOTOCHEMICAL SMOG: OZONE AND ITS PRECURSORS	227
	<i>Sanford Sillman</i>	
1	Introduction	227
2	General Features of Photochemical Smog	228
3	Relation between Ozone, NO _x , and Hydrocarbons	233
4	Chemistry of Ozone Formation	237
	References	240
14	BIOMASS BURNING	243
	<i>Anne M. Thompson</i>	
1	Introduction	243
2	Chemical Reactions: Ozone Formation and Effects of Fires on Atmospheric Oxidizing Capacity	244
3	Results of Tropical Field Campaigns	246
4	Remote Sensing	254
	References	264

15 ACID RAIN AND DEPOSITION	269
<i>William B. Grant</i>	
1 Introduction	269
2 Sources	271
3 Transformation	273
4 Transport	274
5 Deposition	275
6 Measurement	276
7 Intensive Study Programs	277
8 Global Trends in Emissions and Deposition	278
9 Soil Changes	279
10 Effects of Forests, Aquatic Ecosystems, and Materials	279
11 Policies	282
References	283
16 FUNDAMENTALS OF VISIBILITY	285
<i>William C. Malm</i>	
1 Introduction	285
2 Theory of Radiation Transfer and Visibility	288
3 Visibility Impairment	300
4 Examples of Visibility Impairment	308
5 Value of Good Visual Air Quality	321
References	327
17 CLOUD CHEMISTRY	331
<i>Stephen E. Schwartz</i>	
1 Introduction	331
2 Cloud Physical Properties Pertinent to Cloud Chemistry	331
3 Sources of Cloudwater Composition	332
4 Uptake of Gases into Cloudwater	334
5 Reactive Uptake of Gases by Cloudwater	337
6 Coupled Mass Transport of Chemical Reaction	343
7 Summary	344
References	344
18 DRY DEPOSITION	347
<i>M. L. Wesely</i>	
1 Introduction	347

2	Formulation of Deposition Velocity	348
3	Deposition Velocity Estimates	350
4	Models of Deposition Velocity	353
	References	354
19	FATE OF ATMOSPHERIC TRACE GASES: WET DEPOSITION	357
	<i>Chris Walcek</i>	
1	Introduction	357
2	Nucleation Scavenging	358
	References	371
20	LARGE-SCALE CIRCULATION OF THE STRATOSPHERE	373
	<i>William L. Grose</i>	
1	Governing Equations	373
2	Vertical Temperature Structure	375
3	Zonal-Mean Climatology of Temperatures and Zonal Winds	377
4	Zonal-Mean Meridional Circulation	377
5	Wave Motions	379
6	Summary	381
	References	383
21	STRATOSPHERIC OZONE OBSERVATIONS	385
	<i>Jack A. Kaye and Jack Fishman</i>	
1	Introduction	385
2	Properties of Ozone Affecting Its Measurement	387
3	Total Column Measurements	387
4	Ozone Vertical Profile Measurements	394
5	Future Measurements	402
	References	404
22	AEROSOL PROCESSES IN THE STRATOSPHERE	405
	<i>Mario J. Molina</i>	
1	Introduction	405
2	Chemical Reactions on Stratospheric Aerosols	405
3	Heterogeneous Reaction Rates and Mechanisms	407
4	Thermodynamic Properties of Stratospheric Aerosols	409
5	Mechanism of Formation of Stratospheric Aerosols	412
	References	414

SECTION 2 HYDROLOGY

23	HYDROLOGY OVERVIEW	417
	<i>Soroosh Sorooshian and Martha P. L. Whitaker</i>	
1	Introduction	417
2	Hydrologic Cycle	418
3	Reservoirs	419
4	Fluxes	422
5	Modeling and Remote Sensing of the Global Hydrologic Cycle: Modeling Globally, Benefiting Locally	427
6	Stochastic Models of Hydrologic Processes	428
7	Conclusion	428
	References	429
24	RAINFALL	431
	<i>James A. Smith</i>	
1	Rain Gages	431
2	Radar	432
3	Satellite	437
	References	439
25	SNOW HYDROLOGY AND WATER RESOURCES (WESTERN UNITED STATES)	443
	<i>Roger C. Bales and Don Cline</i>	
1	Introduction	443
2	Current Hydroclimatic Conditions in the Western United States	443
3	Measurement and Estimation of Snow Properties	446
4	Estimation of Snowmelt Runoff	453
	References	457
26	EVALUATING THE SPATIAL DISTRIBUTION OF EVAPORATION	461
	<i>William P. Kustas, M. Susan Moran, and John M. Norman</i>	
1	Introduction	461
2	Short History	462
3	Conventional Approaches for Measuring Evaporation	465
4	Approaches for Estimating Evaporation Using Remote Sensing	467
5	Synthesis	480

6	Concluding Remarks	482
	References	485
27	INFILTRATION AND SOIL MOISTURE PROCESSES	493
	<i>Paul R. Houser</i>	
1	Controls on Infiltration and Soil Moisture	493
2	Principles of Soil Water Movement	497
3	Infiltration Estimation	499
4	Infiltration Measurement	501
5	Soil Moisture Measurement	502
6	Spatial and Temporal Variability	503
	References	503
28	GROUNDWATER FLOW PROCESSES	507
	<i>William W-G. Yeh</i>	
1	Introduction	507
2	Darcy's Law	508
3	Flow Equation for a Confined or Leaky Aquifer	509
4	Flow Equation for an Unconfined Aquifer	510
5	Initial and Boundary Conditions	512
6	Data Collection	513
7	Selection of Numerical Models	513
8	Parameter Estimation (Parameter Identification)	514
9	Parameterization	515
10	Parameter Uncertainty, Parameter Structure, and Optimum Parameter Dimension	516
11	Model Structure Error (Parameter Structure Error)	518
12	Generalized Inverse Procedure	519
13	Conclusions	521
	References	522
29	SURFACE RUNOFF GENERATION	527
	<i>Keith Beven</i>	
1	Introduction: Defining Runoff	527
2	Generation of Subsurface Runoff	529
3	Generation of Surface Runoff	536
4	Effect of Heterogeneity	537

5	Importance of Runoff in Grid-Scale Land Surface Modeling for GCMs	539
	References	539
30	FLOW ROUTING	543
	<i>D. L. Fread</i>	
1	Introduction	543
2	Storage Routing Models	544
3	Simplified Hydraulic Routing Models	548
4	Dynamic Routing Model	550
	References	566
31	HYDROLOGIC MODELING FOR RUNOFF FORECASTING	571
	<i>Hoshin Gupta</i>	
1	Introduction	571
2	Modeling and Complexity	571
3	Model Parameter Estimation, Calibration, and Evaluation	574
4	Forecasting and State Updating	582
5	Emerging Directions	583
32	STOCHASTIC CHARACTERISTICS AND MODELING OF HYDROCLIMATIC PROCESSES	587
	<i>José D. Salas and Roger A. Pielke, Sr.</i>	
1	Introduction	587
2	General Characteristics of Hydroclimatic Processes	590
3	Stochastic Analysis and Properties of Hydroclimatic Time Series	592
4	Stochastic Models and Modeling Techniques	597
	References	602
33	STOCHASTIC SIMULATION OF PRECIPITATION AND STREAMFLOW PROCESSES	607
	<i>José D. Salas, Jorge A. Ramírez, Paolo Burlando, and Roger A. Pielke, Sr.</i>	
1	Stochastic Simulation of Precipitation	608
2	Stochastic Simulation of Streamflow	613
3	Temporal and Spatial Disaggregation Models	618
4	Temporal and Spatial Aggregation Models	620
5	Scaling Issues and Downscaling	622
	References	634

34	STOCHASTIC FORECASTING OF PRECIPITATION AND STREAMFLOW PROCESSES	641
	<i>Juan B. Valdés, Paolo Burlando, and José D. Salas</i>	
1	Introduction	641
2	Adaptive Prediction: The Kalman Filter	643
3	Stochastic Precipitation Forecasting	645
4	Stochastic Streamflow Forecasting	654
	References	660
35	REMOTE SENSING AND GEOGRAPHICAL INFORMATION SYSTEMS APPLICATIONS IN HYDROLOGY	667
	<i>Edwin T. Engman and Nandish Mattikalli</i>	
1	Introduction	667
2	Precipitation	668
3	Snow Hydrology	669
4	Soil Moisture	670
5	Evapotranspiration	672
6	Runoff	674
7	Water and Energy Balance Models	674
8	Geographical Information Systems	675
9	Summary and Conclusions	682
	References	683
36	FLOODS	691
	<i>Steven Jennings and Eve Gruntfest</i>	
1	Introduction	691
2	Definition of Floods	692
3	Factors That Lead to Flooding	692
4	Discussion of Nonstructural Measures	701
5	Conclusion	704
	References	705
SECTION 3 SOCIETAL IMPACTS		
37	CLIMATE AND SOCIETY	711
	<i>Michael H. Glantz</i>	
	References	717

38	HOUSEHOLD FOOD SECURITY AND COPING WITH CLIMATIC VARIABILITY IN DEVELOPING COUNTRIES	719
	<i>Thomas E. Downing and Yolande Stowell</i>	
1	Introduction	719
2	Case Studies of Vulnerability and Coping	722
3	Approaches to Coping, Capacity, and Vulnerability	728
4	Coping and Climate Prediction	734
5	Conclusions	735
	References	739
39	DROUGHT IN THE U.S. GREAT PLAINS	743
	<i>Donald A. Wilhite</i>	
1	Introduction	743
2	Concept of Drought: Definition and Types	744
3	Drought Climatology of the Great Plains	746
4	Impacts of Drought	750
5	Drought Management	753
6	Summary	756
	References	756
40	FLOODS ON THE MISSISSIPPI RIVER SYSTEM OF THE UNITED STATES	759
	<i>Stanley A. Changnon</i>	
1	Introduction	759
2	Efforts to Control Flooding: 1851 to Present	763
3	Impacts from Flooding	767
4	Lessons	771
5	Summary	774
	References	775
41	DROUGHT IN NORTHWEST AFRICA	777
	<i>Will Swearingen and Abdellatif Bencherifa</i>	
1	Introduction	777
2	Increasing Vulnerability to Drought	778
3	Field Research to Assess Linkages between Human Activities and Drought	783
4	Conclusion	786
	References	786

42	HURRICANE AS AN EXTREME METEOROLOGICAL EVENT	789
	<i>Roger A. Pielke, Jr., and Roger A. Pielke, Sr.</i>	
1	Introduction: Understanding Societal Responses to Extreme Weather Events	789
2	Hurricanes Defined	791
3	Hurricanes in North American History	793
4	Geographic and Seasonal Distribution: Origin	794
5	Hurricane Impacts on Ocean and Land	796
6	Conclusion	802
	References	803
43	EL NIÑO IN AUSTRALIA	807
	<i>Neville Nicholls</i>	
1	Introduction	807
2	El Niño–Southern Oscillation Effect on Australian Climate	807
3	Discovery of Effect of El Niño–Southern Oscillation on Australia	808
4	Ecological Impacts of El Niño–Southern Oscillation	809
5	El Niño–Southern Oscillation and Vegetation Changes	812
6	Impacts of El Niño–Southern Oscillation on Australian Crops	813
	References	814
44	BIOLOGICAL AND SOCIETAL IMPACTS OF CLIMATE VARIABILITY: AN EXAMPLE FROM PERUVIAN FISHERIES	817
	<i>Kenneth Broad</i>	
1	Introduction	817
2	What Is ENSO?	818
3	Peruvian Fisheries Sector	821
4	Artisanal Subsector	822
5	Industrial Subsector	825
6	Policy Implications of Climate Information	828
	References	831
45	DROUGHT IN SOUTH AFRICA	833
	<i>Coleen Vogel</i>	
1	Introduction	833
2	Biophysical Dimensions of Drought in South Africa	833
3	Rainfall Variability	835
4	Causes of Droughts in South Africa	836
5	Classifying Droughts	839

6	Impacts of Droughts in South Africa	840
7	Drought Management and Policy Initiatives	843
8	Conclusions	844
	References	844
46	TRANSBOUNDARY FISHERIES: PACIFIC SALMON	851
	<i>Kathleen A. Miller and Mary W. Downton</i>	
1	Introduction	851
2	Salmon Abundance: Climate and Other Influences	852
3	History of Harvest Management	856
4	Recent Conflict	858
5	Current Agreement and Prospects for the Future	860
	References	862
47	TRANSBOUNDARY RIVER FLOW CHANGES	865
	<i>Roger S. Pulwarty</i>	
1	Introduction	865
2	Impacts	868
3	The Nile: Centuries of Change	871
4	The Colorado: Decadal-Scale Variations	873
5	The Paraná–Paraguay River Basin: Interannual Variability and Extreme Events	876
6	Problems	877
7	Lessons	879
8	Importance of Linking Human and Physical Aspects	881
	References	882
48	LESSONS FROM THE RISING CASPIAN	885
	<i>Igor S. Zonn</i>	
1	Introduction	885
2	Nature of Sea-Level Changes in Caspian Sea	887
3	The Caspian Rises	888
4	Societal Impacts of Sea-Level Rise	890
5	Sea-Level Change as a Global Problem	891
	References	892
49	ACID RAIN AND SOCIETY	893
	<i>Paulette Middleton</i>	
1	Introduction	893

2	Acid Rain: The Phenomenon	894
3	Definitions of Acid Rain	894
4	Sources of Acidity	895
5	Effects of Acid Rain	896
6	Social Response to Acid Rain	897
7	Current Conditions	899
8	Keeping a Broad Basis of Assessment and Action	900
	References	902
50	IMPACTS OF CLIMATE CHANGE	903
	<i>Stewart J. Cohen</i>	
1	Science-Policy Challenge	903
2	Need for Integrated Assessment of Global Climate Change	905
3	Methodology for Impact Assessment of Climate Change Scenarios	905
4	Summary of Case Studies	907
5	Lessons and a Look Ahead	909
	References	910
51	IMPACTS OF STRATOSPHERIC OZONE DEPLETION	913
	<i>Michele M. Betsill</i>	
1	Introduction	913
2	Impacts of Stratospheric Ozone Depletion	914
3	International Responses to Stratospheric Ozone Depletion	918
4	Remaining Challenges in Addressing Stratospheric Ozone Depletion	920
5	Conclusion	921
	References	922
52	TROPICAL DEFORESTATION AND CLIMATE	925
	<i>Roger A. Sedjo</i>	
1	Introduction	925
2	Human Influences in the Tropics	927
3	Values of Forests	927
4	Deforestation in the Tropics	928
5	Similarities with Earlier Deforestations	932
6	Timber Harvests in the Tropics	932

7	Renewability	933
8	Conclusions	933
	References	934
53	DESERTIFICATION	935
	<i>R. L. Heathcote</i>	
1	Introduction: Origins of Concern	935
2	Defining the Phenomenon	937
3	Documenting Desertification	940
4	Explaining Desertification	941
5	Future of Desertification	943
	References	944
54	IMAGINABLE SURPRISES	947
	<i>Stephen H. Schneider</i>	
1	Introduction	947
2	Uncertainty	948
3	Overcome or Just Manage Uncertainty	950
4	Surprise	950
5	Application to Global Change	951
	References	953
	Index	955
