

Advanced Drying Technologies

Tadeusz Kudra
Arun S. Mujumdar

Contents

<i>Preface</i>	<i>iii</i>
Part I. General Discussion: Conventional and Novel Drying Concepts	1
1. The Need for Advanced Drying Technologies	3
2. Classification and Selection Criteria: Conventional Versus Novel Technologies	11
3. Innovation and Trends in Drying Technologies	19
Part II. Selected Advanced Drying Technologies	27
4. Drying on Inert Particles	29
5. Impinging Stream Drying	49
6. Drying in Pulsed Fluid Beds	69
	v

7. Superheated Steam Drying	81
8. Airless Drying	113
9. Drying in Mobilized Bed	119
10. Drying with Shock Waves	131
11. Vacu Jet Drying System	149
12. Contact–Sorpton Drying	157
13. Sonic Drying	187
14. Pulse Combustion Drying	211
15. Heat-Pump Drying	239
Part III. Selected Techniques for Drying and Dewatering	265
16. The Carver–Greenfield Process	267
17. Drying in a Plasma Torch	271
18. Displacement Drying	281
19. Vapor Drying	291
20. Slush Drying	297
21. Atmospheric Freeze-Drying	303
Part IV. Hybrid Drying Technologies	311
22. Radio-Frequency Drying with 50-Ohm Technology	313
23. Radio-Frequency-Assisted Heat-Pump Drying	323
24. Radio-Frequency–Vacuum Drying	329
25. Microwave–Convective Drying	335

Contents	vii
26. Microwave-Vacuum Drying	347
27. Filtermat Drying	355
28. Spray-Fluid Bed-Vibrated Fluid Bed Drying	359
29. Combined Filtration and Drying	363
30. Other Hybrid Technologies	381
Part V. Other Techniques	385
31. Special Drying Technologies	387
