

# BACTERIAL PROTEIN TOXINS

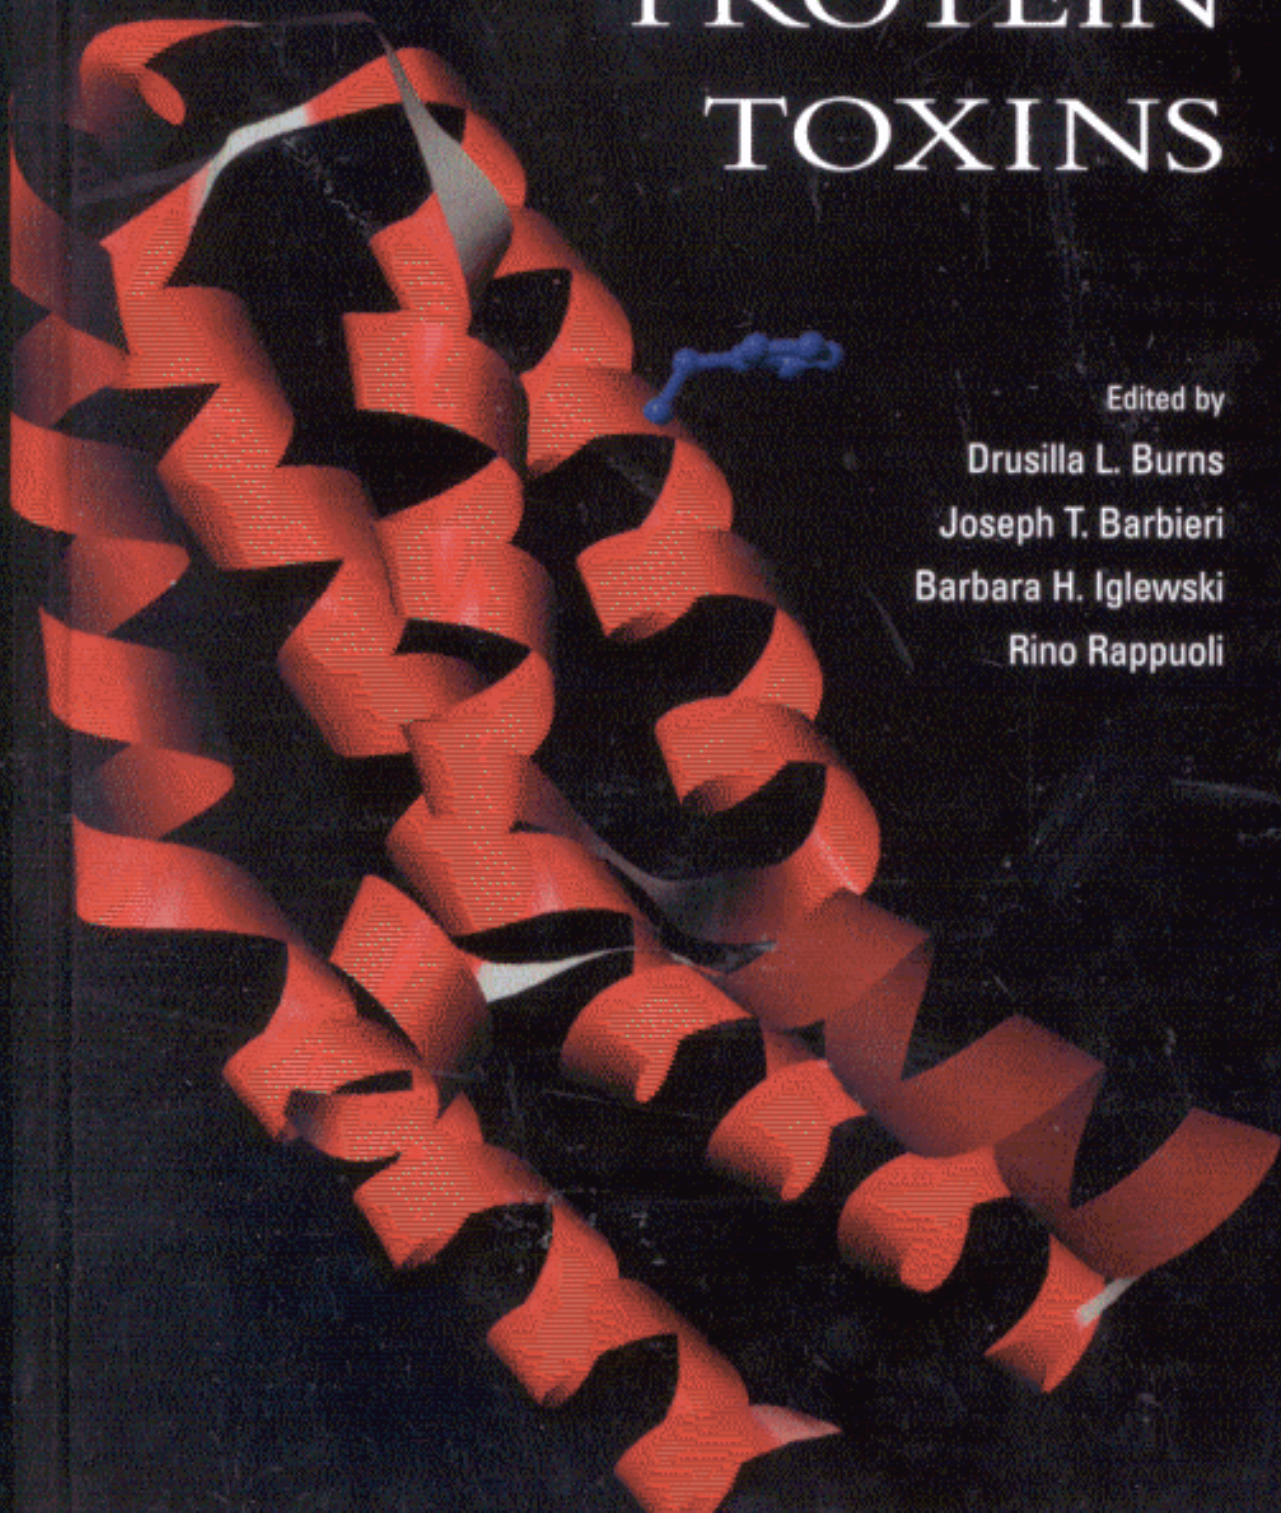

Edited by

Drusilla L. Burns

Joseph T. Barbieri

Barbara H. Iglewski

Rino Rappuoli

# CONTENTS

<i>Contributors</i>	<i>vii</i>
<i>Foreword</i> R. John Collier	<i>xi</i>
<i>Preface</i>	<i>xv</i>

## I. GENETICS AND REGULATION 1

- 1 Two-Component Systems 3  
*Scott Stibitz*
- 2 Regulation of Bacterial Toxin Synthesis by Iron 25  
*Shelley M. Payne*
- 3 AraC Family Regulators and Transcriptional Control of Bacterial Virulence Determinants 39  
*Dara W. Frank and Meredith L. Hunt*
- 4 Quorum Sensing 55  
*Everett C. Pesci and Barbara H. Iglewski*

## II. TOXIN BIOGENESIS: CROSSING BACTERIAL MEMBRANE BARRIERS 67

**Box 1:** Type V Export Systems: Proteins That Export Themselves  
*Drusilla L. Burns*

- 5 The Type I Export Mechanism 71  
*Vassilis Koronakis, Jeyanthi Eswaran, and Colin Hughes*
- 6 Toxins and Type II Secretion Systems 81  
*Maria E. Scott and Maria Sandkvist*
- 7 Type III Secretion Systems 95  
*Gregory V. Plano, Kurt Schesser, and Matthew L. Nilles*  
**Box 2** Pathogenicity Islands  
*Jörg Hacker*
- 8 Type IV Secretion Systems 115  
*Drusilla L. Burns*

## III. TOXIN DELIVERY INTO EUKARYOTIC CELLS 129

- 9 Receptors for Bacterial Toxins 131  
*Catharine B. Saelinger*  
**Box 3** Domain Structures of Bacterial Toxins  
*Stephen H. Leppla*

- Box 4 Recombinant Immunotoxins**  
*David J. FitzGerald, Robert J. Kreitman, and Ira Pastan*
- 10** Direct Penetration of Bacterial Toxins across the Plasma Membrane **149**  
*Franca R. Zaretzky, Mary C. Gray, and Erik L. Hewlett*
- 11** Transport of Toxins across Intracellular Membranes **157**  
*Kirsten Sandoig*
- 12** Transcytosis of Bacterial Toxins across Mucosal Barriers **173**  
*Bonny L. Dickinson and Wayne I. Lencer*
- Box 5 Lipid Rafts**  
*Bonny L. Dickinson and Wayne I. Lencer*
- IV. TOXIN ACTION 187**
- 13** Membrane-Damaging Toxins: Pore Formation **189**  
*F. Gidou van der Goot*  
**Box 6** The Vacuolating Toxin VacA of *Helicobacter pylori*  
*F. Gidou van der Goot*
- 14** Membrane-Damaging Toxins: Family of RTX Toxins **203**  
*Camilla Oxhamre and Agneta Richter-Dahlfors*
- 15** Bacterial Toxins that Covalently Modify Eukaryotic Proteins by ADP-Ribosylation **215**  
*Joseph T. Barbieri and Drusilla L. Burns*  
**Box 7** Discovery that the Active Sites of *Pseudomonas aeruginosa* Exotoxin A and the Heat-Labile Enterotoxin of *Escherichia coli* Are Superimposable  
*Wim Hol*
- 16** Glucosylating and Deamidating Bacterial Protein Toxins **229**  
*Klaus Aktories*
- 17** Plant and Bacterial Toxins as RNA N-Glycosidases **245**  
*Angela Melton-Celsa and Alison D. O'Brien*
- 18** Cytolethal Distending Toxin **257**  
*Lawrence A. Dreyfus*
- 19** Proteases **271**  
*Ornella Rossetto, Fiorella Tonello, and Cesare Montecucco*
- Box 8** Landmarks in Tetanus and Botulinum Research  
*Ornella Rossetto, Fiorella Tonello, and Cesare Montecucco*
- 20** Bacterial Toxins that Modulate Rho GTPase Activity **283**  
*James B. Bliska and Gloria I. Viboud*
- 21** Staphylococcal and Streptococcal Superantigens **293**  
*Patrick M. Schlievert*
- V. BACTERIAL TOXINS: FRIENDS AND FOES 309**
- 22** Toxins as Vaccines and Adjuvants **311**  
*Mariagrazia Pizza, Vega Masignani, and Rino Rappuoli*
- 23** Nefarious Uses of Bacterial Toxins **327**  
*Drusilla L. Burns and Joseph T. Barbieri*
