

PORT DESIGNER'S HANDBOOK: RECOMMENDATIONS AND GUIDELINES

Carl A. Thoresen

Contents

Foreword	xiv
Preface and acknowledgements	xv
About the author	xviii
Chapter 1 Port planning	1
1.1 Introduction, 1	
1.2 Planning procedures, 1	
1.2.1 Resolution to start planning, 3	
1.2.2 Selection of Consulting Engineers (planners), 4	
1.2.3 Scope of work, 7	
1.2.4 Registration of users, 8	
1.2.5 Recording of users' needs, 8	
1.2.6 Growth factors, 14	
1.2.7 Impact study, 14	
1.2.8 Site evaluation, 14	
1.2.9 Layout plan, 17	
1.2.10 Economic analysis, 17	
1.2.11 Work schedule, 18	
1.3 Subsurface investigations, 18	
1.3.1 General, 18	
1.3.2 Organization of the site investigations, 20	
1.3.3 Geophysical methods, 21	
1.3.4 Soundings or simple borings (probings), 23	
1.3.5 Borings with in situ tests, 24	
1.3.6 Soil and rock sampling, 26	

- 1.3.7 Field trials, 28
- 1.3.8 Laboratory tests, 29
- 1.4 Hydraulic laboratory studies, 30
- References and further reading, 35

Chapter 2 Environmental forces **36**

- 2.1 General, 36
- 2.2 Wind, 36
 - 2.2.1 Wind forces, 39
 - 2.2.2 Different wind standards and recommendations, 40
 - 2.2.3 Wind area and wind loads, 49
- 2.3 Waves, 50
 - 2.3.1 Waves near ports, 58
 - 2.3.2 Breaking waves, 59
 - 2.3.3 Wave action, 60
 - 2.3.4 Design wave, 60
 - 2.3.5 Wave forces, 63
- 2.4 Current, 65
 - 2.4.1 Current forces, 65
 - 2.4.2 Different current standards and recommendations, 66
- 2.5 Ice forces, 73
- References and further reading, 76

Chapter 3 Channels and harbour basins **78**

- 3.1 Channels and waterways, 78
 - 3.1.1 General, 78
 - 3.1.2 Straight channel, 79
 - 3.1.3 Channels with curves, 81
- 3.2 Harbour basin, 82
 - 3.2.1 General, 82
 - 3.2.2 Entrance, 82
 - 3.2.3 Stopping distance, 83
 - 3.2.4 Turning area, 84
 - 3.2.5 Berthing area, 84
- 3.3 Anchorage areas, 91
- 3.4 Grounding areas, 94
- Further reading, 94

Chapter 4 Berthing requirements **95**

- 4.1 Operational conditions, 95
 - 4.1.1 General, 95

4.1.2	Tide, 96	
4.1.3	Water depth, 97	
4.2	Navigation, 100	
4.3	Tugboat assistance, 110	
4.4	Wind and wave restrictions, 117	
4.5	Ship movements, 124	
4.6	Mooring system, 135	
4.7	Visibility, 146	
4.8	Port regulations, 147	
4.9	Availability of berth, 147	
	References and further reading, 148	
Chapter 5 Impact from ships		150
5.1	General, 150	
5.2	The theoretical or kinetic method, 151	
5.3	The empirical method, 160	
5.4	The statistical method, 160	
5.5	Abnormal impacts, 161	
5.6	Absorption of fender forces, 162	
5.7	Ship 'Hanging' on the fenders, 165	
	References and further reading, 165	
Chapter 6 Design considerations		167
6.1	General, 167	
6.2	Design life, 169	
6.3	Load factors, 172	
6.4	Material factors, 174	
6.5	Characteristic loads on berth structures, 175	
6.5.1	Temperature and shrinkage forces, 175	
6.5.2	Live loads and wheel loads, 175	
6.5.3	Seismic loads, 178	
6.6	Characteristic loads from the landside, 179	
6.7	Summary of loads acting from the seaside, 179	
	References and further reading, 180	
Chapter 7 Safety consideration		181
7.1	General, 181	
7.2	Specification safety, 181	
7.3	Design safety, 181	
7.4	Construction safety, 186	
7.5	Personnel safety, 186	

- 7.6 Operational safety, 187
- 7.7 Total safety, 187
- Further reading, 188

Chapter 8 Types of berth structures 189

- 8.1 General, 189
- 8.2 Vertical loads, 192
- 8.3 Horizontal loads, 193
 - 8.3.1 At berth deck level, 193
 - 8.3.2 Between slab and sea bottom levels, 195
 - 8.3.3 At bottom level, 197
- 8.4 Factors affecting the choice of structures, 200
 - 8.4.1 Soil conditions, 200
 - 8.4.2 Underwater work, 200
 - 8.4.3 Wave action, 200
 - 8.4.4 Design experience, 201
 - 8.4.5 Construction equipment, 201
 - 8.4.6 Materials, 202
 - 8.4.7 Construction time, 202
 - 8.4.8 Future extensions, 203
 - 8.4.9 Expansion joints, 204
 - 8.4.10 Construction costs, 204
- 8.5 Norwegian and international berth construction, 204
 - Further reading, 205

Chapter 9 Gravity-wall structures 206

- 9.1 General, 206
- 9.2 Block wall berths, 206
- 9.3 Caisson berths, 210
- 9.4 Cell berths, 212
 - References and further reading, 222

Chapter 10 Sheet pile wall structures 223

- 10.1 General, 223
- 10.2 Driving of steel sheet piles, 228
- 10.3 Simple sheet pile wall berths, 228
- 10.4 Solid platform berths, 235
- 10.5 Semi-solid platform berth, 239
- 10.6 Drainage of the steel sheet piles, 240
 - References and further reading, 240

Chapter 11	Open berth structures	242
11.1	General, 242	
11.2	Column berths, 248	
11.3	Pile berths, 255	
11.4	Lamella berths, 267	
11.5	Open berth slabs, 268	
11.5.1	Jacket form system, 270	
11.5.2	Girder systems, 271	
11.5.3	Precast concrete element system, 273	
	Further reading, 288	
Chapter 12	Berth details	289
12.1	General, 289	
12.2	Lighting, 289	
12.3	Electric power supply, 290	
12.4	Potable and raw water supply, 290	
12.5	Water drainage system, 290	
12.6	Sewage disposal, 291	
12.7	Oil and fuel interceptors, 291	
12.8	Access ladders, 291	
12.9	Handrails and guardrails, 291	
12.10	Kerbs, 291	
12.11	Lifesaving equipment, 292	
12.12	Pavements, 293	
12.12.1	General, 293	
12.12.2	The construction components, 296	
	Further reading, 302	
Chapter 13	Container terminals	304
13.1	Site location, 304	
13.2	Existing areas, 305	
13.3	Potential areas, 306	
13.4	Container ships, 306	
13.5	Terminal areas, 308	
13.5.1	Apron, 308	
13.5.2	Yard area, 309	
13.6	Ship to shore crane, 312	
13.7	Container handling systems, 319	
13.7.1	Stack height, 319	
13.7.2	Fork-lift truck and reach-stacker system, 319	
13.7.3	Straddle-carrier system, 321	

- 13.7.4 Rubber-tyre gantry and/or rail-mounted gantry systems, 323
- 13.8 The terminal area requirements, 326
- 13.8.1 The terminal container capacity, 327
- 13.8.2 The berth container capacity, 329
- 13.8.3 The berth occupancy, 332
- 13.8.4 Terminal capacity, 333
- 13.8.5 Hinterland, 334
- 13.9 Port security, 335
- 13.10 The world's largest container ports, 336
- Further reading, 336

Chapter 14 Fenders 338

- 14.1 General, 338
- 14.2 Fender requirements, 339
- 14.3 Surface-protecting and energy-absorbing fenders, 340
- 14.4 Different types of fenders, 347
- 14.5 Installation, 349
- 14.6 Effects of fender compression, 352
- 14.7 Properties of a fender, 356
- 14.7.1 Design life, 356
- 14.7.2 Fender testing, 357
- 14.7.3 Hysteresis, 358
- 14.7.4 Temperature, 359
- 14.7.5 Friction, 360
- 14.8 Single- and double-fender systems, 360
- 14.9 Fender wall, 363
- 14.10 Hull pressure, 366
- 14.11 Spacing of fenders, 368
- 14.12 Cost of fenders, 369
- 14.13 Damage to fender structures, 370
- 14.14 Calculation examples, 372
- 14.15 Information from different fender manufacturers, 374
- 14.15.1 Fentek marine fendering system, 375
- 14.15.2 Trellex fender system, 380
- Further reading, 388

Chapter 15 Erosion protection 390

- 15.1 General, 390
- 15.2 Erosion due to wave action, 392
- 15.3 Erosion due to the main propeller action, 393
- 15.4 Erosion due to the thrusters, 396

- 15.5 The required stone protection layer, 397
- 15.6 Erosion protection systems, 398
- References and further reading, 405

Chapter 16 Steel corrosion 406

- 16.1 General, 406
- 16.2 Corrosion rate, 408
- 16.3 Corrosion protection systems, 408
- Further reading, 412

Chapter 17 Underwater concreting 413

- 17.1 General, 413
- 17.2 Different methods of underwater concreting, 414
 - 17.2.1 General, 414
 - 17.2.2 Bucket concreting, 414
 - 17.2.3 Sack concreting, 414
 - 17.2.4 Container concreting, 414
 - 17.2.5 Tremie pipe concreting, 415
 - 17.2.6 Hydrovalve concreting, 415
 - 17.2.7 Pump concreting, 416
 - 17.2.8 Injection, 416
- 17.3 Tremie pipe method, 416
 - 17.3.1 General, 416
 - 17.3.2 Formwork, 417
 - 17.3.3 Spacing of tremie pipes, 420
 - 17.3.4 Pouring of concrete, 420
 - 17.3.5 Structural aspects, 427
- 17.4 Concrete production of tremie concrete, 429
 - 17.4.1 General, 429
 - 17.4.2 Cement, 430
 - 17.4.3 Water, 430
 - 17.4.4 W/C ratio, 430
 - 17.4.5 Aggregates, 430
 - 17.4.6 Workability, 431
 - 17.4.7 Admixtures, 431
 - 17.4.8 Concrete compressive strength, 431
- 17.5 The AWO-concrete, 432
 - 17.5.1 General, 432
 - 17.5.2 Mix design consequences, 433
 - 17.5.3 Mixing procedure, 434
 - 17.5.4 Casting procedures, 435

- 17.5.5 Placing and casting methods, 435
- 17.5.6 Formwork consequences, 436
- 17.5.7 Combination, 436
- 17.5.8 Hardened concrete, 437
- 17.6 Damage during construction of new structures, 437
- 17.6.1 Unskilled labour, 438
- 17.6.2 Unsatisfactory concreting equipment, 438
- 17.6.3 Deficient delivery of concrete, 439
- 17.6.4 Faulty formwork, 440
- 17.6.5 Physical damage, 441
- 17.7 Repairs of new concrete, 441
- 17.8 Concrete plant and supervision, 442
- 17.8.1 General, 442
- 17.8.2 Construction supervision, 442
- 17.8.3 Checklist for underwater concreting, 443
- References and further reading, 446

Chapter 18 Concrete deterioration

447

- 18.1 General, 447
- 18.2 Durability of concrete berth structures, 449
- 18.3 Freezing and thawing, 450
- 18.4 Erosion, 450
- 18.5 Chemical deterioration, 451
- 18.6 Corrosion of reinforcement, 451
- 18.7 Condition survey, 454
- 18.8 Surface coating, 457
- 18.9 Service life, 457
- 18.10 Overloading of the berth structure, 459
- 18.11 In situ quality control, 459
- References and further reading, 459

Chapter 19 Concrete repair

461

- 19.1 General, 461
- 19.2 Assessment, 462
- 19.3 Repairs of concrete, 463
- 19.4 Repairs in Zone 1, 464
- 19.4.1 Tremie pipe concreting, 465
- 19.4.2 Injection, 466
- 19.4.3 Micro-concrete, 467
- 19.4.4 Special epoxy, 468
- 19.4.5 Rescon method, 468

19.5	Repairs in Zone 2, 469	
19.5.1	Shotcrete or gunite, 470	
19.5.2	Tremie pipe concreting, 472	
19.6	Repairs in Zone 3, 472	
19.6.1	Patch repair, 474	
19.6.2	Cathodic protection, 477	
19.7	Chloride extraction, 482	
19.8	Service inspection, 482	
19.9	Condition of a structure, 483	
19.10	Costs of repairs, 484	
	Further reading, 485	
Chapter 20	Ship dimensions	486
20.1	General, 486	
20.2	Ship dimensions, 488	
20.3	Recommended design dimensions, 495	
20.4	Recommendation, 516	
	References and further reading, 516	
Chapter 21	Definitions	517
	References and further reading, 530	
Chapter 22	Conversion factors	531
22.1	Length, 531	
22.2	Speed, 531	
22.3	Area, 532	
22.4	Volume, 532	
22.5	Weight, 532	
22.6	Force, 532	
22.7	Force per unit length, 533	
22.8	Force per unit area, 533	
22.9	Moment, 533	
22.10	Temperatures, 533	
22.11	Useful data, 534	
Index		535
