

Amorphous Food and Pharmaceutical Systems

edited by HARRY LEVINE

Contents

Introduction – Progress in Amorphous Food and Pharmaceutical Systems 1
H. Levine

Structure and its Significance in the Application Technology of Amorphous Materials

The Concept of ‘Structure’ in Amorphous Solids from the Perspective of the Pharmaceutical Sciences 11
E. Shalaev and G. Zograf

Analytical Model for the Prediction of Glass Transition Temperature of Food Systems 31
V. Truong, B.R. Bhandari, T. Howes and B. Adhikari

Microstructural Domains in Foods: Effect of Constituents on the Dynamics of Water in Dough, as Studied by Magnetic Resonance Spectroscopy 48
Y. Kou, E.W. Ross and I.A. Taub

Supplemented State Diagram for Sucrose from Dynamic Mechanical Thermal Analysis 59
I. Braga da Cruz, W.M. MacInnes, J.C. Oliveira and F.X. Malcata

Glassy State Dynamics and its Significance for Stabilization of Labile Bioproducts

Glassy State Dynamics, its Significance for Biostabilisation and the Role of Carbohydrates 73
R. Parker, Y.M. Gunning, B. Lalloué, T.R. Noel and S.G. Ring

Influence of Physical Ageing on Physical Properties of Starchy Materials <i>D. Lourdin, P. Colonna, G. Brownsey and S. Ring</i>	88
Uptake and Transport of Gas in Microstructured Amorphous Matrices <i>A. Schoonman, J.B. Ubbink, W.M. MacInnes and H.J. Watzke</i>	98
Theories of Unstable Aqueous Systems: How Can They Help the Technologist?	
Recent Developments in the Theory of Amorphous Aqueous Systems <i>P.G. Debenedetti and J.R. Errington</i>	115
Studies on Raffinose Hydrates <i>K. Kajiwara, A. Motegi, M. Sugie, F. Franks, S. Munekawa, T. Igarashi and A. Kishi</i>	121
Comparison between WLF and VTF Expressions and Related Physical Meaning <i>A. Schiraldi</i>	131
Progress in Food Processing and Storage	
Progress in Food Processing and Storage, Based on Amorphous Product Technology <i>L. Slade and H. Levine</i>	139
The Effect of Microstructure on the Complex Glass Transition Occurring in Frozen Sucrose Model Systems and Foods <i>H.D. Goff, K. Montoya and M.E. Sahagian</i>	145
Relationship between the Glass Transition, Molecular Structure and Functional Stability of Hydrolyzed Soy Proteins <i>V. Zylberman and A.M.R. Pilosof</i>	158
A Study of Vitrification of Australian Honeys at Different Moisture Contents <i>P.A. Sopade, B. Bhandari, B. D'Arcy, P. Halley and N. Caffin</i>	169
Rational Pharmaceutical Formulation of Amorphous Products	
Rational Formulation Design – Can the Regulators be Educated? <i>T. Auffret</i>	187
Solid–Liquid State Diagrams in Pharmaceutical Lyophilisation: Crystallization of Solutes <i>E. Shalaev and F. Franks</i>	200

<i>Contents</i>	xxxi
Miscibility of Components in Frozen Solutions and Amorphous Freeze-dried Protein Formulations <i>K.-I. Izutsu and S. Kojima</i>	216
Investigations into the Amorphous and Crystalline Forms of a Development Compound <i>D. O'Sullivan, G. Steele and T.K. Austin</i>	220
Thermophysical Properties of Amorphous Dehydrated and Frozen Sugar Systems, as Affected by Salts <i>M.F. Mazzobre, M.P. Longinotti, H.R. Corti and M.P. Buera</i>	231
Glass-forming Ability of Polyphosphate Compounds and Their Stability <i>K. Kawai, T. Suzuki, T. Hagiwara and R. Takai</i>	244
Chemistry in Solid Amorphous Matrices	
Chemistry in Solid Amorphous Matrices: Implication for Biostabilization <i>M.J. Pikal</i>	257
Residual Water, its Measurement, and its Effects on Product Stability	
Residual Water in Amorphous Solids: Measurement and Effects on Stability <i>D. Lechuga-Ballesteros, D.P. Miller and J. Zhang</i>	275
A Decrease in Water Adsorption Ability of Amorphous Starch Subjected to Prolonged Ball-milling is Accompanied by Enthalpy Relaxation <i>T. Suzuki, Y.J. Kim, C. Pradistsuwana and R. Takai</i>	317
Novel Experimental Approaches to Studies of Amorphous Aqueous Systems	
Use, Misuse and Abuse of Experimental Approaches to Studies of Amorphous Aqueous Systems <i>D.S. Reid</i>	325
Glass Transition and Ice Crystallisation of Water in Polymer Gels, Studied by Oscillation DSC, XRD–DSC Simultaneous Measurements, and Raman Spectroscopy <i>N. Murase, M. Ruike, S. Yoshioka, C. Katagiri and H. Takahashi</i>	339
Subject Index	347
