## INTERNATIONAL EDITION

## **Contents**

1	Intr	oduction 1
	1-1	Mechanics Overview 1
	1-2	Applications of Statics 2
	1-3	
	1-4	Calculations and Numerical Accuracy 10
		Calculations and Dimensional Analysis 12
	1-6	SI Units for Statics and Strength of Materials 14
	Sum	mary 17
	Prob	olems 18
2	Prin	ciples of Statics 22
	2-1	Forces and the Effects of Forces 22
	2-2	Characteristics of a Force 22
	2-3	Units of a Force 23
	2-4	Types and Occurrence of Forces 23
	2-5	Scalar and Vector Quantities 24
	2-6	The Principle of Transmissibility 25
	2-7	Types of Force Systems 26
	2-8	Orthogonal Concurrent Forces: Resultants and Components 26
	Sum	mary 35
	Prob	lems 36
3	Resi	ultants of Coplanar Force Systems 40
	3-1	Resultant of Two Concurrent Forces 40
	3-2	Resultant of Three or More Concurrent Forces 45
	3-3	Moment of a Force 48

## Contents

<ul> <li>3-4 The Principle of Moments: Varignon's Theorem</li> <li>3-5 Resultants of Parallel Force Systems</li> <li>52</li> <li>3-6 Couples</li> <li>60</li> </ul>
3-7 Resultants of Nonconcurrent Force Systems 62
Summary 64
Problems 65
Equilibrium of Coplanar Force Systems 78
4-1 Introduction 78
4-2 Conditions of Equilibrium 78
4-3 The Free-Body Diagram 79
4-4 Equilibrium of Concurrent Force Systems 84
4-5 Equilibrium of Parallel Force Systems 89
4-6 Equilibrium of Nonconcurrent Force Systems 92
Summary 95
Problems 96
Analysis of Structures 108
5-1 Introduction 108
<b>5-2</b> Trusses 108
5-3 Forces in Members of Trusses 110
5-4 The Method of Joints 110
5-5 The Method of Sections 116
<b>5-6</b> Analysis of Frames 119
Summary 127
Problems 128
Friction 138
<b>6-1</b> Introduction 138
<b>6-2</b> Friction Theory 139
6-3 Angle of Friction 141
<b>6-4</b> Friction Applications 142
<b>6-5</b> Wedges 153
<b>6-6</b> Belt Friction 156
<b>6-7</b> Square-Threaded Screws 161
Summary 165
Problems 166
Centroids and Centers of Gravity 173
7-1 Introduction 173

173

177

7-2 Center of Gravity

7-3 Centroids and Centroidal Axes

Contents

	7-4 Sumi	Centroids and Centroidal Axes of Composite Areas 177 mary 184
	Prob	lems 185
8	Area	Moments of Inertia 191
	8-1	Introduction and Definitions 191
	8-2	Moment of Inertia 192
	8-3	The Transfer Formula 195
	8-4	Moment of Inertia of Composite Areas 196
	8-5	Radius of Gyration 203
	8-6	Polar Moment of Inertia 205
	Sum	mary 208
	Prob	lems 209
9	Stre	sses and Strains 215
	9-1	Introduction 215
	9-2	Tensile and Compressive Stresses 215
	9-3	Shear Stresses 223
	9-4	Tensile and Compressive Strain and Deformation 227
	9-5	
	9-6	The Relation between Stress and Strain (Hooke's Law) 230
	Sum	mary 235
	Prob	lems 237
10	Dear	sortion of Matarials 242
10	rio	perties of Materials 243
	10-1	The Tension Test 243
	10-2	The Stress-Strain Diagram 245
	10-3	Mechanical Properties of Materials 248
	10-4	Engineering Materials: Metals 251
-	10-5	Engineering Materials: Nonmetals 257
	10-6	Allowable Stresses and Calculated Stresses 259
	10-7	Factor of Safety 261
	10-8	Elastic-Inelastic Behavior 263
	Sum	mary 266
	Prob	lems 266
11	Stre	ess Considerations 270
	11-1	Poisson's Ratio 270
	11-2	Thermal Effects 274
	11-3	Members Composed of Two or More Materials 278
	11-4	Stress Concentration 283
	11 5	Strasses on Inclined Dianes 287

_					
^	^	_	+~	nte	

	11-6 Shear Stresses on Mutually Perpendicular Planes 289
	11-7 Tension and Compression Caused By Shear 290
	Summary 293
	Problems 294
12	Torsion in Circular Sections 301
	12-1 Introduction 301
	<b>12-2</b> Members in Torsion 301
	12-3 Torsional Shear Stress 304
	<b>12-4</b> Angle of Twist 311
	12-5 Transmission of Power By a Shaft 314
	Summary 317
	Problems 318
13	Shear and Bending Moment in Beams 322
	13-1 Types of Beams and Supports 322
	13-2 Types of Loads on Beams 324
	13-3 Beam Reactions 326
	13-4 Shear Force and Bending Moment 329
	13-5 Shear Diagrams 336
	13-6 Moment Diagrams 342
	13-7 Sections of Maximum Moment 347
	<b>13-8</b> Moving Loads 349
	Summary 353
	Problems 354
14	Stresses in Beams 364
	14-1 Tensile and Compressive Stresses Due to Bending 364
	14-2 The Flexure Formula 366
	14-3 Computation of Bending Stresses 369
	14-4 Shear Stresses 375
	14-5 The General Shear Formula 376
	14-6 Shear Stresses in Structural Members 379
	14-7 Beam Analysis 387
	14-8 Inelastic Bending of Beams 393
	Summary 398
	Problems 399
15	Design of Beams 405
	15-1 The Design Process 405

15-2 Design of Steel Beams

407

Contents ix

	15-3 Design of Timber Beams 416
	Summary 425
	Problems 425
16	Deflection of Beams 430
	16-1 Reasons for Calculating Beam Deflection 430
	<b>16-2</b> Curvature and Bending Moment 431
	<b>16-3</b> Methods of Calculating Deflections 434
	<b>16-4</b> The Formula Method 435
	16-5 The Moment-Area Method 439
	16-6 Moment Diagram By Parts 449
	16-7 Applications of the Moment-Area Method 453
	Summary 462
	Problems 462
17	Combined Stresses 468
	17-1 Introduction 468
	17-2 Biaxial Bending 468
	17-3 Combined Axial and Bending Stresses 471
	17-4 Eccentrically Loaded Members 476
	17-5 Maximum Eccentricity for Zero Tensile Stress 479
	17-6 Eccentric Load Not on Centroidal Axis 481
	17-7 Combined Normal and Shear Stresses 483
	<b>17-8</b> Mohr's Circle 494
	17-9 Mohr's Circle: The General State of Stress 498
	Summary 502
	Problems 504
18	Columns 513
•	<b>18-1</b> Introduction 513
	18-2 Ideal Columns 514
	18-3 Effective Length 518
	18-4 Allowable Axial Compressive Loads 520
	18-5 Allowable Stress for Axially Loaded Steel Columns (AISC) 522
	18-6 Analysis of Axially Loaded Steel Columns (AISC) 524
	18-7 Design of Axially Loaded Steel Columns (AISC) 528
	18-8 Analysis and Design of Axially Loaded Steel Machine Parts 530
	18-9 Analysis and Design of Axially Loaded Timber Columns 533
	18-10 Eccentric Loads on Steel Columns 537
	Summary 540

**Problems** 

541

19	Connections 545
	19-1 Introduction 545
	19-2 Bolts and Bolted Connections (AISC) 546
	19-3 Modes of Failure of a Bolted Connection 548
	19-4 High-Strength Bolted Connections 551
	19-5 Connections Using Common Bolts (AISC) 558
	<b>19-6</b> Introduction to Welding 559
	19-7 Strength and Behavior of Welded Connections (AISC) 560
	Summary 566
	Problems 567
20	Pressure Vessels 572
	20-1 Introduction 572
	20-2 Stresses in Thin-Walled Pressure Vessels 573
	20-3 Joints in Thin-Walled Pressure Vessels 578
	20-4 Design and Fabrication Considerations 581
	Summary 582
	Problems 582
21	Statically Indeterminate Beams 584
	21-1 Introduction 584
	21-2 Restrained Beams 584
	21-3 Propped Cantilever Beams 585
	<b>21-4</b> Fixed Beams 588
	21-5 Continuous Beams: Superposition 593
	21-6 The Theorem of Three Moments 595
	Summary 602
	Problems 603
	Appendices 606
	Notation 635
	Answers to Selected Problems 637

Index 644
