Foreword / ix

Preface / xi

Acronyms / xv

1 Introduction / 1

1.1 Evolution of Wireless Networks / 2

1.1.1 Wireless Local Area Networks / 4

1.1.2 Public Wide-Area Wireless Networks / 6

1.2 Evolution of Public Mobile Services / 13

1.2.1 First Wave of Mobile Data Services: Text-Based Instant Messaging / 14

1.2.2 Second Wave of Mobile Data Services: Low-Speed Mobile Internet Services / 15

1.2.3 Current Wave of Mobile Data Services: High-Speed and Multimedia Mobile Internet Services / 17

1.3 Motivations for IP-Based Wireless Networks / 19

1.4 3GPP, 3GPP2, and IETF / 22

1.4.1 3GPP / 22

1.4.2 3GPP2 / 24

1.4.3 IETF / 27

1.5 Organization of the Book / 29

References / 29

2 Wireless IP Network Architectures / 33

2.1 3GPP Packet Data Networks / 33

2.1.1 Network Architecture / 34

2.1.2	Protocol Reference Model /	41
2.1.3	Packet Data Protocols, Bearers, and Connections for Packet Services /	45
2.1.4	Packet Data Protocol (PDP) Context /	48
2.1.5	Steps for a Mobile to Access 3GPP Packet-Switched Services /	50
2.1.6	User Packet Routing and Transport /	52
2.1.7	Configuring PDP Addresses on Mobile Stations /	55
2.1.8	GPRS Attach Procedure /	56
2.1.9	PDP Context Activation and Modification /	59
2.1.10	Radio Access Bearer Assignment /	66
2.1.11	Packet-Switched Domain Protocol Stacks /	67
2.1.12	Accessing IP Networks through PS Domain /	78
2.2	3GPP2 Packet Data Networks /	87
2.2.1	3GPP2 Network Architecture /	87
2.2.2	3GPP2 Packet Data Network Architecture /	89
2.2.3	Protocol Reference Model /	93
2.2.4	Access to 3GPP2 Packet Data Network /	95
2.2.5	User Packet Routing and Transport /	97
2.2.6	Protocol Stacks for Packet Data Services /	98
2.3	MWIF All-IP Mobile Networks /	106
2.3.1	Network Architectures /	107
2.3.2	Access to MWIF Networks /	111
2.3.3	Session Management /	113
	References /	118

3 IP Multimedia Subsystems and Application-Level Signaling / 121

3.1	Signaling in IP Networks /	121
3.1.1	Session Initiation Protocol (SIP) /	122
3.1.2	Session Description Protocol (SDP) /	134
3.2	3GPP IP Multimedia Subsystem (IMS) /	136
3.2.1	IMS Architecture /	136
3.2.2	Mobile Station Addressing for Accessing the IMS /	139
3.2.3	Reference Interfaces /	139
3.2.4	Service Architecture /	140
3.2.5	Registration with the IMS /	143
3.2.6	Deregistration with the IMS /	146
3.2.7	End-to-End Signaling Flows for Session Control /	149
3.3	3GPP2 IP Multimedia Subsystem (IMS) /	154
	References /	158

4 Mobility Management / 161

4.1	Basic Issues in Mobility Management /	161
-----	---------------------------------------	-----

4.1.1	Impact of Naming and Addressing on Mobility Management /	163
4.1.2	Location Management /	164
4.1.3	Packet Delivery to Mobile Destinations /	169
4.1.4	Handoffs /	172
4.1.5	Roaming /	174
4.2	Mobility Management in IP Networks /	176
4.2.1	Naming and Addressing of IP Terminals /	177
4.2.2	Mobile IPv4 /	178
4.2.3	MIPv4 Regional Registration /	200
4.2.4	Paging Extensions to Mobile IPv4 /	203
4.2.5	Mobile IPv6 /	205
4.2.6	SIP-Based Mobility Management /	218
4.2.7	Cellular IP /	225
4.2.8	HAWAII /	230
4.3	Mobility Management in 3GPP Packet Networks /	239
4.3.1	Packet Mobility Management (PMM) Context and States /	241
4.3.2	Location Management for Packet-Switched Services /	245
4.3.3	Routing Area Update /	248
4.3.4	Serving RNS Relocation /	254
4.3.5	Hard Handoffs /	258
4.3.6	Paging Initiated by Packet-Switched Core Network /	261
4.3.7	Service Request Procedure /	262
4.3.8	Handoff and Roaming Between 3GPP and Wireless LANs /	264
4.4	Mobility Management in 3GPP2 Packet Data Networks /	268
4.4.1	Packet Data Service States /	271
4.4.2	Location Management for Packet Data Services /	272
4.4.3	Handoffs for Supporting Packet Data Services /	273
4.4.4	Fast Inter-PDSN Handoff /	283
4.4.5	Paging and Sending User Data to a Dormant Mobile /	288
4.5	Mobility Management in MWIF Networks /	291
4.5.1	Handoffs /	293
4.6	Comparison of Mobility Management in IP, 3GPP, and 3GPP2 Networks /	294
	References /	298

5 Security / 303

5.1	Introduction /	303
5.1.1	Different Facets of Security /	303
5.1.2	Security Attacks /	304
5.1.3	Cryptography /	305
5.1.4	Public-Key Infrastructure (PKI) /	310
5.2	Internet Security /	310
5.2.1	IP Security (IPsec) /	311

5.2.2	Authentication, Authorization, and Accounting (AAA) /	323
5.3	Security in Wireless Networks /	328
5.4	Security in IS-41 /	331
5.4.1	Secret Keys /	332
5.4.2	Authentication /	334
5.4.3	Privacy /	335
5.5	Security in GSM /	336
5.6	Security in GPRS /	338
5.7	Security in 3GPP /	339
5.7.1	Security Principles /	339
5.7.2	Security Architecture /	341
5.7.3	Network Access Security /	342
5.7.4	Network Domain Security /	349
5.7.5	Summary /	351
5.8	Security in 3GPP2 /	352
5.8.1	Network Access Security /	353
5.8.2	Network Domain Security /	358
	References /	360

6 Quality of Service / 367

6.1	Internet QoS /	367
6.1.1	Integrated Services (Int-Serv) /	368
6.1.2	Differentiated Services (Diff-Serv) /	370
6.1.3	Comparison of Int-Serv and Diff-Serv /	376
6.1.4	Policy-Based QoS Management /	377
6.2	QoS Challenges in Wireless IP Networks /	379
6.3	QoS in 3GPP /	380
6.3.1	UMTS QoS Architecture /	380
6.3.2	UMTS QoS Management /	382
6.3.3	UMTS QoS Classes /	384
6.3.4	QoS Attributes (QoS Profile) /	384
6.3.5	Management of End-to-End IP QoS /	388
6.4	QoS in 3GPP2 /	394
6.4.1	3GPP2 QoS Architecture /	395
6.4.2	3GPP2 QoS Management /	398
6.4.3	3GPP2 QoS Classes /	400
6.4.4	QoS Attributes (QoS Profile) /	401
6.4.5	Management of End-to-End IP QoS /	401
	References /	404
