

INTRODUCTION TO
BIOTECHNOLOGY
AN AGRICULTURAL REVOLUTION

Ray V. Herren

Contents

Preface xi

CHAPTER 1: The Phenomena of Biotechnology I

Introduction 2

Defining Biotechnology 5

The Need for Biotechnology 7

Current Uses of Biotechnology 10

Plant Biotechnology 10

Animal Science 11

Medicine 14

The Environment 15

Summary 16

Lab Activity: Global Use of Transgenic Crops 19

CHAPTER 2: The Historical Development of Biotechnology 21

The Early Beginnings of Biotechnology 22

Biotechnology and the Expansion of Civilization 23

Food Preservation 23

Bread Making 25

The Science of Genetics 26

The Discovery of Cells 27

Disease Prevention and Treatment 28

Reproduction 32

Gene Transfer 33

Genetic Engineering 34

Summary 35

Lab Activity: Biotechnology Time Line 38

CHAPTER 3: The Principles of Scientific Research 41

Scientific Research 42

The Scientific Method 49

Stating the Problem 49

Formulating a Hypothesis 50

Designing the Research Methodology 52

Conducting the Experiment 53

Collecting the Data 54

Analyzing the Data 55

Drawing Conclusions and Implications 57

Writing the Research Report 58

Summary 59

Lab Activity: Zymotechnology: Ancient Art and Modern Science 62

CHAPTER 4: Cells: The Foundation of Life 65

The Importance of Cells 66

Types of Cells 68

Prokaryotic Cells 69*Eukaryotic Cells* 73*Eukaryotic Cell Components* 74

Cell Reproduction 79

Meiosis 80*Mitosis* 82

Animal Stem Cells 85

Summary 87

Lab Activity: Cells: The Building Blocks of Life 90

CHAPTER 5: The Principles of Genetic Transfer 95

The Phenomena of Gene Transfer 96

DNA Sequencing 98*Genes* 99*Chromosomes* 106*RNA and the Process of Transcription and Translation* 108

Gene Mapping 108

Summary 113

Lab Activity: Extracting DNA 116

CHAPTER 6: Producing Genetically Modified Organisms 119

Introduction 120

Genetically Modified Microorganisms 122

The Process of Genetic Engineering 124*Gene Splicing in Plants* 127*Inserting the DNA* 132*Gene Splicing in Animals* 133

Summary 138

Lab Activity: Cloning the Old-Fashioned Way: Asexual Propagation of Plants 142

CHAPTER 7: Animal Cloning 145

Introduction 146

Why Do We Want to Create Clones? 146

Genetic Superiority 147*Animal and Product Uniformity* 149*Endangered Species* 150*Research* 151

The Animal Cloning Process 152

Frog Clones 152*Cloning Mammals* 154*Genetically Altered Clones* 157

Perfecting the Process 160

Differences in Clones 161

Summary 163

Lab Activity: Selective Breeding: Salt Tolerance 166

CHAPTER 8: Plant Cloning 171

Introduction 172

Advantages of Plant Cloning 172

Methods of Plant Cloning 176*Cloning by Separation and Division 176**Cloning by Cuttings 182**Layering 187**Cloning by Grafting 191**Cloning by Tissue Culture 193***Cloning Genetically Altered Organisms 196****Summary 196****Lab Activity: Herbicide-Resistant Transgenic Plants 199****CHAPTER 9: Biotechnology in Plant Science 203****Introduction 204****Insect Control through Biotechnology 204***Sterile Male Insects 205**Insect-Resistant Plants 206**Herbicide-Resistant Crops 210**Disease-Resistant Crops 213**Climatic Tolerance 215**Other Uses of Plant Biotechnology 216***Summary 222****Lab Activity: Penicillin: An Accident Waiting to Happen 225****CHAPTER 10: Biotechnology in Animal Reproduction 229****Introduction 230****Artificial Insemination 231***The Development of Artificial Insemination 233**Semen Collection and Processing 235**Control of the Estrus Cycle 237***Embryo Transfer 238***The Process of Embryo Transfer 240***Sperm Sexing 242****Summary 248****Lab Activity: Feed Preservation: Silage 251****CHAPTER 11: Biotechnology in Medicine 255****Pharming 256***Animal Pharms 259**Plant Pharming 266***Summary 271****Lab Activity: Food Preservation: Enzymes 274****CHAPTER 12: Biotechnology in the Food Industry 277****Meeting Dietary Needs 278****Preserving Foods through Biotechnology 285***Drying and Salting 286**Canning 287**Refrigeration 289***Enzyme Production 291****Summary 293****Lab Activity: Biogas Generators 296**

CHAPTER 13: Biotechnology in Ecology 299

Ecology 300

Agriculture and Our Environment 301

Detecting Environmental Pollutants 302

Bioremediation 303

Phytoremediation 306

Advantages and Limitations of Using Bio- and Phytoremediation 307

High-Yield Farming 310

Environmental Concerns of Genetically Modified Crops 314

Growing Crops in Harsh Conditions 315

Biodiesel 316

Summary 317

Lab Activity: Bioremediation Part 1: Secondary Wastewater Treatment 320

CHAPTER 14: Consumer Concerns about Biotechnology 323

Introduction 324

Food Issues 324

Environmental Concerns 329

The Altering of Animals 335

Genetic Transfer in Animals 337

The Governing of Biotechnology 339

GMO Labeling 340

Summary 340

Lab Activity: Bioremediation Part 2: Tertiary Wastewater Treatment 344

CHAPTER 15: Ethical Issues in Biotechnology 347

Ethical Dilemmas 348

Ethics in Stem Cell Research 351

Ethics in Cloning 355

Who Should Benefit from Biotechnology? 357

Patents on Life 358

Biopiracy 359

Summary 360

Lab Activity: Bioremediation Part 3: Oil-Degrading Bacteria 364

CHAPTER 16: Careers in Biotechnology 367

Making a Career Decision 368

Research and Development 369

Manufacturing and Production 375

Marketing and Sales 377

Careers in Natural Resources and the Environment 378

Careers in Social Science 379

Educational Preparation 381

Summary 385

Lab Activity: Phytoremediation 388

Glossary 393

Index 403
