

Fishes

AN INTRODUCTION TO
ICHTHYOLOGY

FIFTH EDITION

PETER B. MOYLE
JOSEPH J. CECH, JR.

CONTENTS

PREFACE xv

PART I: INTRODUCTION 1

1	INTRODUCTION	1
	Modern Fishes	1
	History of Ichthyology	5
	Fish Classification	9
	Introductory Lessons	10
	Box 1.1 Pursuing Ichthyological Knowledge	8
	Supplemental Readings	10
	Web Connections	10

PART II: STRUCTURE AND FORM 11

2	FORM AND MOVEMENT	11
	External Anatomy	11
	Body Shape	11
	Scales	15
	Fins	17
	Other Structures	19
	Skeletal System	20
	Muscular System	23
	Locomotion	26
	Energetics of Swimming	31
	Lessons from Form and Movement	34
	Box 2.1 Hormones “Remodel” Salmon Swimming Muscle	25
	Box 2.2 Exercise Is Good for Fish Too!	34
	Supplemental Readings	35
	Web Connections	35
3	RESPIRATION	37
	Gills	39
	Air-Breathing Fishes	44
	Fish Oxygen Requirements	46
	Lessons from Respiration	49
	Box 3.1 Living Without Oxygen	46

Supplemental Readings 49

Web Connections 49

4 BLOOD AND ITS CIRCULATION 51

Blood 51

Erythrocytes 52

Leukocytes 54

Hemoglobin 57

Circulation 65

Heart Structure 65

Myocardial Electrical Activity 68

Cardiac Flow 69

Cardiovascular Control 72

Secondary Circulation 74

Lessons from Blood and Circulation 75

Box 4.1 What Are the Cardiac Performance Limits of Fishes? 71

Supplemental Readings 75

Web Connections 75

5 BUOYANCY AND THERMAL REGULATION 77

Buoyancy 77

Thermal Regulation 83

Lessons from Buoyancy and Thermal Regulation 87

Box 5.1 How Do Fish Inflate Their Swimbladder for the First Time? 79

Supplemental Readings 87

Web Connections 87

6 HYDROMINERAL BALANCE 89

Osmoregulation 89

Ionic Regulation 92

Stress Responses and Effects 99

Freezing Resistance 104

Acid-Base Balance 106

Lessons from Hydromineral Balance 109

Box 6.1 Fish in "Hot Water": Warm Temperature-Related Losses of

Smolt Characteristics 98

Box 6.2 Responses to Heat Shock (and Other) Stresses: Expression of

Molecular Chaperones 101

Box 6.3 Stressful Rides: Fish Responses to Transport and Handling 102

Supplemental Readings 109

Web Connections 109

7 FEEDING, NUTRITION, DIGESTION, AND EXCRETION 111

Feeding 111

Nutrition 117

Digestion and Absorption 122

Excretion	124
Lessons from Feeding, Nutrition, Digestion, and Excretion	125
Box 7.1 Brain Peptides Help Regulate Appetite in Fishes	114
Box 7.2 Fish Use Polarized Light to Locate Prey	114
Box 7.3 Adrenaline Regulates Fish Blood Sugar	119
Supplemental Readings	126
Web Connections	126

8 GROWTH 127

Factors Affecting Growth	127
Growth Regulation	133
Growth Rate Measurements and Models	134
Lessons from Growth	139
Box 8.1 Ear Stone Analyses Reveal Life History	138
Supplemental Readings	139
Web Connections	139

9 REPRODUCTION 141

Reproductive Anatomy	141
Breeding Behavior	143
Development	148
Physiological Adaptations	151
Bioenergetics	154
Mating Systems	160
Alternative Reproductive Strategies	161
Sex Change in Fish	164
Lessons from Fish Reproduction	165
Box 9.1 High and “Dry”: Beach Spawning in the Grunion	145
Box 9.2 Feminization of Male Fish by Endocrine Disrupting Chemicals	153
Box 9.3 American Shad: Why Some Die, and Why Some Do Not	160
Box 9.4 The Mystery of An All-Male “Species”	163
Supplemental Readings	165
Web Connections	165

10 SENSORY PERCEPTION 167

Chemoreception	167
Olfaction	167
Taste	169
Acousticolateralis System	170
Hearing	171
Equilibrium and Balance	173
Lateral Line	175
Electroreception/Magnetoreception	177

Vision/Photoreception	180
Lessons from Sensory Perception	185
Box 10.1 Finding the Way Back Using Familiar Odors	169
Box 10.2 Do Large Brains Make Smarter Fish?	179
Supplemental Readings	185
Web Connections	185

11 BEHAVIOR AND COMMUNICATION 187

Migratory Behavior	187
Shoaling Behavior	192
Feeding Behavior	196
Aggressive Behavior	197
Communication	198
Lessons from Fish Behavior and Communication	206
Box 11.1 The Complex Movements of Atlantic Bluefin Tuna	190
Box 11.2 Do Fish Sleep?	198
Supplemental Readings	207
Web Connections	207

PART III: THE FISHES 209

12 SYSTEMATICS, GENETICS, AND SPECIATION 209

Taxonomic Methods	210
Genetic Variability	213
Speciation	214
Hybridization	217
Nomenclature	218
Lessons from Fish Systematics, Genetics, and Speciation	220
Box 12.1 The Nature of Species: Arctic Charr	216
Box 12.2 The Complex History of Rainbow Trout	219
Supplemental Readings	220
Web Connections	220

13 EVOLUTION 221

The Earliest Vertebrates	221
Ostracoderms	224
Placoderms	225
Chondrichthyes	226
Acanthodii	229
Osteichthyes	230
Sarcopterygii	231
Actinopterygii	235
Structural Changes in Actinopterygians	238
Evolutionary Trends Within the Teleosts	240
Lessons from Fish Evolution	242

Box 13.1	The Origin of Jaws	227
Box 13.2	Picturing Ancient Fishes	232
	Supplemental Readings	243
	Web Connections	243

14	HAGFISHES AND LAMPREYS	245
	Hagfishes	245
	Lampreys	248
	Lessons from Hagfishes and Lampreys	252
	Box 14.1	Hagfish Leather 248
	Box 14.2	The Great Sea Lamprey Invasion 252
	Supplemental Readings	253
	Web Connections	253

15	SHARKS, RAYS, AND CHIMAERAS	255
	Characteristics	257
	Adaptations	258
	Reproduction	262
	Diversity	265
	Elasmobranchii	265
	Holocephali	272
	Lessons from the Chondrichthyes	272
	Box 15.1	What Is the Hammer Head for? 261
	Box 15.2	World's Largest Fish 268
	Box 15.3	The Cookie-Cutter Shark, Ambush Predator 269
	Supplemental Readings	273
	Web Connections	273

16	RELICT BONY FISHES	275
	Sarcopterygii	276
	Dipnomorpha (Dipnoi)	276
	Actinistia: Coelacanth	277
	Actinopterygii	279
	Polypteriformes	279
	Acipenseriformes	280
	Lepisosteiformes	282
	Amiiformes	283
	Lessons from Relict Bony Fishes	284
	Box 16.1	The Second Coelacanth 278
	Supplemental Readings	284
	Web Connections	284

17	BONYTONGUES, EELS, AND HERRINGS	285
	Teleostei	285
	Osteoglossomorpha	286
	Elopomorpha	290

Elopiformes	290
Albuliformes	291
Anguilliformes	292
Saccopharyngiformes	294
Clupeomorpha	295
Lessons from Bonytongues, Eels, and Herrings	298
Box 17.1 Are All Anguillid Eels Catadromous?	293
Box 17.2 Freshwater Herrings	296
Supplemental Readings	298
Web Connections	298

18 MINNOWS, CHARACINS, AND CATFISHES 299

Gonorynchiformes	300
Otophysi	302
Cypriniformes	303
Characiformes	307
Siluriformes	308
Gymnotiformes	315
Lessons from Minnows, Characins, and Catfishes	316
Box 18.1 Common Carp: Super Fish	306
Box 18.2 The Remarkable Pangasiid Catfishes of the Mekong River	313
Box 18.3 Electric Eels: Shocking Predators	316
Supplemental Readings	317
Web Connections	317

19 SMELT, SALMON, AND PIKE 319

Argentiniiformes	320
Salmoniformes	321
Osmeroidei	321
Salmonoidei	324
Esociformes	328
Lessons from Smelt, Salmon, and Pike	329
Box 19.1 Galaxiids: Small Fish in Remote Places	323
Box 19.2 Special Names for Special Fishes	326
Supplemental Readings	329
Web Connections	329

20 ANGLERFISH, BARRACUDINAS, CODS, AND DRAGONFISHES 331

Stenopterygii	332
Cyclosquamata	335
Scopelomorpha	337
Lampridiomorpha	338
Polymixiomorpha	338
Paracanthopterygii	339

Percopsiformes	340
Ophidiiformes	340
Gadiformes	342
Batrachoidiformes	344
Lophiiformes	345
Lessons from Odds and Cods	345
Box 20.1 Fish as Parasites: The Pearlfishes	342
Supplemental Readings	347
Web Connections	347

21 MULLET, SILVERSIDES, FLYING FISH, AND KILLIFISH 349

Mugilomorpha	350
Atherinomorpha	351
Atheriniformes	351
Beloniformes	353
Cyprinodontiformes	355
Lessons from the Atherinomorpha	359
Box 21.1 Do Flying Fishes Really Fly?	355
Box 21.2 Devils Hole: Smallest Range of Any Species	357
Supplemental Readings	360
Web Connections	360

22 OPAHS, SQUIRRELFISH, DORIES, PIPEFISH, AND SCULPINS 361

Percomorpha	362
Stephanoberyciformes and Beryciformes	364
Zeiformes	365
Gasterosteiformes	365
Synbranchiformes	369
Dactylopteriformes	371
Scorpaeniformes	371
Lessons from Percomorphs	375
Box 22.1 Pregnant Males	369
Box 22.2 World's Longest-Lived Fish?	372
Supplemental Readings	376
Web Connections	376

23 PERCIFORMES: SNOOKS TO SNAKEHEADS 377

Percoidei	379
Elassomatoidei	384
Labroidei	386
Zoarcoidei	389
Notothenioidae	390

Trachinoidei	391
Blennioidei	391
Icosteoidi	393
Gobiesocoidei	393
Callionymoidei	393
Gobioidei	394
Kurtoidei	396
Acanthuroidei	396
Scombroidei	396
Stromateoidi	400
Anabantoidei	401
Channoidei	402
More Lessons from the Percomorpha	402
Box 23.1 Nature's Grand Experiment in Evolution	386
Box 23.2 Color and Sex Change in Parrotfishes and Wrasses	389
Box 23.3 World's Smallest Fishes	395
Supplemental Readings	403
Web Connections	403

24 FLOUNDERS, PUFFERS, AND MOLAS 405

Pleuronectiformes	405
Tetraodontiformes	409
Lessons from Flatfish and Puffers	411
Box 24.1 Floundering for Names	408
Box 24.2 Fugu Fame	410
Supplemental Readings	412
Web Connections	412

PART IV: ZOOGEOGRAPHY 413

25 ZOOGEOGRAPHY OF FRESHWATER FISHES 413

Zoogeographic Types	413
Zoogeographic Regions	415
African Region	416
Neotropical Region	418
Oriental Region	420
Palearctic Region	422
North American Region	422
Australian Region	431
Plate Tectonics and the Distribution of Freshwater Fishes	432
Pleistocene Glaciation	434
Lessons from Freshwater Zoogeography	435
Box 25.1 Madagascar: A Refuge for Relict Fishes	417

Box 25.2	Lake Baikal: Center of Speciation	423
Box 25.3	Mississippi River as a Refuge for Fishes	426
	Supplemental Readings	436
	Web Connections	436

26 ZOOGEOGRAPHY OF MARINE FISHES 437

	Continental Shelves	438
	Tropical Regions	438
	North Temperate Regions	442
	Arctic Region	446
	South Temperate Regions	446
	Antarctic Region	448
	Pelagic Regions	448
	Deepsea Regions	450
	Antitropical Distribution Patterns	451
	Lessons from Marine Zoogeography	452
Box 26.1	The Suez Canal: An Experiment in Zoogeography	440
Box 26.2	St. Helena: Evidence of Long-Distance Dispersal in Fishes?	442
	Supplemental Readings	453
	Web Connections	453

PART V: ECOLOGY 455

27 INTRODUCTION TO ECOLOGY 455

	Filters	455
	Predation	458
	Competition	460
	Symbiosis	463
	Parasites and Pathogens	465
	Lessons from Fish Ecology	467
Box 27.1	Cannibalism: A Special Kind of Predation	458
Box 27.2	Intraspecific Competition: An Important Regulatory Mechanism in Fishes	462
	Supplemental Readings	468
	Web Connections	468

28 TEMPERATE STREAMS 469

	Physical Factors	469
	Chemical Factors	473
	Biological Factors	473
	Zoogeographic Factors	478
	Zonation	479

Fish Assemblages	481
The Role of Fish in Stream Ecosystems	482
Lessons from Stream Fishes	483
Box 28.1 The Stoneroller: Mover and Shaker in Streams of the Eastern United States	474
Box 28.2 Shigeru Nakano's Legacy of Stream Studies	483
Supplemental Readings	484
Web Connections	484

29 TEMPERATE LAKES AND RESERVOIRS 485

Physical Factors	485
Chemical Factors	488
Temporal Factors	490
Biological Factors	492
Zoogeographic Factors	496
Fish Zones	496
Reservoirs	498
Lessons from Lake Fishes	501
Box 29.1 Fish Integrate Benthic and Pelagic Foodwebs in Lakes	493
Box 29.2 Lake Ecosystem Changes Lead to Road-Killed Bald Eagles	495
Supplemental Readings	501
Web Connections	502

30 TROPICAL FRESHWATER LAKES AND STREAMS 503

Physical Factors	504
Chemical Factors	506
Biological Factors	507
Fish Communities	510
Fish as Major Players in Tropical Ecosystems	516
Speciation in African Cichlids	517
Lessons from Tropical Fishes	520
Box 30.1 Symbiotic Interactions Among Fishes in African Lakes	510
Supplemental Readings	520
Web Connections	520

31 ESTUARIES 521

Characteristics of Estuaries	521
Estuarine Fishes	522
Factors That Affect Distribution	524
Food Webs	528
Fish Communities	529
Lessons from Estuarine Fishes	530
Box 31.1 Life on the Edge: Fish in a Newfoundland Estuary	527

Box 31.2 Long-Term Changes in a Portuguese Estuary	529
Supplemental Readings	531
Web Connections	531

32 COASTAL HABITATS 533

Rocky Intertidal Areas	533
Exposed Beaches	536
Mudflats	537
Salt Marshes	538
Mangrove Swamps	540
Sea Grass Flats	541
Kelp Beds	542
Near-Shore Rocky Bottoms	544
Near-Shore Soft Bottoms	546
Hypersaline Lagoons and Salt Ponds	551
Lessons from Coastal Fishes	552
Box 32.1 How Offshore Fisheries Affect Kelp Bed Fishes	545
Supplemental Readings	553
Web Connections	553

33 TROPICAL REEFS 555

The Reef Environment	556
Types of Reef Fishes	557
Species Interactions	561
Activity Patterns	564
Reproduction	565
Early Life History	566
Community Structure	567
Lessons from Tropical Reef Fishes	569
Box 33.1 Peaceful Coexistence Among Anemonefishes	563
Box 33.2 Stay-at-Home Cleaner Gobies	567
Supplemental Readings	570
Web Connections	570

34 EPIPELAGIC ZONE 571

Adaptations for Pelagic Life	571
Ecological Types	572
Physical Factors	573
Chemical Factors	576
Biological Factors	576
Migrations and Movements	578
Pacific Sardine	579
Lessons from Epipelagic Fishes	582
Box 34.1 Ocean Conditions and the Decline of Wild Atlantic Salmon	573
Box 34.2 Tuna FADs	575

Supplemental Readings	583
Web Connections	583

35 DEEP SEA HABITATS 585

Diversity	585
Adaptations	586
Reproductive Strategies	589
Ecology	590
Lessons from Deep Sea Fishes	595
Box 35.1 Lilliputian Fishes of the Southern Atlantic	592
Box 35.2 How Do Anglerfishes Coexist?	593
Supplemental Readings	596
Web Connections	596

36 POLAR REGIONS 597

Arctic Fishes	597
Antarctic Fishes	599
Adaptations	599
Factors Affecting Distribution	601
Fish Communities	602
Evolution of a Species Flock	604
Lessons from Polar Fishes	605
Box 36.1 Contaminants in an Arctic Shark	598
Box 36.2 Learning About the Behavior of Fish Under Ice	603
Supplemental Readings	606
Web Connections	606

37 CONSERVATION 607

Status of Fish Faunas	607
Causes of Declines in Fish Diversity and Abundance	611
Aquaculture	618
Fisheries Management	619
Reserves	621
Economic Values of Fish	622
Non-Economic Values of Fish	626
Fish Conservation in the Real World	628
Conclusions	634
The Final Lesson	635
Box 37.1 Biotic Homogenization: A World Trend	614
Box 37.2 Loss of Fish Diversity Causes Loss of Mussel Diversity	617
Box 37.3 Fish in the Bank	625
Supplemental Readings	636
Web Connections	636

BIBLIOGRAPHY 637

INDEX 711
