

Marine Microbiology

Ecology & Applications

C.B. Munn

ADVANCED TEXT

Contents

List of research focus boxes	xii
Preface	xiii
Acknowledgements	xv
Abbreviations	xvii
Glossary of key terms	xxi

1 Microbes in the marine environment	1
1.1 What is marine microbiology?	1
1.2 Biological organization and the evolution of life	2
1.2.1 Cells	2
1.2.2 The nature of viruses	2
1.2.3 Phylogenetic approaches to classifying the living world	3
1.2.4 The three-domain tree of life	3
1.3 The importance of microbes in the living world	5
1.4 The importance of size	5
1.5 The world's oceans and seas	8
1.6 Chemical and physical factors in the marine environment	9
1.6.1 Properties of seawater	9
1.6.2 Solar radiation and temperature	10
1.7 Marine microbial habitats	10
1.7.1 The water column and marine snow	10
1.7.2 Sediments	13
1.7.3 Microbial life at surfaces – biofilms and microbial mats	14
1.7.4 Sea ice	14
1.7.5 Hydrothermal vents and cold seeps	15
1.7.6 Living organisms as microbial habitats	17
References and further reading	17
2 Methods in marine microbiology	19
2.1 Sampling and experimental approaches	19
2.2 Microscopic methods	21
2.2.1 Light microscopy	21
2.2.2 Electron microscopy	21
2.2.3 Confocal laser scanning microscopy (CLSM)	21
2.2.4 Epifluorescence light microscopy (ELM)	22
2.3 Flow cytometry (FCM)	22
2.4 Antibody-labeling techniques	24
2.5 Laboratory culture	25
2.5.1 The importance of cultural conditions	25
2.5.2 Enrichment culture	26
2.5.3 Isolation	26
2.5.4 Biochemical methods for identification and taxonomy of bacteria	28

2.6	Molecular methods	30
2.6.1	<i>The impact of molecular tools in marine microbial diversity</i>	30
2.6.2	<i>Isolation of nucleic acids</i>	32
2.6.3	<i>The polymerase chain reaction (PCR)</i>	33
2.6.4	<i>DNA sequencing</i>	36
2.6.5	<i>Phylogenetic analysis</i>	37
2.6.6	<i>Community fingerprinting</i>	39
2.6.7	<i>Limitations of environmental analysis of nucleic acids</i>	39
2.6.8	<i>Genomic fingerprinting and molecular markers</i>	40
2.6.9	<i>Genomics</i>	41
2.6.10	<i>Fluorescent in situ hybridization (FISH)</i>	42
2.6.11	<i>GC ratios and DNA–DNA hybridization in bacterial taxonomy</i>	43
2.7	Detecting microbial activities in the marine environment	43
2.7.1	<i>The microenvironment</i>	43
2.7.2	<i>Microelectrodes and biosensors</i>	44
2.7.3	<i>Isotope methods</i>	44
2.7.4	<i>Measurement of specific cell constituents</i>	45
2.7.5	<i>Remote sensing</i>	45
	References and further reading	46
3	Structure of marine prokaryotes	49
3.1	Overview of the <i>Bacteria</i> and <i>Archaea</i>	49
3.2	Cell morphology and structure	49
3.3	Cyttoplasmic and internal membranes	49
3.4	Inclusion bodies	51
3.5	Prokaryotic genomes	52
3.6	Ribosomes and protein synthesis	53
3.7	Cell walls	54
3.8	Capsules and the glycocalyx	55
3.9	Motility of marine bacteria	56
3.9.1	<i>Flagella</i>	56
3.9.2	<i>Chemotaxis and related behaviors</i>	57
3.9.3	<i>Gliding motility</i>	59
3.10	Pili (fimbriae)	60
	References and further reading	60
4	Physiology of marine prokaryotes	63
4.1	Metabolic diversity and the importance of microbial communities	63
4.2	Modes of nutrition in marine prokaryotes	63
4.3	Energy-yielding processes	63
4.3.1	<i>Methods of ATP generation</i>	63
4.3.2	<i>Phototrophy and primary productivity</i>	64
4.3.3	<i>Fermentation</i>	66
4.3.4	<i>Respiration</i>	66
4.3.5	<i>Methanogenesis</i>	66
4.4	Nutrients needed for growth	67
4.4.1	<i>Macronutrients, micronutrients and trace elements</i>	67
4.4.2	<i>Carbon</i>	67
4.4.3	<i>Carbon dioxide fixation in autotrophs</i>	67
4.4.4	<i>Nitrification and denitrification</i>	68

4.4.5	<i>Nitrogen fixation</i>	69
4.4.6	<i>Sulfur and phosphorus</i>	69
4.4.7	<i>Iron</i>	70
4.5	Growth and the effects of nutrient concentration	71
4.5.1	<i>The bacterial growth cycle</i>	71
4.5.2	<i>Cell viability</i>	72
4.5.3	<i>Effects of nutrient concentration</i>	73
4.5.4	<i>Growth on surfaces – microbial interactions and biofilm communities</i>	75
4.6	Extreme environmental conditions	77
4.6.1	<i>Low temperature</i>	77
4.6.2	<i>High temperature</i>	77
4.6.3	<i>High pressure</i>	78
4.6.4	<i>Toxic effects of oxygen</i>	80
4.6.5	<i>Ultraviolet (UV) irradiation</i>	81
4.6.6	<i>High salt concentrations</i>	81
	References and further reading	82

5	Marine Bacteria	85
5.1	Approaches to the study of prokaryotic diversity	85
5.2	Prokaryote diversity in marine ecosystems revealed by culture-independent methods	86
5.2.1	<i>Cloning of 16S rRNA sequences from the environment</i>	86
5.2.2	<i>The major phylogenetic groups of planktonic Bacteria</i>	87
5.3	Anoxygenic phototrophic bacteria	88
5.3.1	<i>Purple sulfur and nonsulfur bacteria</i>	88
5.3.2	<i>Roseobacter and Erythrobacter</i>	90
5.3.3	<i>Green sulfur bacteria</i>	91
5.4	Oxygenic phototrophs – the <i>Cyanobacteria</i>	91
5.4.1	<i>Nature of the Cyanobacteria</i>	91
5.4.2	<i>Morphology and taxonomy</i>	92
5.4.3	<i>Nitrogen fixation</i>	92
5.4.4	<i>Prochlorococcus and Synechococcus</i>	93
5.4.5	<i>Microbial mats and stromatolites</i>	94
5.5	The nitrifying bacteria	94
5.6	Sulfur- and iron-oxidizing chemolithotrophs	95
5.6.1	<i>Thiobacillus, Beggiatoa, Thiothrix and Thiovulum</i>	95
5.6.2	<i>Thioploca and Thiomargarita</i>	96
5.7	Hydrogen-oxidizing bacteria	97
5.8	Aerobic methanotrophs and methylotrophs	97
5.9	<i>Pseudomonas, Alteromonas and Shewanella</i>	98
5.10	Free-living aerobic nitrogen-fixing bacteria	98
5.11	The <i>Enterobacteriaceae</i>	99
5.12	Vibrio and related genera	99
5.12.1	<i>Vibrio, Photobacterium, Aeromonas and related genera</i>	99
5.12.2	<i>Bioluminescence</i>	100
5.12.3	<i>Regulation of bioluminescence</i>	102
5.13	Rickettsias	104
5.14	Spirilla	105
5.14.1	<i>Oceanospirillum and related genera</i>	105
5.14.2	<i>Magnetotactic bacteria</i>	106
5.14.3	<i>Bdellovibrio</i>	106

5.15	Budding and stalked <i>Proteobacteria</i>	107
5.16	Planctomycetes ~ stalked bacteria	107
5.17	Sulfur- and sulfate-reducing <i>Proteobacteria</i>	108
5.18	Gram-positive <i>Bacteria</i>	109
5.18.1	<i>Endospore-formers</i> – <i>Bacillus</i> and <i>Clostridium</i>	109
5.18.2	Other Firmicutes	110
5.18.3	<i>Epulopiscium fishelsoni</i>	110
5.18.4	Actinobacteria – <i>mycobacteria and actinomycetes</i>	111
5.19	The <i>Cytophaga-Flavobacterium-Bacteroides</i> (CFB) group	111
5.20	<i>Verrucomicrobia</i>	111
5.21	<i>Spirochaetes</i>	112
5.22	'Deeply branching' hyperthermophiles	112
5.22.1	<i>Aquifex</i>	112
5.22.2	<i>Thermotoga</i>	112
	References and further reading	112
6	Marine Archaea	115
6.1	Phylogenetic groups in the domain <i>Archaea</i>	115
6.2	The <i>Euryarchaeota</i>	118
6.2.1	<i>Methanogens</i>	118
6.2.2	<i>Hyperthermophilic chemoorganotrophs</i> – <i>Thermococcus</i> and <i>Pyrococcus</i>	119
6.2.3	<i>Hyperthermophilic sulfate-reducers and iron-oxidizers</i> – <i>Archaeoglobus</i> and <i>Ferroglobus</i>	120
6.2.4	<i>Extreme halophiles</i>	120
6.3	The <i>Crenarchaeota</i>	121
6.3.1	<i>The diversity of Crenarchaeota</i>	121
6.3.2	<i>Hyperthermophiles</i> – the <i>Desulfurococcales</i>	121
6.3.3	<i>The uncultured psychrophilic marine Crenarchaeota</i>	122
	References and further reading	123
7	Marine eukaryotic microbes	125
7.1	Introduction to the protists and fungi	125
7.2	Overview of eukaryotic cell structure and function	125
7.3	Nanoplanktonic flagellates	127
7.4	Dinoflagellates	128
7.4.1	<i>Bioluminescence and biological clocks</i>	130
7.5	Ciliates	130
7.6	Diatoms	131
7.7	Coccolithophorids	133
7.8	Radiolarians and foraminifera	134
7.9	Fungi	135
	References and further reading	136
8	Marine viruses	137
8.1	The nature of marine viruses	137
8.2	Viruses infecting prokaryotes	138
8.3	Enumerating viruses and virus-like particles	139
8.4	Morphology of marine viruses	140
8.5	Estimates of virus abundance	140
8.6	Observing phage-infected cells	141
8.7	Virus inactivation	141

8.8	Host specificity	142
8.9	Lysogeny	142
8.10	Effect of viruses on plankton mortality	143
8.11	Viruses of eukaryotic plankton	145
	References and further reading	145
9	The role of microbes in ocean processes	147
9.1	Changing paradigms	147
9.2	Carbon cycling in the oceans	148
9.3	Photosynthesis and primary productivity	150
9.4	Productivity and nutrients	151
	<i>9.4.1 Nutrient limitation</i>	151
	<i>9.4.2 Microbial aspects of nitrogen cycling</i>	153
	<i>9.4.3 The importance of iron</i>	154
9.5	The microbial loop in ocean food webs	159
	<i>9.5.1 Classic and modern food webs compared</i>	159
	<i>9.5.2 The formation and fate of DOM and POM</i>	160
	<i>9.5.3 Protistan grazing</i>	161
	<i>9.5.4 Viral lysis</i>	162
9.6	Microbial processes in eutrophication of coastal waters	163
9.7	Microbial processes and climate	163
	References and further reading	164
10	Symbiotic associations	167
10.1	What is symbiosis?	167
10.2	Symbioses of microalgae with animals	167
	<i>10.2.1 Types of association</i>	167
	<i>10.2.2 Nature of dinoflagellate endosymbionts (zooxanthellae)</i>	167
	<i>10.2.3 Corals</i>	170
	<i>10.2.4 Tridacnid clams</i>	171
10.3	Symbioses of chemoautotrophic prokaryotes with animals	171
	<i>10.3.1 Chemoautotrophic endosymbionts in hydrothermal vent animals</i>	171
	<i>10.3.2 Episymbiotic bacteria on vent animals</i>	173
	<i>10.3.3 Chemoautotrophic endosymbionts in non-vent animals</i>	173
	<i>10.3.4 Phylogeny and acquisition of symbiotic bacteria</i>	173
10.4	Light organ symbioses in fish and invertebrates	175
	<i>10.4.1 Flashlight fishes and anglerfishes</i>	175
	<i>10.4.2 Sepiolids (bobtail squids)</i>	176
10.5	Microbial symbionts of sponges	177
10.6	Symbiosis and mixotrophy in protists	177
10.7	Metabolic consortia and mutualism between prokaryotes	180
	References and further reading	180
11	Human disease – bacteria and viruses	183
11.1	Mechanisms of pathogenicity	183
11.2	Indigenous marine bacteria	184
	<i>11.2.1 Vibrio cholerae</i>	184
	<i>11.2.2 Vibrio vulnificus</i>	189
	<i>11.2.3 Vibrio parahaemolyticus</i>	189
	<i>11.2.4 Clostridium botulinum</i>	190

11.2.5	<i>Scombroid fish poisoning</i>	190
11.2.6	<i>Pufferfish (Fugu) poisoning</i>	190
11.3	Health hazards from sewage pollution at sea	191
11.3.1	<i>Sewage as a source of bacterial and viral infections</i>	191
11.3.2	<i>Monitoring for potential pathogens – the indicator concept</i>	192
11.3.3	<i>Coliforms and Escherichia coli</i>	193
11.3.4	<i>Fecal streptococci (enterococci)</i>	193
11.3.5	<i>Quality standards for recreational marine waters</i>	195
11.3.6	<i>Shellfish hygiene</i>	196
11.3.7	<i>Alternative indicators</i>	198
11.3.8	<i>Direct testing for pathogens</i>	199
11.4	Heavy metal mobilization	199
	References and further reading	200
12	Human disease – toxic dinoflagellates and diatoms	203
12.1	'Red tides' and 'harmful algal blooms'	203
12.2	Shellfish poisoning	203
12.2.1	<i>Paralytic shellfish poisoning (PSP)</i>	205
12.2.2	<i>Neurotoxic shellfish poisoning (NSP)</i>	205
12.2.3	<i>Diarrhetic shellfish poisoning (DSP) and azaspiracid poisoning</i>	206
12.2.4	<i>Amnesic shellfish poisoning (ASP)</i>	207
12.3	Ciguatera fish poisoning (CFP)	208
12.4	<i>Pfiesteria piscicida</i>	209
12.5	Why do dinoflagellates and diatoms produce toxins?	211
12.6	Why are HABs and toxin-associated diseases increasing?	211
12.7	Monitoring and control of HABs	213
	References and further reading	214
13	Diseases of marine mammals	217
13.1	Difficulties of study	217
13.2	Effects of microalgal toxins	217
13.3	Virus infections	218
13.3.1	<i>Morbilliviruses</i>	218
13.3.2	<i>Other viruses</i>	220
13.4	Bacterial and fungal infections	220
13.5	Effects of environmental pollution on infectious diseases	221
13.6	Zoonoses	221
	References and further reading	222
14	Microbial diseases of fish	223
14.1	Importance in wild fish and in aquaculture	223
14.2	Disease diagnosis	223
14.3	Bacterial infections	224
14.3.1	<i>Mechanisms of pathogenicity</i>	224
14.3.2	<i>Vibrio sp.</i>	224
14.3.3	<i>Photobacterium damselaе subsp. <i>piscicida</i></i>	227
14.3.4	<i>Aeromonas salmonicida</i>	228
14.3.5	<i>Piscirickettsia salmonis</i>	229
14.3.6	<i>Renibacterium salmoninarum</i>	229
14.3.7	<i>Tenacibacter maritimus</i>	231
14.3.8	<i>Mycobacterium and Nocardia</i>	231
14.3.9	<i>Lactococcus and Streptococcus</i>	231

14.4	Viral infections	232
14.4.1	<i>Importance</i>	232
14.4.2	<i>Infectious pancreatic necrosis virus (IPNV)</i>	232
14.4.3	<i>Infectious salmon anemia virus (ISAV)</i>	232
14.4.4	<i>Other virus infections</i>	232
14.5	Control of infectious disease of fish	233
14.5.1	<i>Husbandry and health management in mariculture</i>	233
14.5.2	<i>Treatment – antimicrobial agents</i>	233
14.5.3	<i>Vaccines, immunostimulants and probiotics</i>	236
14.6	Protistan infections and HABs	240
	References and further reading	240
15	Diseases of invertebrates	243
15.1	Introduction	243
15.2	Bacterial and viral diseases of bivalve molluscs	243
15.2.1	<i>Viruses</i>	243
15.2.2	<i>Bacteria</i>	243
15.3	Bacterial and viral diseases of crustaceans	245
15.3.1	<i>Diseases in aquaculture</i>	245
15.3.2	<i>Viruses</i>	246
15.3.3	<i>Rickettsias and mycoplasmas</i>	246
15.3.4	<i>Aerococcus viridans var. homari</i>	246
15.3.5	<i>Vibrio spp.</i>	247
15.3.6	<i>Control of disease in crustaceans</i>	247
15.4	Diseases of corals	248
	References and further reading	252
16	Marine microbes and human society	255
16.1	Beneficial and detrimental effects	255
16.2	Biofouling and biodeterioration	255
16.2.1	<i>Biofilms and biofouling</i>	255
16.2.2	<i>Biodeterioration of metals and wood</i>	259
16.3	Biodegradation and bioremediation of marine pollutants	260
16.3.1	<i>Oil pollution</i>	260
16.3.1.1	<i>Sources of oil in the sea</i>	260
16.3.1.2	<i>Biodegradation</i>	260
16.3.1.3	<i>Bioremediation</i>	261
16.3.2	<i>Persistent organic pollutants and plastics</i>	263
16.3.3	<i>Other pollutants</i>	263
16.4	Environmental monitoring	264
16.5	Microbiology of fish and seafood products	264
16.6	Microbial enzymes	266
16.7	Microbial polymers	268
16.8	Biomedical and health products	268
16.9	Biomimetics, nanotechnology and bioelectronics	269
	References and further reading	271
17	Concluding remarks	273
	References and further reading	274
