# Inorganic Chemistry

SECOND  
EDITION

P.A. Cox

# CONTENTS

43302A, 2017

Abbreviations	vii
Preface	viii
<b>Section A – Atomic structure</b>	
A1 The nuclear atom	1
A2 Atomic orbitals	5
A3 Many-electron atoms	9
A4 The periodic table	12
A5 Trends in atomic properties	16
<b>Section B – Introduction to inorganic substances</b>	
B1 Electronegativity and bond type	21
B2 Chemical periodicity	25
B3 Stability and reactivity	29
B4 Oxidation and reduction	33
B5 Describing inorganic compounds	37
B6 Inorganic reactions and synthesis	41
B7 Methods of characterization	45
<b>Section C – Structure and bonding in molecules</b>	
C1 Electron pair bonds	51
C2 Molecular shapes: VSEPR	56
C3 Molecular symmetry and point groups	61
C4 Molecular orbitals: homonuclear diatomics	67
C5 Molecular orbitals: heteronuclear diatomics	72
C6 Molecular orbitals: polyatomics	76
C7 Rings and clusters	81
C8 Bond strengths	85
C9 Lewis acids and bases	89
C10 Molecules in condensed phases	92
<b>Section D – Structure and bonding in solids</b>	
D1 Introduction to solids	95
D2 Element structures	99
D3 Binary compounds: simple structures	103
D4 Binary compounds: factors influencing structure	108
D5 More complex solids	112
D6 Lattice energies	116
D7 Electrical and optical properties of solids	120
<b>Section E – Chemistry in solution</b>	
E1 Solvent types and properties	125
E2 Brønsted acids and bases	129
E3 Complex formation	133
E4 Solubility of ionic substances	137
E5 Electrode potentials	140

**Section F – Chemistry of nonmetals**

F1	Introduction to nonmetals	145
F2	Hydrogen	149
F3	Boron	153
F4	Carbon, silicon and germanium	157
F5	Nitrogen	161
F6	Phosphorus, arsenic and antimony	165
F7	Oxygen	169
F8	Sulfur, selenium and tellurium	173
F9	Halogens	177
F10	Noble gases	181

**Section G – Chemistry of non-transition metals**

G1	Introduction to non-transition metals	185
G2	Group 1: alkali metals	189
G3	Group 2: alkaline earths	193
G4	Group 12: zinc, cadmium and mercury	196
G5	Group 13: aluminum to thallium	199
G6	Group 14: tin and lead	203

**Section H – Chemistry of transition metals**

H1	Introduction to transition metals	207
H2	Ligand field theory	211
H3	3 <i>d</i> series: aqueous ions	215
H4	3 <i>d</i> series: solid compounds	218
H5	4 <i>d</i> and 5 <i>d</i> series	221
H6	Complexes: structure and isomerism	224
H7	Complexes: kinetics and mechanism	228
H8	Complexes: electronic spectra and magnetism	231
H9	Complexes: $\pi$ acceptor ligands	235
H10	Organometallic compounds	239

**Section I – Lanthanides and actinides**

I1	Lanthanum and the lanthanides	245
I2	Actinium and the actinides	248

**Section J – Environmental, biological and industrial aspects**

J1	Origin and abundance of the elements	253
J2	Geochemistry	256
J3	Bioinorganic chemistry	259
J4	Industrial chemistry: bulk inorganic chemicals	264
J5	Industrial chemistry: catalysts	267
J6	Environmental cycling and pollution	271

**Further reading** 275

**Appendix I – The elements 1–103** 277

**Appendix II – The Periodic Table of Elements** 278

**Index** 279
