

MANUFACTURING TECHNOLOGY

METAL CUTTING & MACHINE TOOLS

P N RAO

McGRAW-HILL INTERNATIONAL EDITION
Mechanical Engineering Series

Contents

Preface

vii

1 INTRODUCTION

1

- 1.1 Material Removal Processes 1
- 1.2 Types of Machine Tools 2

2 METAL CUTTING

5

- 2.1 Chip Formation 6
- 2.2 Shear Zone 10
- 2.3 Orthogonal Cutting 11
- 2.4 Shear Angle and Its Relevance 22
- 2.5 Cutting Tool Materials 26
- 2.6 Thermal Aspects 34
- 2.7 Tool Wear and Tool Life 37
- 2.8 Surface Finish 45
- 2.9 Cutting Fluids 47
- 2.10 Empirical and Analytical Determination of Cutting Forces 51
- 2.11 Economics 52
 - References* 60
 - Review Questions* 60
 - Problems* 63

3 MACHINE TOOLS

68

- 3.1 Classification of Machine Tools 68
- 3.2 Generation and Forming 70
- 3.3 Methods of Generating Surfaces 71
- 3.4 Accuracy and Finish Achievable 73
- 3.5 Basic Elements of Machine Tools 75
- 3.6 Support Structures 76
- 3.7 Guideways 78
- 3.8 General Work Holding Methods 81
 - Review Questions* 82

CENTRE LATHE**83**

- 4.1 Introduction 83
- 4.2 Constructional Features of a Centre Lathe 84
- 4.3 Aids for Support and Location 86
- 4.4 Cutting Tools 92
- 4.5 Operations Performed in a Centre Lathe 96
- 4.6 Taper Turning Methods 100
- 4.7 Thread Cutting Methods 105
- 4.8 Special Attachments 108
- 4.9 Machining Time and Power Estimation 109
- 4.10 Typical Set-ups 117
- Review Questions 119*
- Problems 121*

SPECIAL PURPOSE LATHES**123**

- 5.1 Limitations of a Centre Lathe 123
- 5.2 Capstan and Turret Lathes 124
- 5.3 Automatic Lathes 134
- 5.4 Tooling Layout and CAM Design for Automatic Lathes 140
- Review Questions 146*

RECIPROCATING MACHINE TOOLS**147**

- 6.1 Shaper 147
- 6.2 Planer 154
- 6.3 Slotter 155
- Review Questions 156*
- Problems 156*

MILLING**158**

- 7.1 Introduction 158
- 7.2 Types of Milling Machines 159
- 7.3 Milling Cutters 163
- 7.4 Milling Operations 171
- 7.5 Dividing Head 175
- 7.6 Milling Mechanics 182
- 7.7 Machining Time Estimation 186
- 7.8 Special Set-ups 189
- Review Questions 192*
- Problems 193*

8	HOLE MAKING OPERATIONS	195
	8.1 Introduction 195	
	8.2 Drilling 196	
	8.3 Reaming 207	
	8.4 Boring 209	
	8.5 Tapping 211	
	8.6 Other Hole Making Operations 213	
	<i>Review Questions</i> 213	
	<i>Problems</i> 214	
9	ABRASIVE PROCESSES	216
	9.1 Introduction 216	
	9.2 Grinding Wheel—Designation and Selection 217	
	9.3 Types of Grinding Machines 224	
	9.4 Grinding Process 229	
	9.5 Grinding Process Parameters 232	
	9.6 Creep Feed Grinding 235	
	9.7 Honing 236	
	9.8 Lapping 238	
	9.9 Other Finishing Processes 240	
	<i>Review Questions</i> 243	
	<i>Problems</i> 244	
10	OTHER MACHINE TOOLS	245
	10.1 Sawing 245	
	10.2 Broaching 250	
	10.3 Gear Cutting 253	
	<i>Review Questions</i> 261	
11	UNCONVENTIONAL MACHINING PROCESSES	263
	11.1 Need for Unconventional Processes 263	
	11.2 Electric Discharge Machining 265	
	11.3 Electrochemical Machining 281	
	11.4 Ultrasonic Machining 290	
	11.5 Chemical Machining 293	
	11.6 Laser Beam Machining 295	
	<i>Review Questions</i> 296	
12	MACHINE TOOL TESTING	298
	12.1 Introduction 298	
	12.2 Measuring Instruments Used for Testing 298	

- 12.3 Test Procedures 299
- 12.4 Acceptance Tests 299
- Review Questions* 307

13 DESIGNING FOR MACHINING 308

- 13.1 Introduction 308
- 13.2 General Guidelines for Design for Machining (DFM) 309
- 13.3 Design for Turning 311
- 13.4 Design for Hole Making Operations 314
- Review Questions* 316

14 PROCESS PLANNING 317

- 14.1 Product Cycle in Manufacturing 317
- 14.2 Product Quality 320
- 14.3 Part Print Analysis 324
- 14.4 Location Principles 327
- 14.5 Tolerance Stacking 332
- 14.6 Errors in Machining 335
- 14.7 Operation Selection 343
- 14.8 Tolerance Analysis 349
- 14.9 Computer Aided Process Planning 352
- Review Questions* 358

15 METROLOGY 360

- 15.1 Tolerances, Limits and Fits 360
- 15.2 Linear Measurement 366
- 15.3 Angular Measurement 371
- 15.4 Gauges and Gauge Design 372
- Review Questions* 374

16 NUMERICAL CONTROL OF MACHINE TOOLS 376

- 16.1 Introduction 376
- 16.2 Numerical Control 377
- 16.3 NC Machine Tools 379
- 16.4 Part Programming Fundamentals 388
- 16.5 Manual Part Programming Methods 392
- 16.6 Computer Aided Part Programming (CAP) 412
- Review Questions* 425
- Problems* 425

Bibliography 429
