

INTERNATIONAL EDITION

Business Statistics in Practice

Bowerman
O'Connell

Third Edition

www.mhhe.com/bowerman3e

McGraw-Hill

Table of Contents

Chapter 1

An Introduction to Business Statistics

- 1.1 Populations and Samples 3
- 1.2 Sampling a Population of Existing Units 4
- 1.3 Sampling a Process 12
- *1.4 Ratio, Interval, Ordinal, and Nominative Scales of Measurement 20
- App 1.1 Getting Started with MINITAB 24
- App 1.2 Getting Started with Excel 29
- App 1.3 Getting Started with MegaStat 32
- App 1.4 Introduction to Internet Exercises 36

Chapter 2

Descriptive Statistics

- 2.1 Describing the Shape of a Distribution 39
- 2.2 Describing Central Tendency 55
- 2.3 Measures of Variation 64
- 2.4 Percentiles, Quartiles, and Box-and-Whiskers Displays 75
- 2.5 Describing Qualitative Data 84
- *2.6 Using Scatter Plots to Study Relationships between Variables 91
- *2.7 Misleading Graphs and Charts 93
- *2.8 Weighted Means and Grouped Data 97
- *2.9 The Geometric Mean 101
- App 2.1 Descriptive Statistics Using MINITAB 111
- App 2.2 Descriptive Statistics Using Excel 114
- App 2.3 Descriptive Statistics Using MegaStat 117

Chapter 3

Probability

- 3.1 The Concept of Probability 121
- 3.2 Sample Spaces and Events 123
- 3.3 Some Elementary Probability Rules 130
- 3.4 Conditional Probability and Independence 137

Chapter 4

Discrete Random Variables

- 4.1 Two Types of Random Variables 153
- 4.2 Discrete Probability Distributions 154

4.3	The Binomial Distribution	165
*4.4	The Poisson Distribution	176
App 4.1	Binomial and Poisson Probabilities Using MINITAB	184
App 4.2	Binomial and Poisson Probabilities Using Excel	184
App 4.3	Binomial and Poisson Probabilities Using MegaStat	186

Chapter 5

Continuous Random Variables

5.1	Continuous Probability Distributions	189
5.2	The Uniform Distribution	191
5.3	The Normal Probability Distribution	194
*5.4	Approximating the Binomial Distribution by Using the Normal Distribution	212
*5.5	The Exponential Distribution	216
*5.6	The Cumulative Normal Table	218
App 5.1	Normal Distribution Using MINITAB	226
App 5.2	Normal Distribution Using Excel	227
App 5.3	Normal Distribution Using MegaStat	229

Chapter 6

Sampling Distributions

6.1	The Sampling Distribution of the Sample Mean	231
6.2	The Sampling Distribution of the Sample Proportion	244
App 6.1	Simulating Sampling Distributions Using MINITAB	252

Chapter 7

Confidence Intervals

7.1	Large Sample Confidence Intervals for a Population Mean	255
7.2	Small Sample Confidence Intervals for a Population Mean	264
7.3	Sample Size Determination	272
7.4	Confidence Intervals for a Population Proportion	276
*7.5	Confidence Intervals for Parameters of Finite Populations	283
*7.6	An Introduction to Survey Sampling	287
*7.7	A Comparison of Confidence Intervals and Tolerance Intervals	290
App 7.1	Confidence Intervals Using MINITAB	296
App 7.2	Confidence Intervals Using Excel	297
App 7.3	Confidence Intervals Using MegaStat	298

Chapter 8

Hypothesis Testing

8.1	The Null and Alternative Hypotheses and Errors in Hypothesis Testing	301
8.2	Large Sample Tests about a Population Mean: One-Sided Alternatives	307
8.3	Large Sample Tests about a Population Mean: Two-Sided Alternatives	317
8.4	Small Sample Tests about a Population Mean	323
8.5	Tests about a Population Proportion	328
*8.6	Type II Error Probabilities and Sample Size Determination	333

- *8.7 The Chi-Square Distribution 340
- *8.8 Statistical Inference for a Population Variance 341
- App 8.1 One-Sample Hypothesis Testing Using MINITAB 348
- App 8.2 One-Sample Hypothesis Testing Using Excel 349
- App 8.3 One-Sample Hypothesis Testing Using MegaStat 350

Chapter 9

Statistical Inferences Based on Two Samples

- 9.1 Comparing Two Population Means by Using Large, Independent Samples 353
- 9.2 Comparing Two Population Means by Using Small, Independent Samples 360
- 9.3 Comparing Two Population Variances by Using Independent Samples 367
- 9.4 Paired Difference Experiments 374
- 9.5 Comparing Two Population Proportions by Using Large, Independent Samples 382
- App 9.1 Two-Sample Hypothesis Testing Using MINITAB 392
- App 9.2 Two-Sample Hypothesis Testing Using Excel 394
- App 9.3 Two-Sample Hypothesis Testing Using MegaStat 396

Chapter 10

Experimental Design and Analysis of Variance

- 10.1 Basic Concepts of Experimental Design 399
- 10.2 One-Way Analysis of Variance 402
- 10.3 The Randomized Block Design 413
- 10.4 Two-Way Analysis of Variance 422
- App 10.1 Experimental Design and Analysis of Variance Using MINITAB 437
- App 10.2 Experimental Design and Analysis of Variance Using Excel 439
- App 10.3 Experimental Design and Analysis of Variance Using MegaStat 441

Chapter 11

Simple Linear Regression Analysis

- 11.1 The Simple Linear Regression Model 445
- 11.2 The Least Squares Estimates, and Point Estimation and Prediction 456
- 11.3 Model Assumptions and the Standard Error 465
- 11.4 Testing the Significance of the Slope and y Intercept 468
- 11.5 Confidence and Prediction Intervals 477
- 11.6 Simple Coefficients of Determination and Correlation 485
- 11.7 An F Test for the Model 491
- *11.8 Residual Analysis 493
- *11.9 Some Shortcut Formulas 510
- App 11.1 Simple Linear Regression Analysis Using MINITAB 519
- App 11.2 Simple Linear Regression Analysis Using Excel 520
- App 11.3 Simple Linear Regression Analysis Using MegaStat 522

Chapter 12

Multiple Regression and Model Building

- Part 1 Basic Multiple Regression 525
 - 12.1 The Linear Regression Model 525

12.2	The Least Squares Estimates, and Point Estimation and Prediction	533
12.3	The Mean Square Error and the Standard Error	540
12.4	Model Utility: R^2 , Adjusted R^2 , and the Overall F Test	541
12.5	Testing the Significance of an Independent Variable	544
12.6	Confidence and Prediction Intervals	548
Part 2	Using Squared and Interaction Terms	551
12.7	The Quadratic Regression Model	551
12.8	Interaction	559
Part 3	Dummy Variables and Advanced Statistical Inferences	568
12.9	Using Dummy Variables to Model Qualitative Independent Variables	568
12.10	The Partial F Test: Testing the Significance of a Portion of a Regression Model	580
Part 4	Model Building and Model Diagnostics	583
12.11	Model Building, and the Effects of Multicollinearity	583
12.12	Residual Analysis in Multiple Regression	595
12.13	Diagnostics for Detecting Outlying and Influential Observations	599
App 12.1	Multiple Linear Regression Analysis Using MINITAB	614
App 12.2	Multiple Linear Regression Analysis Using Excel	618
App 12.3	Multiple Linear Regression Analysis Using MegaStat	620

Chapter 13

Time Series Forecasting

13.1	Time Series Components and Models	625
13.2	Time Series Regression: Basic Models	626
*13.3	Time Series Regression: More Advanced Models	632
13.4	Multiplicative Decomposition	636
13.5	Exponential Smoothing	643
13.6	Forecast Error Comparisons	651
13.7	Index Numbers	652
App 13.1	Time Series Analysis Using MINITAB	661
App 13.2	Time Series Analysis Using Excel	662
App 13.3	Time Series Analysis Using MegaStat	663

Chapter 14

Process Improvement Using Control Charts

14.1	Quality: Its Meaning and a Historical Perspective	667
14.2	Statistical Process Control and Causes of Process Variation	671
14.3	Sampling a Process, Rational Subgrouping, and Control Charts	673
14.4	\bar{x} and R Charts	678
14.5	Pattern Analysis	695
14.6	Comparison of a Process with Specifications: Capability Studies	700
14.7	Charts for Fraction Nonconforming	708
*14.8	Cause-and-Effect and Defect Concentration Diagrams	714
App 14.1	Control Charts Using MINITAB	722
App 14.2	Control Charts Using Excel	723
App 14.3	Control Charts Using MegaStat	725

Chapter 15

Nonparametric Methods

- 15.1 The Sign Test: A Hypothesis Test about the Median 728
- 15.2 The Wilcoxon Rank Sum Test 732
- 15.3 The Wilcoxon Signed Ranks Test 738
- 15.4 Comparing Several Populations Using the Kruskal–Wallis H Test 742
- 15.5 Spearman’s Rank Correlation Coefficient 744
- App 15.1 Nonparametric Methods Using MINITAB 750
- App 15.2 Nonparametric Methods Using MegaStat 753

Chapter 16

Chi-Square Tests

- 16.1 Chi-Square Goodness of Fit Tests 757
- 16.2 A Chi-Square Test for Independence 766
- App 16.1 Chi-Square Tests Using MINITAB 776
- App 16.2 Chi-Square Tests Using Excel 778
- App 16.3 Chi-Square Tests Using MegaStat 780

Chapter 17

Decision Theory

- 17.1 Bayes’ Theorem 783
- 17.2 Introduction to Decision Theory 788
- 17.3 Decision Making Using Posterior Probabilities 794
- 17.4 Introduction to Utility Theory 800

Appendix A

Statistical Tables 806

Appendix B

Counting Rules 836

Appendix C

The Hypergeometric Distribution 838

Appendix D

Properties of the Mean and the Variance of a Random Variable, and the Covariance 839

Appendix E

Derivations of the Mean and Variance of \bar{x} and \hat{p} 842

Appendix F (Part 1)

Stratified Random Sampling 843

Answers to Most Odd-Numbered Exercises 847

References 855

Index 857

Appendix F (Part 2) On CD-ROM

Cluster Sampling and Ratio Estimation

Appendix G On CD-ROM

Using Matrix Algebra to Perform Regression
Calculations

Appendix H On CD-ROM

The Regression Approach to Two-Way
Analysis of Variance

Appendix I On CD-ROM

Factor Analysis, Cluster Analysis, and
Multidimensional Scaling

Appendix J On CD-ROM

The Box–Jenkins Methodology

Appendix K On CD-ROM

Holt–Winters' Models

Appendix L On CD-ROM

Individuals Charts and c Charts

Appendix M On CD-ROM

List of Cases
