Preface xv
About the Authors xxii

Chapter 1 **Data and Statistics 1**

Statistics in Practice: Business Week 2

- 1.1 Applications in Business and Economics 3**
 - Accounting 3
 - Finance 4
 - Marketing 4
 - Production 4
 - Economics 4
- 1.2 Data 5**
 - Elements, Variables, and Observations 6
 - Scales of Measurement 6
 - Qualitative and Quantitative Data 7
 - Cross-Sectional and Time Series Data 7
- 1.3 Data Sources 8**
 - Existing Sources 8
 - Statistical Studies 11
 - Data Acquisition Errors 11
- 1.4 Descriptive Statistics 12**
- 1.5 Statistical Inference 14**
- 1.6 Statistical Analysis Using Microsoft Excel 16**
 - Data Sets and Excel Worksheets 16
 - Using Excel for Statistical Analysis 18
- Summary 19**
- Glossary 20**
- Exercises 21**

Chapter 2 **Descriptive Statistics: Tabular and Graphical Methods 27**

Statistics in Practice: Colgate-Palmolive Company 28

- 2.1 Summarizing Qualitative Data 29**
 - Frequency Distribution 29
 - Using Excel's COUNTIF Function to Construct a Frequency Distribution 30
 - Relative Frequency and Percent Frequency Distributions 31
 - Using Excel to Construct Relative Frequency and Percent Frequency Distributions 32
 - Bar Graphs and Pie Charts 33
 - Using Excel's Chart Wizard to Construct Bar Graphs and Pie Charts 34
 - Exercises 36

- 2.2 Summarizing Quantitative Data 39**
 - Frequency Distribution 39
 - Using Excel's FREQUENCY Function to Construct a Frequency Distribution 41
 - Relative Frequency and Percent Frequency Distributions 42
 - Histogram 42
 - Using Excel's Chart Wizard to Construct a Histogram 44
 - Cumulative Distributions 45
 - Ogive 47
 - Exercises 49
- 2.3 Exploratory Data Analysis: The Stem-and-Leaf Display 52**
 - Exercises 56
- 2.4 Crosstabulations and Scatter Diagrams 57**
 - Crosstabulation 57
 - Using Excel's PivotTable Report to Construct a Crosstabulation 59
 - Scatter Diagram and Trendline 64
 - Using Excel's Chart Wizard to Construct a Scatter Diagram and a Trendline 64
 - Exercises 67
- Summary 71**
- Glossary 72**
- Key Formulas 73**
- Supplementary Exercises 73**
- Case Problem Consolidated Foods 79**
- Appendix 2.1 Using Excel's Histogram Tool to Construct a Frequency Distribution and Histogram 80**

Chapter 3

Descriptive Statistics: Numerical Methods 84

Statistics in Practice: Small Fry Design 85

- 3.1 Measures of Location 86**
 - Mean 86
 - Median 88
 - Mode 89
 - Using Excel to Compute the Mean, Median, and Mode 89
 - Percentiles 90
 - Quartiles 92
 - Using Excel to Sort Data and to Compute Percentiles and Quartiles 93
 - Exercises 94
- 3.2 Measures of Variability 98**
 - Range 99
 - Interquartile Range 99
 - Variance 99
 - Standard Deviation 101
 - Using Excel to Compute the Sample Variance and Sample Standard Deviation 103
 - Coefficient of Variation 104
 - Using Excel's Descriptive Statistics Tool 104
 - Exercises 106

- 3.3 Measures of Relative Location and Detecting Outliers 108**
 - z-Scores 108
 - Chebyshev's Theorem 109
 - Empirical Rules 110
 - Detecting Outliers 111
 - Exercises 112
- 3.4 Exploratory Data Analysis 114**
 - Five-Number Summary 115
 - Box Plot 115
 - Exercises 116
- 3.5 Measures of Association Between Two Variables 118**
 - Covariance 120
 - Interpretation of the Covariance 121
 - Correlation Coefficient 122
 - Interpretation of the Correlation Coefficient 124
 - Using Excel to Compute the Covariance and the Correlation Coefficient 126
 - Exercises 127
- 3.6 The Weighted Mean and Working with Grouped Data 130**
 - Weighted Mean 130
 - Grouped Data 131
 - Exercises 134
- Summary 135**
- Glossary 136**
- Key Formulas 137**
- Supplementary Exercises 139**
- Case Problem 1 Consolidated Foods, Inc. 145*
- Case Problem 2 National Health Care Association 146*
- Case Problem 3 Business Schools of Asia-Pacific 147*

Chapter 4

Introduction to Probability 150

Statistics in Practice: Morton International 151

- 4.1 Experiments, Counting Rules, and Assigning Probabilities 152**
 - Counting Rules, Combinations, and Permutations 153
 - Assigning Probabilities 157
 - Probabilities for the KP&L Project 159
 - Exercises 161
- 4.2 Events and Their Probabilities 163**
 - Exercises 165
- 4.3 Some Basic Relationships of Probability 167**
 - Complement of an Event 167
 - Addition Law 168
 - Exercises 171
- 4.4 Conditional Probability 173**
 - Independent Events 177

- Multiplication Law 177
- Exercises 179
- 4.5 Bayes' Theorem 181**
 - Tabular Approach 185
 - Using Excel to Compute Posterior Probabilities 186
 - Exercises 187
- Summary 188**
- Glossary 188**
- Key Formulas 189**
- Supplementary Exercises 190**
- Case Problem Hamilton County Judges 195**

Chapter 5

Discrete Probability Distributions 197

- Statistics in Practice: Citibank 198**
- 5.1 Random Variables 199**
 - Discrete Random Variables 199
 - Continuous Random Variables 200
 - Exercises 201
- 5.2 Discrete Probability Distributions 202**
 - Exercises 205
- 5.3 Expected Value and Variance 207**
 - Expected Value 207
 - Variance 208
 - Using Excel to Compute the Expected Value, Variance, and Standard Deviation 209
 - Exercises 210
- 5.4 Binomial Probability Distribution 213**
 - A Binomial Experiment 214
 - Martin Clothing Store Problem 215
 - Using Excel to Compute Binomial Probabilities 220
 - Expected Value and Variance for the Binomial Probability Distribution 222
 - Exercises 223
- 5.5 Poisson Probability Distribution 224**
 - An Example Involving Time Intervals 225
 - An Example Involving Length or Distance Intervals 226
 - Using Excel to Compute Poisson Probabilities 226
 - Exercises 229
- 5.6 Hypergeometric Probability Distribution 230**
 - Using Excel to Compute Hypergeometric Probabilities 232
 - Exercises 232
- Summary 233**
- Glossary 234**
- Key Formulas 234**
- Supplementary Exercises 235**

Chapter 6

Continuous Probability Distributions 239

Statistics in Practice: Procter & Gamble 240

- 6.1 Uniform Probability Distribution 241**
 - Area as a Measure of Probability 242
 - Exercises 244
- 6.2 Normal Probability Distribution 245**
 - Normal Curve 246
 - Standard Normal Probability Distribution 248
 - Computing Probabilities for Any Normal Probability Distribution 254
 - Great Tire Company Problem 254
 - Using Excel to Compute Normal Probabilities 256
 - Exercises 259
- 6.3 Exponential Probability Distribution 262**
 - Computing Probabilities for the Exponential Distribution 263
 - Relationship Between the Poisson and Exponential Distributions 264
 - Using Excel to Compute Exponential Probabilities 265
 - Exercises 266
- Summary 267**
- Glossary 267**
- Key Formulas 268**
- Supplementary Exercises 268**

Chapter 7

Sampling and Sampling Distributions 271

Statistics in Practice: MeadWestvaco Corporation 272

- 7.1 The Electronics Associates Sampling Problem 273**
- 7.2 Simple Random Sampling 274**
 - Sampling from a Finite Population 274
 - Using Excel to Select a Simple Random Sample 276
 - Sampling from an Infinite Population 278
 - Exercises 279
- 7.3 Point Estimation 281**
 - Exercises 283
- 7.4 Introduction to Sampling Distributions 285**
- 7.5 Sampling Distribution of \bar{x} 288**
 - Expected Value of \bar{x} 289
 - Standard Deviation of \bar{x} 290
 - Central Limit Theorem 291
 - Sampling Distribution of \bar{x} for the EAI Problem 293
 - Practical Value of the Sampling Distribution of \bar{x} 293
 - Relationship Between the Sample Size and the Sampling Distribution of \bar{x} 295
 - Exercises 297
- 7.6 Sampling Distribution of \bar{p} 300**
 - Expected Value of \bar{p} 300
 - Standard Deviation of \bar{p} 301
 - Form of the Sampling Distribution of \bar{p} 301

Practical Value of the Sampling Distribution of \bar{p} 302

Exercises 304

7.7 Sampling Methods 305

Stratified Random Sampling 306

Cluster Sampling 306

Systematic Sampling 307

Convenience Sampling 307

Judgment Sampling 308

Summary 308

Glossary 309

Key Formulas 310

Supplementary Exercises 310

Chapter 8

Interval Estimation 313

Statistics in Practice: Dollar General Corporation 314

8.1 Interval Estimation of a Population Mean: Large-Sample Case 315

CJW Problem 315

σ Assumed Known 318

σ Estimated by s 320

Using Excel to Construct a Confidence Interval 322

Exercises 324

8.2 Interval Estimation of a Population Mean: Small-Sample Case 326

σ Assumed Known 326

σ Estimated by s 327

Using Excel to Construct a Confidence Interval With σ Estimated by s 331

The Role of the Population Distribution 332

Exercises 334

8.3 Determining the Sample Size 337

Exercises 338

8.4 Interval Estimation of a Population Proportion 339

Using Excel to Construct a Confidence Interval 341

Determining the Sample Size 343

Exercises 344

Summary 346

Glossary 347

Key Formulas 348

Supplementary Exercises 348

Case Problem 1 Bock Investment Services 351

Case Problem 2 Gulf Real Estate Properties 353

Case Problem 3 Metropolitan Research, Inc. 355

Chapter 9

Hypothesis Testing 356

Statistics in Practice: Harris Corporation 357

9.1 Developing Null and Alternative Hypotheses 358

Testing Research Hypotheses 358

- Testing the Validity of a Claim 359
- Testing in Decision-Making Situations 359
- Summary of Forms for Null and Alternative Hypotheses 360
- Exercises 360
- 9.2 Type I and Type II Errors 361**
 - Exercises 362
- 9.3 One-Tailed Tests About a Population Mean: Large-Sample Case 363**
 - σ Assumed Known 365
 - Steps of Hypothesis Testing 369
 - σ Estimated by s 369
 - Using Excel to Conduct a One-Tailed Hypothesis Test 372
 - Summary: One-Tailed Tests About a Population Mean 375
 - Exercises 376
- 9.4 Two-Tailed Tests About a Population Mean: Large-Sample Case 379**
 - p -Values for Two-Tailed Tests 381
 - Using Excel to Conduct a Two-Tailed Hypothesis Test 381
 - Summary: Two-Tailed Tests About a Population Mean 382
 - Relationship Between Interval Estimation and Hypothesis Testing 383
 - Exercises 385
- 9.5 Tests About a Population Mean: Small-Sample Case 387**
 - One-Tailed Test 388
 - p -Values and the t Distribution 390
 - Using Excel to Conduct a One-Tailed Hypothesis Test: Small-Sample Case 390
 - Two-Tailed Test 392
 - Using Excel to Conduct a Two-Tailed Hypothesis Test: Small-Sample Case 393
 - Exercises 394
- 9.6 Tests About a Population Proportion 396**
 - Using Excel to Conduct Hypothesis Tests About a Population Proportion 399
 - Exercises 401
 - Summary 404**
 - Glossary 406**
 - Key Formulas 406**
 - Supplementary Exercises 407**
 - Case Problem 1* Unemployment Study 409
 - Case Problem 2* Quality Associates, Inc. 409

Chapter 10

Comparisons Involving Means 411

Statistics in Practice: Fisons Corporation 412

- 10.1 Estimation of the Difference Between the Means of Two Populations: Independent Samples 413**
 - Sampling Distribution of $\bar{x}_1 - \bar{x}_2$ 415
 - Large-Sample Case 416
 - Using Excel: Large-Sample Case 418
 - Small-Sample Case 419

- Using Excel: Small-Sample Case 422
- Exercises 423
- 10.2 Hypothesis Tests About the Difference Between the Means of Two Populations: Independent Samples 426**
 - Large-Sample Case 426
 - Using Excel: Large-Sample Case 429
 - Small-Sample Case 432
 - Using Excel: Small-Sample Case 433
 - Exercises 435
- 10.3 Inferences About the Difference Between the Means of Two Populations: Matched Samples 439**
 - Using Excel 442
 - Exercises 444
- 10.4 Introduction to Analysis of Variance 447**
 - Assumptions for Analysis of Variance 448
 - Conceptual Overview 449
- 10.5 Analysis of Variance: Testing for the Equality of k Population Means 451**
 - Between-Treatments Estimate of Population Variance 452
 - Within-Treatments Estimate of Population Variance 453
 - Comparing the Variance Estimates: The F Test 454
 - ANOVA Table 455
 - Using Excel's Anova: Single Factor Tool 456
 - Exercises 459
- Summary 463**
- Glossary 463**
- Key Formulas 464**
- Supplementary Exercises 466**
- Case Problem 1 Par, Inc. 472**
- Case Problem 2 Wentworth Medical Center 472**
- Case Problem 3 Compensation for ID Professionals 473**

Chapter 11

Comparisons Involving Proportions and a Test of Independence 475

Statistics in Practice: United Way 476

- 11.1 Inferences About the Difference Between the Proportions of Two Populations 477**
 - Sampling Distribution of $\bar{p}_1 - \bar{p}_2$ 477
 - Interval Estimation of $p_1 - p_2$ 477
 - Using Excel to Develop an Interval Estimation of $p_1 - p_2$ 479
 - Hypothesis Tests About $p_1 - p_2$ 481
 - Using Excel to Conduct a Hypothesis Test About $p_1 - p_2$ 483
 - Exercises 484
- 11.2 Hypothesis Test for Proportions of a Multinomial Population 486**
 - Using Excel to Conduct a Goodness of Fit Test 490
 - Exercises 491
- 11.3 Test of Independence: Contingency Tables 493**
 - Using Excel to Conduct a Test of Independence 497
 - Exercises 499

Summary	501
Glossary	502
Key Formulas	502
Supplementary Exercises	503
<i>Case Problem A Bipartisan Agenda for Change</i>	508

Chapter 12

Simple Linear Regression 509

Statistics in Practice: Alliance Data Systems 510

12.1 Simple Linear Regression Model 511

Regression Model and Regression Equation 511

Estimated Regression Equation 512

12.2 Least Squares Method 514

Using Excel to Develop a Scatter Diagram and Compute the Estimated Regression Equation 517

Exercises 520

12.3 Coefficient of Determination 526

Using Excel to Compute the Coefficient of Determination 530

Correlation Coefficient 531

Exercises 533

12.4 Model Assumptions 535

12.5 Testing for Significance 537

Estimate of σ^2 537

t Test 538

Confidence Interval for β_1 540

F Test 541

Some Cautions About the Interpretation of Significance Tests 543

Exercises 544

12.6 Excel's Regression Tool 547

Using Excel's Regression Tool for the Armand's Pizza Parlors Problem 547

Interpretation of Estimated Regression Equation Output 549

Interpretation of ANOVA Output 550

Interpretation of Regression Statistics Output 550

Exercises 551

12.7 Using the Estimated Regression Equation for Estimation and Prediction 555

Point Estimation 555

Interval Estimation 555

Confidence Interval Estimate of the Mean Value of y 555

Prediction Interval Estimate of an Individual Value of y 557

Using Excel to Develop Confidence and Prediction Interval Estimates 559

Exercises 561

12.8 Residual Analysis: Validating Model Assumptions 563

Residual Plot Against x 564

Residual Plot Against \hat{y} 567

Using Excel's Regression Tool to Construct a Residual Plot	568
Exercises	569
Summary	570
Glossary	571
Key Formulas	572
Supplementary Exercises	573
<i>Case Problem 1</i> Spending and Student Achievement	579
<i>Case Problem 2</i> U.S. Department of Transportation	581
<i>Case Problem 3</i> Alumni Giving	582

Chapter 13

Multiple Regression 584

Statistics in Practice: International Paper	585
13.1 Multiple Regression Model	586
Regression Model and Regression Equation	586
Estimated Multiple Regression Equation	587
13.2 Least Squares Method	588
An Example: Butler Trucking Company	588
Using Excel's Regression Tool to Develop the Estimated Multiple Regression Equation	591
Note on Interpretation of Coefficients	592
Exercises	593
13.3 Multiple Coefficient of Determination	598
Exercises	600
13.4 Model Assumptions	601
13.5 Testing for Significance	603
<i>F</i> Test	603
<i>t</i> Test	606
Multicollinearity	607
Exercises	608
13.6 Using the Estimated Regression Equation for Estimation and Prediction	610
Exercises	611
13.7 Qualitative Independent Variables	612
An Example: Johnson Filtration, Inc.	612
Interpreting the Parameters	614
More Complex Qualitative Variables	616
Exercises	618
Summary	621
Glossary	622
Key Formulas	622
Supplementary Exercises	623
<i>Case Problem 1</i> Consumer Research, Inc.	629
<i>Case Problem 2</i> NFL Quarterback Rating	630
<i>Case Problem 3</i> Predicting Student Proficiency Test Scores	631
<i>Case Problem 4</i> Alumni Giving	632

Chapter 14

Statistical Methods for Quality Control 634

Statistics in Practice: Dow Chemical 635

14.1 Statistical Process Control 636

Control Charts 637

\bar{x} Chart: Process Mean and Standard Deviation Known 638

\bar{x} Chart: Process Mean and Standard Deviation Unknown 641

R Chart 644

Using Excel to Construct an R Chart and an \bar{x} Chart 645

p Chart 649

np Chart 650

Interpretation of Control Charts 651

Exercises 652

14.2 Acceptance Sampling 654

KALI, Inc.: An Example of Acceptance Sampling 656

Computing the Probability of Accepting a Lot 656

Selecting an Acceptance Sampling Plan 659

Multiple Sampling Plans 660

Exercises 662

Summary 663

Glossary 663

Key Formulas 664

Supplementary Exercises 665

Appendix A

References and Bibliography 667

Appendix B

Tables 668

Appendix C

Summation Notation 676

Appendix D

Self-Test Solutions and Answers to Even-Numbered Exercises 678

Appendix E

Using Excel Functions 708

Index 712
