

# Food Technology and Quality Evaluation

Editors  
**Ramdane Dris**  
**Arun Sharma**

# CONTENTS

Preface	v
1. Influence of field conditions and handling operations of fruit quality <i>Ramdane Dris</i>	1
2. Development and prospects for fruit and vegetable storage and transport industry in China <i>Zhang Xuejie</i>	7
3. Biochemistry and molecular biology of papaya fruit softening during ripening <i>Zainon Mohd Ali, Soh Chin-Pin, and Hamid Lazan</i>	15
4. Quality maintenance of apples after harvest <i>Ramdane Dris</i>	23
5. Improving control of storage regimens using computer-based control systems <i>Dan Black</i>	27
6. Influence of storage conditions on quality performance of maney amarillo fruits <i>J.E. Manzano-Mendez</i>	33
7. Quality changes in sweet corn ( <i>Zea mays</i> L. ssp. <i>saccharata</i> ) cv. Trophy F <sub>1</sub> under various storage conditions <i>Maria Gawęda and Jan Michal Ben</i>	37
8. Prolonging the self life of apples by modified atmosphere packaging <i>Mirja Makkila, Tuija Lyyjynen, Ari Pipatti, Arto Ylämäki and Risto Tahvonen</i>	43
9. Shelflife of minimally-processed fruits and vegetables <i>Leeni Leis and Ramdane Dris</i>	47
10. Postharvest handling of pineapple <i>R. Corona and J.E. Manzano-Mendez</i>	49
11. Postharvest quality of red currant <i>A. Krivorot and R. Dris</i>	57
12. Impact of postharvest conditions on processing quality of potato <i>S. Sirtautaitė, R. Dris, and R. Niskanen</i>	59

13. Nondestructive determination of soluble solids in horticultural crops by near-infrared spectroscopy <i>Hidekazu Ito</i>	61
14. Controlling of enzymatic browning in processing of fruits and vegetables <i>Zhang Jingfang</i>	67
15. Relation between water-soluble and total Ca content and bitter pit occurrence in 'Idared' apple <i>Nikola Pavicic, Tomislav Cosic, Ivo Pavlovic, and Tomislav Jemric</i>	71
16. Controlled atmosphere temperature treatment system (CATTS) <i>Dan Black</i>	77
17. Relations between mineral element contents in 'Jonica' apples and their liability to physiological disorders during storage <i>Jan Michal Ben and Maria Gaweda</i>	85
18. Quality of commercialized oregano ( <i>Origanum vulgare</i> L.) in Argentina <i>Jorge Ringuet, Roberto Barreyro, Mari Silvina, and Natalia Morales</i>	89
19. Effect of saline water irrigation and storage temperature on sensory evaluation of tomato fruits <i>Juan E. Manzano and José A. Salas</i>	93
20. Influence of controlled atmosphere storage on apple quality <i>Miodrag Janković and Snezana Mašović</i>	97
21. Suitability of frozen raspberry cultivars for puree <i>Solvita Kampuse and Kaspars Kampuss</i>	101
22. Improved cold storage of vegetables by treatment with microbiological cultures <i>V. Kolodyaznaya, N. Smirnova, N. Samusenko, and K. Fikiin</i>	109
23. Biochemical and physico-chemical characteristics of dehydrofrozen and frozen sweet pepper <i>V. Kolodyaznaya, K. Lebedeva, K. Fikiin and T. Filatova</i>	115
24. Postharvest storage improvement in pineapples by irradiation <i>G. J. Sharma</i>	125
25. Extension of shelf life of mushroom ( <i>Agaricus bisporus</i> ) by using gamma radiation <i>S. Gautam and Arun Sharma</i>	135
26. Potential use of plant extracts to reduce postharvest fungal rots of fruits and vegetables <i>Silvia Bautista-Baños, Laura L. Barrera-Necha, Erika García Domínguez, and Mónica Hernández-López</i>	143

27. Evaluation of the behaviour of two redcurrant varieties ( <i>Ribes rubrum</i> L.)	155
<i>Gustavo Vater, Miriam E. Arena and María José Ces</i>	
28. New Romanian apricot varieties	163
<i>Balan Viorică, Fouillet Valérie, Darnaud Alexandre, and Clareton Marie</i>	
29. Fruit juice quality evaluation according to anionic profile determined by capillary isotachophoresis	165
<i>Milan Suhaj and Juraj Jezek</i>	
30. Chemical composition and storability of cranberry	173
<i>R. Daubaras, D. Budriuniene, L. Chesoniene, S. Rimkiene and P. Viskelis</i>	
31. Biochemical composition of <i>Sorbus</i> fruits and its change during ripening	179
<i>Bronislovas Gelvonauskis and Pranas Viskelis</i>	
32. Radical scavenging and antioxidant activity of various plants grown in Lithuania	183
<i>Rasa Bauzaite, Petras Rimantas Venskutonis, Dainora Gruzdiene, Dace Tirzite and Gunars Tirzitis</i>	
33. Antioxidant constituents in Moldavian dragonhead ( <i>Dracocephalum moldavica</i> L.) extracts	195
<i>Vitalija Povilaitytė, Petras Rimantas Venskutonis, Marie-Elisabeth Cuvelier, and Claudette Berset</i>	
34. Application of plant extracts and synthetic antioxidants for rapeseed oil stabilization	203
<i>R. Kazernaviciūtė, R. P. Venskutonis, and D. Gruzdiene</i>	
35. Extraction of aromatic and medicinal plants with supercritical carbon dioxide	209
<i>G. Miliauskas, P. R. Venskutonis and B. Sivik</i>	
36. Physiology of red bayberry during preharvest and harvest time	215
<i>Wang Xiangyang, Li Jianrong, Lian Xinghui and Den Gan</i>	
37. Current trends in postharvest technology	223
<i>Daryl C. Joyce</i>	
38. Injury of red bayberry during storage and transportation	235
<i>Xiangyang Wang, Jianrong Li, Daryl C. Joyce, Xinhui Yang</i>	
39. Development of irradiation system to enhance postharvest quality of vegetables	243
<i>Ramdane Dris</i>	
40. Influence of chilling injury on horticultural commodities	245
<i>Ramdane Dris</i>	
41. Storage technology to improve fruit and vegetable quality performance	247
<i>Ramdane Dris</i>	

42. Harvest season changes the textural and compositional quality of long-term harvested green asparagus from mother stalk culture 251  
*Pankaj Kumar Bhowmik and Toshiyuki Matsui*
43. Influence of intermittent warming treatments on postharvest quality of arazá fruit (*Eugenia stipitata* McVaugh) 261  
*M.S. Hernández, O. Martínez, H.E. Arjona, and J.P. Fernández-Trujillo*
- Index 267
