ANNA C. THORNTON

Variation Risk MANAGEMENT

Focusing Quality Improvements in Product Development and Production

CONTENTS

Preface xiii
Figures xv
Tables xix
Text Boxes xxi
Nomenclature xxiii
Acronyms xxv

1 Introduction 1

1.1. The Competitive Advantage of VRM / 5
1.2. Guide to Readers / 8

2 Basics of Variation Risk Management 12

2.1. Basic Principles of VRM / 13
2.1.1. VRM Must Be Holistic / 14
2.1.2. VRM Must Be Process Oriented / 17
2.1.3. VRM Must Be Data Driven / 24
2.2. Variation and Its Impact on Quality / 25
2.3. Summary / 31

3 Identification 33

3.1. Definition of Key Characteristics and Variation Flowdown / 34
3.1.1. Key Characteristics / 35
3.1.2. Variation Flowdown / 38
3.2. Defining the Scope of the VRM Application / 42
3.3. Identifying Critical System Requirements / 42
3.3.1. Identify the Voice of the Customer / 43

3.3.2. Identify Specifications and Requirements / 43
3.3.3. Identify Critical System Requirements / 43
3.4. Identifying System Key Characteristics / 45
3.4.1. What Is a System Key Characteristic? / 45
3.4.2. Examples of System Key Characteristics / 47
3.5. Creating the Variation Flowdown / 52
3.5.1. What Information to Gather / 56
3.5.2. How to Conduct the Top-Down Process / 58
3.5.3. How to Conduct the Bottom-Up Process / 60
3.5.4. How to Conduct and Document the Identification Procedure / 63
3.6. Summary / 64

4 Overview of Assessment **68**

4.1. Assessment during Product Development / 70
4.2. Assessment during Production / 73

5 Assessment of Defect Rates **76**

5.1. Predicting the Frequency of Defects / 76
5.1.1. Variation Models / 79
5.1.2. Prediction Tools / 83
5.2. Estimating the Contributions of Part and Process KCs / 93
5.2.1. Qualitative Analysis of Variation Contribution / 95
5.2.2. Quantitative Analysis of Variation Contribution / 96
5.3. Measuring the Frequency of Defects / 96
5.4. Measuring the Contributions of Part and Process KCs / 100
5.5. Summary / 101

6 Assessment of Cost and Risk **102**

6.1. Cost and Risk Assessment during Product Development / 103
6.1.1. Qualitative Assessments / 105
6.1.2. Step Cost Functions / 106
6.1.3. Continuous Cost Functions / 106
6.2. Total Cost of Variation Assessment during Production / 109
6.2.1. Cost Sources / 109
6.2.2. Representation of the Total Cost of Variation / 117
6.2.3. Cost Analysis and Aggregation / 119
6.3. Summary / 123

7 Assessment of the Quality Control System 124

7.1. QC Plan Maturity / 126
7.1.1. Detection Capability and Effectiveness / 126
7.1.2. Diagnosis Capability / 127
7.1.3. Efficient Resource Utilization / 128
7.2. QC Location in the Manufacturing Process / 129
7.3. QC Effectiveness Matrix / 133
7.4. Summary / 135

8 Mitigation 137

8.1. Mitigation during Product Development and Production / 138
8.1.1. Mitigation during Product Development / 139
8.1.2. Mitigation during Production / 140
8.2. Identifying Mitigation Strategies / 141
8.2.1. Design Changes / 141
8.2.2. Manufacturing Process Changes / 145
8.2.3. Manufacturing Process Improvements / 151
8.2.4. Monitoring and Controlling Manufacturing Processes / 151
8.2.5. Testing and Inspection / 154
8.3. Selecting a Mitigation Strategy / 155
8.4. Selecting a Project Portfolio / 157
8.5. Executing Mitigation Strategies / 160
8.6. Summary / 162

9 Integration of Variation Risk Management with Product Development 165

9.1. Basics of Product Development / 165
9.1.1. Stage Gate Product Development Process / 165
9.1.2. VRM during Product Development / 167
9.1.3. Metrics / 168
9.2. Requirements Development / 170
9.3. Concept Development / 172
9.4. Product Architecture Design / 174
9.5. System Concept Design / 178
9.6. Detail Design / 179
9.7. Product Testing and Refinement / 180
9.8. Transition to Production / 183

9.8.1. Handling Customer Complaints / 184
9.8.2. Wrap-Up / 186
9.8.3. Documenting the Key Characteristic Plan / 186
9.9. Production / 188
9.9.1. Continually Monitor Total Cost of Variation / 188
9.9.2. Track Customer Complaint Data / 189
9.9.3. Review Quality Control Data / 191
9.9.4. Track Impact of Changes / 192
9.10. Summary / 192

10 Roles and Responsibilities in Variation Risk Management **193**

10.1. Product Development / 194
10.1.1. The Integrated Product Team Approach / 194
10.1.2. Expert Teams / 199
10.1.3. Coaches / 200
10.2. Production / 200
10.2.1. Production Teams / 201
10.2.2. Expert Teams / 201
10.3. Suppliers' Roles and Responsibilities / 202
10.3.1. Role of Suppliers during Product Development / 203
10.3.2. Role of Suppliers during Production / 206
10.3.3. What Does a KC Mean to a Supplier? / 207
10.4. Summary / 208

11 Planning and Implementing a Variation Risk Management Program **209**

11.1. Planning a VRM Program / 209
11.1.1. Gathering Management Support / 210
11.1.2. Gathering Organizational Support / 211
11.1.3. Baselining the Existing VRM Processes / 211
11.1.4. Formalizing VRM / 215
11.1.5. Developing KC Tracking Methods / 215
11.1.6. Identifying Lead Users / 217
11.1.7. Developing Training Materials / 219
11.2. Implementing the VRM Program / 220
11.2.1. Identifying Initial Projects / 221
11.2.2. Training the Team / 221

11.2.3. Applying VRM / 221
11.2.4. Gathering Feedback / 222
11.3. Summary / 222

12 Summary 223

Appendix A Maturity Models 226

Appendix B Process Capability Databases 231

B.1. Background on Process Capability Data / 232
B.1.1. Importance of Using Process Capability Data / 232
B.1.2. Structure and Content of a Process Capability Database / 234
B.1.3. Difficulties in Implementing Process Capability Databases / 235
B.2. The Right Structure / 235
B.2.1. Designing the Indexing Scheme / 237
B.2.2. Choosing the Database Implementation Approach / 241
B.2.3. Creating the User Interfaces and Data Analysis / 242
B.3. The Right Data / 245
B.4. The Right Management Support / 247
B.5. The Right Usage / 248
B.6. Implementation of a Process Capability Database / 249
B.6.1. Who Should Be Involved / 250
B.6.2. What Decisions Should Be Made / 251
B.6.3. Implementation Steps / 252
B.7. Summary / 252

Appendix C Other Initiatives 253

C.1. Six Sigma / 254
C.2. Design for Six Sigma / 259
C.3. Lean Manufacturing / 260
C.4. Continual Improvement, TQM, and Kaizen / 262
C.5. Dimensional Management / 263
C.6. Design for Manufacturing / 264
C.7. Quality Function Deployment (House of Quality) / 264

C.8. FMEA / 267
C.9. Summary / 267

Appendix D Summary of Process Diagrams 269

Glossary 273

Bibliography 277
