

SECOND EDITION

Introduction to
**Fluid
Mechanics**
and **Fluid
Machines**

S K Som • G Biswas

Contents

<i>Preface to the Second Edition</i>	v
<i>Preface to the First Edition</i>	vii
1. Introduction and Fundamental Concepts	1
1.1 Definition of Stress	1
1.2 Definition of Fluid	2
1.3 Distinction between a Solid and a Fluid	2
1.4 Fluid Properties	3
<i>Summary</i>	16
<i>Solved Examples</i>	18
<i>Exercises</i>	25
2. Fluid Statics	28
2.1 Forces on Fluid Elements	28
2.2 Normal Stresses in a Stationary Fluid	28
2.3 Fundamental Equation of Fluid Statics	30
2.4 Units and Scales of Pressure Measurement	33
2.5 The Barometer	34
2.6 Manometers	35
2.7 Hydrostatic Thrusts on Submerged Surfaces	40
2.8 Buoyancy	45
2.9 Stability of Unconstrained Bodies in Fluid	46
<i>Summary</i>	53
<i>Solved Examples</i>	54
<i>Exercises</i>	73
3. Kinematics of Fluid	78
3.1 Introduction	78
3.2 Scalar and Vector Fields	78
3.3 Flow Field and Description of Fluid Motion	79
3.4 Existence of Flow	97
<i>Summary</i>	98
<i>Solved Examples</i>	99
<i>Exercises</i>	109

4. Conservation Equations and Analysis of Finite Control Volumes	108
4.1 System	108
4.2 Conservation of Mass—The Continuity Equation	109
4.3 Conservation of Momentum: Momentum Theorem	121
4.4 Analysis of Finite Control Volumes	127
4.5 Euler's Equation: The Equation of Motion for an Ideal Flow	138
4.6 Conservation of Energy	145
<i>Summary</i>	150
<i>References</i>	151
<i>Solved Examples</i>	151
<i>Exercises</i>	166
5. Applications of Equations of Motion and Mechanical Energy	175
5.1 Introduction	175
5.2 Bernoulli's Equation in Irrotational Flow	176
5.3 Steady Flow Along Curved Streamlines	179
5.4 Fluids in Relative Equilibrium	187
5.5 Principles of a Hydraulic Siphon	190
5.6 Losses Due to Geometric Changes	192
5.7 Measurement of Flow Rate Through Pipe	196
5.8 Flow Through Orifices and Mouthpieces	205
<i>Summary</i>	215
<i>Solved Examples</i>	217
<i>Exercises</i>	236
6. Principles of Physical Similarity and Dimensional Analysis	241
6.1 Introduction	241
6.2 Concept and Types of Physical Similarity	242
6.3 The Application of Dynamic Similarity— Dimensional Analysis	250
<i>Summary</i>	261
<i>Solved Examples</i>	261
<i>Exercises</i>	274
7. Flow of Ideal Fluids	277
7.1 Introduction	277
7.2 Elementary Flows in a Two-dimensional Plane	279
7.3 Superposition of Elementary Flows	286
7.4 Aerofoil Theory	298
<i>Summary</i>	302
<i>Solved Examples</i>	302
<i>References</i>	310
<i>Exercises</i>	311

8. Viscous Incompressible Flows	314
8.1 Introduction	314
8.2 General Viscosity Law	315
8.3 Navier–Stokes Equations	316
8.4 Exact Solutions of Navier–Stokes Equations	324
8.5 Low Reynolds Number Flow	337
<i>Summary</i>	342
<i>References</i>	342
<i>Solved Examples</i>	342
<i>Exercises</i>	355
9. Laminar Boundary Layers	359
9.1 Introduction	359
9.2 Boundary Layer Equations	359
9.3 Blasius Flow Over a Flat Plate	363
9.4 Wall Shear and Boundary Layer Thickness	369
9.5 Momentum-Integral Equations for Boundary Layer	372
9.6 Separation of Boundary Layer	373
9.7 Karman-Pohlhausen Approximate Method for Solution of Momentum Integral Equation over a Flat Plate	377
9.8 Integral Method for Non-Zero Pressure Gradient Flows	379
9.9 Entry Flow in a Duct	382
9.10 Control of Boundary Layer Separation	383
9.11 Mechanics of Boundary Layer Transition	384
9.12 Several Events of Transition	386
<i>Summary</i>	387
<i>References</i>	388
<i>Solved Examples</i>	388
<i>Exercises</i>	393
10. Turbulent Flow	398
10.1 Introduction	398
10.2 Characteristics of Turbulent Flow	398
10.3 Laminar–Turbulent Transition	400
10.4 Correlation Functions	402
10.5 Mean Motion and Fluctuations	403
10.6 Derivation of Governing Equations for Turbulent Flow	406
10.7 Turbulent Boundary Layer Equations	409
10.8 Boundary Conditions	410
10.9 Shear Stress Models	412
10.10 Universal Velocity Distribution Law and Friction Factor in Duct Flows for Very Large Reynolds Numbers	415
10.11 Fully Developed Turbulent Flow in a Pipe for Moderate Reynolds Numbers	419

<p>10.12 Skin Friction Coefficient for Boundary Layers on a Flat Plate 421</p> <p style="padding-left: 20px;"><i>Summary</i> 424</p> <p style="padding-left: 20px;"><i>References</i> 425</p> <p style="padding-left: 20px;"><i>Solved Examples</i> 425</p> <p style="padding-left: 20px;"><i>Exercises</i> 430</p>	421
<p>11. Applications of Viscous Flows Through Pipes</p> <p>11.1 Introduction 433</p> <p>11.2 Concept of Friction Factor in a Pipe Flow 433</p> <p>11.3 Variation of Friction Factor 435</p> <p>11.4 Concept of Flow Potential and Flow Resistance 439</p> <p>11.5 Flow through Branched Pipes 441</p> <p>11.6 Flow through Pipes with Side Tappings 448</p> <p>11.7 Losses in Pipe Bends 450</p> <p>11.8 Losses in Pipe Fittings 451</p> <p>11.9 Power Transmission by a Pipeline 452</p> <p style="padding-left: 20px;"><i>Summary</i> 453</p> <p style="padding-left: 20px;"><i>Solved Examples</i> 454</p> <p style="padding-left: 20px;"><i>Exercises</i> 468</p>	433
<p>12. Flows with a Free Surface</p> <p>12.1 Introduction 472</p> <p>12.2 Flow in Open Channels 472</p> <p>12.3 Flow in Closed Circular Conduits Only Partly Full 487</p> <p>12.4 Hydraulic Jump 489</p> <p>12.5 Occurrence of Critical Conditions 492</p> <p style="padding-left: 20px;"><i>Summary</i> 491</p> <p style="padding-left: 20px;"><i>Solved Examples</i> 495</p> <p style="padding-left: 20px;"><i>Exercises</i> 503</p>	472
<p>13. Applications of Unsteady Flows</p> <p>13.1 Introduction 505</p> <p>13.2 Inertia Pressure and Accelerative Head 506</p> <p>13.3 Establishment of Flow 507</p> <p>13.4 Oscillation in a U-Tube 509</p> <p>13.5 Damped Oscillation between Two Reservoirs 513</p> <p>13.6 Water Hammer 515</p> <p style="padding-left: 20px;"><i>Summary</i> 529</p> <p style="padding-left: 20px;"><i>Solved Examples</i> 530</p> <p style="padding-left: 20px;"><i>Exercises</i> 536</p>	505
<p>14. Compressible Flow</p> <p>14.1 Introduction 538</p> <p>14.2 Thermodynamic Relations of Perfect Gases 540</p>	538

14.3	Speed of Sound	546
14.4	Pressure Field due to a Moving Source	547
14.5	Basic Equations for One-Dimensional Flow	549
14.6	Stagnation and Sonic Properties	551
14.7	Normal Shocks	562
	<i>Summary</i>	570
	<i>References</i>	571
	<i>Solved Examples</i>	571
	<i>Exercises</i>	579
15.	Principles of Fluid Machines	581
15.1	Introduction	581
15.2	Classifications of Fluid Machines	581
15.3	Rotodynamic Machines	583
15.4	Reciprocating Pump	629
15.5	Hydraulic System	635
	<i>Summary</i>	637
	<i>Solved Examples</i>	639
	<i>Exercises</i>	658
16.	Compressors, Fans and Blowers	661
16.1	Centrifugal Compressors	661
16.2	Axial Flow Compressors	672
16.3	Fans and Blowers	678
	<i>Summary</i>	684
	<i>References</i>	685
	<i>Solved Examples</i>	685
	<i>Exercises</i>	692
Appendix A—	<i>Physical Properties of Fluids</i>	695
Appendix B—	<i>Review of Preliminary Concepts</i>	
	<i>in Vectors and their Operations</i>	698
Index		708
