

INTRODUCTION TO COMPUTER GRAPHICS

N KRISHNAMURTHY

INTERNATIONAL EDITION

<i>Foreword</i>	vii
<i>Preface</i>	ix
<i>Acknowledgements</i>	xiii
1. Introduction	1
1.1 Nature and Types of Computer Graphics	1
1.2 Manual Drafting Versus Computer Graphics	2
1.3 Features of Computer Graphics	3
1.3.1 Functions of Computer Graphics	3
1.3.2 Characteristics of Computer Graphics	4
1.4 Scope of this Book	4
2. Applications	6
2.1 Computer-Aided Design/Drafting (CAD/CADD)	7
2.2 Geographical Information Systems (GIS)	7
2.3 Presentation and Business Graphics	8
2.4 Scientific and Engineering Graphics	8
2.5 Computer-Aided Learning (CAL)	9
2.6 Medical Applications	9
2.7 Desktop Publishing (DTP)	10
2.8 Computer Art	10
2.9 Computer Games and Entertainment	10
2.10 Simulation and Virtual Reality	11
2.11 Graphical User Interface (GUI)	12
2.12 Internet	13
2.13 Multimedia	14
2.14 Pre-Processors and Post-Processors	15
2.14.1 Matrix Structural Analysis	15
2.14.2 Finite Element Method	15
2.14.3 Pre-Processors	16
2.14.4 Post-Processors	17

2.15	Miscellaneous Applications	18	
2.15.1	Image Processing	18	
2.15.2	Image Superposition and Enhancement	18	
2.15.3	Fractals	18	
2.15.4	Backward and Forward Extrapolation	19	
2.15.5	Shrinking and Stretching Time	19	
3.	Graphics Mathematics		20
3.1	Coordinate Systems	20	
3.2	Basic Mathematical Concepts	21	
3.3	Cubic Splines	21	
3.3.1	Equation for Cubic Spline	21	
3.3.2	Example of Cubic Spline	22	
3.3.3	Parametric Form	22	
3.3.4	Concatenation of Multiple Cubic Spline Segments	23	
3.3.5	Example of Multiple Segment Cubic Spline	23	
3.4	Bezier Curves	24	
3.4.1	Bezier Curve Characteristics	24	
3.4.2	Equations for Bezier Curves	26	
3.4.3	Example of Bezier Curve Generation	26	
3.4.4	Concatenation of Multiple Bezier Curve Segments	27	
3.4.5	Example of Multiple Segment Bezier Curve	28	
3.5	Regression Analysis	29	
3.5.1	Least Squares Fit	29	
3.5.2	Example of Straight Line Fit	30	
3.5.3	Curves Transformable to Straight Lines	31	
	Exercises	33	
4.	Input Hardware		34
4.1	Analog Input Devices	34	
4.1.1	Paddle Control	34	
4.1.2	Mouse	35	
4.1.3	Trackball	35	
4.1.4	Joystick	35	
4.1.5	Scanner	36	
4.2	Digital Input Devices	36	
4.2.1	Keyboard	37	
4.2.2	Light Pen	37	
4.2.3	Graphics Tablet and Pointer	39	
4.2.4	Touch-Sensitive Screens (TSS)	40	
4.3	Three-Dimensional Input Devices	40	
5.	Output Hardware		42
5.1	Monitor Output	42	
5.1.1	The Monitor	42	
5.1.2	Uses and Benefits of Monitor Display	43	

5.1.3	Monitor Modes and Sizes	44
5.1.4	Monitor Types	45
5.2	Storage Type Output Devices	45
5.2.1	Direct View Storage Tube (DVST)	45
5.2.2	Plasma Display Panel (PDP)	46
5.2.3	Laser Scan Display	46
5.2.4	Liquid Crystal Display (LCD)	46
5.3	Refresh Type Output Devices	46
5.3.1	Standard CRT	46
5.3.2	Beam Penetrating CRT	47
5.3.3	Shadow-Mask CRT	47
5.4	Random Scan Monitors	48
5.5	Raster Scan Monitor	49
5.5.1	Pixel Principles	49
5.5.2	Raster Scan	50
5.5.3	Raster Scan Display Components	51
5.5.4	Frame Buffers	52
5.6	Monochrome Monitors	53
5.7	Colour Monitors	53
5.7.1	Advantages and Disadvantages	53
5.7.2	Characteristics of Colour	53
5.7.3	Primary and Complementary Colours	54
5.7.4	Types of Colour Monitors	55
5.8	Hardcopy Output Hardware	56
5.8.1	Element Printers	56
5.8.2	Dot-Matrix Printers	56
5.8.3	Line Printers	57
5.8.4	Thermal, Ink-Jet, and Laser Printers	58
5.8.5	Plotters	58
6.	Output Characteristics	
6.1	Computer Output Modes	60
6.1.1	Text Mode	60
6.1.2	Graphics Mode	62
6.1.3	Text Versus Graphics Modes	62
6.2	Display Coordinate System	63
6.3	Aspect Ratios	64
6.3.1	Screen Aspect Ratio	64
6.3.2	Character Block and Pixel Dimensions	64
6.3.3	Grid Aspect Ratio	65
6.4	Aliasing and Anti-Aliasing	66
6.4.1	Aliasing	66
6.4.2	Aliasing in Text Mode	66
6.4.3	Aliasing in Pixel Mode	68
6.4.4	Aliasing in Text Fonts	69
6.4.5	Anti-Aliasing	70

- 6.5 Limitations of Raster Scan 71
 - 6.5.1 Distorted Displays 71
 - 6.5.2 Compensating for Distortions 73
 - 6.5.3 Example of Distortion Compensation for Straight Line 74
 - 6.5.4 Other Display Problems 76
- 6.6 Effects on Prints and Plots 76
 - 6.6.1 Printing of Character Graphics 76
 - 6.6.2 Printing of Pixel Graphics 77
 - 6.6.3 Plotting 77
 - Exercises 77*
- 7. Line-Drawing Algorithms**
 - 7.1 Scan Conversion of Lines 78
 - 7.1.1 Desirable Characteristics 78
 - 7.1.2 Pixel Plotting 79
 - 7.2 General Technique for Scan Conversion 80
 - 7.2.1 General Method in Cartesian Coordinates 80
 - 7.2.2 Example of Straight Line by General Algorithm 80
 - 7.2.3 Elimination of Pixel Gaps 81
 - 7.2.4 Use of Inverted Plotting Equation 82
 - 7.2.5 Example of Inverted Equation 82
 - 7.2.6 Example of Circle by General Algorithm 83
 - 7.2.7 Interpolation within the Gaps 84
 - 7.2.8 Example of Interpolated Gaps 85
 - 7.3 Parametric Representations 87
 - 7.3.1 Plotting Considerations 87
 - 7.3.2 Example of Parametric Plotting 89
 - 7.4 Incremental Line Drawing 90
 - 7.4.1 Considerations in Incremental Plotting 90
 - 7.4.2 Incremental Plot Techniques 92
 - 7.5 DDA for Straight Lines 93
 - 7.5.1 Symmetric DDA for Straight Lines 93
 - 7.5.2 Example of Symmetric DDA Straight Line 94
 - 7.5.3 Simple DDA for Straight Lines 95
 - 7.5.4 Example of Simple DDA Straight Line 95
 - 7.6 DDA for Circles 96
 - 7.6.1 Circle Generating DDA, Parametric Approach 96
 - 7.6.2 Circle-Generating DDA, Direct Approach 97
 - 7.6.3 Example of Circle-Generating DDA 98
 - 7.7 Bresenham's Algorithm for Straight Lines 100
 - 7.7.1 Basic Theory for Straight Line Algorithm 100
 - 7.7.2 Example of Bresenham's Straight Line Algorithm 102
 - 7.8 Bresenham's Circle Algorithms 103
 - 7.8.1 Basic Theory for the Circle Algorithm 103
 - 7.8.2 Example of Bresenham's Circle Algorithm 104
 - 7.8.3 Bresenham-Michenor's Algorithm for Octant of Circle 105
 - 7.8.4 Example of Bresenham-Michenor's Circle Algorithm 106

7.9	General Curves	107
7.9.1	Ellipses	107
7.9.2	Parabolas	108
7.9.3	Hyperbolas	109
	<i>Exercises</i>	110

8. Programming

111

8.1	Graphics Environment	111
8.1.1	Interactive Processing	111
8.1.2	User-Friendliness	112
8.1.3	Efficient Arithmetic	113
8.1.4	Common Characteristics of Enhancements	115
8.2	Evolution of Graphics Software	115
8.3	Operating Systems Support	115
8.3.1	Operating Systems	116
8.3.2	Graphical User Interfaces (GUIs)	116
8.3.3	Graphics Formats	117
8.4	High-Level Languages	118
8.4.1	Fortran	118
8.4.2	Cobol	118
8.4.3	Basic	118
8.4.4	Pascal	119
8.4.5	"C" Language	119
8.4.6	Programming Languages and Standards	119
8.5	Input Considerations	120
8.5.1	Input Modes	120
8.5.2	Geometry Input Parameters	120
8.5.3	Other Input Parameters	122
8.5.4	Input Commands	122
8.6	Programming Considerations	123
8.6.1	Object and Image	123
8.6.2	Scaling	124
8.6.3	Location	124
8.6.4	Proportion	125
8.6.5	Procedure for Plotting	126
8.6.6	Example of Image Plot	126
8.6.7	Example of Natural Scale Display of Image	127
8.6.8	Sizing the Object	129
8.6.9	Sorting by Value	130
8.6.10	Sorting by Position in Array	130
8.7	Origin and Coordinate Axes	131
8.7.1	Location of Origin and Axes	131
8.7.2	Marked Intervals and Starting Values	132
8.7.3	Procedure for Axes Location and Value Marking	133
8.7.4	Example of Axes Selection and Value Marking	134
8.7.5	Plotting of Axes, Tick Marks, and Values	134
	<i>Exercises</i>	138

9. Business and Scientific Graphics**139**

- 9.1 Histograms 139
 - 9.1.1 Types of Histograms 139
 - 9.1.2 Computations for Histograms 141
 - 9.1.3 Example of Histogram Computations 141
 - 9.1.4 General Programming Considerations 142
 - 9.1.5 Horizontal Histogram with Character Blocks 142
 - 9.1.6 Example of Horizontal Histogram with Characters 144
 - 9.1.7 Horizontal Histograms with Pixels 145
 - 9.1.8 Programming for Vertical Histograms 147
 - 9.1.9 On-line Vertical Histogram with Character Blocks 148
 - 9.1.10 Stacked Bar-charts 149
- 9.2 Pictograms 149
 - 9.2.1 Pictogram Bar-charts 150
 - 9.2.2 Proportionate Pictograms 150
 - 9.2.3 Example of Proportionate Pictogram 151
- 9.3 Pie-Charts 152
 - 9.3.1 Types of Pie-charts 152
 - 9.3.2 Procedure and Computations for Pie-chart 153
 - 9.3.3 Example of Pie-chart 153
 - 9.3.4 Computer Plotting of Pie-chart 154
- 9.4 Business X-Y Charts 155
 - 9.4.1 Typical Business x-y Charts 155
 - 9.4.2 Multiple x-y Plots 155
- 9.5 Scientific X-Y Plots 157
 - 9.5.1 Characteristics of Scientific x-y Plots 157
 - 9.5.2 Applications of Scientific x-y Plots 157
 - 9.5.3 x-y Plots with Character Blocks 158
- 9.6 Presentation Graphics 159
- 9.7 Business Graphics Packages 161
 - Exercises 161

10. Window and Viewport**162**

- 10.1 Window-Viewport Relationship 163
 - 10.1.1 Window 163
 - 10.1.2 Viewport 163
 - 10.1.3 Image Manipulations 163
- 10.2 Computer-Related Coordinate Systems 164
 - 10.2.1 World Coordinates 164
 - 10.2.2 Screen Coordinates 165
 - 10.2.3 Normalized Screen Coordinates 165
 - 10.2.4 Device Coordinates 165
 - 10.2.5 Inter-Relationships between Coordinates 167
 - 10.2.6 Window Definitions 168
 - 10.2.7 Viewport Definitions 169
- 10.3 Viewing Transformation 169

10.3.1	Viewing Transformation Matrix	169
10.3.2	Example of Viewing Transformation	172
10.4	Natural Scale Transformation	174
10.4.1	Scaling Relationships	174
10.4.2	Preservation of Natural Scale	174
10.4.3	Example of Natural Scale Viewing Transformation	176
	<i>Exercises</i>	177
11.	Clipping	178
11.1	Clipping Considerations	178
11.2	Cohen-Sutherland Clipping Method	179
11.2.1	Principles of Cohen-Sutherland Method	179
11.2.2	Example of Cohen-Sutherland Clipping Method	181
11.3	Mid-point Clipping Method	183
11.3.1	Principles of the Mid-Point Method	183
11.3.2	Example of Mid-Point Method	184
11.4	Sutherland-Hodgman Method	185
11.4.1	Principles of Sutherland-Hodgman Method	185
11.4.2	Example of Sutherland-Hodgman Clipping Method	187
11.5	Other Clipping Algorithms	190
11.5.1	Weiler and Atherton Method	190
11.5.2	Liang and Barsky Method	190
11.5.3	Author's Clipping Approach	190
11.5.4	Example of Clipping by Mixed Method	191
	<i>Exercises</i>	193
12.	Modeling Transformations	194
12.1	General Considerations	194
12.1.1	Types of Manipulations	194
12.1.2	Direct and Matrix Formulations	195
12.1.3	Homogeneous Coordinates	195
12.1.4	Transformation of Multiple Points	197
12.2	Move Transformation	198
12.2.1	Theoretical Development of Move Transformation	198
12.2.2	Example of Move Transformation	198
12.3	Flip Transformation	199
12.3.1	Flip about Horizontal Axis	199
12.3.2	Example of x -Flip Transformation	200
12.3.3	Flip about Vertical Axis	200
12.3.4	Example of y -Flip Transformation	201
12.3.5	Flip about Arbitrary Axis	202
12.3.6	Example of a -Flip Transformation	203
12.3.7	Flip About Origin	204
12.3.8	Example of o -Flip Transformation	205
12.4	Twist Transformation	205
12.4.1	Theoretical Development of Twist Transformation	206
12.4.2	Example of Twist Transformation	207

12.5	Scale Transformation	207	
12.5.1	Theoretical Development of Scale Transformation	208	
12.5.2	Example of Scale Transformation	208	
12.6	Rotate Transformation	209	
12.6.1	Theoretical Development of Rotate Transformation	209	
12.6.2	Example of Rotate Transformation	210	
12.7	Inverse Transformations	210	
12.7.1	General Considerations	211	
12.7.2	Relationships between Forward and Backward Transformations	212	
	<i>Exercises</i>	213	
13.	Transformation Applications		215
13.1	Combination of Similar Transformations	215	
13.1.1	Move Combination	215	
13.1.2	Flip Combinations	215	
13.1.3	Twist Combination	216	
13.1.4	Scale Combination	216	
13.1.5	Rotate Combination	216	
13.2	Composite Transformations	217	
13.2.1	Theoretical Considerations	217	
13.2.2	Example of Composite Transformation – 1	218	
13.2.3	Example of Composite Transformation – 2	219	
13.2.4	Example of Composite Transformation – 3	220	
13.2.5	Example of Composite Transformation – 4	220	
13.3	Transformation about an Arbitrary Focus	221	
13.3.1	Theoretical Development of Transformation about a Focus	222	
13.3.2	Example of Transformation about a Focus	223	
13.4	Transformation about Rotated Axes	224	
13.4.1	Theoretical Development of Transformation about Rotated Axes	224	
13.4.2	Example of Transformation about Rotated Axes	225	
13.5	Other Transformations	226	
13.5.1	Instance Transformations	226	
13.5.2	Viewing Transformation as Composite Transformation	227	
13.6	Example of 2D Application	228	
13.6.1	Data Input	228	
13.6.2	Processing Commands	230	
13.6.3	Results Output	231	
	<i>Exercises</i>	232	
14.	Tools and Techniques		233
14.1	Menu Selection	233	
14.1.1	Types of Menus	233	
14.1.2	Typical Menus	234	
14.2	Pointing and Positioning	236	
14.3	Rubber Band Technique	238	
14.4	Zoom	239	

- 14.4.1 Enlargement to Pixel Level 239
- 14.4.2 Reduced Views 240
- 14.5 Cut, Copy, and Paste 241
- 14.6 Simple Transformations 242
- 14.7 Filling and Shading 243
 - 14.7.1 Filling 243
 - 14.7.2 Half-Toning 244
 - 14.7.3 Surface Renderings 244
- 14.8 Dimensioning and Textual Annotation 244
- 14.9 Other Graphics Tools 245
- 14.10 Typical Graphics Toolbox 246
 - 14.10.1 Graphics Toolbar 246
 - 14.10.2 Palette 248
- 14.11 Dedicated Graphics Packages 249
 - 14.11.1 CAD Packages 249
 - 14.11.2 AutoCAD 249
- 14.12 Animation 251
 - 14.12.1 General Procedure 251
 - 14.12.2 Zooming 251
 - 14.12.3 Partial Motion 252
 - 14.12.4 Morphing 252
 - 14.12.5 Image Shift Computation 252
 - 14.12.6 Relative Motion 253
 - 14.12.7 Panning 253

15. 3D Input and Processing

255

- 15.1 3d Input 255
 - 15.1.1 General Considerations 255
 - 15.1.2 Example of 3D Input 257
- 15.2 Types of Planar Projections of 3D 258
- 15.3 Parallel Projection 259
 - 15.3.1 Orthographic Projections 259
 - 15.3.2 Axonometric Projections 260
- 15.4 Windowing and Clipping 261
- 15.5 Axi-Symmetric Solids 262
 - 15.5.1 Generation of Axi-symmetric Solid 262
 - 15.5.2 Example of Axi-symmetric Solid 263
- 15.6 3D Modeling Transformations 263
 - 15.6.1 Move Transformation 264
 - 15.6.2 Flip Transformations 264
 - 15.6.3 Twist Transformation 265
 - 15.6.4 Scale Transformation 266
 - 15.6.5 Rotate Transformation 266
- 15.7 Axonometric Projection 267
 - 15.7.1 Axonometric Transformation Matrix 267
 - 15.7.2 Example of Axonometric Projection 268
 - 15.7.3 Isometric Projection 268

15.8	Other Transformations	269	
15.8.1	Backward Transformations	269	
15.8.2	Composite Transformations	269	
15.8.3	Transformation about a Focus	269	
15.8.4	Transformation about Rotated Axes	270	
15.8.5	Arbitrary Transformations	270	
15.9	Intersection of Surfaces	270	
15.9.1	Intersection of Two Planes	270	
15.9.2	Intersection of Two Surfaces	271	
	<i>Exercises</i>	273	
16.	3D Realism and Output		274
16.1	Realistic Output	274	
16.1.1	General Considerations	274	
16.1.2	Specific Needs for Realism	275	
16.2	Hidden-Line or Surface Removal	276	
16.2.1	Different Representations	276	
16.2.2	Classification of Methods	277	
16.3	Object Space Methods	278	
16.3.1	Robert's Algorithm	278	
16.3.2	Back Face Detection Method	278	
16.3.3	Example of Back Face Detection Method	279	
16.3.4	Painter's Algorithm	281	
16.4	Image Space Methods	282	
16.4.1	Area Subdivision Method	282	
16.4.2	Example of Area Subdivision Method	283	
16.4.3	Octree Method	285	
16.4.4	Depth-Buffer Method	286	
16.4.5	Scan Line Method	287	
16.4.6	Example of Scan Line Method	288	
16.4.7	Ray Tracing Method	289	
16.5	Perspective Projections	290	
16.5.1	Vanishing Points	291	
16.5.2	Central Projection	291	
16.6	Surface Renderings	293	
16.6.1	Surface Textures	293	
16.6.2	Shading	294	
	<i>Exercises</i>	295	
17.	Conclusion		296

Appendices

A.	Coordinate Systems		298
A.1	Cartesian Coordinate System	298	
A.2	Polar and Cylindrical Coordinate Systems	299	
A.3	Inter-System Transformations	299	

A.3.1	Polar to Cartesian Transformation	299
A.3.2	Cartesian to Polar Transformation	300
A.3.3	Cartesian 3D to Cylindrical Transformations	301
A.4	Spherical Coordinate System	301
	Exercises	302
B.	Lines and Curves in 2D	303
B.1	Straight Lines	303
B.1.1	Length and Direction of a Straight Line	303
B.1.2	General Form of Straight Line	303
B.1.3	Slope-Intercept Form of Straight Line	304
B.1.4	Parametric Form of Straight Line	304
B.1.5	Intersection of Two Straight Lines	304
B.1.6	Parallel Straight Lines	305
B.1.7	Perpendicular Straight Lines	305
B.1.8	Perpendicular Distance from a Point to a Straight Line	305
B.1.9	Position of a Point on a Line	306
B.2	Ellipses	306
B.2.1	General Equations for an Ellipse	307
B.2.2	Parametric Equations for an Ellipse	307
B.2.3	Ellipse not Centred at Origin	308
B.2.4	Symmetry of Ellipse	308
B.3	Circles	309
B.3.1	General Equations for a Circle	309
B.3.2	Parametric Equations for a Circle	309
B.3.3	Symmetry of Circle	310
B.4	Parabolas and Hyperbolas	310
B.4.1	Parabolas	311
B.4.2	Hyperbolas	311
	Exercises	312
C.	Matrix Algebra	313
C.1	Matrix Definitions and Types	313
C.2	Matrix Operations	314
C.2.1	Matrix Transposition	314
C.2.2	Matrix Addition and Subtraction	315
C.2.3	Matrix Multiplication	315
C.2.4	Matrix Inversion	316
C.2.5	Solution of Simultaneous Equations	317
	Exercises	318
D.	Lines and Surfaces in 3D	319
D.1	Planes	319
D.1.1	Equations for Plane	319
D.1.2	Outward Normal to Plane	320
D.1.3	Perpendicular from a Point to Plane	321
D.1.4	Position of Point with Reference to Plane	321

D.2	Straight Lines	321
D.2.1	Non-Parametric Form	321
D.2.2	Parametric Form	322
D.2.3	Intersection of Straight Line with Plane	322
D.3	Quadric Surfaces	322
D.3.1	Ellipsoid and Sphere	322
D.3.2	Elliptic and Right Circular Cylinder	323
D.3.3	Elliptic and Right Circular Cone	323
D.3.4	Elliptic and Right Circular Paraboloid	324
	<i>Exercises</i>	324
E.	References and Resources	325
E.1	Bibliography of Books	325
E.2	Sources from World Wide Web (As of August, 2001)	326
E.2.1	Search Engines	326
E.2.2	Resource Sites	326
E.2.3	Specific Sites	326
F.	Colour Plates and Notes	328
