

"The Professional Edition is without a doubt the best book on Photoshop I've ever read."

—Brian Maffitt, Chief Creative Officer, Total Training, Inc.

FULL COLOR THROUGHOUT!

Photoshop 7

PROFESSIONAL EDITION

Master Photoshop's most powerful retouching options, color adjustments, and filters

Create sophisticated Web graphics, photographic compositions, and unique synthetic effects

Achieve unprecedented control over layers, color balance, focus, lighting, masking, and styles

Preface	ix
---------------	----

Chapter 1: Painting and Brushes 1

Photoshop Paints Like a Pro	1
Meet the Paint and Edit Tools	2
The paint tools	4
The edit tools	5
Basic Techniques	7
Painting a straight line	8
Painting a perpendicular line	8
Painting with the smudge tool	11
Mopping up with the sponge tool	15
Undoing the damage that you've done	18
Brush Size and Shape	18
Selecting a brush shape	18
Making your own brush shape	21
Defining a custom brush	24
Brush Dynamics	24
Brush dynamic basics	25
Shape dynamics	26
Additional brush dynamics	31
Noise, Wet Edges, and the rest	34
Opacity and Strength, Flow and Exposure	35
Brush Modes	38
The 24 paint tool modes	39
The three dodge and burn modes	45

Chapter 2: Cloning, Healing, and Patterns 47

The Gentle Art of Retouching	47
Cloning and Healing	48
The clone stamp tool	48
The healing brush	53
The patch tool	60
Retouching Photographs	62
Restoring an old photograph	65
Eliminating distracting background elements	69
Applying Repeating Patterns	73
Retouching with a pattern	74
Pattern painting options	77
Creating patterns and textures	78
Using the Pattern Maker	84
Building your own seamless pattern	89

Chapter 3: Undo and History	95
Stepping Back through Time	95
The History Palette	96
Painting away the Past	99
The eraser tool	100
The history brush	102
The art history brush	105
Source state limitations	108
Retouching with the History Brush	108
Sharpening and smoothing	109
Painting with the snapshots	111
Creative History Effects	114
Chapter 4: Masks and Extractions	119
Selecting Via Masks	119
Masking defined	120
Painting and Editing Inside Selections	122
Working in Quick Mask Mode	126
How the quick mask mode works	127
Changing the red coating	131
Gradations as masks	132
Creating gradient arrows	138
Generating Masks Automatically	140
The magic eraser	141
The more magical background eraser	143
The still more magical Extract command	145
Using the Color Range command	150
A few helpful Color Range hints	154
Creating an Independent Mask Channel	155
Saving a selection outline to a mask channel	155
Converting a mask to a selection	157
Viewing mask and image	158
Building a Mask from an Image	159
Chapter 5: Working with Layers	167
Layers, Layers Everywhere	167
Sending a Selection to a Layer	169
Other ways to make a layer	169
Duplicating a layer	172
Layer Basics	173
Switching between layers	173
Switching layers from the keyboard	174
Understanding transparency	175
Modifying the background layer	177
Reordering layers	178
Automated matting techniques	180
Blending layers	183
Fusing several layers	184

Dumping layers	185
Saving a flattened version of an image	185
Selecting the Contents of Layers	186
Moving, Linking, and Aligning Layers	186
Linking layers	187
Uniting layers into sets	188
Locking layers	191
Applying Transformations	192
Transforming the entire image	192
Transforming layers and selected pixels	193
Numerical transformations	197
Masking and Layers	197
Preserving transparency	198
Creating layer-specific masks	200
Pasting inside a selection outline	202
Masking groups of layers	202

Chapter 6: Blend Modes and Knockouts 205

It's High Time to Blend, Friend	205
Opacity and Fill	207
Blend Modes	211
Blend mode madness	233
Advanced Blending Options	239
Blending interior layer effects	239
Blending clipping groups	242
Masking and unmasking effects	243
Dumping whole color channels	246
Making knockouts	247
Dropping Out and Forcing Through	251
Color range slider bars	252
Fuzziness	254

Chapter 7: Shapes and Styles 259

Adobe Gumbo	259
Drawing Shapes	260
The pros and cons of shapes	260
The shape tools	262
The shape drawing process	264
Combining and editing shapes	267
Editing the stuff inside the shape	269
The Bold and Beautiful Layer Styles	272
The basic varieties of layer effects	273
Inside the Layer Style dialog box	281
Modifying and Saving Effects	292
Disabling effects	292
Duplicating effects	293
Scattering effects to the four winds	294
Effects and blending options	294
Saving effects as styles	294

Chapter 8: Corrective Filtering 297

Filter Basics	297
A first look at filters	298
How filters work	300
Fading a filter	303
Heightening Focus and Contrast	305
Using the Unsharp Mask filter	306
Sharpening grainy photographs	315
Using the High Pass filter	318
Converting an image into a line drawing	318
Blurring an Image	321
Applying the Gaussian Blur filter	321
Directional blurring	323
Softening a selection outline	331
Noise Factors	337
Adding noise	338
Removing noise with Despeckle	340
Averaging pixels with Median	342
Sharpening a compressed image	344

Chapter 9: Pixelate, Distort, and Render 351

Destructive Filters	351
A million wacky effects	351
A note about RAM	360
The Pixelate Filters	361
The Crystal Halo effect	361
Creating a mezzotint	363
Edge-Enhancement Filters	366
Embossing an image	366
Tracing around edges	370
Creating a metallic coating*	371
Distortion Filters	372
Reflecting an image in a spoon	374
Twirling spirals	377
Creating concentric pond ripples	382
Creating parallel ripples and waves	386
Distorting an image along a curve	395
Changing to polar coordinates	396
Distorting with the Liquify command	400
Adding Clouds and Spotlights	410
Creating clouds	411
Lighting an image	412

Chapter 10: Custom Effects 419

Creating a Home-Grown Effect	419
The Custom filter	419
Custom filter advice	420
Applying Custom Values	424
Symmetrical effects	424
Sharpening	425

Non-1 variations	430
Other custom effects	434
Displacing Pixels in an Image	440
Displacement theory	441
The Displace dialog box	445
Using Displacement Maps	446
Applying predefined dmaps	449
Creating your own textural dmaps	452
Customizing a dmap to an image	455
Designing custom transformations	458

Chapter 11: Correcting Hue and Saturation 461

Adjusting Colors	461
Color effects and corrections	462
Using the adjustment dialog boxes	463
Applying Color Variations	465
How hues work	466
Intensity and range	469
When to use Variations	470
Hue Shifting and Colorizing	473
Adjusting the Hue and Saturation values	473
Editing independent color ranges	482
Colorizing images	488
When Variations and Hue/Saturation Fail	490
Mixing color channels	493
Reducing red-eye	494
Final channel-mixing tidbits	499
Adjustment Layers	500
Creating an adjustment layer	500
The advantages of layer-based corrections	501

Chapter 12: Levels and Curves 507

Making Custom Brightness Adjustments	507
Automatic Levels-Based Adjustments	508
Auto Levels	508
Auto Contrast	510
Auto Color	512
The Levels Command	513
The histogram	514
Input and output levels	517
Applying Levels one channel at a time	524
Customizing the Auto functions	526
Eyedropping neutral colors	528
The Curves Command	530
Mastering the brightness curve	530
Eyedropping graph points	534
Gradient maps	536
Creating and editing continuous curves	539
Working with arbitrary maps	540
Channel-by-channel brightness graphing	543

Chapter 13: File Management and Automation 547

Batching It	547
Hidden Shortcuts and Modifiers	547
Alt-key combos	549
The shortcut menu	550
Toolbox shortcuts	550
The File Browser	552
Working with thumbnails	556
Managing the cache	557
Batch renaming	559
Creating Custom Actions	560
How actions work	561
Editing an action	564
Playing actions and operations	567
Saving and loading sets	568
Batch Processing	569

Chapter 14: Preparing Web Graphics 573

The World of Web Imagery	573
Photoshop and ImageReady	575
Rules of Web Imagery	575
Work large, then shrink	576
World-wide color shifts	578
More rules of Web imagery	584
Saving JPEG Images	586
Adjusting the quality	587
Other JPEG options	587
Preparing and Saving GIF Images	589
The three routes to a GIF file	591
Using the Indexed Color command	593
Colors, transparency, and dithering	596
Making Side-by-Side Comparisons	599
JPEG optimization settings	601
GIF optimization settings	603
The Optimize menu	605
The Preview menu	606
Slicing Images	607
Creating slices	608
Editing slices	610
Setting slice options	610
Saving slices	613
Turning to ImageReady	613
