

# Introduction to Modern Nonparametric Statistics

James J. Higgins

# Contents

|       |   |    |
|-------|---|----|
| 0     | Preliminaries   | 1  |
| 0.1   | Cumulative Distributions and Probability Density Functions                | 1  |
| 0.2   | Common Continuous Probability Distributions                               | 1  |
| 0.3   | The Binomial Distribution   | 4  |
| 0.4   | Confidence Intervals and Tests of Hypotheses                              | 5  |
| 0.5   | Parametric versus Nonparametric Methods                                   | 7  |
| 0.6   | Classes of Nonparametric Methods  | 7  |
| 1     | One-Sample Methods  | 11 |
| 1.1   | A Nonparametric Test of Hypothesis and Confidence Interval for the Median | 11 |
| 1.1.1 | Binomial Test   | 11 |
| 1.1.2 | Confidence Interval   | 13 |
| 1.1.3 | Computer Analysis   | 14 |
| 1.2   | Estimating the Population cdf and Percentiles                             | 14 |
| 1.2.1 | Confidence Interval for the Population cdf                                | 14 |
| 1.2.2 | Inferences for Percentiles  | 16 |
| 1.2.3 | Computer Analysis   | 17 |
| 1.3   | A Comparison of Statistical Tests   | 17 |
| 1.3.1 | Type I Errors   | 18 |
| 1.3.2 | Power   | 18 |
| 1.3.3 | Derivations   | 20 |
|       | Exercises   | 21 |

# 2 Two-Sample Methods 23

|            |   |    |
|------------|---|----|
| <b>2.1</b> | A Two-Sample Permutation Test   | 23 |
| 2.1.1      | The Permutation Test  | 24 |
| 2.1.2      | Summary of Steps Used in a Two-Sample Permutation Test                      | 27 |
| 2.1.3      | Hypotheses for the Two-Sample Permutation Test                              | 28 |
| 2.1.4      | Computer Analysis   | 29 |
| <b>2.2</b> | Permutation Tests Based on the Median and Trimmed Means                     | 30 |
| 2.2.1      | A Permutation Test Based on Medians   | 30 |
| 2.2.2      | Trimmed Means   | 31 |
| <b>2.3</b> | Random Sampling the Permutations  | 31 |
| 2.3.1      | An Approximate $p$ -Value Based on Random Sampling the Permutations         | 32 |
| 2.3.2      | Computer Analysis Using Resampling Stats                                    | 33 |
| 2.3.3      | Computer Analysis Using StatXact  | 35 |
| <b>2.4</b> | Wilcoxon Rank-Sum Test  | 35 |
| 2.4.1      | Steps in Conducting the Wilcoxon Rank-Sum Test                              | 37 |
| 2.4.2      | Comments on the Use of the Wilcoxon Rank-Sum Test                           | 38 |
| 2.4.3      | A Statistical Table for the Wilcoxon Rank-Sum Test                          | 38 |
| 2.4.4      | Computer Analysis   | 39 |
| <b>2.5</b> | Wilcoxon Rank-Sum Test Adjusted for Ties                                    | 41 |
| 2.5.1      | Steps in Conducting the Wilcoxon Rank-Sum Test Adjusted for Ties            | 41 |
| 2.5.2      | Computer Analysis   | 42 |
| <b>2.6</b> | Mann–Whitney Test and a Confidence Interval                                 | 43 |
| 2.6.1      | The Mann–Whitney Statistic  | 43 |
| 2.6.2      | Equivalence of Mann–Whitney and Wilcoxon Rank-Sum Statistics                | 44 |
| 2.6.3      | A Confidence Interval for a Shift Parameter and the Hodges–Lehmann Estimate | 45 |
| 2.6.4      | Computer Analysis   | 48 |
| <b>2.7</b> | Scoring Systems   | 49 |
| 2.7.1      | Three Common Scoring Systems  | 49 |
| 2.7.2      | Computer Analysis   | 51 |
| <b>2.8</b> | Tests for Equality of Scale Parameters and an Omnibus Test                  | 51 |
| 2.8.1      | Siegel–Tukey and Ansari–Bradley Test  | 52 |
| 2.8.2      | Tests on Deviances  | 53 |
| 2.8.3      | Kolmogorov–Smirnov Test   | 57 |
| 2.8.4      | Computer Analysis   | 58 |

|             |  |    |
|-------------|--|----|
| <b>2.9</b>  | Selecting Among Two-Sample Tests                               | 58 |
| 2.9.1       | The <i>t</i> -Test   | 60 |
| 2.9.2       | The Wilcoxon Rank-Sum Test versus the <i>t</i> -Test           | 61 |
| 2.9.3       | Relative Efficiency  | 62 |
| 2.9.4       | Power of Permutation Tests                                     | 63 |
| <b>2.10</b> | Large-Sample Approximations                                    | 65 |
| 2.10.1      | Sampling Formulas  | 65 |
| 2.10.2      | Application to the Wilcoxon Rank-Sum Test                      | 66 |
| 2.10.3      | Wilcoxon Rank-Sum Test with Ties                               | 68 |
| 2.10.4      | Explicit Formulas for $E(W_{ties})$ and $\text{var}(W_{ties})$ | 70 |
| 2.10.5      | Large-Sample Confidence Interval Based<br>on Mann-Whitney Test | 71 |
| 2.10.6      | A Normal Approximation for the Permutation Distribution        | 72 |
|             | Exercises  | 73 |

## 3 K-Sample Methods 79

|            |  |    |
|------------|--|----|
| <b>3.1</b> | <i>K</i> -Sample Permutation Tests   | 79 |
| 3.1.1      | The <i>F</i> Statistic   | 80 |
| 3.1.2      | Steps in Carrying Out the Permutation <i>F</i> -Test   | 81 |
| 3.1.3      | Alternative Forms of the Permutation <i>F</i> Statistic  | 83 |
| 3.1.4      | Computer Analysis  | 84 |
| <b>3.2</b> | The Kruskal-Wallis Test  | 86 |
| 3.2.1      | The Kruskal-Wallis Statistic   | 86 |
| 3.2.2      | Adjustment for Ties  | 88 |
| 3.2.3      | An Intuitive Derivation of the Chi-Square<br>Approximation for KW                                      | 90 |
| 3.2.4      | Tests on General Scores  | 91 |
| 3.2.5      | Computer Analysis  | 91 |
| <b>3.3</b> | Multiple Comparisons   | 92 |
| 3.3.1      | Three Rank-Based Procedures for Controlling Experiment-Wise<br>Error Rate Assuming No Ties in the Data | 92 |
| 3.3.2      | Multiple Comparisons for General Scores (Including Ties)   | 96 |
| 3.3.3      | Multiple Comparison Permutation Tests  | 96 |
| 3.3.4      | Variance of a Difference of Means When Sampling<br>from a Finite Population                            | 98 |
| 3.3.5      | Computer Analysis  | 99 |
| <b>3.4</b> | Ordered Alternatives   | 99 |

|       |                            |     |
|-------|----------------------------|-----|
| 3.4.1 | Jonckheere-Terpstra Test   | 101 |
| 3.4.2 | Large-Sample Approximation | 101 |
| 3.4.3 | Computer Analysis          | 103 |

Exercises 105

## 4 Paired Comparisons and Blocked Designs 109

|       |  |     |
|-------|--|-----|
| 4.1   | Paired-Comparison Permutation Test                               | 109 |
| 4.1.1 | Steps for a Paired-Comparison Permutation Test                   | 110 |
| 4.1.2 | Randomly Selected Permutations                                   | 113 |
| 4.1.3 | Large-Sample Approximations                                      | 113 |
| 4.1.4 | A Test for the Median of a Symmetric Population                  | 114 |
| 4.1.5 | Computer Analysis  | 114 |
| 4.2   | Signed-Rank Test   | 117 |
| 4.2.1 | The Wilcoxon Signed-Rank Test without Ties in the Data           | 118 |
| 4.2.2 | Large-Sample Approximation                                       | 118 |
| 4.2.3 | Adjustment for Ties  | 120 |
| 4.2.4 | Computer Analysis  | 124 |
| 4.3   | Other Paired-Comparison Tests                                    | 125 |
| 4.3.1 | Sign Test  | 125 |
| 4.3.2 | General Scoring Systems  | 126 |
| 4.3.3 | Selecting Among Paired-Comparison Tests                          | 127 |
| 4.4   | A Permutation Test for a Randomized Complete Block Design        | 127 |
| 4.4.1 | <i>F</i> Statistic for Randomized Complete Block Designs         | 128 |
| 4.4.2 | Permutation <i>F</i> -Test for Randomized Complete Block Designs | 129 |
| 4.4.3 | Multiple Comparisons   | 130 |
| 4.4.4 | Computer Analysis  | 131 |
| 4.5   | Friedman's Test for a Randomized Complete Block Design           | 132 |
| 4.5.1 | Friedman's Test without Ties                                     | 133 |
| 4.5.2 | Adjustment for Ties  | 134 |
| 4.5.3 | Cochran's <i>Q</i> and Kendall's <i>W</i>                        | 136 |
| 4.5.4 | Chi-Square Approximation for FM or $FM_{ties}$                   | 136 |
| 4.5.5 | Computer Analysis  | 137 |
| 4.6   | Ordered Alternatives for a Randomized Complete Block Design      | 138 |
| 4.6.1 | Page's Test  | 139 |
| 4.6.2 | Computer Analysis  | 140 |

Exercises 141

# 5 Tests for Trends and Association

145

|            |   |     |
|------------|---|-----|
| <b>5.1</b> | A Permutation Test for Correlation and Slope                          | 145 |
| 5.1.1      | The Correlation Coefficient   | 145 |
| 5.1.2      | Slope of Least Squares Line   | 146 |
| 5.1.3      | The Permutation Test  | 147 |
| 5.1.4      | Large-Sample Approximation for the<br>Permutation Distribution of $r$ | 151 |
| 5.1.5      | Computer Analysis   | 152 |
| <b>5.2</b> | Spearman Rank Correlation   | 153 |
| 5.2.1      | Statistical Test for Spearman Rank Correlation                        | 154 |
| 5.2.2      | Large-Sample Approximation  | 154 |
| 5.2.3      | Computer Analysis   | 158 |
| <b>5.3</b> | Kendall's Tau   | 158 |
| 5.3.1      | Estimating Kendall's Tau with No Ties in the Data                     | 159 |
| 5.3.2      | Large-Sample Approximation  | 160 |
| 5.3.3      | Adjustment for Ties in the Data                                       | 161 |
| 5.3.4      | Computer Analysis   | 163 |
| <b>5.4</b> | Permutation Tests for Contingency Tables                              | 163 |
| 5.4.1      | Hypotheses to Be Tested and the Chi-Square Statistic                  | 163 |
| 5.4.2      | Permutation Chi-Square Test   | 165 |
| 5.4.3      | Multiple Comparisons in Contingency Tables                            | 167 |
| 5.4.4      | Computer Analysis   | 169 |
| <b>5.5</b> | Fisher's Exact Test for a $2 \times 2$ Contingency Table              | 172 |
| 5.5.1      | Probability Distribution Under the Null Hypothesis                    | 173 |
| 5.5.2      | Computer Analysis   | 175 |
| <b>5.6</b> | Contingency Tables with Ordered Categories                            | 176 |
| 5.6.1      | Singly Ordered Tables   | 176 |
| 5.6.2      | Doubly Ordered Tables   | 178 |
| 5.6.3      | Computer Analysis   | 179 |
| <b>5.7</b> | Mantel-Haenszel Test  | 179 |
| 5.7.1      | Hypotheses to Be Tested   | 179 |
| 5.7.2      | Testing Hypotheses for Stratified Contingency Tables                  | 181 |
| 5.7.3      | Estimation of the Odds Ratio  | 183 |
| 5.7.4      | Computer Analysis   | 184 |
| <b>5.8</b> | McNemar's Test  | 186 |
| 5.8.1      | Notation and Hypotheses   | 187 |
| 5.8.2      | Test Statistic and Permutation Distribution                           | 187 |
| 5.8.3      | Computer Analysis   | 188 |
|            | Exercises   | 189 |

# 6 Multivariate Tests

195

|            |   |            |
|------------|---|------------|
| <b>6.1</b> | <b>Two-Sample Multivariate Permutation Tests</b>      | <b>195</b> |
| 6.1.1      | Notation and Assumptions                              | 196        |
| 6.1.2      | The Permutation Version of Hotelling's $T^2$          | 197        |
| 6.1.3      | Other Multivariate Statistics                         | 198        |
| 6.1.4      | Computer Analysis                                     | 200        |
| <b>6.2</b> | <b>Two-Sample Multivariate Rank Tests</b>             | <b>202</b> |
| 6.2.1      | A Sum of Wilcoxon Statistics                          | 203        |
| 6.2.2      | Computer Analysis                                     | 205        |
| <b>6.3</b> | <b>Multivariate Paired Comparisons</b>                | <b>206</b> |
| 6.3.1      | A Permutation Test Based on $T^2$                     | 207        |
| 6.3.2      | Random Sampling the Permutations                      | 207        |
| 6.3.3      | Other Multivariate Statistics                         | 209        |
| 6.3.4      | Computer Analysis                                     | 210        |
| <b>6.4</b> | <b>Multivariate Rank Tests for Paired Comparisons</b> | <b>210</b> |
| 6.4.1      | Testing Medians of a Symmetric Distribution           | 212        |
| 6.4.2      | A Sum of Signed-Rank Statistics                       | 214        |
| 6.4.3      | Computer Analysis                                     | 216        |
| <b>6.5</b> | <b>Multiresponse Categorical Data</b>                 | <b>216</b> |
| 6.5.1      | Hypotheses for Multiresponse Data                     | 217        |
| 6.5.2      | A Statistical Test                                    | 218        |
| 6.5.3      | Computer Analysis                                     | 220        |
|            | <b>Exercises</b>                                      | <b>222</b> |

# 7 Analysis of Censored Data

225

|            |  |            |
|------------|--|------------|
| <b>7.1</b> | <b>Estimating the Survival Function</b>                | <b>225</b> |
| 7.1.1      | Censored Data  | 225        |
| 7.1.2      | Kaplan–Meier Estimate                                  | 226        |
| 7.1.3      | Computer Analysis                                      | 228        |
| <b>7.2</b> | <b>Permutation Tests for Two-Sample Censored Data</b>  | <b>229</b> |
| 7.2.1      | Censoring Mechanism                                    | 229        |
| 7.2.2      | Examples of Tests Based on Medians and Ranks           | 231        |
| 7.2.3      | Computer Analysis                                      | 232        |
| <b>7.3</b> | <b>Gehan's Generalization of the Mann–Whitney Test</b> | <b>232</b> |
| 7.3.1      | An Alternative Form of $U_c$ Based on Gehan Scores     | 233        |
| 7.3.2      | Large-Sample Approximations                            | 235        |
| 7.3.3      | Computer Analysis                                      | 236        |

|            |   |     |
|------------|---|-----|
| <b>7.4</b> | Scoring Systems for Censored Data             | 236 |
| 7.4.1      | Prentice-Wilcoxon Scores                      | 236 |
| 7.4.2      | Log-Rank Scores                               | 238 |
| 7.4.3      | The Likelihood Approach                       | 239 |
| 7.4.4      | Computer Analysis                             | 241 |
| <b>7.5</b> | Tests Using Scoring Systems for Censored Data | 242 |
| 7.5.1      | Two-Sample and K-Sample Tests                 | 242 |
| 7.5.2      | Paired-Comparison and Blocked Designs         | 244 |
| 7.5.3      | Computer Analysis                             | 245 |
|            | Exercises                                     | 245 |

## **8** Nonparametric Bootstrap Methods 249

|            |   |     |
|------------|---|-----|
| <b>8.1</b> | The Basic Bootstrap Method                                      | 249 |
| 8.1.1      | Mean Squared Error and Margin of Error                          | 250 |
| 8.1.2      | The Bootstrap Estimate of MSE                                   | 250 |

Exercises 298

## **9 Multifactor Experiments** 301

|            |  |            |
|------------|--|------------|
| <b>9.1</b> | <b>Analysis of Variance Models</b>                                   | <b>301</b> |
| 9.1.1      | The Bootstrap Approach to the Analysis<br>of the Fixed-Effects Model | 302        |
| 9.1.2      | A Permutation Test for the Overall Effect of a Factor                | 305        |
| 9.1.3      | Computer Analysis  | 307        |
| <b>9.2</b> | <b>Aligned-Rank Transform</b>  | <b>309</b> |
| 9.2.1      | Aligning the Data in a Completely Random Design                      | 310        |
| 9.2.2      | Aligning the Data in a Split-Plot Design                             | 311        |
| 9.2.3      | Properties of the Aligned-Rank Procedure                             | 314        |
| 9.2.4      | Computer Analysis  | 314        |
| <b>9.3</b> | <b>Testing for Lattice-Ordered Alternatives</b>                      | <b>314</b> |
| 9.3.1      | A Test Statistic for Lattice-Ordered Alternatives                    | 315        |
| 9.3.2      | Lattice Correlation  | 316        |
| 9.3.3      | References for Lattice-Ordered Alternatives                          | 318        |
| 9.3.4      | Computer Analysis  | 319        |

Exercises 319

## **10 Smoothing Methods and Robust Model Fitting** 323

|             |  |            |
|-------------|--|------------|
| <b>10.1</b> | <b>Estimating the Probability Density Function</b> | <b>323</b> |
| 10.1.1      | Kernel Method                                      | 324        |
| 10.1.2      | Computer Analysis                                  | 326        |
| <b>10.2</b> | <b>Nonparametric Curve Smoothing</b>               | <b>326</b> |
| 10.2.1      | Loess Method                                       | 326        |
| 10.2.2      | Kernel Method                                      | 327        |
| 10.2.3      | Computer Analysis                                  | 329        |

**10.3 Robust and Rank-Based Regression 329**

10.3.1 *M*-Estimation 329

10.3.2 Rank-Based Regression 331

10.3.3 Computer Analysis 334
