

Coping with Risk in Agriculture

SECOND EDITION

J.B. Hardaker, R.B.M. Huirne,
J.R. Anderson and G. Lien

CABI Publishing

Contents

| | |
|--|-----------|
| PREFACE | ix |
| Preface to the second edition | ix |
| Preface to the first edition | x |
| 1. INTRODUCTION TO RISK IN AGRICULTURE | 1 |
| Examples of risky decisions in agriculture, and their implications | 1 |
| The need to take account of risk in agriculture | 4 |
| Risk and uncertainty | 5 |
| Who needs to think about risk in agriculture? | 11 |
| A general approach to risk management in agriculture | 13 |
| When formal decision analysis is needed | 18 |
| Outline and general approach of the book | 20 |
| Selected additional reading | 22 |
| 2. DECISION ANALYSIS: OUTLINE AND BASIC ASSUMPTIONS | 23 |
| Basic concepts | 23 |
| A simple risky decision problem | 25 |
| Structuring the problem: influence diagram representation | 27 |
| Decision tree representation | 28 |
| Analysing the decision tree | 30 |
| Components of decision analysis and its axiomatic foundation | 34 |
| Other assumptions | 36 |

| | |
|---|------------|
| Rational choice under risk | 37 |
| Selected additional reading | 37 |
| 3. MEASURING UNCERTAINTY WITH SUBJECTIVE PROBABILITIES | 38 |
| Probabilities to calibrate beliefs | 38 |
| Eliciting and describing probability distributions | 41 |
| Accounting for new information | 55 |
| Selected additional reading | 61 |
| 4. MAKING BETTER PROBABILITY JUDGEMENTS | 62 |
| Introduction | 62 |
| The relevance of data in probability assessment | 62 |
| Taking expert advice | 71 |
| Obtaining joint probability distributions | 74 |
| Psychological pitfalls in making probability judgements | 86 |
| Selected additional reading | 90 |
| 5. ATTITUDES TO RISKY CONSEQUENCES | 92 |
| Introduction | 92 |
| Utility function elicitation | 95 |
| Risk aversion | 100 |
| Utility function fitting | 105 |
| From expected utility to certainty equivalent | 105 |
| Problems in utility function elicitation | 106 |
| Alternatives to direct elicitation of utility functions | 108 |
| Rationalizing risk aversion | 110 |
| The importance of risk aversion | 113 |
| Group decision making | 118 |
| Conclusion | 119 |
| Selected additional reading | 120 |
| 6. INTEGRATING BELIEFS AND PREFERENCES FOR DECISION ANALYSIS | 121 |
| Decision trees revisited | 121 |
| Payoff table approach | 130 |
| Incorporating new information | 131 |
| Beliefs and preferences in analysing production under risk | 134 |
| Selected additional reading | 138 |
| 7. DECISION ANALYSIS WITH PREFERENCES UNKNOWN | 140 |
| Efficiency criteria | 140 |
| Analysis using moments of the distribution | 142 |
| Stochastic efficiency methods | 147 |

| | |
|---|------------|
| Concluding comment | 156 |
| Selected additional reading | 156 |
| 8. STOCHASTIC SIMULATION | 157 |
| Introduction | 157 |
| Stochastic simulation as a tool in decision analysis | 158 |
| Basic sampling techniques | 164 |
| Methods to account for stochastic dependency | 168 |
| Combining stochastic simulation and optimization | 176 |
| Concluding comments | 181 |
| Selected additional reading | 181 |
| 9. RISK AND MATHEMATICAL PROGRAMMING MODELS | 182 |
| A brief introduction to mathematical programming | 182 |
| A basic example | 184 |
| Mathematical programming approaches to whole-farm system planning under risk | 185 |
| Risk programming | 187 |
| Stochastic programming | 203 |
| Concluding comment | 209 |
| Selected additional reading | 210 |
| 10. DECISION ANALYSIS WITH MULTIPLE OBJECTIVES | 211 |
| Introduction with some examples | 211 |
| Objectives and attributes | 213 |
| Structuring the decision problem | 213 |
| Basic concepts in multi-attribute utility | 218 |
| Assessing attribute utilities | 224 |
| Methods for weighting attribute utilities | 227 |
| Multi-attribute utility analysis under uncertainty | 230 |
| Other forms of multi-attribute utility analysis | 232 |
| Selected additional reading | 233 |
| 11. RISKY DECISION MAKING AND TIME | 234 |
| The time factor in decision analysis | 234 |
| Investment appraisal under uncertainty | 236 |
| Dynamic decision analysis | 244 |
| Stochastic dynamic modelling methods | 252 |
| Selected additional reading | 264 |
| 12. STRATEGIES DECISION MAKERS CAN USE TO MANAGE RISK | 265 |
| Introduction | 265 |
| On-farm strategies | 268 |
| Strategies to share risk with others | 275 |

| | |
|--|------------|
| Concluding comment | 286 |
| Selected additional reading | 286 |
| 13. RISK CONSIDERATIONS IN AGRICULTURAL POLICY MAKING | 287 |
| Introduction | 287 |
| Government intervention and farm-level risk | 288 |
| Market failure for risk transfer | 293 |
| Experience with public risk-management instruments | 299 |
| Emerging issues in risk management | 303 |
| Concluding comment | 308 |
| Selected additional reading | 308 |
| REFERENCES | 309 |
| SELECTED SOFTWARE FOR DECISION ANALYSIS | 320 |
| INDEX | 322 |
