NOVA

CONTENTS

Preface		vii
Chapter 1	Food Biotechnology in the United States: Science, Regulation, and Issues <i>Donna U. Vogt and Mickey Parish</i>	1
Chapter 2	U.S. European Agricultural Trade: Food Safety and Biotechnology Issues <i>Charles E. Hanrahan</i>	31
Chapter 3	Starlink™ Corn Controversy: Background <i>Alejandro E. Segarra and Jean M. Rawson</i>	39
Chapter 4	Labeling of Genetically Modified Foods <i>Donna U. Vogt</i>	49
Chapter 5	Adoption of Genetically Modified Agricultural Products <i>Geoffrey S. Becker</i>	57
Chapter 6	The “Terminator Gene” and other Genetic Use Restriction Technologies (Gurts) in Crops <i>Alejandro E. Segarra and Jean M. Rawson</i>	65
Chapter 7	Agricultural Biotechnology: The U.S.-EU Dispute <i>Geoffrey S. Becker and Charles E. Hanrahan</i>	77
Chapter 8	Biosafety Protocol for Genetically Modified Organisms: Overview <i>Alejandro E. Segarra and Susan R. Fletcher</i>	87
Chapter 9	Agricultural Biotechnology <i>Geoffrey S. Becker</i>	99

Chapter 10	Status of Genetically Engineered Wheat in North America <i>Gwenell L. Waters Bass</i>	103
Chapter 11	Genetically Engineered Soybeans: Acceptance and Intellectual Property Rights Issues in South America <i>Randy Schnepf</i>	111
Chapter 12	Biotechnology and Agricultural Trade <i>Charles E. Hanrahan</i>	119
Chapter 13	U.S. Agricultural Biotechnology in Global Markets: An Introduction <i>Geoffrey S. Becker and Charles E. Hanrahan</i>	123
Index		145
