

Chemical and Functional Properties  
of Food Components Series

*Chemical and  
Functional  
Properties of  
Food  
Components*

---

*Second Edition*

---

EDITED BY Zdzisław E. Sikorski

CRC PRESS

# 1 Food Components and Their Role in Food Quality

*Zdzisław E. Sikorski*

## CONTENTS

1.1	Main Food Components.....	1
1.1.1	Introduction .....	1
1.1.2	Contents and Role in Food Raw Materials .....	2
1.1.3	Factors Affecting Food Composition.....	4
1.2	Quality of Foods .....	5
1.3	Functional Properties of Food Components.....	5
1.4	Role of Chemistry and Processing Factors .....	6
1.4.1	Introduction .....	6
1.4.2	Effect on Safety and Nutritional Value.....	7
1.4.3	Effect on Sensory Quality.....	7
	References.....	8

# 2 Chemical Composition and Structure of Foods

*Krystyna Palka*

## CONTENTS

2.1	Introduction .....	11
2.2	Protein Food Products.....	12
2.2.1	Meat.....	12
2.2.2	Milk and Milk Products.....	14
2.2.3	Eggs.....	15
2.3	Saccharide Food Products.....	16
2.3.1	Cereal and Cereal Products.....	16
2.3.2	Potatoes .....	18
2.3.3	Honey .....	20
2.3.4	Nuts .....	20
2.3.5	Seeds of Pulses.....	20
2.4	Edible Fats.....	21
2.5	Fruits and Vegetables .....	21
	References.....	23

# 3 Water and Food Quality

*Barbara Cybulska and Peter Edward Doe*

## CONTENTS

3.1	Introduction .....	25
3.2	Structure and Properties of Water.....	26
3.2.1	Water Molecule .....	26
3.2.2	Hydrogen Bonds .....	27
3.2.3	Properties of Bulk Water .....	28
3.2.4	Thermal Properties of Water.....	32
3.2.5	Water as a Solvent .....	33
3.2.6	Water in Biological Materials.....	36
3.2.6.1	Properties .....	36
3.2.6.2	Water Transport.....	39
3.3	Water in Food.....	40
3.3.1	Introduction .....	40
3.3.2	Sorption Isotherms and Water Activity .....	41
3.3.2.1	Principle .....	41
3.3.2.2	Measurement of Water Activity.....	43
3.3.3	Water Activity and Shelf Life of Foods .....	44
3.4	Water Supply, Quality, and Disposal.....	45
3.4.1	Water Supply.....	45
3.4.2	Water Quality .....	45
3.4.2.1	Standards and Treatment .....	45
3.4.2.2	Water Pollution .....	47
3.4.3	Wastewater Treatment and Disposal.....	48
	References.....	49

# 4 Mineral Components

*Michał Nabrzyski*

## CONTENTS

4.1	Contents and Role of Minerals in Foods .....	51
4.2	Interaction with Dietary Components.....	54
4.2.1	Effect on Absorption.....	54
4.2.2	Building Body Tissue and Regulating Body Processes .....	57
4.3	Role in Food Processes.....	57
4.3.1	Effect on Oxidation.....	57
4.3.2	Effect on Rheological Properties .....	67
4.3.3	Other Effects .....	68
4.4	Effect of Storage and Processing on the Mineral Components in Foods ....	68
4.5	Chemical Nature of Toxicity of Some Mineral Food Components.....	70
4.5.1	Introduction .....	70
4.5.2	Arsenic .....	70
4.5.3	Mercury .....	71
4.5.4	Cadmium .....	72
4.5.5	Lead.....	74
4.5.6	Interactions of Elements .....	77
	References.....	77

# 5 Saccharides

*Piotr Tomasik*

## CONTENTS

5.1	Natural Food Saccharides, Occurrence, Role, and Applications .....	81
5.2	Carbohydrate Structure .....	82
5.3	Carbohydrate Chirality .....	88
5.4	Carbohydrate Reactivity .....	89
5.4.1	Chemical and Physical Transformations of Mono-, Di-, and Oligosaccharides Essential in Food Chemistry .....	89
5.4.1.1	Reactions of Aldehyde and Ketone Functions .....	89
5.4.1.2	Reactions of the Hydroxyl Groups .....	92
5.4.1.3	Reactions of Glycosidic Bond .....	97
5.4.1.4	Specific Reactions of Saccharides .....	97
5.4.2	Chemical and Physical Transformations of Polysaccharides .....	99
5.4.2.1	Depolymerization of Carbohydrates .....	102
5.4.2.2	Chemical Modification of Polysaccharides without Attempted Depolymerization .....	103
5.4.2.3	Cross-Linked Polysaccharides .....	105
5.4.3	Enzymatic Transformations of Carbohydrates .....	105
5.4.4	Cereal and Tuber Starches .....	107
5.5	Functional Properties of Carbohydrates .....	107
5.5.1	Taste .....	107
5.5.2	Colorants .....	109
5.5.3	Flavor and Aroma .....	110
5.5.4	Texture .....	110
5.5.5	Encapsulation .....	111
5.5.6	Polysaccharide Containing Biodegradable Materials .....	112
	References .....	113

# 6 Food Lipids

*Yan-Hwa Chu and Lucy Sun Hwang*

## CONTENTS

6.1	Introduction .....	115
6.2	Chemical Constituents of Oils and Fats .....	116
6.3	Processing of Oils and Fats .....	118
6.3.1	Introduction .....	118
6.3.2	Receiving .....	118
6.3.3	Preparation .....	118
6.3.4	Extraction .....	118
6.3.5	Refining .....	119
6.3.5.1	Degumming .....	119
6.3.5.2	Chemical Refining .....	119
6.3.5.3	Physical Refining .....	120
6.3.5.4	Bleaching .....	120
6.3.5.5	Deodorizing .....	120
6.3.5.6	Dewaxing .....	120
6.3.6	Modification .....	121
6.3.6.1	Hydrogenation .....	121
6.3.6.2	Interesterification .....	121
6.3.6.3	Fractionation .....	121
6.4	Changes of Lipids Due to Storage .....	121
6.5	Interactions of Lipids with Other Components in the Food System .....	122
6.6	Functional Fatty Substances .....	123
6.6.1	Structured Lipids .....	123
6.6.2	Polyenoic Fatty Acids .....	126
6.6.3	Vegetable Lecithin .....	128
6.6.4	Tocopherol and Phytosterol .....	129
6.6.5	Sesame Lignans .....	130
	References .....	131

# 7 Proteins

*Zdzisław E. Sikorski*

## CONTENTS

7.1	Chemical Structure.....	134
7.1.1	Introduction.....	134
7.1.2	Amino Acid Composition.....	134
7.1.3	Hydrophobicity.....	137
7.1.3.1	Average Hydrophobicity.....	137
7.1.3.2	Surface Hydrophobicity.....	137
7.2	Conformation.....	138
7.2.1	Native State.....	138
7.2.2	Denaturation.....	141
7.3	Functional Properties.....	141
7.3.1	Introduction.....	141
7.3.2	Solubility.....	142
7.3.2.1	Effect of the Protein Structure and Solvent.....	142
7.3.2.2	Effect of Ions.....	143
7.3.2.3	Importance in Food Processing.....	144
7.3.3	Water-Holding Capacity.....	144
7.3.4	Gelling and Film Formation.....	145
7.3.4.1	Gel Structure.....	145
7.3.4.2	Interactions of Components.....	146
7.3.4.3	Binding Forces and Process Factors.....	146
7.3.4.4	Importance in Food Processing.....	147
7.3.5	Emulsifying Properties.....	148
7.3.5.1	Principle.....	148
7.3.5.2	Factors Affecting Emulsification.....	149
7.3.5.3	Determination of Emulsifying Properties.....	150
7.3.6	Foaming Properties.....	150
7.4	Proteins as Functional Components in Foods.....	151
7.4.1	Muscle Proteins.....	151
7.4.2	Legume Proteins.....	153
7.4.3	Milk Proteins.....	153
7.4.4	Egg Proteins.....	154
7.4.5	Mycoprotein.....	154
7.5	Effects of Heating.....	155
7.5.1	Introduction.....	155

7.5.2	Rheological Changes.....	156
7.5.3	Changes in Color .....	157
7.5.4	Development of Volatile Compounds.....	158
7.5.5	Reactions at Alkaline pH.....	159
7.6	Oxidation.....	160
7.7	Enzyme-Catalyzed Reactions .....	162
7.7.1	Introduction .....	162
7.7.2	Changes in Milk Proteins .....	162
7.7.3	Role of Enzymes in Muscle Foods .....	162
7.7.4	Transglutaminase-Catalyzed Reactions .....	166
7.7.5	Other Enzyme Applications in Foods.....	167
7.8	Chemical Modifications .....	168
7.8.1	Introduction .....	168
7.8.2	Alkylation.....	169
7.8.3	Acylation .....	170
7.8.4	<i>N</i> -Nitrosation.....	171
7.8.5	Reactions with Phosphates.....	172
	References.....	173

# 8 Rheological Properties of Food Systems

*Tadeusz Matuszek*

## CONTENTS

8.1	Introduction .....	179
8.2	Flow Properties of Liquid and Semisolid Food Systems.....	181
8.3	Effect of Composition and Processing Parameters on the Rheological Behavior of Food Systems.....	191
8.3.1	Energy, Stress, and Deformation .....	191
8.3.2	Structure Development.....	193
8.3.3	Glass Transition and State Diagrams .....	195
8.3.4	Dynamics Map of the Food System.....	196
8.4	Importance of the Rheological Properties of Foods for Process Design and Control.....	199
8.4.1	Simplified Rheological Principles .....	199
8.4.2	Case Behavior of Fluid Food System.....	201
	References.....	203

# 9 Food Colorants

*Jadwiga Wilska-Jeszka*

## CONTENTS

9.1	Introduction .....	205
9.2	Carotenoids.....	206
9.2.1	Structure .....	206
9.2.2	Occurrence .....	209
9.2.3	Carotenoids Used as Food Colorants .....	210
9.2.4	Physical and Chemical Properties .....	212
9.2.5	Biological Activity .....	213
9.3	Chlorophyll.....	215
9.4	Heme Pigments .....	217
9.5	Anthocyanins.....	219
9.5.1	Occurrence and Structure.....	219
9.5.2	Chemical Properties .....	220
9.5.3	Biological Activity .....	222
9.5.4	Stability of Anthocyanins' Color in Food .....	223
9.6	Betalains .....	224
9.6.1	Occurrence and Structure.....	224
9.6.2	Chemical Properties .....	225
9.7	Quinoid Pigments.....	226
9.8	Some Other Natural Pigments .....	226
9.8.1	Riboflavin and Riboflavin 5'phosphate.....	226
9.8.2	Turmeric, Curcumin .....	227
9.8.3	Caramel .....	227
9.9	Synthetic Organic Colors.....	228
	References.....	228

# 10 Flavor Compounds

*Chung-May Wu, Jen-Min Kuo,  
and Bonnie Sun Pan*

## CONTENTS

10.1	Sources of Flavors in Foods .....	232
10.1.1	Flavors Formed Naturally in Plants.....	232
10.1.1.1	Spices and Herbs .....	232
10.1.1.2	Fruits .....	232
10.1.1.3	Vegetables .....	233
10.1.2	Flavors Produced by Microbes or Enzymes.....	233
10.1.3	Flavors Produced by Heating or Cooking.....	233
10.1.4	Flavors from Flavorants Added .....	233
10.2	Molecular Structure and Odor of Flavor Compounds .....	234
10.2.1	Volatility and Intensity of Aroma Compounds.....	234
10.2.2	Flavor Compounds and Their Odors .....	234
10.3	Changes in Flavor During Food Storage and Processing .....	235
10.3.1	Changes Due to Nature of Flavor Compounds.....	235
10.3.2	Changes Due to Continuing Aroma Biogenesis.....	236
10.3.3	Changes Due to Tissue Disruption or Enzyme Reactions .....	236
10.3.3.1	Introduction.....	236
10.3.3.2	Allium .....	236
10.3.3.3	Brassicas .....	237
10.3.3.4	Mushrooms .....	237
10.3.3.5	Formation of Green-Grassy Notes in Disrupted Tissues.....	237
10.3.3.6	Glycosides as Flavor Precursors.....	238
10.3.4	Changes Due to Processing .....	238
10.3.4.1	Maillard Reaction .....	238
10.3.4.2	Lipid Oxidation.....	239
10.3.4.3	Interaction of Lipids in the Maillard Reaction .....	240
10.3.4.4	Extrusion .....	241
10.3.4.5	Concentration and Other Processes.....	241
10.3.5	Changes Due to Storage of Food Products .....	241
10.4	Use of Flavors in Food Industry.....	242
10.4.1	Functional Properties of Flavor Compounds.....	242
10.4.2	Collection or Production of Flavoring Materials .....	243
10.4.2.1	Natural Flavor Materials.....	243
10.4.2.2	Organic Chemicals Used in Flavorings.....	244
10.4.3	Flavor Manufacturing.....	245

10.4.3.1	Flavor Compounding .....	245
10.4.3.2	Process Flavor .....	246
10.5	Biotechnological Production of Flavors .....	246
10.5.1	Microbial Production of Flavor Compounds.....	246
10.5.2	Enzymatic Generation of Flavor Compounds .....	248
10.5.3	Recombinant DNA Technology for Flavor Formations .....	249
10.6	Applications of Flavors .....	250
	References.....	251

# 11 Probiotics in Food

*Maria Bielecka*

## CONTENTS

11.1	Introduction .....	259
11.2	Scientific Basis of Probiotic Functionality and Justification of Their Use .....	260
11.3	Probiotic Strain Selection .....	261
11.4	Probiotic Effects .....	263
11.4.1	Introduction .....	263
11.4.2	Intestinal Infections .....	264
11.4.3	Immune Stimulation .....	264
11.4.4	Effect on Nonspecific Immune Responses .....	264
11.4.5	Effect on Specific Immune Responses .....	265
11.4.6	Factors that Influence the Efficacy of LAB .....	266
11.4.7	Future .....	266
11.5	Probiotic Foods .....	266
11.5.1	Food Products Containing Probiotics .....	266
11.5.2	Efficacy of Probiotic Products .....	267
11.5.3	Safety .....	268
11.5.4	Critical Questions Related to Probiotics .....	268
11.6	Recommendation for Future Research .....	269
	References .....	269

# 12 Major Food Additives

*Adriaan Ruiter and Alphons G.J. Voragen*

## CONTENTS

12.1	Introduction .....	273
12.2	Classification .....	274
12.3	Preservatives .....	275
12.3.1	Introduction .....	275
12.3.2	Sulfite .....	276
12.3.3	Nitrite .....	277
12.3.4	Sorbic Acid.....	277
12.3.5	Benzoic Acid.....	278
12.4	Antioxidants .....	278
12.5	Flavorings, Colorants, and Sweeteners.....	279
12.6	Stabilizers, Emulsifiers, and Thickening Agents.....	281
12.7	Clarifying Agents and Film Formers.....	283
12.8	Acidulants.....	283
12.9	Fat Substitutes and Fat Mimetics .....	284
12.10	Prebiotics .....	285
	References.....	287

# 13 Food Safety

*Julie Miller Jones*

## CONTENTS

13.1 Introduction .....	291
13.2 Consumer Attitudes toward the Food Safety Problem.....	293
13.3 Tests to Determine Food Safety .....	294
13.4 Food Safety Concerns .....	296
13.5 Microbial Contamination of Food .....	296
13.6 Risk-Benefit as It Applies to Food .....	298
13.7 Nutritional Evaluation of Food Processing .....	300
13.7.1 Effects on Vitamins .....	300
13.7.2 Effects on Minerals .....	302
13.8 Newer and Novel Technologies .....	302
13.8.1 Irradiation .....	302
13.8.2 Biotechnology .....	303
13.9 Additives.....	303
References.....	304

# 14 Mutagenic, Carcinogenic, and Chemopreventive Compounds in Foods

*Agnieszka Bartoszek*

## CONTENTS

14.1	Introduction .....	308
14.2	Role of Mutagens in Carcinogenesis.....	309
14.3	Metabolic Activation and Formation of DNA Adducts by Food Mutagens and Carcinogens .....	310
14.4	Tests for Mutagenicity and Carcinogenic Properties of Food Components.....	315
14.5	Food-borne Mutagens and Carcinogens .....	317
14.5.1	Introduction .....	317
14.5.2	Mycotoxins.....	318
14.5.3	Nitrosamines.....	319
14.5.4	Mutagens in Heat-Processed Foods.....	320
14.5.4.1	Heterocyclic Aromatic Amines.....	320
14.5.4.2	Polycyclic Aromatic Hydrocarbons.....	322
14.5.4.3	Effect of Commercial Processing and Cooking Techniques .....	323
14.5.5	Mutagens in Tea, Coffee, and Alcoholic Beverages .....	324
14.5.6	Other Risk Factors .....	325
14.6	Chemopreventive Food Components .....	326
14.6.1	Anticarcinogenic Food Components .....	327
14.6.2	Cancer Chemoprevention .....	330
14.7	Summary .....	331
	References.....	333
