

Postharvest Oxidative Stress

— in —

HORTICULTURAL CROPS

Editor

D. Mark Hodges

CONTENTS

About the Editor	ix
Contributors	xi
Preface	xiii
Chapter 1. Overview: Oxidative Stress and Postharvest Produce	1
<i>D. Mark Hodges</i>	
Active Oxygen Species	1
General AOS Activity	3
AOS Generation	4
Conclusion	7
Chapter 2. Postharvest Response of Horticultural Products to Ozone	13
<i>Charles F. Forney</i>	
Introduction	13
Ozone Chemistry	13
Physiological Effects on Plants	16
Postharvest Use on Fresh Produce	31
Conclusion and Topics for Further Research	43
Chapter 3. Low Temperature As a Causative Agent of Oxidative Stress in Postharvest Crops	55
<i>Wendy V. Wismer</i>	
Introduction	55
Chilling Injury	57
Low-Temperature Sweetening	59
Low-Temperature Stress-Related Quality Defects	60
Temperature Preconditioning to Inhibit Low-Temperature Oxidative Stress	63

Conclusion	65
Issues and Topics for Further Research	65
Chapter 4. Effects of Storage Conditions and Postharvest Procedures on Oxidative Stress in Fruits and Vegetables	69
<i>Peter M. A. Toivonen</i>	
Introduction	69
Maturity at Harvest	70
Storage Duration	72
Storage Temperature	73
Postharvest Water Loss	75
Controlled and Modified Atmospheres	75
Ethylene	77
Irradiation	79
Future Directions	81
Chapter 5. Superficial Scald—A Postharvest Oxidative Stress Disorder	91
<i>John M. DeLong</i> <i>Robert K. Prange</i>	
Chemistry of Scald	92
Scald and Oxidative Stress Theories	94
Ethylene and Scald	97
Postharvest Scald Treatments to Control Oxidative Stress	98
Conclusion and Future Research Direction	103
Chapter 6. Oxidative Stress Affecting Fruit Senescence	113
<i>Gene Edward Lester</i>	
Introduction	113
Oxidative Stress	118
Factors Affecting Oxidative Stress and Senescence	120
Recent Research into Fruit Oxidative Stress	122
Conclusion	124
Issues for Further Research	125

Chapter 7. Antioxidants	131
<i>Susan Lurie</i>	
Introduction	131
Lipid-Soluble Membrane-Associated Antioxidants	132
Water-Soluble Antioxidants	133
Enzymatic Antioxidant Systems	136
Antioxidants During Postharvest Storage	140
Conclusion and Directions for Future Research	144
Chapter 8. How Respiring Plant Cells Limit the Production of Active Oxygen Species	151
<i>Albert C. Purvis</i>	
Introduction	151
Sites of Active Oxygen Species Production in the Mitochondrial Electron Transport Chain	152
Intracellular Oxygen Concentration	155
The Alternative Oxidase	155
The Plant Uncoupling Mitochondrial Protein	156
Q-Cycle Inhibitors	158
The Q Pool	159
Conclusion	160
Issues and Topics for Future Research	160
Chapter 9. Physiological Effects of Oxidative Stress in Relation to Ethylene in Postharvest Produce	165
<i>Andrea Masia</i>	
Introduction	165
Ethylene Physiology in Postharvest	173
Future Directions	189
Chapter 10. Genetic Variation and Prospects for Genetic Engineering of Horticultural Crops for Resistance to Oxidative Stress Induced by Postharvest Conditions	199
<i>Christopher B. Watkins Mulpuri V. Rao</i>	
Introduction	199
AOS Metabolism	200

Senescence, Ripening, and AOS Metabolism	202
Chilling Injuries of Fruits and Vegetables	205
Genetic Approaches: Are They Feasible?	210
Conclusion and Future Research	213
Chapter 11. Postharvest Treatments to Control Oxidative Stress in Fruits and Vegetables	225
<i>Peter M. A. Toivonen</i>	
Introduction	225
Control of Oxidative Injury Using Antioxidant Dips and Edible Coatings	226
Postharvest Treatments to Control Oxidant Injury in Fruits and Vegetables	228
Future Directions	238
Index	247
