

Transgenic Plants

Current Innovations and Future Trends

Edited by:

C. Neal Stewart, Jr.

Contents

List of Contributors	vi
Preface	ix
Chapter 1	1
Introduction: The Future of Transgenic Plants <i>C. Neal Stewart, Jr and Anil Day</i>	
Chapter 2	9
Controlling Maturation and Flowering for Forest Tree Domestication <i>Amy M. Brunner, Barry Goldfarb, Victor B. Busov, and Steven H. Strauss</i>	
Chapter 3	45
Transgenic Trees: Advances in Somatic Embryogenesis, Transformation and Engineering with Phytoremediation Genes <i>Scott A. Merkle</i>	
Chapter 4	65
<i>In Planta</i> Transformation <i>Georges Pelletier and Nicole Bechtold</i>	
Chapter 5	83
Engineering the Chloroplast Genome for Biotechnology Applications <i>Henry Daniell and Muhammad Sarwar Khan</i>	
Chapter 6	111
Antibiotic Resistance Genes in Transgenic Plants: Their Origins, Undesirability and Technologies for Their Elimination from Genetically Modified Crops <i>Anil Day</i>	
Chapter 7	157
Site-Specific Recombination Systems and Their Uses for Targeted Gene Manipulation in Plant Systems <i>Chris L. Baszczyński, William J. Gordon-Kamm, L. Alexander Lyznik, David J. Peterson and Zuo-Yu Zhao</i>	

Chapter 8	179
Transgenic Plants for Disease Resistance <i>Vipaporn Phuntumart</i>	
Chapter 9	217
Plant Biotechnology and Food Safety Evaluation <i>Harold Richards and Susan Hefle</i>	
Chapter 10	233
Plant-Based Vaccines <i>James E. Carter III, Nak-Won Choi, Cheree Rivers-Khalid, and William H.R. Langridge</i>	
Chapter 11	265
Genomics Using Transgenic Plants <i>Mentewab Ayalew</i>	
Index	293
