# CONTENTS

## PREFACE x

<b>CHAPTER 1:</b>	<b>Introduction to Expert Systems</b>	<b>1</b>
1.1	Introduction	1
1.2	What Is an Expert System	1
1.3	Advantages of Expert Systems	8
1.4	General Concepts of Expert Systems	9
1.5	Characteristics of an Expert System	12
1.6	The Development of Expert Systems Technology	14
1.7	Expert Systems Applications and Domains	20
1.8	Languages, Shells, and Tools	26
1.9	Elements of an Expert System	28
1.10	Production Systems	34
1.11	Procedural Paradigms	38
1.12	Nonprocedural Paradigms	45
1.13	Artificial Neural Systems	51
1.14	Connectionist Expert Systems and Inductive Learning	58
1.15	The State of the Art in Artificial Intelligence	58
1.16	Summary	63
	Problems	63
	Bibliography	64
<b>CHAPTER 2:</b>	<b>The Representation of Knowledge</b>	<b>67</b>
2.1	Introduction	67
2.2	The Meaning of Knowledge	69
2.3	Productions	74
2.4	Semantic Nets	78
2.5	Object-Attribute-Value Triples	82
2.6	PROLOG and Semantic Nets	83
2.7	Difficulties with Semantic Nets	88
2.8	Schemata	90

2.9	Frames	91
2.10	Difficulties with Frames	95
2.11	Logic and Sets	96
2.12	Propositional Logic	99
2.13	The First Order Predicate Logic	105
2.14	The Universal Quantifier	106
2.15	The Existential Quantifier	108
2.16	Quantifiers and Sets	109
2.17	Limitations of Predicate Logic	110
2.18	Summary	111
	Problems	111
	Bibliography	114

### **CHAPTER 3: Methods of Inference 115**

3.1	Introduction	115
3.2	Trees, Lattices, and Graphs	116
3.3	State and Problem Spaces	120
3.4	AND-OR Trees and Goals	125
3.5	Deductive Logic and Syllogisms	129
3.6	Rules of Inference	136
3.7	Limitations of Propositional Logic	144
3.8	First-Order Predicate Logic	146
3.9	Logic Systems	148
3.10	Resolution	152
3.11	Resolution Systems and Deduction	154
3.12	Shallow and Causal Reasoning	157
3.13	Resolution and First-Order Predicate Logic	161
3.14	Forward and Backward Chaining	167
3.15	Other Methods of Inference	173
3.16	Metaknowledge	182
3.17	Hidden Markov Models	183
3.18	Summary	184
	Problems	185
	Bibliography	188

### **CHAPTER 4: Reasoning under Uncertainty 189**

4.1	Introduction	189
4.2	Uncertainty	190

4.3	Types of Error	192
4.4	Errors and Induction	194
4.5	Classical Probability	197
4.6	Experimental and Subjective Probabilities	202
4.7	Compound Probabilities	204
4.8	Conditional Probabilities	207
4.9	Hypothetical Reasoning and Backward Induction	212
4.10	Temporal Reasoning and Markov Chains	217
4.11	The Odds of Belief	222
4.12	Sufficiency and Necessity	224
4.13	Uncertainty in Inference Chains	227
4.14	The Combination of Evidence	232
4.15	Inference Nets	240
4.16	The Propagation of Probabilities	250
4.17	Summary	255
	Problems	256
	Bibliography	260

## **CHAPTER 5: Inexact Reasoning 261**

5.1	Introduction	261
5.2	Uncertainty and Rules	262
5.3	Certainty Factors	268
5.4	Dempster-Shafer Theory	279
5.5	Approximate Reasoning	294
5.6	The State of Uncertainty	342
5.7	Some Commercial Applications of Fuzzy logic	344
5.8	Summary	346
	Problems	346
	Bibliography	350

## **CHAPTER 6: Design of Expert Systems 353**

6.1	Introduction	353
6.2	Selecting the Appropriate Problem	354
6.3	Stages in the Development of an Expert System	358
6.4	Errors in Development Stages	362
6.5	Software Engineering and Expert Systems	367
6.6	The Expert System Life Cycle	370
6.7	A Detailed Life Cycle Model	373

6.8	Summary	379
	Problems	380
	Bibliography	380

## **CHAPTER 7: Introduction to CLIPS      383**

7.1	Introduction	383
7.2	CLIPS	384
7.3	Notation	385
7.4	Fields	387
7.5	Entering and Exiting CLIPS	390
7.6	Facts	392
7.7	Adding and Removing Facts	395
7.8	Modifying and Duplicating Facts	398
7.9	The Watch Command	399
7.10	The Deffacts Construct	400
7.11	The Components of a Rule	401
7.12	The Agenda and Execution	404
7.13	Commands for Manipulating Constructs	408
7.14	The Printout Command	411
7.15	Using Multiple Rules	411
7.16	The Set-Break Command	413
7.17	Loading and Saving Constructs	415
7.18	Commenting Constructs	417
7.19	Variables	417
7.20	Multiple Use of Variables	419
7.21	Fact Addresses	420
7.22	Single-Field Wildcards	422
7.23	Blocks World	424
7.24	Multifield Wildcards and Variables	430
7.25	Summary	435
	Problems	436
	Bibliography	441

## **CHAPTER 8: Advanced Pattern Matching      443**

8.1	Introduction	443
8.2	Field Constraints	443
8.3	Functions and Expressions	447
8.4	Summing Values Using Rules	451

8.5	The <i>Bind</i> Function	453
8.6	I/O Functions	454
8.7	The Game of Sticks	461
8.8	Predicate Functions	463
8.9	The Test Conditional Element	464
8.10	The Predicate Field Constraint	466
8.11	The Return Value Field Constraint	467
8.12	The Sticks Program	469
8.13	The <i>OR</i> Conditional Element	469
8.14	The <i>AND</i> Conditional Element	472
8.15	The <i>NOT</i> Conditional Element	473
8.16	The <i>EXISTS</i> Conditional Element	476
8.17	The <i>FORALL</i> Conditional Element	479
8.18	The <i>LOGICAL</i> Conditional Element	481
8.19	Summary	485
	Problems	486

## **CHAPTER 9: Modular Design, Execution Control, and Rule Efficiency 495**

9.1	Introduction	495
9.2	Deftemplate Attributes	495
9.3	Salience	504
9.4	Phases and Control Facts	507
9.5	Misuse of Salience	512
9.6	The Defmodule Construct	514
9.7	Importing and Exporting Facts	518
9.8	Modules and Execution Control	522
9.9	The Rete Pattern-Matching Algorithm	530
9.10	The Pattern Network	533
9.11	The Join Network	536
9.12	The Importance of Pattern Order	539
9.13	Ordering Patterns for Efficiency	545
9.14	Multifield Variables and Efficiency	546
9.15	The Test CE and Efficiency	547
9.16	Built-In Pattern-Matching Constraints	549
9.17	General Rules versus Specific Rules	549
9.18	Simple Rules versus Complex Rules	551

9.19 Summary	554
Problems	555
Bibliography	562

## **CHAPTER 10: Procedural Programming 563**

10.1 Introduction	563
10.2 Procedural Functions	563
10.3 The Deffunction Construct	571
10.4 The Defglobal Construct	582
10.5 The Defgeneric and Defmethod Constructs	590
10.6 Procedural Constructs and Defmodules	608
10.7 Useful Commands and Functions	610
10.8 Summary	617
Problems	618

## **CHAPTER 11: Classes, Instances, and Message-Handlers 623**

11.1 Introduction	623
11.2 The Defclass Construct	623
11.3 Creating Instances	625
11.4 System-Defined Message-Handlers	626
11.5 The Defininstances Construct	628
11.6 Classes and Inheritance	629
11.7 Object Pattern Matching	638
11.8 User-Defined Message-Handlers	650
11.9 Slot Access and Handler Creation	656
11.10 Before, After, and Around Message-Handlers	659
11.11 Instance Creation, Initialization, Handlers and Deletion Message-Handlers	677
11.12 Modifying and Duplicating Instances	680
11.13 Classes and Generic Functions	684
11.14 Instance Set Query Functions	685
11.15 Multiple Inheritance	690
11.16 Defclasses and Defmodules	697
11.17 Loading and Saving Instances	699
11.18 Summary	700
Problems	702

<b>CHAPTER 12:</b>	<b>Expert System Design Examples</b>	<b>705</b>
12.1	Introduction	705
12.2	Certainty Factors	705
12.3	Decision Trees	710
12.4	Backward Chaining	724
12.5	A Monitoring Problem	736
12.6	Summary	755
	Problems	756
	Bibliography	757
<b>APPENDIXES</b>	<b>759</b>	
APPENDIX A	Some Useful Equivalences	759
APPENDIX B	Some Elementary Quantifiers and Their Meanings	760
APPENDIX C	Some Set Properties	761
APPENDIX D	CLIPS Support Information	762
APPENDIX E	CLIPS Commands and Functions Summary	763
APPENDIX F	CLIPS BNF	785
APPENDIX G	Software Resources	793
	Index	827
