

# Bacterial Adhesion

*to Animal Cells and Tissues*

Itzhak Ofek, David L. Hasty,  
and Ron J. Doyle

## CONTENTS

---

*Preface* • ix

- Chapter 1. Basic Concepts in Bacterial Adhesion • 1**
- Chapter 2. Methodological Approaches to Analysis of Adhesins and Adhesion • 19**
- Chapter 3. Target Tissues for Bacterial Adhesion • 43**
- Chapter 4. Adhesins as Bacterial Cell Surface Structures: General Concepts of Structure, Biogenesis, and Regulation • 63**
- Chapter 5. Emerging Concepts in Bacterial Adhesion and Its Consequences • 97**
- Chapter 6. Diversification of Receptor Specificities and Its Biological Consequences • 101**
- Chapter 7. Entry of Bacteria into Nonphagocytic Cells • 113**
- Chapter 8. Postadhesion Events Induced in Nonphagocytic Cells • 127**
- Chapter 9. Adhesion-Dependent Upregulation of Bacterial Genes • 143**
- Chapter 10. Role of Adhesion in Biofilm Formation • 147**
- Chapter 11. Antiadhesion Therapy • 157**
- Chapter 12. Adhesins, Receptors, and Target Substrata Involved in the Adhesion of Pathogenic Bacteria to Host Cells and Tissues • 177**
- Index • 407**
