

CONCEPTS, TECHNIQUES, TRICKS, AND TRAPS

# *Building Embedded* **LINUX SYSTEMS**

O'REILLY

KARIM YAGHMOUR

---

# Table of Contents

|  |           |
|--|-----------|
| Preface .....  | xiii      |
| <b>1. Introduction .....</b>                           | <b>1</b>  |
| Definitions .....                                      | 1         |
| Real Life and Embedded Linux Systems .....             | 5         |
| Example Multicomponent System .....                    | 30        |
| Design and Implementation Methodology .....            | 37        |
| <b>2. Basic Concepts .....</b>                         | <b>42</b> |
| Types of Hosts .....                                   | 42        |
| Types of Host/Target Development Setups .....          | 44        |
| Types of Host/Target Debug Setups .....                | 47        |
| Generic Architecture of an Embedded Linux System ..... | 48        |
| System Startup .....                                   | 51        |
| Types of Boot Configurations .....                     | 52        |
| System Memory Layout .....                             | 55        |
| <b>3. Hardware Support .....</b>                       | <b>57</b> |
| Processor Architectures .....                          | 57        |
| Buses and Interfaces .....                             | 64        |
| I/O .....  | 75        |
| Storage .....  | 85        |
| General Purpose Networking .....                       | 93        |
| Industrial Grade Networking .....                      | 101       |
| System Monitoring .....                                | 105       |

|  |            |
|--|------------|
| <b>4. Development Tools</b>  | <b>107</b> |
| Using a Practical Project Workspace  | 107        |
| GNU Cross-Platform Development Toolchain                                     | 109        |
| C Library Alternatives   | 134        |
| Java   | 141        |
| Perl   | 144        |
| Python   | 146        |
| Ada  | 147        |
| Other Programming Languages  | 148        |
| Integrated Development Environments  | 149        |
| Terminal Emulators   | 150        |
| <b>5. Kernel Considerations</b>  | <b>156</b> |
| Selecting a Kernel   | 156        |
| Configuring the Kernel   | 159        |
| Compiling the Kernel   | 164        |
| Installing the Kernel  | 166        |
| In the Field   | 168        |
| <b>6. Root Filesystem Content</b>  | <b>171</b> |
| Basic Root Filesystem Structure  | 171        |
| Libraries  | 174        |
| Kernel Modules   | 180        |
| Kernel Images  | 180        |
| Device Files   | 181        |
| Main System Applications   | 182        |
| Custom Applications  | 191        |
| System Initialization  | 191        |
| <b>7. Storage Device Manipulation</b>  | <b>198</b> |
| MTD-Supported Devices  | 198        |
| Disk Devices   | 221        |
| To Swap or Not to Swap   | 223        |
| <b>8. Root Filesystem Setup</b>  | <b>224</b> |
| Selecting a Filesystem   | 224        |
| Using an NFS-Mounted Root Filesystem<br>to Write a Filesystem Image to Flash | 229        |
| CRAMFS   | 229        |
| JFFS2  | 232        |

|   |            |
|---|------------|
| Disk Filesystem over NFTL                       | 233        |
| Disk Filesystem over RAM Disk                   | 234        |
| Mounting Directories on TMPFS                   | 236        |
| Live Updates                                    | 237        |
| <b>9. Setting Up the Bootloader .....</b>       | <b>246</b> |
| Bootloaders Galore                              | 247        |
| Server Setup for Network Boot                   | 253        |
| Using LILO with Disk and CompactFlash Devices   | 258        |
| Using GRUB with DiskOnChip Devices              | 262        |
| U-Boot  | 266        |
| <b>10. Setting Up Networking Services .....</b> | <b>285</b> |
| The Internet Super-Server                       | 286        |
| Remote Administration with SNMP                 | 289        |
| Network Login Through Telnet                    | 292        |
| Secure Communication with SSH                   | 295        |
| Serving Web Content Through HTTP                | 301        |
| Dynamic Configuration Through DHCP              | 305        |
| <b>11. Debugging Tools .....</b>                | <b>307</b> |
| Debugging Applications with gdb                 | 308        |
| Tracing   | 314        |
| Performance Analysis                            | 322        |
| Memory Debugging                                | 331        |
| A Word on Hardware Tools                        | 334        |
| <b>A. Worksheet .....</b>                       | <b>337</b> |
| <b>B. Resources .....</b>                       | <b>353</b> |
| <b>C. Important Licenses and Notices .....</b>  | <b>357</b> |
| <b>Index .....</b>                              | <b>369</b> |
