INFORMATION TECHNOLOGY

Strategic Decision Making for Managers

HENRY C. LUCAS, JR.

CONTENTS

PREFACE xii

CHAPTER 1

TECHNOLOGY TRANSFORMS THE ORGANIZATION 1

Technology Transforms Business 1
Value Proposition 2
Victor Electronics 3
On Being a Manager 4
Managerial Decisions 6
Information Technology in Perspective 8
Transforming Organizations 9
The Challenge of Change 11
Six Important Trends 12
A Preview of the Book 15
Chapter Summary 16
Keywords 17
Recommended Readings 17
Discussion Questions 17

CHAPTER 2

A DYNAMIC MODEL OF IT STRATEGY IN A NETCENTRIC ECONOMY 19

Value Proposition 19
Thinking Strategically 20
What is Electronic Business? 20
Hypercompetition 23
A Dynamic Model of Competitive Advantage 23
Value Chains and Competitive Forces 25
The Value Chain 26
The Five Forces Model 27
Core Competence 29
Resource-Based Views of Strategy 30
The Dynamic Model 31
Externalities and Critical Mass 31
Other Assets 32
Lock In and Switching Costs 33
Additional Resources 38
A System of Resources 38
Knowledge and Skills 39
Chapter Summary 39
Keywords 40
Recommended Readings 40
Discussion Questions 40
Endnotes 41

CHAPTER 3

NEW BUSINESS MODELS 43

Value Proposition 43
When Business Conditions Change 44
New Business Models 45
The Internet 46
Electronic Commerce 49
The Retail Sales Model 50
Business-to-Business Electronic Commerce 51
Lean and Agile Manufacturing, Mass Customization 53
New Businesses On the Web 54
New Markets 56
You Need a Revenue Model 57
Electronic Commerce: Pervasive Technology 58
Analyzing Business Models 59
Chapter Summary 60
Keywords 61
Recommended Readings 62

Discussion Questions **62**
Endnotes **62**

CHAPTER 4

ORGANIZATIONAL TRANSFORMATION WITH IT **63**

Value Proposition 63
Transforming Organizations 64
Retail Stock Trading **64**
What Hit the Content Providers? **71**
ebay: Creating a New Business **75**
IT Variables for Designing Organizations 76
Structural **77**
Virtual Components **77**
Electronic Linking **78**
Technological Leveling **78**
Work Process **78**
Production Automation **78**
Electronic Workflows **78**
Communications **78**
Electronic Communications **78**
Technological Matrixing **78**
Interorganizational Relations **79**
Electronic Customer/Supplier Relationships **79**
Building a T-Form Organization **79**
Adopting the T-Form: An Example **81**
New Management Challenges **85**
Chapter Summary **87**
Keywords **87**
Recommended Readings **88**
Discussion Questions **88**
Endnotes **89**

CHAPTER 5

GLOBALIZATION AND IT IN INTERNATIONAL BUSINESS **91**

Value Proposition 91
Globalization: The Future of Business 93
The Impact of Globalization on Business 93
International Business Strategies 94
Multinational **94**
Global **95**
International **95**
Transnational **95**
The Globally Outsourced Firm **95**
Key Issues in An International Environment 96
Information Needs **96**
Implementing International IT **98**
Managing Information Technology Internationally 100
Concentrate On Interorganizational Linkages **101**
Establish Global Systems Development Skills **101**
Build an Infrastructure **101**
Take Advantage of Liberalized Electronic Communications **101**
Strive for Uniform Data **101**
Develop Guidelines for Shared versus Local Systems **102**
Two Examples 102
Standard Pharmaceuticals International **102**
Verifone **103**
Transnational Virtual Firms and IT 106
Business Models and IT Management 107
Independent Operations **108**
Headquarters Driven **108**
Intellectual Synergy **108**
Integrated Global IT **108**
The Internet, Imperialism, and Developing Countries 109
Chapter Summary **110**
Keywords **110**
Recommended Readings **111**
Discussion Questions **111**
Endnotes **112**

CHAPTER 6

ASSESSING THE VALUE OF INVESTING IN IT: THE PRODUCTIVITY PARADOX **113**

Value Proposition 113

What Is Value? 114
Challenging Conventional Wisdom and Practice **115**
What about Successful Implementation? **116**
The IT Investment Opportunities Matrix 117
Are Investment Types Independent? **124**
A Personal View 125
Chapter Summary **126**
Keywords **126**
Recommended Readings **126**
Discussion Questions **127**
Endnotes **127**

CHAPTER 7

MAKING THE IT INVESTMENT DECISION **129**

Garbage Cans and IT Investment 129
Project Success and Other Outcomes **131**
The Concept of Conversion Effectiveness **132**
The Information Technology Investment Equation 133
Estimating Returns **136**
The IT Value Equation 137
Back to the Pipeline **137**
The Investment Decision 138
Traditional Net Present Value Analysis **138**
An NPV Example **139**
A Controversial Approach: The Real Options Pricing Framework **141**
OPM Examples **144**
Guidelines for IT Investments 148
Chapter Summary **152**
Keywords **153**
Recommended Readings **153**
Discussion Questions **153**
Endnotes **154**

CHAPTER 8

CHOOSING TECHNOLOGY **155**

The Industry 156
To Buy or Not: Major Applications 157
The Decision Context **157**
Buying Applications Packages **158**
Establishing Criteria **159**
Making a Final Decision **159**
Enterprise Software Packages **160**
What if IT's Free? Shareware for Everyone **161**
Looking for Services 161
The Pros and Cons of Outsourcing 163
On Balance **166**
A Scenario for the Future: The Computer Utility? 167
An Example 168
Chapter Summary **169**
Keywords **170**
Recommended Readings **170**
Discussion Questions **170**
Endnotes **171**

CHAPTER 9

IMPLEMENTING IT **173**

Implementation 174
What Is Implementation? **174**
Success or Failure **174**
Research on Implementation 174
A Model of Implementation **175**
The Implementation Process **177**
An Implementation Strategy 177
The Role of Design Teams **178**
An Implementation Framework **179**
Emergent Change **181**
Implementing IT-Based Transformations of the Organization 182
Analyzing the Costs and Benefits of Change **184**
Motivating Organizational Change **185**
A Change Program **186**
Beyond Structural Change 189
Chapter Summary **189**
Keywords **190**
Recommended Readings **190**
Discussion Questions **191**

Appendix A **192**

CHAPTER 10

STRUCTURING AND MANAGING THE IT FUNCTION **193**

Opportunities for Greatness and Disaster 193
Centralization and Decentralization **194**
A Political Model of Information Technology **194**
What Has to Be Managed? 196
Relationships **196**
Strategy **196**
Infrastructure **196**
Human Capital **197**
Innovation **197**
Solutions Delivery **197**
Provisioning for Service **197**
Financial Performance **198**
New Organizational Models for IT 198
The Partner Model **198**
The Platform Model **199**
The Scalable Model **199**
Coordination 200
The Chief Information Officer **200**
A Vision and Plan for IT **203**
What the CEO Should Do 204
Chapter Summary **206**
Keywords **206**
Recommended Readings **206**
Discussion Questions **206**

CHAPTER 11

MANAGEMENT CONTROL OF INFORMATION TECHNOLOGY **209**

Management Control 209
Control Theory **209**
Control in the Organization **210**
Failure of Control **212**
Information and Control **212**
Control of Systems Development 212
Control of Operations 214
Control and Electronic Commerce 217
Security 220
Auditing Information Systems 221
Management Issues 221
Chapter Summary **222**
Keywords **222**
Recommended Readings **222**
Discussion Questions **223**
Endnotes **223**

CHAPTER 12

THE LEGACY ENVIRONMENT **225**

The IT Architecture at Victor Electronics 226
The Mainframe in Rockville **227**
Singapore **227**
Manchester, United Kingdom **229**
Malaysia **229**
Spain **229**
Maine **230**
New Mexico **230**
Mexico, Puerto Rico, and Costa Rica **230**
Communications and Networking **230**
Web Site ASP **231**
Why this Architecture? **232**
What Does Legacy Really Mean? **234**
IT Architecture Questions for Management 236
Chapter Summary **237**
Recommended Readings **237**
Discussion Questions **237**

CHAPTER13

THE FIRST COMPONENT: COMPUTER SYSTEMS **239**

The Computer Changed the World 239
The Rise of the Mainframe **240**
Powerful Supercomputers **240**
Minis: The Beginning of the Revolution **241**
The Personal Computer Changed Everything **241**
The Server **242**
The Network PC versus the Under-$1,000 PC **242**

Massively Parallel Computers **243**
Grid Computing **243**
A Personal Assistant **244**
Mobile Computing **244**
Conclusions **245**
So Many Types of Computers **245**
Future Technology 246
The Amazing Chip **246**
Servers: Small and Large **246**
Web Services **248**
The Semantic Web **250**
Moving Software to the Cloud **250**
Ubiquitous Computing **251**
A Worldwide Computer **251**
Monitoring and Sensing **252**
New Chip Technologies **252**
Implications **252**
Chapter Summary **253**
Keywords **253**
Recommended Readings **253**
Discussion Questions **254**
Endnotes **254**

CHAPTER 14

THE SECOND COMPONENT: THE DATABASE **255**
The Importance of the Database 255
Database Management Software 256
Enter DBMS Software **256**
Benefits of the Relational Model **257**
An Example **257**
Object-Oriented Databases **262**
SQL **263**
Oracle: An Enterprise DBMS **264**
Distributed Databases **264**
The Data Warehouse **265**
An Example: A Data Warehouse at Hudson's Bay Company **266**
Data Mining: Looking for Gold in the Data **270**
Approaches to Data Mining **271**
Clementine **272**
An Example of Data Mining at Credit Suisse **272**
Databases and the Organization 274
Chapter Summary **274**
Keywords **275**
Recommended Readings **275**
Discussion Questions **275**
Endnotes **276**
Appendix 14-1 **277**

CHAPTER 15

THE THIRD COMPONENT: POWERFUL NETWORKS **281**
The Impact of Communications Technology 282
Building Private Networks 282
The Virtual Private Network **283**
The Typology of a Network **284**
The Internet Transforms Business and Commerce 285
Intranets and Extranets **290**
A Variety of Ways to Access the Net **290**
Going Wireless **290**
Cell Phones, PDAS, and Refrigerators **292**
The Impact of the Internet **293**
Chapter Summary **294**
Keywords **294**
Recommended Readings **295**
Discussion Questions **295**

CHAPTER 16

ELECTRONIC COMMERCE: CHANGING HOW BUSINESS IS DONE **297**
Value Proposition 297
The Nature of Markets 298
The Law of One Price 298
Transaction Cost Economics 299
Auctions 300
Manheim Auctions **301**

E-Commerce 303
Business-to-Consumer (B2C) E-Commerce **304**
Business-to-Business (B2B) E-Commerce **305**
Exchanges **307**
What Happens to Intermediaries? **310**
Some Successes **310**
Grainger **310**
Southwest Airlines **312**
Fedex **312**
General Motors **313**
Chapter Summary **314**
Keywords **314**
Recommended Readings **315**
Discussion Questions **315**
Endnotes **315**

CHAPTER 17
BUSINESS PROCESS: EXAMPLES FROM ERP AND CRM **317**
Value Proposition 317
Understanding Business Processes 318
What is a Process? 319
An Example of a Process at Merrill Lynch 319
The Original System **320**
A New System **323**
Evaluation **327**
Improving Processes **328**
Enterprise Resource Planning Systems (ERP) 329
Product Examples **332**
SAP **332**
Oracle **333**
Peoplesoft **334**
Great Detail and Complexity **334**
The Implementation Challenge **335**
An Example **337**
Customer Relationship Management 338
Siebel Systems **339**
Salesforce.com **341**
Chapter Summary **342**
Keywords **342**
Recommended Readings **342**
Discussion Questions **343**
Endnotes **343**

CHAPTER 18
DECISION AND INTELLIGENT SYSTEMS **345**
Value Proposition 345
Decision Support Systems 345
Examples of DSSs 346
Yield Management: How to Overbook Gracefully **346**
Overbooking **346**
Discount Seats **347**
Traffic Management **347**
Results **348**
A Distribution Network at Pfizer **348**
Onstar **349**
Merrill Lynch's Integrated Choice Account Structure **350**
The Promise of DSS **353**
Executive Information Systems 353
Group Decision Support Systems 355
Technology-Assisted Meetings **355**
Intelligent Decisions 356
Artificial Intelligence **356**
AI versus Traditional Programs **356**
Expert Systems: Applied AI 357
Components of Expert Systems **358**
The Inference Engine **358**
Systems Development **360**
Some Examples **360**
Aesop: A System for Stock Options Pricing **360**
The Specialist **361**
The Expert System **362**
The Port of Singapore Authority **364**
At the Port **365**

Portnet and Mains **365**
Citos **366**
Berth Planning **366**
Stowage Planning **366**
Yard Planning **366**
Resource Allocation **366**
Gate Automation **367**
Cimos **367**
Knowledge Discovery 368
Neural Networks 368
Case-Based Reasoning **370**
Genetic Algorithms **370**
Intelligent Agents **372**
Chapter Summary **372**
Keywords **373**
Recommended Readings **373**
Discussion Questions **373**
Endnotes **374**

CHAPTER 19

KNOWLEDGE MANAGEMENT: BENEFITING FROM CORE COMPETENCIES **375**
Value Proposition 375
The Nature of Knowledge 376
Knowledge on the Plant Floor **376**
From Information to Knowledge **377**
Diffusing Knowledge **378**
The Nature of Information 379
How People Interpret Information **380**
Characteristics of Information **381**
Groupware, Information, and Knowledge 382
The Options 386
Building Knowledge Bases **387**
Chapter Summary **387**
Keywords **388**
Recommended Readings **388**
Discussion Questions **388**

CHAPTER 20

TECHNOLOGY HAVES AND HAVE NOTS: THE DIGITAL DIVIDE IN THE U.S. AND THE WORLD **389**
The Divide In The United States 390
A Cause for Optimism **393**
The Global Digital Divide 393
Web Inequality **394**
New Technologies and Economic Inequality Among Nations: Historical Perspectives **395**
The Traditional View: Advantages of Latecomers **396**
A New View: The Power of Networks and Network Externalities **397**
The Growth and Distribution of the Internet **398**
Predicting Internet Hosts **399**
The Implications **400**
The Controversy **400**
Modest Progress **401**
Some Recommendations **402**
Proposals for Assistance **402**
An Important Consideration **404**
Chapter Summary **405**
Keywords **405**
Recommended Readings **405**
Discussion Questions **406**
Endnotes **406**

CHAPTER 21

ETHICAL ISSUES AND A LOOK AHEAD **407**
Corporate Governance and IT 407
Proposals for Reform **408**
Are the Proposals Enough? **410**
Corporate Codes of Ethics **410**
The Role of IT in Corporate Governance **411**
The Ethical Use of Technology 413
Privacy **413**

Protection of Intellectual Property **415**
Monitoring **416**
Security **416**
Spam **417**
Ethics for IT Professionals 418
The Future With Information Technology 419
Key Management Decisions **420**
Looking To The Future **421**
Keywords **422**
Recommended Readings **422**
Discussion Questions **423**
Endnotes **423**

BIBLIOGRAPHY **425**
INDEX **435**
