Woodhead Publishing in Food Science and Technology

Detecting foreign bodies in food

Edited by M. Edwards

Woodhead Publishing Limited

Contents

Preface xi

Contributor contact details xvii

Part I Management issues 1

1 Identifying potential sources of foreign bodies in the supply chain 3
R. A. Marsh and R. E. Angold, RHM Technology, UK
1.1 Introduction 3
1.2 Sources of contamination in the food chain 5
1.3 The role of the manufacturer 9
1.4 Concluding comments 11
1.5 Sources of further information and advice 11

2 GMP, HACCP and the prevention of foreign bodies 14
R. R. Gaze and A. J. Campbell, Campden and Chorleywood Food Research Association, UK
2.1 Introduction 14
2.2 The role of good manufacturing practice (GMP) and prerequisite programmes 16
2.3 The role of the hazard analysis and critical control point (HACCP) system 19
2.4 Future trends 26
2.5 Sources of further information 28

3 Managing incidents involving foreign bodies 29
T. Hines, Leatherhead Food International, UK
3.1 Introduction: managing consumers, manufacturers and retailers 29
3.2 The crisis management team 31
3.3 The crisis management plan 34
3.4 Managing internal and external communications 37
3.5 Successful crisis management 40
3.6 Categories of consumer complaints 41
3.7 Conclusions 42
3.8 Sources of further information and advice 43
3.9 References and notes 43

Part II Detection and identification 45

4 Metal detection 47
J. P. Craig, Thermo Electron Corporation, UK
4.1 Introduction and the history of metal detection 47
4.2 Types of detection systems 49
4.3 The balanced coil system 52
4.4 Factors affecting the application of metal detection systems 55
4.5 Operational and quality control procedures 58
4.6 Future trends and conclusions 62

5 Magnets 63
E. Apoussidis and I. Wells, Eriez Magnetics Europe, UK
5.1 Introduction: magnetic separators and the principles of magnetism 63
5.2 Methods of producing magnetic fields: permanent magnets and electromagnets 65
5.3 Safety and environmental issues 69
5.4 Types of magnetic separator used in the food industry ... 70
5.5 Factors affecting the use of magnets in food processing .. 76
5.6 Examples of magnet use for particular foods 82
5.7 Advantages and disadvantages of using magnets 84
5.8 Future trends 85
5.9 Sources of further information 85

6 Optical sorting systems 86
S. C. Bee and M. J. Honeywood, Sortex Ltd, UK
6.1 Introduction 86
6.2 The principal components of optical sorting systems 87
6.3 Inspection systems: selection of wavelength bands, filters and illumination 98

6.4 The product feeding, ejection, cleaning and dust extraction systems ... 104
6.5 The electronic processing systems in sorting machines ... 110
6.6 Strengths and weaknesses of colour sorting ... 115
6.7 Future trends ... 116
6.8 Sources of further information ... 118

7 Applying optical systems ... 119
G. Doménech-Asensi, Polytechnic University of Cartagena, Spain
7.1 Introduction: foreign bodies in fruits and vegetables ... 119
7.2 Developing sorting systems for the removal of foreign bodies ... 119
7.3 Foreign body detection in the processing of olives and potatoes ... 127
7.4 Future trends ... 129
7.5 Sources of further information and advice ... 130
7.6 References ... 131

8 Microwave reflectance ... 132
R. Benjamin, University of Bristol, UK
8.1 Introduction ... 132
8.2 Microwave imaging techniques ... 133
8.3 Microwave inspection of food products ... 141
8.4 Strengths and weaknesses of microwave sensors ... 151
8.5 References ... 153

9 Nuclear magnetic resonance imaging ... 154
B. Hills, Institute of Food Research, UK
9.1 Introduction ... 154
9.2 Principles of nuclear magnetic resonance (NMR) and magnetic resonance imaging (MRI) ... 155
9.3 The use of NMR and MRI techniques in food processing ... 159
9.4 Factors affecting the development of low-cost on-line MRI foreign body sensors ... 164
9.5 Future trends ... 168
9.6 Sources of further information ... 170
9.7 References ... 171

10 Surface penetrating radar ... 172
U-K. Barr, SIK and H. Merkel, Chalmers University of Technology, Sweden
10.1 Introduction ... 172
10.2 Principles of surface penetrating radar ... 173
10.3 Detecting foreign bodies using microwaves ... 180

10.4 Setting up radar systems in food processing 181
10.5 Strengths and weaknesses of the radar method 185
10.6 Future trends 188
10.7 Sources of further information and advice 189
10.8 References 192

11 Electrical impedance 193
R. Dowdeswell, Kaiku Ltd, UK
11.1 Introduction: measuring the electrical properties of materials 193
11.2 Capacitance, resistance and impedance-based systems ... 196
11.3 Conclusion and future trends 202
11.4 Sources of further information 202
11.5 References 203

12 Ultrasound 204
O. A. Basir and B. Zhao, University of Waterloo and G. S. Mittal, University of Guelph, Canada
12.1 Introduction 204
12.2 Principles of ultrasound 205
12.3 Types of ultrasonic transducer 209
12.4 Ultrasound signal processing to detect foreign bodies 215
12.5 The use of ultrasound techniques in food processing 219
12.6 Conclusions and future trends 221
12.7 References 223

13 Using X-rays to detect foreign bodies 226
B. G. Batchelor, University of Cardiff, E. R. Davies, Royal Holloway, University of London and M. Graves, Spectral Fusion Technologies Ltd, UK
13.1 Introduction: principles of X-ray systems 226
13.2 Single axis X-ray systems 232
13.3 Dual axis X-ray systems 244
13.4 Dual energy X-ray imaging 249
13.5 Using X-ray systems in practice 255
13.6 Conclusions 258
13.7 Sources of further information 258
13.8 References 259
13.9 Appendix: factors affecting system performance 260

14 Separation systems 265
R. O'Connell, Russell Finex Ltd, UK
14.1 Introduction: the need for separation systems 265
14.2 The location and design of separation systems 267
14.3 Traditional types of separation equipment 268

14.4 Innovative types of separation equipment: sieves 269
14.5 Innovative types of separation equipment: filters 276
14.6 Future trends 280
14.7 Sources of further information 280
14.8 Reference 281

15 Identifying foreign bodies 282
M. Edwards, Campden and Chorleywood Food Research Association, UK
15.1 Introduction: definition and sources of foreign bodies 282
15.2 Approaches to foreign body identification 284
15.3 Foreign bodies of biological origin: identification and testing 287
15.4 Foreign bodies of non-biological origin: identification and testing 290
15.5 Effects of food processing on foreign bodies and future trends 294
15.6 Sources of further information and advice 296
15.7 Conclusions 296
15.8 References 296
