

 WILEY

JPL DEEP SPACE COMMUNICATIONS AND NAVIGATION SERIES

# LARGE ANTENNAS OF THE DEEP SPACE NETWORK

WILLIAM A. IMBRIALE

JOSEPH H. YUEN, SERIES EDITOR

# Table of Contents

<i>Foreword</i> .....	<i>xi</i>
<i>Preface</i> .....	<i>xiii</i>
<i>Acknowledgments</i> .....	<i>xv</i>
<b>Chapter 1: Introduction</b> .....	<b>1</b>
<b>1.1 Technology Drivers</b> .....	<b>3</b>
1.1.1 Frequency Bands Allocated to the Deep Space Network .....	6
<b>1.2 Analysis Techniques for Designing Reflector Antennas</b> .....	<b>6</b>
1.2.1 Radiation-Pattern Analysis .....	7
1.2.2 Feed-Horn Analysis .....	14
1.2.3 Spherical-Wave Analysis .....	18
1.2.4 Dual-Reflector Shaping .....	20
1.2.5 Quasioptical Techniques .....	23
1.2.6 Dichroic Analysis .....	29
1.2.7 Antenna Noise-Temperature Determination .....	33
<b>1.3 Measurement Techniques</b> .....	<b>40</b>
1.3.1 Theodolite Measurements .....	40
1.3.2 Microwave Holography .....	45
1.3.3 Aperture Gain and Efficiency Measurements .....	51
1.3.4 Noise-Temperature Measurements .....	53
<b>1.4 Techniques for Designing Beam-Waveguide Systems</b> .....	<b>55</b>
1.4.1 Highpass Design .....	56
1.4.2 Focal-Plane Matching .....	58
1.4.3 Gaussian-Beam Design .....	59
1.4.4 High-Power Design .....	61
<b>1.5 Summary</b> .....	<b>63</b>
<b>References</b> .....	<b>63</b>

<b>Chapter 2: Deep Space Station 11: Pioneer—The First Large Deep Space Network Cassegrain Antenna</b> .....	71
<b>2.1 Introduction to the Cassegrain Concept</b> .....	71
<b>2.2 Factors Influencing Cassegrain Geometry</b> .....	72
<b>2.3 The DSS-11, 26-Meter Cassegrain System</b> .....	74
<b>References</b> .....	77
<b>Chapter 3: Deep Space Station 12: Echo</b> .....	79
<b>3.1 The S-Band Cassegrain Monopulse Feed Horn</b> .....	81
<b>3.2 The 26-Meter S-/X-Band Conversion Project</b> .....	82
3.2.1 Performance Predictions .....	84
3.2.2 Performance Measurements .....	86
<b>3.3 The Goldstone–Apple Valley Radio Telescope</b> .....	86
<b>References</b> .....	87
<b>Chapter 4: Deep Space Station 13: Venus</b> .....	89
<b>4.1 The Dual-Mode Conical Feed Horn</b> .....	93
<b>4.2 Gain Calibration</b> .....	93
<b>References</b> .....	96
<b>Chapter 5: Deep Space Station 14: Mars</b> .....	97
<b>5.1 Antenna Structure</b> .....	98
<b>5.2 S-Band, 1966</b> .....	101
<b>5.3 Performance at X-Band</b> .....	103
5.3.1 Surface Tolerance .....	104
5.3.2 Measured X-Band Performance .....	105
<b>5.4 Tricone Multiple Cassegrain Feed System</b> .....	106
5.4.1 Radio Frequency Performance .....	107
5.4.2 New Wideband Feed Horns .....	109
5.4.3 Dual-Hybrid-Mode Feed Horn .....	109
<b>5.5 Reflex–Dichroic Feed System</b> .....	114
<b>5.6 L-Band</b> .....	120
5.6.1 Design Approach .....	121
5.6.2 Performance Predictions and Measurements .....	123
5.6.3 L-Band System Modifications .....	124
<b>5.7 The Upgrade from 64 Meters to 70 Meters</b> .....	125
5.7.1 Design and Performance Predictions .....	126

5.7.2	S- and X-Band Performance .....	129
5.7.3	Ka-Band Performance .....	132
5.7.4	Adding X-Band Uplink .....	132
<b>5.8</b>	<b>Distortion Compensation .....</b>	<b>140</b>
5.8.1	Deformable Flat Plate .....	140
5.8.2	Array-Feed Compensation System .....	141
5.8.3	The Array-Feed Compensation System–Deformable Flat-Plate Experiment .....	142
5.8.4	Projected Ka-Band Performance .....	149
<b>5.9</b>	<b>Future Interests and Challenges .....</b>	<b>150</b>
	<b>References .....</b>	<b>151</b>
<b>Chapter 6: Deep Space Station 15: Uranus—The First 34-Meter High-Efficiency Antenna .....</b>		
		<b>157</b>
<b>6.1</b>	<b>The Common-Aperture Feed .....</b>	<b>158</b>
<b>6.2</b>	<b>Dual-Reflector Shaping .....</b>	<b>159</b>
<b>6.3</b>	<b>Computed versus Measured Performance .....</b>	<b>163</b>
	<b>References .....</b>	<b>164</b>
<b>Chapter 7: The 34-Meter Research and Development Beam-Waveguide Antenna .....</b>		
		<b>167</b>
<b>7.1</b>	<b>New Analytical Techniques .....</b>	<b>168</b>
<b>7.2</b>	<b>Beam-Waveguide Test Facility .....</b>	<b>168</b>
<b>7.3</b>	<b>The New Antenna .....</b>	<b>170</b>
7.3.1	Antenna Design Considerations .....	171
7.3.2	Upper-Mirror Optics Design .....	173
7.3.3	Pedestal Room Optics Design .....	180
7.3.4	Bypass Beam-Waveguide Design .....	181
7.3.5	Theoretical Performance .....	182
7.3.6	Dual-Shaped Reflector Design .....	187
7.3.7	The Effect of Using the DSS-15 Main Reflector Panel Molds for Fabricating DSS-13 Panels .....	187
<b>7.4</b>	<b>Phase I Measured Results .....</b>	<b>190</b>
7.4.1	The X- and Ka-Band Test Packages .....	190
7.4.2	Noise Temperature .....	192
7.4.3	Efficiency Calibration at 8.45 and 32 GHz .....	196

7.4.4	Optimizing the <i>G/T</i> Ratio of the Beam-Waveguide Antenna .....	196
7.4.5	Beam-Waveguide Antenna Performance in the Bypass Mode .....	200
<b>7.5</b>	<b>Removal of the Bypass Beam Waveguide .....</b>	<b>204</b>
<b>7.6</b>	<b>Multifrequency Operation .....</b>	<b>210</b>
7.6.1	X-/Ka-Band System .....	210
7.6.2	S-Band Design .....	213
<b>7.7</b>	<b>Beam-Waveguide Versatility .....</b>	<b>218</b>
	<b>References .....</b>	<b>219</b>
<b>Chapter 8:</b>	<b>The 34-Meter Beam-Waveguide Operational Antennas .....</b>	<b>225</b>
<b>8.1</b>	<b>Beam-Waveguide Design .....</b>	<b>225</b>
<b>8.2</b>	<b>Initial Testing .....</b>	<b>227</b>
8.2.1	Microwave Holography Measurements .....	229
8.2.2	Efficiency Measurements .....	230
8.2.3	Noise-Temperature Results .....	235
8.2.4	The Shroud .....	236
<b>8.3</b>	<b>Adding Ka-Band to the Operational 34-Meter Beam-Waveguide Antennas .....</b>	<b>239</b>
8.3.1	The Cassini Radio Science Ka-Band Ground System .....	239
8.3.2	Ka-Band Upgrades—Receive-Only System .....	248
	<b>References .....</b>	<b>253</b>
<b>Chapter 9:</b>	<b>The Antenna Research System Task .....</b>	<b>257</b>
<b>9.1</b>	<b>Design of the Beam-Waveguide System .....</b>	<b>259</b>
<b>9.2</b>	<b>Design of the Transmit Feed Horn .....</b>	<b>262</b>
<b>9.3</b>	<b>Receive-System Design .....</b>	<b>268</b>
<b>9.4</b>	<b>Dual-Vane Polarizers .....</b>	<b>273</b>
<b>9.5</b>	<b>Uplink Arraying .....</b>	<b>275</b>
<b>9.6</b>	<b>Deep Space Station 27 .....</b>	<b>276</b>
	<b>References .....</b>	<b>280</b>

<b>Chapter 10: The Next-Generation Deep Space Network</b> .....	283
<b>10.1 The Study to Replace 70-Meter Antennas</b> .....	284
10.1.1 Extending the Life of the Existing 70-Meter Antennas .....	285
10.1.2 Designing a New 70-Meter Single- Aperture Antenna .....	285
10.1.3 Arraying Four 34-Meter Aperture Antennas .....	286
10.1.4 Arraying Small Antennas .....	287
10.1.5 Arraying Flat-Plate Antennas .....	288
10.1.6 Implementing a Spherical Pair of High-Efficiency Reflecting Elements Antenna Concept .....	289
<b>10.2 Towards the Interplanetary Network</b> .....	290
<b>10.3 Final Thoughts</b> .....	291
<b>References</b> .....	292
<b>Acronyms and Abbreviations</b> .....	295
