1 The concept of risk	3
Introduction	3
Terminology and definitions in risk management	4
Risk	5
Risk management	7
Health and safety	8
Living with risk	9
Risk in modern society	11
Responsibilities for risk	13
Quantification of risks	14
Individuals and groups at risk	15
Individual risk	16
Occupational risk	16
Organisational risk	17
Societal risk	17
Acceptable and tolerable levels of risk	18
The principle of 'as low as reasonably practicable' (ALARP)	20
Summary	21
Issues for review and discussion	22
References	22
2 Risk management	23
Introduction	23
World risks in context	24
Risk management	27
Defining acceptable levels of risk	29

Decision analysis	29
A risk management framework	32
Business continuity and disaster management	34
Business continuity management	34
Disaster management	37
Risk mitigation	38
Risk acceptance	39
Risk reduction	41
Risk management and corporate governance	42
Summary	43
Issues for review and discussion	43
References	44
3 Personality, behaviour and human error	45
Introduction	45
Personality and behaviour	46
Personality	46
Personality traits	47
Behaviour	49
Motivation and models of human needs	50
McClelland's model	51
Maslow's model	51
Rogers's model	52
Herzberg's model	52
A comparison of models of motivation	52
Behaviour modification	53
The role of cultural theories in risk management	55
Cultural theories of risk	58
The grid/group framework theory	59
Strengths and weaknesses of the cultural theory approach to risk management	62
Human error	66
Constant and random human errors	67
Types of human error	70
Human error recovery actions	72
Violation errors	72
Models of human error	73
Domino theory	73
Intentional and unintentional behaviours	73
Active and latent errors	74
Personality types	75
Error types	76
Accident proneness	76
Summary	77

<i>Issues for review and discussion</i>	78
<i>References</i>	78
4 Risk perception	80
Introduction	80
Perception	81
Physical perception	82
Cognitive perception	83
Risk perception	87
Cognitive or decision-making approach	88
Psychometric approach	88
Mental models approach	88
Situation versus individual	89
Factors affecting risk perception	89
Unknown and dread risks	91
Affiliation bias	93
Cognitive dissonance	93
Cultural theory and risk perception	94
Risk homeostasis and risk compensation	95
Risk homeostasis	95
Risk compensation	96
<i>Summary</i>	98
<i>Issues for review and discussion</i>	99
<i>References</i>	99
5 Risk communication	101
Introduction	101
Communication	102
Attitudes	102
Changing people's attitudes and values	104
Attitude measurement	104
The communication process	107
Communicator	107
Message	108
Recipient	109
Situation	110
Communication strategy	110
The risk communication process	110
Level of fear	112
Emotive impact	112
Risk communication strategies	113
Ranking and comparing risks	113
Framing effects	116
Social amplification of risk	117

Trust and risk communication	119
<i>Summary</i>	122
<i>Issues for review and discussion</i>	122
<i>References</i>	122
6 Economic issues	124
Introduction	124
Economic principles	125
Positive and normative economics	126
Market economies	126
Microeconomics and macroeconomics	127
Financing a market economy	128
Supply and demand	128
Long-term average cost of production	130
Budget constraint and choice	133
Risk management and economics	136
Health and safety management and economics	136
The effect of externalities on health and safety management	138
Health and safety standards and economics	140
The impact of standards on the long-term average cost of production	140
The effect of a health and safety tax on performance	142
Selecting health and safety control measures within a budget constraint	144
Safety-benefit curves and budget constraints	144
<i>Summary</i>	147
<i>Issues for review and discussion</i>	147
<i>References</i>	147
7 Cost-benefit analysis	149
Introduction	149
The role of cost-benefit analysis in legislation and standards	150
Approach adopted in Europe	150
Approach adopted in the United Kingdom	151
Cost-benefit approaches in decision-making	152
Subjective assessment	152
Informal judgement	152
Health and safety standards	153
Cost-effectiveness analysis	155
Costing risk and valuing safety	155
Decision analysis	156
Value of life	157
Valuation of a life	157

Valuation of non-fatal injuries and ill-health	159
Willingness to pay and willingness to accept	159
Permissive and restrictive approaches to valuation	161
Valuing dread and future risks	161
Comparing costs and benefits	162
Costs	163
Opportunity costs	163
Benefits	164
Discounting and net present values	164
Cost-effectiveness and cost-benefit analyses	165
Cost-effectiveness analysis	166
Cost-benefit analysis	166
Sensitivity analysis	168
Strengths and weaknesses of cost-benefit analysis	168
<i>Summary</i>	170
<i>Issues for review and discussion</i>	170
<i>References</i>	170
8 Managing health and safety risks	172
Introduction	172
The general role of health and safety standards	174
Input standards	176
Workplace standards	176
Output standards	176
Acceptable standards of health and safety	177
Factors influencing standards of health and safety	177
Criteria used for defining standards	178
Setting standards	179
Standards in safety-critical applications	180
Absolute standards and relative standards	180
Tolerability of risk as a health and safety standard	182
The implications and application of standards based on the tolerability of risk	182
Health and safety management in the context of risk and business management	184
The holistic view of risk and business management	185
The impact of changing work patterns on health and safety management	186
Factors influencing the management of health and safety risks	188
Legal factors	189
Economic factors	189
Social factors	190
Intrinsic and extrinsic factors	191
Factors motivating proactive health and safety management	192

<i>Summary</i>	193
<i>Issues for review and discussion</i>	193
<i>References</i>	194

Part Two Best Practice 197

9 Regulatory models for managing health and safety 199

Introduction	199
The role of regulation in health and safety management	200
National legislative systems	204
Developed countries	204
Developing countries	209
Non-governmental regulation	210
International and national standards	210
Corporate governance	213
Challenges for health and safety regulation	216
<i>Summary</i>	217
<i>Issues for review and discussion</i>	217
<i>References</i>	217

10 Models for managing health and safety risks at the organisational level 220

Introduction	220
Principles of organisational management	221
Development of management theories	221
Management theory in practice	223
Organisational models for health and safety management	225
Development of standards for health and safety management	227
Health and safety management system standards	229
<i>Summary</i>	234
<i>Issues for review and discussion</i>	234
<i>References</i>	235

11 Risk assessment 237

Introduction	237
The purpose of risk assessment	238
The risk assessment process	239
Nature of risk	240
Context of risk	240
Probability of risk	240
Consequences of risk	242
Risk specification in health and safety management	242

Completing a risk assessment	243
Establishing the purpose of the risk assessment	244
Understanding the problems associated with the risk assessment	244
Defining the scale of the risk assessment	245
Developing models for the risk assessment	245
Obtaining data for the risk assessment	246
Carrying out the risk assessment	247
Communicating the results of the risk assessment	249
Risk assessment in an environment of uncertainty	249
The use of risk assessment in decision-making at government level	253
Recording the results of a risk assessment	254
General format	256
Safety case and safety report formats	258
Probability, reliability and maintainability	261
Probability and frequency	261
Reliability	263
Maintainability	265
Assessing organisational risks	266
Risk profiling	266
Risk acceptability in strategic decision-making	269
Assessing operational risks	270
Hazard and adverse event identification	270
Risk assessment	280
<i>Summary</i>	289
<i>Issues for review and discussion</i>	290
<i>References</i>	290
12 Risk control	292
Introduction	292
Safety culture and safety climate	293
Safety culture	293
Safety climate	296
Safety culture maturity model	297
Measurement of safety climate and culture	298
An integrated approach to risk control	299
Developing a risk control strategy	299
The hierarchy of controls principle	300
Designing safe plant and equipment	303
Inherently safe design principles	303
Lines of defence	305
The safety lifecycle	307
Safety-related control systems	312
Functional safety of safety-related systems	314
Safety integrity levels	314

A comparison of lines of defence and safety integrity levels	316
An organisation's safe system of work	317
Corporate policy statement	318
Corporate protocols and guidance documents	319
Health and safety manuals	322
Employee handbooks	323
Safe operational procedures	323
Permits to work	325
Safety cases and safety reports	328
Accounting for people in a risk control strategy	329
The influence of human factors on work procedures	329
The influence of human factors on work design	331
The influence of employee work patterns	332
Influencing employees' behaviours	335
Health surveillance and epidemiology	338
Health surveillance	338
Epidemiology	339
Occupational exposure standards	341
<i>Summary</i>	343
<i>Issues for review and discussion</i>	344
<i>References</i>	344
13 Training and competence	348
Introduction	348
Workforce competence, training and education	349
The learning process	350
Theories of learning	350
Experiential learning	351
Designing a training programme	354
Health and safety training	356
<i>Summary</i>	358
<i>Issues for review and discussion</i>	359
<i>References</i>	359
14 Performance measurement	361
Introduction	361
The principles of performance measurement	362
Developing performance indicators	364
Outcome measures	365
Measuring health and safety performance	366
Reactive performance measurement	367
Proactive performance measurement	369
Reporting health and safety performance	372

<i>Summary</i>	374
<i>Issues for review and discussion</i>	374
<i>References</i>	374
15 Auditing, benchmarking and continuous improvement	376
Introduction	376
The role of auditing	377
Internal and external auditing	377
Operational auditing	378
Compliance auditing	379
The audit process	380
Planning	380
Implementing	380
Evaluating and reporting	381
Audit risk	382
Format of an audit report	382
Health and safety auditing	383
Health and safety audit programmes	385
Strengths and weaknesses of auditing systems	389
Quality management	390
Total quality management	390
The link between TQM and organisational performance	392
Continuous improvement	393
Development of benchmarking	395
Defining benchmarking	395
The benchmarking process	396
Implementing the benchmarking process	398
Benchmarking health and safety management systems	402
<i>Summary</i>	403
<i>Issues for review and discussion</i>	403
<i>References</i>	404
16 Responsibility and accountability for health and safety	406
Introduction	406
Individual responsibility and accountability	407
Corporate responsibility for health and safety risks	408
Corporate social responsibility	410
Corporate commitment to health and safety management	412
<i>Summary</i>	413
<i>References</i>	414
<i>Index</i>	415
