 WILEY-VCH

# Analytical Chemistry

*A Modern Approach to Analytical Science*  
Second Edition

# Contents

Foreword	v
Contributors	xxii
Preface to the Second Edition	xxv
Preface to the First Edition	xxxvi
<b>Part I</b>	<b>Introduction to Analytical Chemistry</b> 1
<b>1</b>	<b>Analytical Chemistry as a (Bio)chemical Discipline</b> 1
	Chapter Outlook 1
1.1	A General Approach to Analytical Chemistry 2
1.2	Aims and Objectives of Analytical Chemistry 3
1.3	The Two Sides of Analytical Chemistry 3
1.4	Analytical Information 4
1.5	Analytical Keywords and their Relationships 5
1.6	Classifications in Analytical Chemistry 8
1.7	Evolution of Analytical Chemistry 9
	Questions and Problems 10
	Recommended Reading 10
	Glossary of Selected Analytical Keywords 10
<b>2</b>	<b>Key References in Analytical Sciences</b> 12
	Chapter Outlook 12
2.1	Introduction 13
2.2	Measurement Standards 13
2.2.1	Introduction 13
2.2.2	The Traceability Concept 14
2.2.3	General Types of Standards 15
2.2.4	Analytical Chemical Standards 16
2.2.5	Use of Analytical Standards: The Dual Meaning of Calibration 18
2.3	Written Standards 20
2.4	The Client's Information Needs 21
	Questions and Problems 21
	Recommended Reading 21
<b>3</b>	<b>Analytical Features</b> 22
	Chapter Outlook 22
3.1	An Overview of Analytical Properties 23
3.2	Analytical Errors 24

3.3	Accuracy (Traceability)	26
3.4	Representativeness	27
3.5	Precision (Uncertainty)	28
3.6	Robustness	31
3.7	Sensitivity	31
3.8	Selectivity	32
3.9	Productivity-Related Properties	34
3.10	Relationships Among Analytical Properties	35
	Questions and Problems	36
	Recommended Reading	36
<b>4</b>	<b>The Analytical Process</b>	<b>37</b>
	Chapter Outlook	37
4.1	A General Overview of Chemical Measurement Processes	38
4.2	Preliminary Operations	39
4.3	Sampling	41
4.3.1	Introduction	41
4.3.2	Limiting Factors of Sampling	42
4.3.3	Sampling Approaches	43
4.3.4	Types of Samples	45
4.3.5	Sampling Errors	48
4.3.6	Sampling Methods	49
4.4	Sample Preparation	52
4.5	Measuring and Transducing of the Analytical Signal	55
4.6	Signal Acquisition and Data Processing	57
4.7	Current Scientific and Technical Trends	59
	Questions and Problems	60
	Recommended Reading	60
<b>5</b>	<b>The Analytical Problem</b>	<b>61</b>
	Chapter Outlook	61
5.1	A General Approach to the Analytical Problem	62
5.1.1	Definition of Analytical Problem	62
5.1.2	Required and Delivered Analytical Information	62
5.1.3	Quality and the Analytical Problem	64
5.2	The Analytical Problem-Solving Process	65
5.2.1	Defining the Information Needs	65
5.2.2	Translation of the Information Needs into the Required (Bio)chemical Information	66
5.2.3	Planning the Analytical Approach	67
5.2.4	Monitoring of the Results	67
5.2.5	Implementation of Corrective Actions	68
	Questions and Problems	68
	Recommended Reading	68
<b>6</b>	<b>Analytical Quality Management</b>	<b>69</b>
	Chapter Outlook	69
6.1	Introduction	70
6.2	Frameworks for Quality Systems	71
6.3	The Importance of Sample Management	73
6.4	Quality Assurance and Quality Control	73
6.4.1	'Fitness for Purpose' of Analytical Results	74
6.4.2	Method Description	77

6.4.3	Data, Information, and Knowledge	77
6.4.4	Good Data	77
6.4.5	Validation, Qualification, and Calibration	78
6.4.6	Qualification and Validation as Part of AQM	78
6.4.7	Method Development and Validation	83
6.4.8	Robustness and Ruggedness of Analytical Methods	86
	Questions and Problems	88
	Recommended Reading	88
<b>Part II</b>	<b>Basic Statistics and Chemometrics</b>	<b>91</b>
<b>7</b>	<b>Basic Statistics</b>	<b>91</b>
	Chapter Outlook	91
7.1	Descriptive Statistics	92
7.1.1	Distribution of Random Numbers	92
7.1.2	Location Parameter	96
7.1.3	Dispersion Measures	97
7.1.4	Confidence Interval	98
7.1.5	Descriptive Statistics Graphically Illustrated: Box-and-whisker Plots	99
7.1.6	Error Propagation	99
7.2	Statistical Tests	101
7.2.1	The Standard Normal Distribution	101
7.2.2	Testing Hypotheses	103
7.2.3	Tests for Outliers	111
7.3	Analysis of Variance	114
7.3.1	One-way Analysis of Variance	114
7.3.2	Two-way and Multi-way Analysis of Variance	116
7.3.3	MANOVA: Multidimensional Analysis of Variance	118
	Questions and Problems	119
	Recommended Reading	120
<b>8</b>	<b>Advanced Chemometrics</b>	<b>121</b>
<b>8.1</b>	<b>Calibration</b>	<b>121</b>
	Chapter Outlook	121
8.1.1	Calibration is Comparison	122
8.1.2	Quality of Calibration	123
8.1.3	Frequency of Calibration and Recalibration	124
8.1.4	Absolute vs. Relative Methods of Analysis	124
8.1.5	Calibration Protocols and Calibration Models	125
8.1.6	Calibration Functions from Least-squares Procedures	127
8.1.7	Calibration Modes and Protocols	130
	Questions and Problems	133
	Recommended Reading	134
<b>8.2</b>	<b>Signal Processing</b>	<b>135</b>
	Chapter Outlook	135
8.2.1	Extraction of Information	136
8.2.2	Discretization and the Fourier Transform	137
8.2.3	Convolution	138
8.2.4	Deconvolution, Cross-correlation and Signal Restoration	140
8.2.5	Digital Filters	142
8.2.6	Numerical Differentiation and Integration	146

	Questions and Problems	148
	Recommended Reading	148
<b>8.3</b>	<b>Optimization and Experimental Design</b>	<b>149</b>
	Chapter Outlook	149
8.3.1	Introduction	150
8.3.2	Experimental Design	151
8.3.3	Response Surface Methods (RSM)	158
8.3.4	Sequential Optimization: Simplex Method	161
	Questions and Problems	166
	Recommended Reading	166
<b>8.4</b>	<b>Pattern Recognition and Classification</b>	<b>167</b>
	Chapter Outlook	167
8.4.1	Fundamentals	168
8.4.2	Unsupervised Methods	171
8.4.3	Supervised Methods	183
	Questions and Problems	189
	Recommended Reading	189
<b>8.5</b>	<b>Multivariate Modeling</b>	<b>190</b>
	Chapter Outlook	190
	Questions and Problems	209
	Recommended Reading	209
<b>8.6</b>	<b>Computer Hard- and Software and Interfacing Analytical Instruments</b>	<b>210</b>
	Chapter Outlook	210
8.6.1	The Computer-based Laboratory	211
8.6.2	Analytical Databases	216
8.6.2.1	Representation of Analytical Information	217
8.6.2.2	Library Search	222
8.6.2.3	Simulation of Spectra	226
	Questions and Problems	227
	Recommended Reading	227
<b>Part III</b>	<b>Methods Based on Chemical Reactions</b>	<b>229</b>
<b>9</b>	<b>Introduction to Chemical Equilibria</b>	<b>229</b>
	Chapter Outlook	229
9.1	Introduction	230
9.2	Principles of Homogeneous Phase Equilibria – The Law of Mass Action Applied to Analytical Reactions	230
9.2.1	General	230
9.2.2	Reaction Rates – The Law of Mass Action	231
9.2.3	Expression of Equilibrium Constants – Thermodynamic Quantities	234
9.2.4	Parameters Affecting Chemical Equilibrium	236
9.3	Types of Equilibrium Systems Encountered in Analytical Chemistry	238
9.3.1	Acid-Base Equilibria	238
9.3.2	Solubility Equilibria	244
9.3.3	Complex-Formation Equilibria	245
9.3.4	Redox Equilibria	246
9.4	Limits of Application of the Law of Mass Action	248
9.4.1	Introduction	248

9.4.2	The Debye–Hückel Limiting Law and the Extended Debye–Hückel Equation	249
9.4.3	Thermodynamic versus Conventional Equilibrium Constants	249
9.5	Calculations on Equilibrium Systems	254
9.5.1	Introduction	254
9.5.2	The Mathematical Problem and its Solution	255
9.6	Distribution of a Solute Between Two Immiscible Phases	258
9.6.1	Introduction	258
9.6.2	The Nernst Distribution Law	258
9.6.3	The Distribution Ratio	258
9.6.4	Efficiency of the Extraction	259
	Questions and Problems	261
	Recommended Reading	262
<b>10</b>	<b>Acid-Base Equilibria and Titrations</b>	<b>263</b>
	Chapter Outlook	263
10.1	Introduction	264
10.2	Acid-Base Calculations	264
10.2.1	Calculation of Concentrations in Solutions of Weak Acids and Bases	264
10.3	Graphical Methods for Describing Chemical Equilibria	270
10.3.1	Introduction	270
10.3.2	Distribution Diagrams	270
10.3.3	Logarithmic Concentration Diagrams	272
10.4	Buffer Solutions	274
10.5	Acid-Base Indicators	279
10.6	Acid-Base Titrations	280
10.6.1	Introduction	280
10.6.2	Derivation of Titration Curves	282
10.7	Errors in Acid-Base Titrations	290
10.7.1	Introduction	290
10.7.2	Calculation of the Titration Error	291
10.7.3	Selection of Indicator	292
10.8	Titrations in Non-Aqueous Solvents	294
10.8.1	Introduction	294
10.9	Applications of Acid-Base Titrations	296
10.9.1	Determination of Carbonates	296
10.9.2	Determination of Nitrogen – The Kjeldahl Method	298
10.9.3	Other Applications of Acid-Base Titrations	298
	Questions and Problems	299
	Recommended Reading	300
<b>11</b>	<b>Complexes in Analytical Chemistry – Complexometric Titrations</b>	<b>302</b>
	Chapter Outlook	302
11.1	Introduction	303
11.1.1	Complexes in Analytical Chemistry	303
11.2	Complexometric Titrations	304
11.2.1	General	304
11.2.2	Aminocarboxylic Acids as Ligands in Complexometric Titrations	305
11.2.3	Effect of Other Complexing Agents on the Shape of EDTA Titration Curves	310
11.3	Detection of the Equivalent (End) Point of a Complexometric Titration Curve with EDTA	312
11.3.1	The Function of Metallochromic Indicators	312

11.3.2	Applications of Complexometric EDTA Titrations	314
	Questions and Problems	315
	Recommended Reading	316
<b>12</b>	<b>Redox Equilibria and Titrations</b>	<b>317</b>
	Chapter Outlook	317
12.1	Introduction	318
12.2	Study of Redox Reactions: Electrochemical Cells	318
12.3	Redox Potential and Redox Chemical Properties: Nernst's Equation	320
12.4	Measurement of Redox Potentials: Reference Electrodes	322
12.5	Standard Potential	324
12.6	Equilibrium Constant of a Redox Reaction	326
12.7	Equilibrium Potential	327
12.8	Concurrent Equilibria: Conditional Potential	328
12.8.1	Redox/Acid-Base Concurrent Equilibria	329
12.8.2	Redox/Complex Formation Concurrent Equilibria	331
12.8.3	Redox/Precipitation Concurrent Equilibria	332
12.9	General Considerations on Redox Titrations	334
12.10	Redox Titration Curves	334
12.11	Redox Indicators	338
12.12	Applications of Redox Titrations	341
12.12.1	Pre-Treatment in Redox Titrations	341
12.12.2	Titrations with Permanganate (Permanganimetry)	342
12.12.3	Titrations with Dichromate (Dichromatometry)	344
12.12.4	Titrations Involving Iodine	345
	Questions and Problems	348
<b>13</b>	<b>Precipitation Methods and Thermoanalysis</b>	<b>351</b>
<b>13.1</b>	<b>Precipitation Methods</b>	<b>351</b>
	Chapter Outlook	351
13.1.1	Thermodynamic Considerations	352
13.1.2	Solid-Liquid Systems	356
	Questions and Problems	371
	Recommended Reading	372
<b>13.2</b>	<b>Thermal Analysis</b>	<b>373</b>
	Chapter Outlook	373
13.2.1	Introduction	374
13.2.2	Thermogravimetry (TG)	375
13.2.3	Differential Thermal Analysis (DTA) and Differential Scanning Calorimetry (DSC)	378
13.2.4	Combined Techniques	382
13.2.5	Evolved Gas Analysis (EGA)	387
13.2.6	Other Thermoanalytical Techniques	388
	Questions and Problems	390
	Recommended Reading	391
<b>14</b>	<b>Liquid-Liquid Systems</b>	<b>392</b>
	Chapter Outlook	392
14.1	Introduction	393
14.2	Distribution Constant: Partition Coefficient	393
14.3	Distribution Ratio	394

14.4	Extraction of Molecular Species	396
14.5	Extraction of Metal Complexes	397
14.6	Ion-Pairing Reagents	399
14.7	Metal Chelates	400
	Questions and Problems	402
	Recommended Reading	402
<b>15</b>	<b>Liquid-Solid Equilibria</b>	<b>403</b>
	Chapter Outlook	403
	Introduction	404
15.1	Ion Exchange	404
15.2	Soxhlet Extraction	405
15.3	Supercritical Fluid Extraction	406
15.4	Accelerated Solvent Extraction (ASE)	408
15.5	Microwave-Assisted Methods	409
15.5.1	Microwave-Assisted Solvent Extraction (MWE)	409
15.5.2	Microwave-Assisted Acid Digestion (MWD)	409
15.6	Ultrasonic Extraction (USE)	410
15.7	Subcritical Water Extraction (SWE)	410
15.8	Solid-Phase Extraction (SPE)	411
15.9	Sorptive Extraction Methods	412
15.9.1	Solid-Phase Micro Extraction (SPME)	412
15.9.2	Stir Bar Sorptive Extraction (SBSE)	413
	Questions and Problems	413
	Recommended Reading	414
<b>16</b>	<b>Gas-Liquid and Gas-Solid Systems</b>	<b>415</b>
	Chapter Outlook	415
16.1	Gas-Liquid Systems	416
16.2	Gas-Solid Systems	421
	Questions and Problems	424
	Recommended Reading	424
<b>17</b>	<b>Kinetics and Catalysis</b>	<b>425</b>
	Chapter Outlook	425
17.1	Introduction	426
17.2	The Chemical Reaction Rate	427
17.2.1	Rate Law and Reaction Order	428
17.2.2	Integrated Rate Equations	431
17.2.3	Factors Influencing the Reaction Rate	434
17.2.4	Analytical Use of the Reaction Rate	435
17.2.5	Kinetic-Based Determinations Involving Uncatalyzed Reactions	438
17.3	The Phenomenon of Catalysis	439
17.3.1	General Considerations	439
17.3.2	Rate Equation and Reaction Mechanism	440
17.3.3	Analytical Use of Catalyzed Reactions	448
17.4	Monitoring of the Analytical Signal in Kinetic and Catalytic Methods	450
17.4.1	Closed and Open Systems	451
17.4.2	Automated Kinetic Analysis	451
	Questions and Problems	453
	Recommended Reading	454

<b>Part IV</b>	<b>Electroanalytical Methods</b>	<b>455</b>
<b>18</b>	<b>Electroanalysis</b>	<b>455</b>
	Chapter Outlook	455
18.1	Potentiometry	456
18.2	Voltammetry	474
18.3	Amperometry	492
18.4	Coulometric Methods of Analysis	493
	Questions and Problems	498
	Recommended Reading	499
<b>Part V</b>	<b>Separation Methods</b>	<b>501</b>
<b>19</b>	<b>Introduction to Separation Methods</b>	<b>501</b>
<b>20</b>	<b>Sample Preparation</b>	<b>505</b>
	Chapter Outlook	505
20.1	Introduction to Sample Pretreatment	506
20.2	Grinding, Homogenization, and Drying of the Sample	509
20.3	Dissolution and Digestion of Insoluble Species	509
20.4	Filtration and Membrane-Based Sample Pretreatment Techniques	509
20.5	Headspace Techniques	511
20.6	Extraction	511
20.6.1	Liquid Extraction Techniques	512
20.6.2	Trapping on a Solid (Adsorbent)	515
20.6.3	Extraction of Inorganic Analytes	519
20.7	Chromatographic Procedures as Preliminary Separations	520
20.8	Derivatization	520
20.9	Example	521
	Questions and Problems	521
	Recommended Reading	522
<b>21</b>	<b>Chromatography</b>	<b>523</b>
	Chapter Outlook	523
21.1	Fundamentals of Chromatographic Separations	524
21.1.1	Overview	524
21.1.2	The Development of a Chromatogram	525
21.1.3	Characteristic Values of a Chromatogram	526
21.1.4	Chromatographic Theory	528
21.1.5	The Resolution $R_S$ as a Measure of Peak Separation	533
21.1.6	Qualitative Analysis	534
21.1.7	Quantitative Analysis	535
	Questions and Problems	536
21.2	Gas Chromatography	536
21.2.1	Retention Data and Partition Coefficient	537
21.2.2	Separations in the Gas Phase	538
21.2.3	Components of a Gas Chromatograph	539
21.2.4	Stationary Phases for Gas Chromatography	548
21.2.5	Applications of Gas-Liquid Chromatography	553
21.2.6	Adsorption Chromatography	557
	Questions and Problems	558
21.3	Liquid Chromatography	558
21.3.1	High-Performance Liquid Chromatography (HPLC)	559

21.3.1.1	Chromatography on Bonded Phases	569
21.3.1.2	Adsorption Chromatography	574
21.3.1.3	Ion Chromatography as a Classical and High-Performance Method	575
21.3.2	Size-Exclusion Chromatography	579
21.3.3	Thin-Layer Chromatography	584
	Questions and Problems	588
21.4	Supercritical Fluid Chromatography	589
	Questions and Problems	594
21.5	Multidimensional Chromatographic Techniques	594
21.5.1	Multidimensional Thin-Layer Chromatography	596
21.5.2	Multidimensional Liquid Chromatography	596
21.5.3	On-Line Coupled Liquid Chromatography-Gas Chromatography	597
21.5.4	Multidimensional Gas Chromatography	601
21.5.5	Other Multidimensional Techniques	603
21.5.6	Applications	604
	Questions and Problems	605
	Recommended Reading	605
<b>22</b>	<b>Electrophoresis</b>	<b>606</b>
	Chapter Outlook	606
22.1	Fundamentals	607
22.2	Classical Electrophoresis	609
22.3	Gel Electrophoresis	611
22.4	Capillary Electrophoresis	616
	Questions and Problems	619
	Recommended Reading	619
<b>23</b>	<b>Field-Flow Fractionation</b>	<b>620</b>
	Chapter Outlook	620
23.1	Principle of Separation	621
23.2	The Subtechniques of FFF	624
23.3	Applications	626
	Questions and Problems	626
	Recommended Reading	626
<b>Part VI</b>	<b>Atomic and Molecular Spectroscopy</b>	<b>627</b>
<b>24</b>	<b>Elemental Analysis</b>	<b>627</b>
	Chapter Outlook	627
<b>24.1</b>	<b>Introduction</b>	<b>628</b>
<b>24.2</b>	<b>Atomic Emission Spectrometry</b>	<b>632</b>
24.2.1	Introduction	633
24.2.2	Principle	633
24.2.3	Radiation Sources	638
24.2.4	Spectrometers	643
24.2.5	Detection	649
24.2.6	Analytical Performance	650
24.2.7	Applications	651
	Questions and Problems	652
	Recommended Reading	652

<b>24.3</b>	<b>Atomic Absorption Spectrometry</b>	<b>654</b>
24.3.1	Introduction	655
24.3.2	Principle	655
24.3.3	Primary Radiation Sources	657
24.3.4	Source of Free Atoms	658
24.3.5	Optical Dispersive Systems	661
24.3.6	Detectors	661
24.3.7	Signal Measurements	662
24.3.8	Sensitivity	662
24.3.9	Chemical Interferences	662
24.3.10	Spectral Interferences	663
24.3.11	Recent Developments in AAS	665
	Questions and Problems	666
	Recommended Reading	667
<b>24.4</b>	<b>X-ray Fluorescence Spectrometry</b>	<b>668</b>
	Chapter Outlook	668
24.4.1	Principles	669
24.4.2	Instrumentation	677
24.4.3	Analytical Applications and Procedures	687
24.4.4	Summary	693
	Questions and Problems	694
	Recommended Reading	695
<b>24.5</b>	<b>Activation Analysis</b>	<b>696</b>
	Chapter Outlook	696
24.5.1	Principles	697
24.5.2	Methods for Radiation Detection and Measurement	703
24.5.3	Radiochemical Separations	712
24.5.4	Activation with Reactor Neutrons (NAA)	713
24.5.5	Applications of NAA	718
24.5.6	Nonreactor Activation Analysis	723
	Questions and Problems	724
	Recommended Reading	725
<b>24.6</b>	<b>Inorganic Mass Spectrometry</b>	<b>726</b>
24.6.1	Introduction	727
24.6.2	Ion Sources	727
24.6.3	Mass Spectrometers	733
24.6.4	Detectors	733
24.6.5	Analytical Performance	734
24.6.6	Applications	735
	Questions and Problems	736
	Recommended Reading	736
<b>25</b>	<b>Compound and Molecule Specific Analysis</b>	<b>737</b>
<b>25.1</b>	<b>UV-VIS Spectrometry, Emission and Luminiscence</b>	<b>737</b>
	Chapter Outlook	737
25.1.1	Principles	738
25.1.2	Experimental	740
25.1.3	Analytical Information in the UV-VIS Range	741
25.1.4	Applications of UV-VIS Absorption Spectroscopy	744

25.1.5	Molecular Fluorescence, Phosphorescence and Chemiluminescence	746
	Questions and Problems	749
	General Reading	750
<b>25.2</b>	<b>Infrared and Raman Spectroscopy</b>	<b>751</b>
	Chapter Outlook	751
25.2.1	Principles	752
25.2.2	Experimental	754
25.2.3	Analytical Information	767
25.2.4	Application to Structural Analysis	772
	Questions and Problems	778
	Recommended Reading	779
<b>25.3</b>	<b>Nuclear Magnetic Resonance (NMR) Spectroscopy</b>	<b>780</b>
	Chapter Outlook	780
25.3.1	Introduction	781
25.3.2	The Physical Basis of NMR Spectroscopy	783
25.3.3	Information from Chemical Shifts	799
25.3.4	Information from Spin-Spin Coupling Constants	807
25.3.5	Special Methods for Assigning $^1\text{H}$ and $^{13}\text{C}$ Signals	814
	Questions and Problems	821
	Recommended Reading	822
<b>25.4</b>	<b>Organic Mass Spectrometry</b>	<b>823</b>
	Chapter Outlook	823
25.4.1	Principle	824
25.4.2	Experimental	827
25.4.2.1	A Simple Mass Spectrometer	827
25.4.2.2	Soft Ionization Techniques	832
25.4.2.3	Mass Analysis	837
25.4.2.4	Sample Introduction Systems	841
25.4.2.5	Tandem Mass Spectrometry	844
25.4.3	Analytical Performance	845
25.4.3.1	General Aspects	845
25.4.3.2	Qualitative Analysis	848
25.4.3.3	Quantitative Analysis	855
25.4.4	Applications	856
25.4.4.1	Confirmation of Synthesis Products	857
25.4.4.2	Isotope Incorporation	858
25.4.4.3	Structure Elucidation with Soft Ionization Methods	858
25.4.4.4	Characterization of Biomacromolecules	862
	Questions and Problems	863
	Recommended Reading	864
<b>26</b>	<b>Coupling of Chromatographic and Spectroscopic Techniques</b>	<b>865</b>
	Chapter Outlook	865
26.1	Introduction	866
26.2	Hyphenated Gas Chromatographic Systems	867
26.2.1	Gas Chromatography-Mass Spectrometry (GC-MS)	867
26.2.2	Gas Chromatography-Fourier Transform Infrared Detection (GC-FTIR)	874
26.2.3	Gas Chromatography-Atomic Emission Detection (GC-AED)	879
26.3	Hyphenated Liquid Chromatographic Systems	883

26.3.1	Liquid Chromatography-Mass Spectrometry (LC-MS)	884
26.3.2.	Liquid Chromatography-Fourier Transform Infrared Detection (LC-FTIR)	890
26.3.3	Liquid Chromatography-Nuclear Magnetic Resonance Detection (LC-NMR)	892
26.4	Other Techniques	894
	Questions and Problems	895
	Recommended Reading	895
<b>Part VII</b>	<b>Surface and Structural Analysis</b>	<b>897</b>
<b>27</b>	<b>Surface and Interface Analysis</b>	<b>897</b>
	Chapter Outlook	897
27.1	Introduction	898
27.2	Photon Probe Techniques	899
27.2.1	Emission Spectroscopy	899
27.3	Electron Probe Techniques	904
27.3.1	Fundamentals	905
27.3.2	Electron Probe X-ray Microanalysis (EPXMA) and Scanning Electron Microscopy (SEM)	911
27.3.3	Analytical Electron Microscopy (AEM)	915
27.3.4	Auger Electron Spectroscopy (AES)	917
27.4	Ion Probe Techniques	922
27.4.1	Techniques Based on Scattering	923
27.4.2	Secondary Ion Mass Spectrometry (SIMS)	928
27.5	Field Probe Techniques	935
27.6	Scanning Probe Microscopy (SPM) Techniques	938
27.6.1	Scanning Tunneling Microscopy (STM)	938
27.6.2	Atomic Force Microscopy (AFM)	941
	Questions and Problems	950
	Recommended Reading	951
<b>28</b>	<b>Structural Analysis</b>	<b>952</b>
	Chapter Outlook	952
28.1	General Philosophy	953
28.2	X-ray Diffraction	955
28.2.1	Diffraction by Crystals	955
28.2.2	Powder Diffraction	962
28.2.3	Crystal Structure Analysis	965
	Questions and Problems	971
	Recommended Reading	972
<b>Part VIII</b>	<b>Automation, Miniaturization and Simplification of Analytical Processes</b>	<b>973</b>
<b>29</b>	<b>Introduction</b>	<b>973</b>
	Chapter Outlook	973
29.1	Basic Trends in Analytical Chemistry	974
29.2	Automation, Miniaturization, and Simplification	974
29.3	Laboratory Automation	975
29.4	Flow Injection Analysis	976
29.5	Miniaturized Analytical Systems	977
29.6	Fast-Response Analytical Systems	978
29.6.1	Chemical Sensors	979

- 29.6.2 Screening Systems 980
- 29.7 Process Analysis and On-site Systems 982
  - Recommended Reading 984
- 30 Laboratory Automation 986**
  - Chapter Outlook 986
  - 30.1 Definition and Concepts 987
    - 30.1.1 Mechanization, Instrumentation, and Automation 987
    - 30.1.2 Automatic and Automated Devices 988
  - 30.2 Objectives of Automation in Analytical Chemistry 988
  - 30.3 Automation of Analytical Tools and Processes 990
    - 30.3.1 Automation of Preliminary Operations 991
    - 30.3.2 Automation of Calibration 993
    - 30.3.3 Automation of Measuring and Transducing of the Analytical Signal 993
    - 30.3.4 Automation of Data Acquisition and Processing 994
    - 30.3.5 Analyzers 995
  - 30.4 Automated Information Management Systems 997
  - 30.5 Advantages and Shortcomings of Automation 998
  - 30.6 Automation and Quality 999
    - Questions and Problems 999
    - Recommended Reading 1000
- 31 Flow Injection Analysis 1001**
  - Chapter Outlook 1001
  - 31.1 Batch and Continuous-Flow Analysis 1002
  - 31.2 Principles 1003
  - 31.3 Basic FIA Instrumentation 1005
  - 31.4 Dispersion in FIA 1007
  - 31.5 FIA for Reproducible and Precise Sample Presentation (Limited Dispersion) 1009
  - 31.6 FIA Conversion Techniques (Medium Dispersion Applications) 1012
  - 31.7 FIA Systems with Enzymes 1014
  - 31.8 Flow Injection-Hydride Generation Schemes 1016
  - 31.9 On-Line Sample Conditioning and Preconcentration 1017
  - 31.10 Exploiting the Physical Dispersion Process: FIA Gradient Techniques 1018
  - 31.11 Concluding Remarks 1021
    - Questions and Problems 1021
    - Recommended Reading 1021
- 32 Miniaturized Analytical Systems 1023**
  - Chapter Outlook 1023
  - 32.1 Introduction 1024
    - 32.1.1 Concept 1024
    - 32.1.2 Theory of Miniaturization 1024
  - 32.2 Microfabrication 1027
    - 32.2.1 Silicon and Glass Micromachining 1027
    - 32.2.2 Polymer Replication Technology 1028
  - 32.3 Miniaturized Analytical Components 1030
    - 32.3.1 Sampling and Sample Pre-treatment 1030
    - 32.3.2 Separation 1031
    - 32.3.3 Detection 1033
  - 32.4 System Integration 1034

32.4.1	Serial Integration	1035
32.4.2	Parallel Integration	1037
32.4.3	Commercialization	1039
	Questions and Problems	1040
	Recommended Reading	1041
<b>33</b>	<b>Chemical Sensors</b>	1042
	Chapter Outlook	1042
33.1	Introduction	1043
33.2	Definition	1043
33.3	Classification of Chemical Sensors	1046
33.3.1	Recognition Element	1046
33.3.2	Transducers	1046
33.4	Description of Chemical Sensors	1048
33.4.1	Electrochemical Sensors	1048
33.4.1.1	Potentiometric Sensors	1048
33.4.1.2	Voltammetric Chemical Sensors	1055
33.4.1.3	Sensors Based on Conducting Properties	1058
33.4.2	Optical Sensors	1060
33.4.2.1	Light Guides	1061
33.4.2.2	The Evanescent Wave	1065
33.4.2.3	Design of Fiber-Optic Sensors	1067
33.4.2.4	Indicator-Mediated Sensors	1069
33.4.3	Calorimetric Sensors	1073
33.4.3.1	Catalytic Gas Sensors	1073
33.4.3.2	Thermal Conductivity Sensors	1074
33.4.4	Mass Sensors	1074
33.4.4.1	Piezoelectric Quartz Crystal Resonator	1074
33.4.4.2	Surface Acoustic Wave Sensors	1076
	Questions and Problems	1077
	Recommended Reading	1077
<b>34</b>	<b>Biosensors</b>	1078
	Chapter Outlook	1078
34.1	Introduction	1079
34.2	Producing the Biological Surface	1081
34.3	Achievement of Biotransduction	1089
	Questions and Problems	1108
	Recommended Reading	1109
<b>35</b>	<b>Screening Systems</b>	1110
	Chapter Outlook	1110
35.1	Evolution of Requested Analytical Information	1111
35.2	Screening Systems in Analytical Chemistry	1112
35.3	Analyte Screening Systems	1114
35.4	Sample Screening Systems	1114
35.4.1	Definition	1114
35.4.2	Objectives	1116
35.4.3	Features of the Response of Sample Screening Systems	1116
35.4.4	Types of Sample Screening Systems	1117
	Questions and Problems	1119
	Recommended Reading	1119

<b>36</b>	<b>Process Analytical Chemistry</b>	<b>1120</b>
	Chapter Outlook	1120
36.1	What is Process Analysis?	1121
36.2	Why do Process Analysis?	1121
36.3	How Does Process Analysis Differ from Laboratory Analysis?	1122
36.4	Process Analytical Techniques and Their Applications	1123
36.4.1	Separations (Chromatography)	1125
36.4.2	Spectroscopic Techniques	1126
36.4.3	Wet Chemical Analysis	1130
36.4.4	Other Techniques	1132
36.5	Chemometrics	1132
36.6	Sampling Strategies (Analyzer/Process Interface)	1132
36.6.1	Sampling for On-Line Analysis	1133
36.6.2	Interfaces for In-Line Techniques	1135
36.7	Process Control Strategies Based on Process Analyzers	1135
	Questions and Problems	1136
	Recommended Reading	1136
	<b>Appendix</b>	<b>1137</b>
1	Symbols	1137
2	Abbreviations and Acronyms	1139
3	Key to Literature	1146
4	List of SI Units	1149
5	Collection of Data	1151
6	Laser Principles and Characteristics	1158
7	Colthup Table	1160
8	Statistical Tables	1161
9	Matrix Algebra	1164
10	Answers to Questions and Problems	1167
