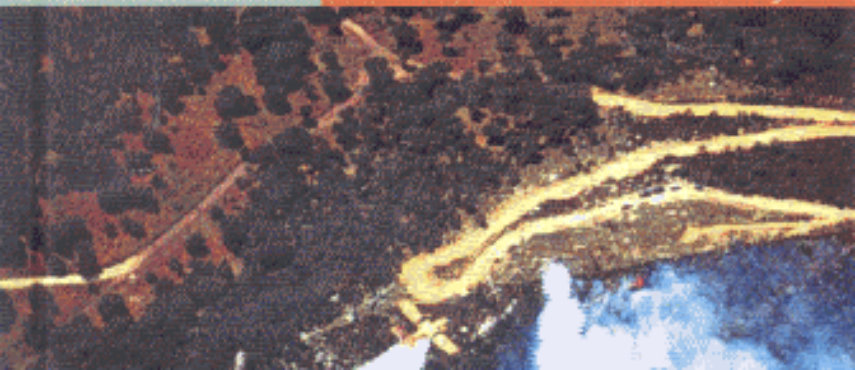
Emilio Chuvieco

# Wildland Fire Danger Estimation and Mapping

## The Role of Remote Sensing Data

Vol. 4

Series in Remote Sensing



# Contents

Preface ..... vii

1. Introduction to Fire Danger Rating and Remote Sensing — Will Remote Sensing Enhance Wildland Fire Danger Rating? ..... 1
   1.1 Wildland Fire — A Multifaceted Process ..... 2
   1.2 Wildland Fire — The 'Ideal Ingredient' for Risk Management and Sustainable, Long-Term Landscape Management ..... 3
   1.3 Temporal and Spatial Scales in Fire Danger Rating ..... 6
   1.4 Concepts Behind Fire Danger Rating ..... 7
   1.5 What Do Remote Sensing and GIS Offer to Fire Danger Rating Systems? — Expectations and Limits ..... 14

2. Current Methods to Assess Fire Danger Potential ..... 21
   2.1 Introduction ..... 22
   2.2 A European Perspective for the Evaluation of Fire Risk ..... 24
      2.2.1 Long-Term Fire Risk Indices ..... 25
         2.2.1.1 Fire Probability Index ..... 25
         2.2.1.2 Vulnerability Index (Likely Damage Index) ..... 26
      2.2.2 Short-Term or Dynamic Fire Risk Indices ..... 27
         2.2.2.1 Meteorological Indices ..... 28
         2.2.2.2 Vegetation Stress Indices ..... 30
         2.2.2.3 Fire Potential Index ..... 31
   2.3 Fire Danger Rating in the USA ..... 35
   2.4 Fire Danger Rating Systems in Australia ..... 41
      2.4.1 Historical Development ..... 41
      2.4.2 Strengths and Weaknesses of the McArthur Fire Danger Rating System ..... 44
         2.4.2.1 Fine Fuel Availability Sub-Model ..... 44
         2.4.2.2 Surface Fine Fuel Moisture ..... 47
         2.4.2.3 Rate of Spread ..... 48
         2.4.2.4 Difficulty of Suppression ..... 48

2.4.3 Conclusions ..... 49
2.5 The Canadian Forest Fire Danger Rating System (CFFDRS) ..... 50
2.5.1 Historical Note ..... 50
2.5.2 CFFDRS structure ..... 50
2.5.2.1 The CFFDRS's FWI Subsystem ..... 51
2.5.2.2 The CFFDRS's FBP Subsystem ..... 53
2.5.2.3 Performance of the CFFDRS ..... 53
2.5.3 Training courses and Computer Software ..... 54
2.5.4 Spatially Displaying CFFDRS Outputs ..... 55
2.5.5 Future Challenges ..... 56
2.5.6 Use of the CFFDRS Outside of Canada ..... 56
2.6 The New Zealand Fire Danger ..... 57
2.6.1 Guide to the Maps ..... 58
2.6.2 The Fire Danger Maps ..... 60

3. Estimation of Live Fuel Moisture Content ..... 63
3.1 Introduction ..... 64
3.2 Field Sampling, Standard Fuels and Meteorological Indices ..... 65
3.2.1 Field Sampling ..... 65
3.2.2 Use of Standard Fuels ..... 68
3.2.3 Meteorological Indices ..... 69
3.3 Remote Sensing Methods ..... 72
3.3.1 Optical Remote Sensing ..... 72
3.3.2 Thermal Infrared Remote Sensing ..... 81
3.3.3 Synergisms between Optical and Thermal Infrared Remote Sensing ..... 84
3.3.4 Microwave Remote Sensing ..... 85
3.4 Conclusion ..... 89

4. Methods Used to Estimate Moisture Content of Dead Wildland Fuels ..... 91
4.1 Introduction ..... 92
4.2 Moisture Content and Loads of Dead Fuels ..... 93
4.3 Dead Fuel Moisture Content Variation in Time and Space ..... 96
4.4 Estimation of Dead Fuel Moisture Content: Direct Estimation and Models ..... 99
4.5 The Role of Remote Sensing Data in Dead Fuel Moisture Assessment ..... 102
4.5.1 Optical Remote Sensing ..... 105
4.5.2 Thermal Infrared Remote Sensing ..... 108
4.5.3 Synergisms between Optical and Thermal Infrared Remote Sensing ..... 110
4.5.4 Radar Remote Sensing ..... 113

5. Fuel Loads and Fuel Type Mapping ..... 119
5.1 Relevant Properties of Fuels for Fire Danger Estimation and Fire Propagation Studies ..... 120
5.1.1 Crown Fuel Properties ..... 120
5.1.2 Surface Fuel Properties ..... 122
5.2 Fuel Types and Fuel Models ..... 124
5.3 Methods to Map Fuel Types ..... 128
5.3.1 Field Surveys ..... 128
5.3.2 Aerial Photointerpretation ..... 129
5.3.3 Satellite Remote Sensing Methods ..... 130
5.3.3.1 Multispectral and Hyperspectral Data ..... 130
5.3.3.2 Microwave Data ..... 132
5.3.3.3 Lidar Systems ..... 134
5.3.4. Ecological Modelling ..... 141

6. The Human Factor in Fire Danger Assessment ..... 143
6.1 Fire as a Complex Phenomenon ..... 144
6.2 Predisposing and Determining Factors ..... 146
6.3 Geography of Causes and Their Distribution ..... 147
6.4 Genesis of Human-Caused Fires ..... 150
6.4.1 Natural Causes ..... 151
6.4.2 Human Induced Fires ..... 153
6.4.2.1 Typology of Causes ..... 153
6.4.2.2 Accidents, Negligence and Arson ..... 156
6.4.2.3 Conflicts in the Rural Interface ..... 156
6.4.2.4 Conflicts in the Urban Interface ..... 158
6.4.2.5 Conflicts Not Directly Related to the Use of Land ..... 159
6.5 Main Variables Related to Fire Occurrence ..... 161
6.5.1 Fire Occurrence Variables ..... 163
6.5.2 Human Variables of Fire Risk/Danger ..... 166
6.5.2.1 Factors in Relation to Socio-Economic Transformations ..... 167
6.5.2.2 Factors Related to Traditional Economic Activities in Rural Areas ..... 169
6.5.2.3 Factors which Could Cause Fires Mainly by Accident or Negligence ..... 170
6.5.2.4 Factors which Could Hamper Fires ..... 171
6.5.2.5 Factors that Generate Conflicts, and at Same Time Could Lead to the Intentional Start of a Fire and/or Facilitate Its Propagation ..... 172
6.6 The Effect of Landscape Patterns on Fire Danger Assessment ..... 174
6.7 Methods to Study Fire Occurrence Patterns ..... 179

6.7.1 Multivariate Statistical Analysis Methods — Logistic Regression Modeling ..... 181
6.7.2 Point Pattern Analysis ..... 182
6.7.2.1 Nearest Neighbour Distances ..... 183
6.7.2.2 Ripley's K Statistic ..... 185
6.7.3 Identification of Spatial and Temporal Structures ..... 186
6.7.3.1 Global Level ..... 186
6.7.3.2 Local Level ..... 187
6.7.4 The Kernel Density Estimation Approach ..... 188
6.7.4.1 The Kernel Approach ..... 189
6.7.4.2 Defining Fire Occurrence Patterns by the Kernel Approach: An Example ..... 190
6.7.5 Overview Remarks ..... 192
6.8 Epilogue ..... 194

7. Integration of Physical and Human Factors in Fire Danger Assessment ..... 197
7.1 Fire Risk and Fire Danger: Operational Definitions ..... 198
7.2.Theoretical Framework for Wildland Fire Risk Assessment ..... 199
7.3 Temporal and Spatial Scales in Fire Danger Mapping ..... 205
7.4 Review of Fire Danger Mapping Studies ..... 206
7.4.1 Short-Term Indices in Fire Danger Rating ..... 207
7.4.2 Long-Term Indices in Fire Danger Rating ..... 207
7.5. Methods for Data Integration ..... 209
7.5.1 Qualitative Criteria ..... 209
7.5.2 Quantitative Indices Based on Expert Knowledge ..... 210
7.5.3 Regression Techniques ..... 212
7.5.4 Artificial Neural Networks ..... 213
7.5.5 Physical Models ..... 216
7.6 Conclusions ..... 217

References ..... 219

Index ..... 263
