

# Water Supply and Pollution Control

SEVENTH EDITION

Warren Viessman, Jr.  
Mark J. Hammer

# Contents

## Preface xvii

### Chapter 1 Introduction 1

- 1.1 Drinking Water Systems 1
- 1.2 Drainage and Sewerage Systems 3
- References 5

### Chapter 2 Water Management 6

- 2.1 From Projects to Issues 6
- 2.2 Institutions 7
- 2.3 Integrated Water Management 8
- 2.4 Roadblocks to Be Overcome 10
- 2.5 Environmental Regulation and Protection 10
- 2.6 Effects of Environmental Regulations 15
- 2.7 A Look to the Future 16
- 2.8 Conclusions 18
  - Problems 18
  - References 18

### Chapter 3 Water Resources Development 20

- Water Quantity** 20
- 3.1 Soil Moisture 21
- 3.2 Surface Waters and Groundwater 21
- 3.3 Runoff Distribution 22
- 3.4 Groundwater Distribution 22
- Water Quality** 24
- 3.5 Groundwater 26
- 3.6 Surface Water 26
- Hydrology and Water Management** 26
- 3.7 The Water Budget 27
- Surface Water Sources** 28
- 3.8 Basin Characteristics Affecting Runoff 28

3.9	Natural and Regulated Runoff	28
3.10	Storage	29
	<b>Reservoirs</b>	29
3.11	Determination of Required Reservoir Capacity	30
3.12	Methods of Computation	30
3.13	Frequency of Extreme Events	32
3.14	Probabilistic Mass Type of Analysis	33
3.15	Losses from Storage	34
	<b>Groundwater</b>	36
3.16	The Subsurface Distribution of Water	36
3.17	Aquifers	37
3.18	Fluctuations in Groundwater Level	37
3.19	Safe Yield of an Aquifer	39
3.20	Groundwater Flow	39
3.21	Hydraulics of Wells	44
3.22	Boundary Effects	55
3.23	Regional Groundwater Systems	56
3.24	Salt Water Intrusion	59
3.25	Groundwater Recharge	60
3.26	Concurrent Development of Groundwater and Surface Water Sources	61
3.27	Aquifer Storage and Recovery (ASR) Problems References	62 63 67
<b>Chapter 4</b>	<b>Water Use</b>	<b>69</b>
4.1	Water Sources	69
4.2	Water-Using Sectors	72
4.3	The Impact of Climate Change on Water Availability and Use	81
4.4	Water Use Trends	83
4.5	Factors Affecting Water Use	88
4.6	Population	89
4.7	Water Use Forecasting Problems References	100 111 113
<b>Chapter 5</b>	<b>Wastewater Generation</b>	<b>117</b>
5.1	Quantities of Wastewater	117
5.2	Waste Flows from Urban Areas	117
5.3	Industrial Waste Volumes	122
5.4	Agricultural Wastes	123
5.5	A Closing Note Problems References	123 123 124

<b>Chapter 6</b>	<b>Conveying and Distributing Water</b>	<b>126</b>
6.1	Aqueducts	126
6.2	Hydraulic Considerations	127
6.3	Design Considerations	138
	<b>Distribution Systems</b>	139
6.4	System Configurations	139
6.5	Distribution System Components	140
6.6	System Requirements	144
6.7	Distribution System Design and Analysis	144
6.8	Hydraulic Design	147
6.9	Network Modeling Software	170
6.10	Distribution Reservoirs and Service Storage	185
	<b>Pumping</b>	193
6.11	Pumping Head	193
6.12	Power	193
6.13	Cavitation	194
6.14	System Head	195
6.15	Pump Characteristics	195
6.16	Selection of Pumps	197
	Problems	199
	References	206
<b>Chapter 7</b>	<b>Wastewater and Storm Water Systems</b>	<b>208</b>
	<b>Hydraulics</b>	208
7.1	Uniform Flow	209
7.2	Gradually Varied Flow and Surface Profiles	213
7.3	Velocity	217
	<b>Design of Sanitary Sewers</b>	218
7.4	House and Building Connections	218
7.5	Collecting Sewers	219
7.6	Intercepting Sewers	219
7.7	Materials	220
7.8	System Layout	221
7.9	Hydraulic Design	223
7.10	Protection Against Floodwaters	231
7.11	Inverted Siphons	231
7.12	Wastewater Pumping Stations	232
	<b>Storm Water Management</b>	233
7.13	Alternative Strategies	233
	<b>Water Quality</b>	233
7.14	Best Management Practices	235
7.15	Treatment Processes	236
	<b>Water Quantity</b>	236
7.16	Hydrologic Considerations	237
7.17	Design Flow	237

7.18	Runoff Estimates	238
7.19	System Layout	260
7.20	Storm Water Inlets	260
7.21	Hydraulic Design	264
7.22	Storm Water Storage	273
	Problems	277
	References	283
<b>Chapter 8</b>	<b>Water Quality</b>	<b>286</b>
	<b>Microbiological Quality</b>	<b>286</b>
8.1	Waterborne Diseases	287
8.2	Coliform Bacteria as Indicator Organisms	291
	<b>Chemical Quality of Drinking Water</b>	<b>294</b>
8.3	Monitoring Drinking Water for Pathogens	295
8.4	Assessment of Chemical Quality	296
8.5	Chemical Contaminants	299
	<b>Quality Criteria for Surface Waters</b>	<b>308</b>
8.6	Water Quality Standards	308
8.7	Pollution Effects on Aquatic Life	309
8.8	Conventional Water Pollutants	310
8.9	Toxic Water Pollutants	313
	<b>Selected Pollution Parameters</b>	<b>316</b>
8.10	Total and Suspended Solids	316
8.11	Biochemical and Chemical Oxygen Demands	317
8.12	Coliform Bacteria	322
	Problems	325
	References	328
<b>Chapter 9</b>	<b>Systems for Treating Wastewater and Water</b>	<b>330</b>
	<b>Wastewater Treatment Systems</b>	<b>330</b>
9.1	Purpose of Wastewater Treatment	331
9.2	Selection of Treatment Processes	332
	<b>Water Treatment Systems</b>	<b>339</b>
9.3	Water Sources	339
9.4	Selection of Water Treatment Processes	343
9.5	Water-Processing Sludges	347
<b>Chapter 10</b>	<b>Physical Treatment Processes</b>	<b>351</b>
	<b>Flow-Measuring Devices</b>	<b>351</b>
10.1	Measurement of Water Flow	351
10.2	Measurement of Wastewater Flow	352
	<b>Screening Devices</b>	<b>354</b>
10.3	Water-Intake Screens	354
10.4	Screens in Wastewater Treatment	354
10.5	Shredding Devices	355
	<b>Hydraulic Characteristics of Reactors</b>	<b>355</b>

10.6	Residence Time Distribution	356	
10.7	Ideal Reactors	357	
10.8	Dispersed Plug Flow	361	
	<b>Mixing and Flocculation</b>	365	
10.9	Rapid Mixing	365	
10.10	Flocculation	366	
	<b>Sedimentation</b>	370	
10.11	Fundamentals of Sedimentation	370	
10.12	Types of Clarifiers	371	
10.13	Sedimentation in Water Treatment	374	
10.14	Sedimentation in Wastewater Treatment	377	
10.15	Grit Chambers in Wastewater Treatment	382	
	<b>Filtration</b>	384	
10.16	Gravity Granular-Media Filtration	384	
10.17	Description of a Typical Gravity Filter System	387	
10.18	Flow Control Through Gravity Filters	392	
10.19	Head Losses Through Filter Media	398	
10.20	Backwashing and Media Fluidization	401	
10.21	Pressure Filters	407	
10.22	Membrane Filtration	407	
	Problems	411	
	References	416	
<b>Chapter 11</b>	<b>Chemical Treatment Processes</b>	418	
	<b>Chemical Considerations</b>	418	
11.1	Inorganic Chemicals and Compounds	419	
11.2	Hydrogen Ion Concentration	423	
11.3	Alkalinity and pH Relationships	424	
11.4	Chemical Equilibria	425	
11.5	Ways of Shifting Chemical Equilibria	426	
11.6	Chemical Process Kinetics	427	
11.7	Colloidal Dispersions	432	
	<b>Water Coagulation</b>	435	
11.8	Coagulation Process	435	
11.9	Coagulants	437	
11.10	Polymers	441	
	<b>Water Softening</b>	442	
11.11	Chemistry of Lime-Soda Ash Process	442	
11.12	Process Variations in Lime-Soda Ash Softening	444	
11.13	Cation Exchange Softening	454	
	<b>Iron and Manganese Removal</b>	455	
11.14	Chemistry of Iron and Manganese	455	
11.15	Preventive Treatment	456	
11.16	Iron and Manganese Removal Processes	457	
	<b>Chemical Disinfection and By-Product Formation</b>	459	
11.17	Chemistry of Chlorination	459	

11.18	Chlorine Dioxide	463	
11.19	Ozone	464	
11.20	Disinfection By-Products	465	
11.21	Control of Disinfection By-Products	467	
11.22	Disinfection/Disinfection By-Products Rule	468	
	<b>Disinfection of Potable Water</b>	468	
11.23	Concept of the $C \cdot t$ Product	469	
11.24	Surface Water Disinfection	472	
11.25	Groundwater Disinfection	476	
	<b>Disinfection of Wastewater</b>	481	
11.26	Conventional Effluent Disinfection	481	
11.27	Tertiary Effluent Disinfection	484	
	<b>Taste and Odor</b>	486	
11.28	Control of Taste and Odor	486	
	<b>Fluoridation</b>	487	
11.29	Fluoridation	488	
	<b>Corrosion and Corrosion Control</b>	489	
11.30	Electrochemical Mechanism of Iron Corrosion	489	
11.31	Corrosion of Lead Pipe and Solder	490	
11.32	Corrosion of Sewer Pipes	491	
	<b>Reduction of Dissolved Salts</b>	492	
11.33	Distillation of Seawater	492	
11.34	Reverse Osmosis	494	
	<b>Volatile Organic Chemical Removal</b>	500	
11.35	Design of Air-Stripping Towers	500	
	<b>Synthetic Organic Chemical Removal</b>	503	
11.36	Activated Carbon Adsorption	504	
11.37	Granular Activated Carbon Systems	505	
	Problems	506	
	References	517	
<b>Chapter 12 Biological Treatment Processes</b>		520	
	<b>Biological Considerations</b>	520	
12.1	Bacteria and Fungi	521	
12.2	Algae	522	
12.3	Protozoans and Higher Animals	523	
12.4	Metabolism, Energy, and Synthesis	524	
12.5	Enzyme Kinetics	527	
12.6	Growth Kinetics of Pure Bacterial Cultures	529	
12.7	Biological Growth in Wastewater Treatment	533	
12.8	Factors Affecting Growth	535	
12.9	Population Dynamics	537	
	<b>Characteristics of Wastewater</b>	541	
12.10	Flow and Strength Variations	542	
12.11	Composition of Wastewater	545	
	<b>Trickling (Biological) Filters</b>	548	

12.12	Biological Process in Trickleing Filtration	549
12.13	Trickleing-Filter Operation and Filter Media Requirements	550
12.14	Trickleing-Filter Secondary Systems	552
12.15	Efficiency Equations for Stone-Media Trickleing Filters	555
12.16	Efficiency Equations for Plastic-Media Trickleing Filters	560
12.17	Combined Trickleing-Filter and Activated-Sludge Processes	569
12.18	Description of Rotating Biological Contactor Media and Process	570
	<b>Activated Sludge</b>	572
12.19	BOD Loadings and Aeration Periods	573
12.20	Operation of Activated-Sludge Processes	577
12.21	Activated-Sludge Treatment Systems	578
12.22	Kinetics Model of the Activated-Sludge Process	591
12.23	Laboratory Determination of Kinetic Constants	596
12.24	Application of the Kinetics Model in Process Design	601
12.25	Oxygen Transfer and Oxygenation Requirements	605
12.26	Determination of Oxygen Transfer Coefficients	610
	<b>Stabilization Ponds</b>	616
12.27	Description of a Facultative Pond	616
12.28	BOD Loadings of Facultative Ponds	618
12.29	Advantages and Disadvantages of Stabilization Ponds	619
12.30	Completely Mixed Aerated Lagoons	621
	<b>Odor Control</b>	625
12.31	Sources of Odors in Wastewater Treatment	625
12.32	Methods of Odor Control	626
	<b>Individual On-Site Wastewater Disposal</b>	628
12.33	Septic Tank-Absorption Field System	628
	<b>Marine Wastewater Disposal</b>	629
12.34	Ocean Outfalls	629
	Problems	631
	References	642

## Chapter 13 Processing of Sludges 644

	<b>Sources, Characteristics, and Quantities of Waste Sludges</b>	644
13.1	Weight and Volume Relationships	645
13.2	Characteristics and Quantities of Wastewater Sludges	648
13.3	Characteristics and Quantities of Water-Processing Sludges	655
	<b>Arrangement of Unit Processes in Sludge Disposal</b>	658
13.4	Selection of Processes for Wastewater Sludges	658
13.5	Selection of Processes for Water Treatment Sludges	664
	<b>Gravity Thickening</b>	668
13.6	Gravity Sludge Thickeners in Wastewater Treatment	668
13.7	Gravity Sludge Thickeners in Water Treatment	670
	<b>Gravity Belt Thickening</b>	671
13.8	Description of a Gravity Belt Thickener	672
13.9	Layout of a Gravity Belt Thickener System	672
13.10	Sizing of Gravity Belt Thickeners	674

	<b>Flotation Thickening</b>	677	
13.11	Description of Dissolved-Air Flotation	678	
13.12	Design of Dissolved-Air Flotation Units	679	
	<b>Biological Sludge Digestion</b>	681	
13.13	Anaerobic Sludge Digestion	681	
13.14	Single-Stage Floating-Cover Digesters	682	
13.15	High-Rate (Completely Mixed) Digesters	684	
13.16	Volatile Solids Loadings and Digester Capacity	686	
13.17	Aerobic Sludge Digestion	690	
13.18	Open-Air Drying Beds	694	
13.19	Composting	695	
	<b>Pressure Filtration</b>	697	
13.20	Description of Belt Filter Press Dewatering	697	
13.21	Application of Belt Filter Dewatering	700	
13.22	Sizing of Belt Filter Presses	702	
13.23	Description of Filter Press Dewatering	704	
13.24	Application of Pressure Filtration	706	
	<b>Centrifugation</b>	708	
13.25	Description of Centrifugation	708	
13.26	Applications of Centrifugation	710	
	<b>Cycling of Waste Solids in Treatment Plants</b>	715	
13.27	Suspended-Solids Removal Efficiency	715	
	<b>Final Disposal or Use</b>	717	
13.28	Land Application	718	
13.29	Codisposal in a Municipal Solid-Waste Landfill	723	
13.30	Surface Land Disposal	724	
	Problems	724	
	References	734	
<b>Chapter 14</b>	<b>Advanced Wastewater Treatment Processes and Water Reuse</b>	736	
	<b>Limitations of Secondary Treatment</b>	737	
14.1	Effluent Standards	737	
14.2	Flow Equalization	739	
	<b>Selection of Advanced Wastewater Treatment Processes</b>	741	
14.3	Selecting and Combining Unit Processes	742	
	<b>Suspended-Solids Removal</b>	743	
14.4	Granular-Media Filtration	743	
14.5	Direct Filtration with Chemical Coagulation	747	
	<b>Carbon Adsorption</b>	749	
14.6	Granular-Carbon Columns	749	
14.7	Activated-Sludge Treatment with Powdered Activated Carbon	750	
	<b>Phosphorus Removal</b>	751	
14.8	Biological Phosphorus Removal	752	
14.9	Biological-Chemical Phosphorus Removal	753	
14.10	Tracing Phosphorus Through Treatment Processes	757	
	<b>Nitrogen Removal</b>	760	

14.11	Tracing Nitrogen Through Treatment Processes	761
14.12	Biological Nitrification	763
14.13	Biological Denitrification	771
14.14	Single-Sludge Biological Nitrification-Denitrification	775
	<b>Water Reuse</b>	781
14.15	Water Quality and Reuse Applications	781
14.16	Agricultural Irrigation	788
14.17	Agricultural Irrigation Reuse, Tallahassee, Florida	795
14.18	Citrus Irrigation and Groundwater Recharge, Orange County and City of Orlando, Florida	802
14.19	Urban Reuse	806
14.20	Urban Reuse, St. Petersburg, Florida	807
14.21	Indirect Reuse to Augment Drinking Water Supply	811
14.22	Fred Hervey Water Reclamation Plant, El Paso, Texas	814
14.23	Direct Injection for Potable Supply, El Paso, Texas	817
14.24	Water Factory 21 and Groundwater Replenishment System, Orange County, California	822
	Problems	830
	References	841
